ACDC combines its knowledge of Class A and switching regulators to assist industry in its ever increasing requirement for DC voltage transformation. To the user, this means smaller volumes, less weight and less power dissipation. Through the use of advanced circuit techniques, ACDC can provide 50% better power efficiencies in one fifth the volume of conventional approaches.

Digital Readout Power Supplies

With the advent of digital display equipment utilizing tube type readouts, requirements exist for DC power sources employing voltages of approximately 170 volts at current levels up to 40MA. A regulation of 2% is normally acceptable for these needs. As an example, the requirement outlined above can be accommodated in a volume measuring 1⅝"x1⅝"x2¼". More detailed information regarding this type of power supply may be obtained by discussing your particular requirements with our factory.

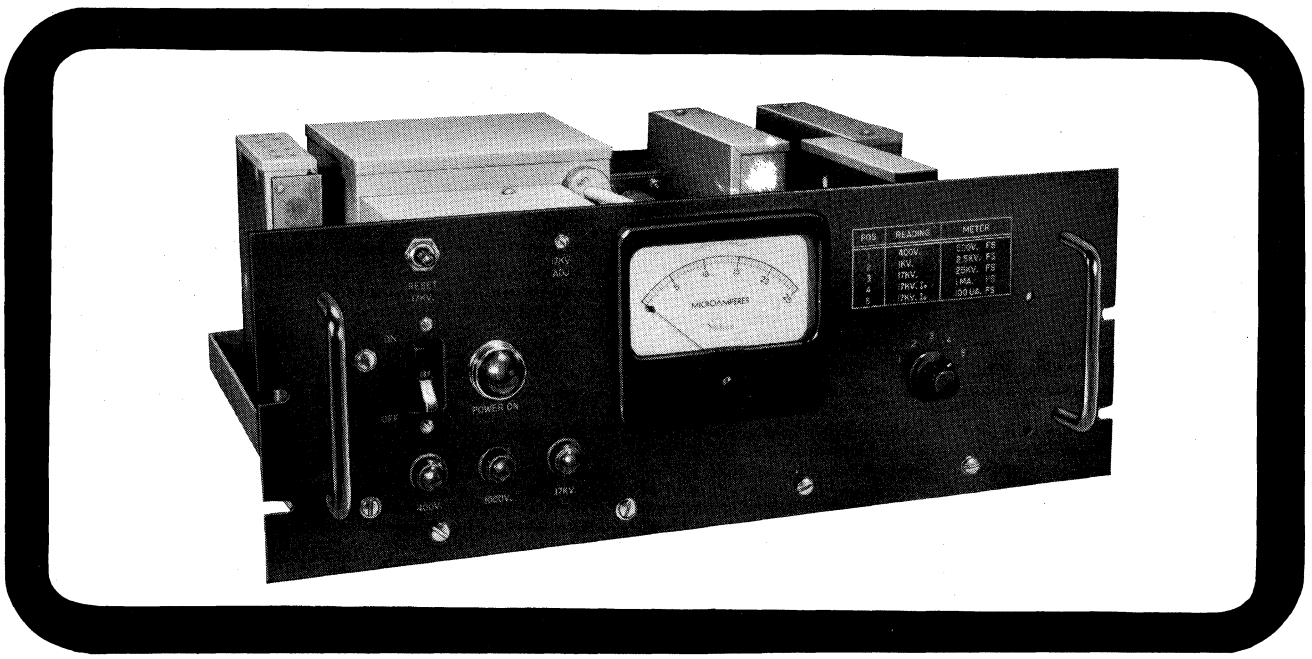
A-MP* SOLID STATE HIGH VOLTAGE POWER CONVERSION



The CAPITRON Division of AMP Incorporated has complete in-house facilities for designing and manufacturing power assemblies, including metal forming, printed circuit board fabrication, magnetics winding, encapsulating, and environmental testing. In addition, the use of AMPLIFILM* capacitor products enables CAPITRON engineers to design higher power into smaller packages for both military and commercial applications.

Solid state and conventional units are characterized by tight regulation, low ripple voltage, and dense, rugged construction. All are pre-engineered to specific customer requirements.

The rack and panel mounted multiple output supply shown is intended for use in normal office environments. All output voltages and current are read from a single panel meter. All voltages are short-circuit proof and a system malfunction will turn off the 17 KV output until it is reset.

A unique feature is the operation of the "power present" indicators: Low input line voltage turns off logic circuits, all supplies and indicators; high output voltage from any supply turns off logic, but not output power; overcurrent from any supply turns off its logic and its indicator.

SPECIFICATIONS:

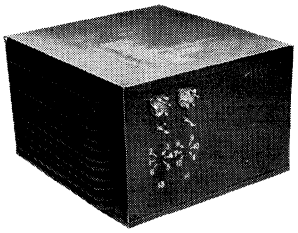
Adjustable outputs	17 KV, 1 KV
Fixed output	400 V
Current ranges	0.1 to 1 ma
Regulation	.01% to 1%
Ripple	.05%

Also available are special purpose power supplies for CRT, Energy Storage, Laser, Traveling Wave Tube and Programmable applications. The CAPITRON Division is equipped to satisfy special design requirements on short notice.

*Trademark of AMP Incorporated

MORE POWER TO

LOW VOLTAGE POWER SUPPLIES



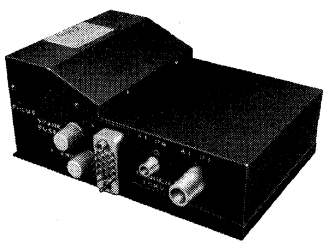
A typical multiple output type, this unit is not only short circuit proof between any output and ground, and between all outputs, but provides automatic over-voltage / undervoltage shutdown and output current limitation to 150% of rated value. All outputs are isolated with respect to the input, and the unit meets RFI requirements of MIL-I-6181.

Input: 20-29 VDC
Outputs:
300 VDC ±2% @ 70 ma.
250 VDC ±2% @ 150 ma.
55 VDC ±2% @ 220 ma.
22 VDC ±2% @ 800 ma.
6 VDC ±2% @ 10 ma.
−0.5 VDC nom. @ 10 ma.
(ext. adj. from +.0.2 to −1.4 VDC)
−20 VDC ±2% @ 25 ma.
−150 VDC ±2% @ 180 ma.

Regulation:
±1.0% line and load
Ripple: 0.017% pk-pk
Altitude:
10,000 ft. (operational)
Temperature:
−54° to +55° C
Shock Vibration:
MIL-E-5400
Size: 8″ x 8″ x 5″
Weight: 19 lb. max.

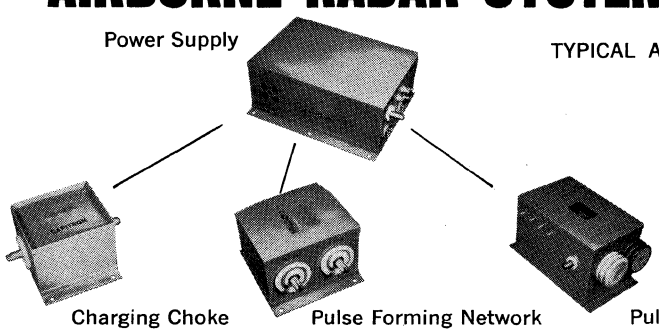
HEADS-UP CRT POWER SUPPLIES

Ripple: .05%
Regulation: ±0.1%
Volume: less than 50 cu. in.
Weight: 3¼ lbs.
Temperature:
−55°C to 110°C
MIL-E-5400



Input: 115 V, 400 cps MIL-STD-704
Outputs:
15 KVDC, 400 μa pk.
1.7 KV (adj. 1.4 to 2.0 KV), +30 μa to −30 μa
300 VDC, +15 μa to −15 μa

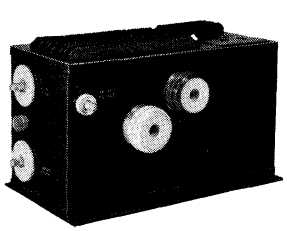
AIRBORNE RADAR SYSTEMS AND COMPONENTS



TYPICAL AIRBORNE RADAR POWER CONVERSION SYSTEM

A compact 4-module pulse system with extremely good heat sinking and klystron filament voltage regulation between 7.35 and 7.75 volts at 2 to 2½ amps. Maximum pulse ripple is only 1.0%. The largest unit is approximately ½ cu. ft. in size and weighs less than 12 lbs.

Pulse Modulator for Airborne Radar



This oil-filled pulse modulator is designed to drive the V-24 klystron family. Offering maximum power (300 KW peak) for minimum size, it has excellent square wave characteristics, providing pulses of long duration for the required repetition rate. A unique heat sinking technique effectively removes 400 watts of heat, permitting operation at 107°C ambient temperature. The package also supplies klystron input voltage variation tightly regulated to 9 +.5V/−0V with variations in temperature from −7 to 107°C, filament power from 107.5 to 119.5 volts, load current from 2 to 2.5 amps, and input frequency from 380 to 420 cps.

Performance Specifications
Input: 5 KVDC ±.25 KVDC @ 510 ma.
Output: 40 KV @ 7½ amps. 1800 pps for search followed by 2235 pps. for indefinite duration
Pulse: 2.1 μsec. read at 100% amplitude; 0.5 μsec. rise time; 0.9 μsec. fall time; 1.5% max. ripple; 10% max. backswing
Ambient Temperature: −7° C to +107° C (operational); −60° C to 121° C (storage)
Size: 10¼″ x 4¾″ x 5⅞″
Weight: 26 lbs. max.

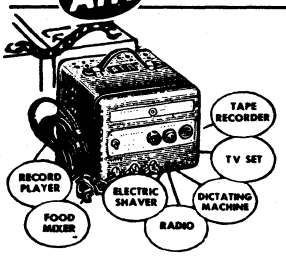
ATR Inverters, Vibrators, "A" Eliminators, etc.



ATR DC TO AC UNIVERSAL INVERTERS

New, universal inverters for operating 110-v., 60 cycle AC equipment from DC voltages in autos, buses, trucks, boats, trains, planes and DC districts. Designed especially for standard 110-volt AC tape recorders, TV sets, radios, PA systems, electric razors, test equipment, etc. Units are carefully engineered and ruggedly constructed to provide long life operation. All feature complete RF interference suppression and exceptional frequency stability. Have operating efficiency in excess of 75%. Four-point voltage regulator corrects output voltage for minimum and maximum loads, and also helps compensate for input voltages lower or higher than normal. Inverters are recommended for use with loads having power factors in excess of 70%. Built-in toggle switch selects most efficient operation for use with TV sets or tape recorders. Inverters are not recommended for use with large motor driven appliances such as refrigerators, washing machines, etc. All have ON-Off switches. Housed in attractive brown hammerloid metal cabinet with convenient leather carrying strap. Sizes: Standard Model RSF, 8½x9⅛x5¼"; Heavy-Duty Model RHG 6⅛x11¼x8½", Extra-Heavy-Duty Model HSJ, 6½x12⅛x8½". With battery clips for instant connection to power source. Models with "P" suffix equipped with adapter cord for use in auto cigarette lighter receptacles. *Recommended for24 volt battery operation. **Before ordering, check wattage of equipment with which inverter will be used.**

PORTABLE PLUG-IN TYPE INVERTERS

SPECIALLY DESIGNED FOR OPERATING STANDARD A. C. DICTATING MACHINES, RECORD PLAYERS, INCANDESCENT LAMPS, ELECTRIC RAZORS, ELECTRONIC TEST EQUIPMENT, AND OTHER SMALL ELECTRICAL AND ELECTRONIC DEVICES FROM D. C. VOLTAGES IN AUTOMOBILES, BUSES, TRUCKS, BOATS, PLANES, TRAINS, AND D. C. DISTRICTS.

Lightweight inverters for operating 110 v. AC equipment from DC voltage sources. Feature excellent frequency stability and high efficiency. 6 and 12-volt units plug into cigarette lighter receptacle of any vehicle; others are equipped with standard 2-prong plugs. All are designed especially for use with dictating machines; record players, electric razors, test equipment, etc. Not recommended for tape recorders and large motor driven appliances such as refrigerators, washing machines, etc. Brown Hammerloid case with leather carrying strap. Sizes: DME, 5¼x4¾x2¾"; RME and RMF, 8⅜x8x3¾". *Recommended for 24-volt operation. **Check wattage rating of equipment before ordering. RMF/RME Model Inverters equipped with voltage regulator.**

Stock No.	Mfr's Type	Input D.C. Volts	A.C. Output 60 Cycles	Output Watt. Int.	Output Watt. Cont.	Shipping Weight	List Price	Net Price
	6-DME (1)	6	110 Volts	40	30	5 lbs.	$33.50	$22.33

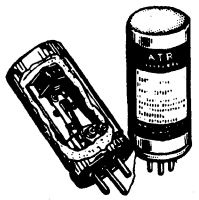
	220-RME	220	110	150	100	12	74.95	49.95

(1) These Inverters primarily recommended for Edison VP dictating machines. May also be used with Model 200 Sound-scriber (with engine of car not running).
(2) Primarily recommended for Dictaphone's Time Master, DeJur Stenorette, and Gray Audograph dictating machines or other similar types. Also recommended for use with Norelco tape recorder Model EL-3516 and Geloso Model G 255-S tape Recorder.
(3) **This Inverter specially designed and recommended also for use with RCA 8½" portable TV set or G.E. 9" portable TV set in an automobile.**



ATR VIBRATORS

FOR ALL AUTO RADIO SETS SINCE 1954 USE ONE OF THE ATR VIBRATORS LISTED BELOW ... ATR VIBRATORS FEATURE

Ceramic Stack Spacers with Two-Bolt Stack construction.

Instant Starting—as a result of highly efficient magnetic circuit with formed base for more uniform operation on both high and low voltages.

Large Oversize Tungsten Contacts having Full Wiping Action—for greater reliability and longer life.

Perforated Reed of Highest Quality Swedish Spring Steel.

Highest Precision Construction and Workmanship—Practically all parts used are held to within a tolerance of 0.0005 of inch.

Value Plus—as readily evidenced by the Larger Contacts, Ceramic Spacers and Precision Construction and Workmanship. Available in TEN-PAK.

ATR No. 1400 (Bulk), 4-Prong, 6-Volt For All 6-Volt Sets Since 1954

ATR No. 1843 (Bulk), 3-Prong, 12-Volt For All 12-Volt General Motors Since 1954

ATR No. 1843 also used in following automobiles: 1956 Ford (Philco), Lincoln (Bendix), and Mercury (Bendix); 1956 Chrysler (Philco); 1955-57 Packard; 1956-57 Plymouth (Philco); 1956 Studebaker (Philco) and 1957 Mercury (Philco)

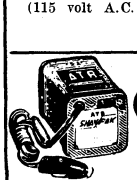
ATR No. 1840 (Bulk), 4-Prong, 12-Volt For 12 Volt Cars other Than GM Since 1954

ATR ELECTRONIC TUBE PROTECTOR

A "MUST" FOR EVERY TV HOME! WILL DOUBLE OR TRIPLE THE LIFE OF ALL TYPES OF ELECTRONIC TUBES, INCLUDING TV PICTURE TUBE. Automatic in operation, for use with any electronic equipment having input wattage of 100 to 300 watts. Fuse protected; rugged construction; and enclosed in interior decorator's golden brown hammerloid-finish metal case. Wall Model 250 is 1 - 15/16" OD x 3⅛" in length and plugs directly into wall socket. Shipping weight is 1 lb.

—Wall Model 250

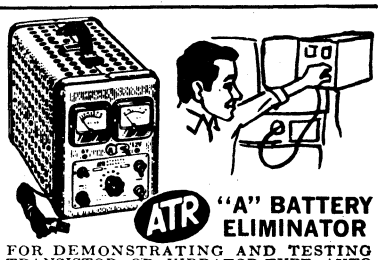
(115 volt A.C.) . . . . . **Net $2.95**



ATR SHAV-PAKS

Every man should have this lightweight ATR Inverter in his car for that "Keep Clean-Shaved Look." Will operate standard A.C. Electric Shavers from your CAR or Boat*. Complete with 3 ft. cord set. Plugs into cigarette lighter receptacle. Fuse protected, rugged construction, and attractively housed in grey hammerloid-finish steel case. Size 4"x2¾"x 2¾". Shipping weight 2½ lbs.

Model 6-SPB (6 volt) . . . . . **Net $14.75**
Model 12-SPB (12 volt) . . . . . **Net 12.95**



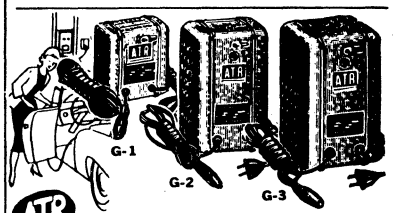
ATR "A" BATTERY ELIMINATOR

FOR DEMONSTRATING AND TESTING TRANSISTOR OR VIBRATOR-TYPE AUTO RADIOS. Designed for testing D.C. Electrical Apparatus on regular 110 volt A. C. lines . . . equipped with full-wave dry disc-type rectifier, assuring noiseless, interference-free operation. Fully Automatic and Fool-Proof; has voltmeter, ammeter, and 8-position voltage control. Fuse protected, and housed in heavy gauge brown hammerloid-finish metal case. 6 ft. cord set included. Size: Model 610C-ELIF, 6½"x9¼"x8½"—shipping weight 22 lbs.; Model 620C-ELIT, 6½"x12⅛"x8½"—shipping weight 33 lbs.

IDEAL AS A POWER SUPPLY FOR MODEL RAILROAD TRAINS, RADIO SETS, ELECTRO PLATING OUTFITS, AND OTHER 6 OR 12 VOLT, D.C. EQUIPMENT. MAY ALSO BE USED AS A BATTERY CHARGER.

—Model 610C-ELIF (6 volt at 10 amps. or 12 volt at 6 amps.) . . . . . **Net $59.82**

—Model 620C-ELIT (6 volt at 20 amps. or 12 volt at 10 amps.) . . . . . **Net $79.75**



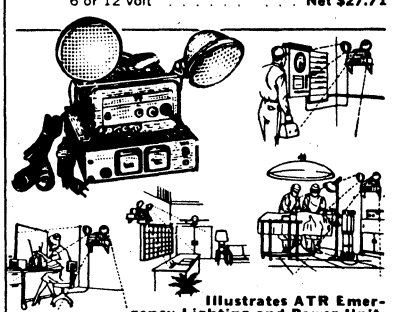
ATR AUTO PLUG-IN, HOME-TYPE PORTABLE BATTERY CHARGERS

No installation . . . just plug into cigarette lighter receptacle! Makes motor starting easy! Keeps your car battery fully charged in your own garage. Operates directly from standard 110 volt A.C. Household Current. Available in three portable sizes for both 6 or 12 volt cars. Light in weight, rugged in construction, economical, and built to last. Each battery charger is housed in grey hammerloid-finish metal case. Complete with cord sets. Size of G1 is 5¾"x4⅞"x2¾"—shipping weight is 6 lbs.; G2 is 8¼"x5½"x3⅞"—shipping weight is 8 lbs.; and G3 is 8½"x5½"x5¼"—shipping weight is 10 lbs.

(G-1) 6 or 12 volt **—Model 612CA4** (4 amp.) . . . . . **Net $19.46**

(G-2) 6 or 12 volt **—Model 612CA6** (6 amp.) . . . . . **Net $22.46**

(G-3) 6 or 12 volt **—Model 612CA10** (10 amp.) . . . . . **Net $27.71**



Illustrates ATR Emergency Lighting and Power Unit, Model ETS complete with lamps.

ATR EMERGENCY LIGHTING and POWER UNIT

Completely Automatic Standby-Power Units Specially Designed to Permit the Instantaneous Continued Operation of Critical Lighting Equipment, PA Systems, Amplifiers, Intercom Systems, Burglar Alarms, Fire Alarms, Synchronous Electric Clocks, Electric Time and Recording Clocks, Incubators, Gas Valves, Telephone and Test Equipment, and Similar Critical Devices in the Event of 115 Volt AC Commercial Power Line Failure. For Use: In Hospitals, Banks, Hotels, Theatres, Factories, Office Buildings, Schools, Homes, and Many Other Areas of Operation.

Type	*Storage Battery Input	A.C. Output 60 Cycles	Output Wattage Int.	Output Wattage Cont.	Net With Lamps
661-ETM	6-volts	110-volts	80	60	$231.75

1234-ETJ	12	110	250	200	287.25

For Units Without Lamps Deduct $37.50 Net.

Need custom power supplies?

Acme Electric can design and build to your specs.

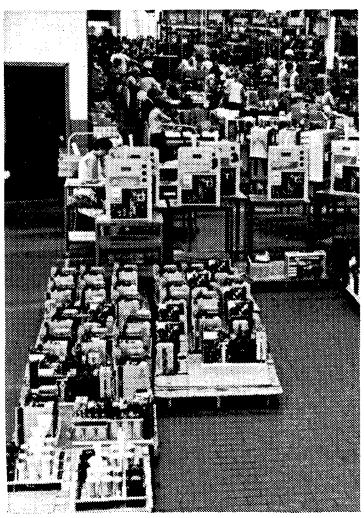
Acme Electric's engineering and experience have developed thousands of custom designed regulated DC power supplies for a variety of industrial markets. You'll find our power supplies in computers and data processing, communications, nuclear research, machine tools, photography, medical apparatus, to name but a few.

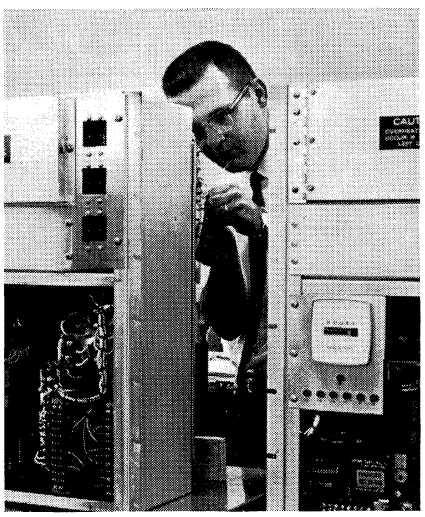
In these and other fields we have solved such knotty power supply problems as: dynamic load regulation of 3000 DC amps at .002%; economically achieved high efficiency at extremely low voltage and high current for IC's; tough packaging problems and programming requirements; many others. We're also specialists at designing and manufacturing CVT regulated power supplies.

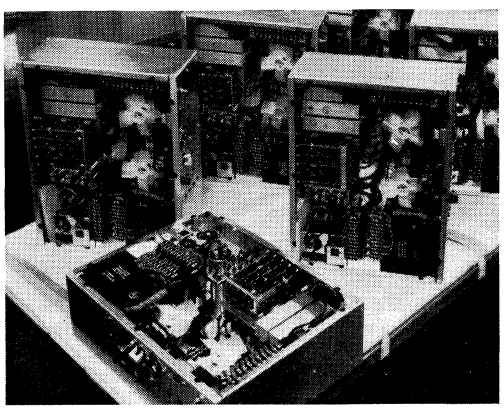
So, if you're looking for high quality, soundly engineered custom units, yet want them made with production line efficiency, why not draw on the engineering know-how of Acme Electric Corporation? Our business is to satisfy the functions of power control, conversion and/or regulation, whatever the industry or application.

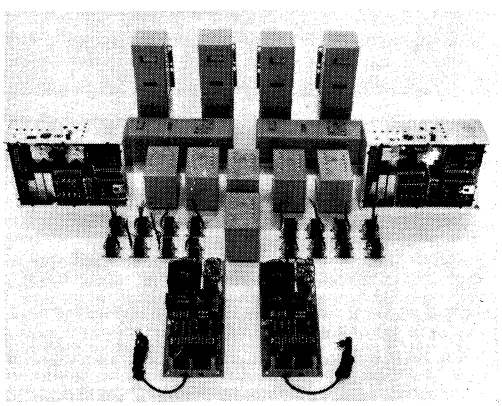
Acme Electric

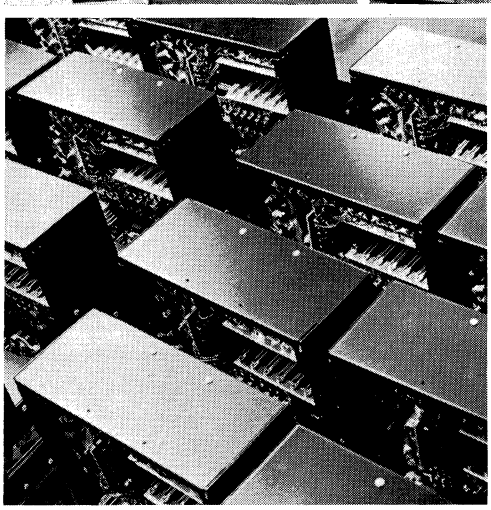
Acme Electric Corporation. Cuba, New York

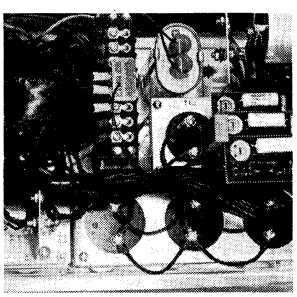


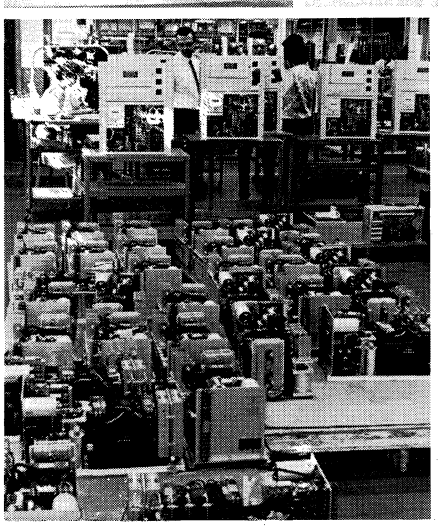


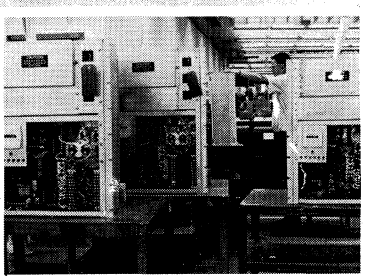


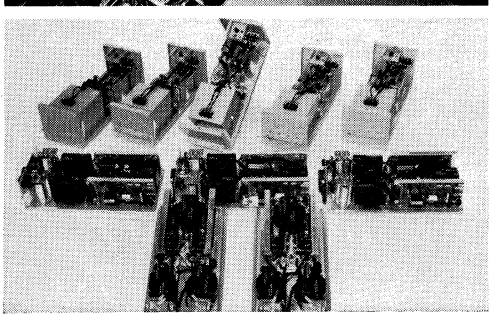


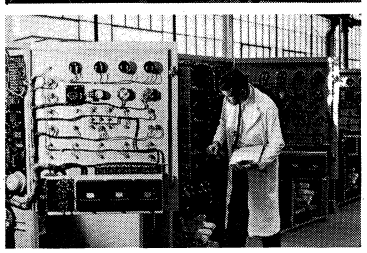












ABBOTT POWER MODULES

The Next 18 Pages List 2411 Regulated Modules with Specifications and Prices

The most complete line of small size MIL-SPEC type power modules available in the industry is fully described in the following 18 pages. The Abbott line of power modules include output voltages from 5.0 volts to 10,000 volts DC, output current from 2 milli-amperes to 20 amperes and output power from 2 watts to 240 watts. Sizes, weights, regulations and environments are shown for various input and output powers. A new line of 60 Hz to DC all silicon models for industrial as well as military applications is included. Optional features such as terminal pins on the mounting base, special connectors, re-mote output adjustment, etc., are described on the last page. Look through the next 18 pages and you may find the power supply you want is a standard Abbott model.

GENERAL PRICE REDUCTION

Over Half of the Models Reduced From 5% to 16%

It has always been our policy to promptly extend to our customers the benefits of our lower costs as well as our improved efficiencies. Recently, the costs of semi-conductors and other components used in our power modules have been reduced. We are pleased to announce a general price reduction this year. More than half of the prices listed in the next 18 pages reflect a 5 to 16% reduction over last year's prices, for the same models, shown in the 1968-69 edition of EEM.

specifications

INPUT VOLTAGE RANGE
105-125 VRMS

INPUT FREQUENCY RANGE
50-420 Hertz, 1 phase

OUTPUT VOLTAGE AND CURRENT
See specific models listed in table below

LINE REGULATION
±0.05% or 10 mv (whichever is greater) for input change of 105-125 VRMS

LOAD REGULATION
±0.05% or 10 mv (whichever is greater) for change from no load to full load

RIPPLE
0.02% or 5 mv RMS (whichever is greater)

OUTPUT VOLTAGE ADJUSTMENT
Voltage is continuously adjustable between the limits shown in table by means of an externally accessible screwdriver adjustment potentiometer

ADJUSTMENT RESOLUTION
30 mv max. for outputs 5 thru 16 VDC; 50 mv max. for outputs 18 thru 50 VDC 70 mv mav for outputs 55 thru 95 VDC

ISOLATION VOLTAGE
300 VDC between output terminals and chassis ground

INSULATION RESISTANCE
50 megohms between output terminals and chassis ground when measured at 50 VDC

POLARITY
Inputs and outputs are isolated; either positive or negative side may be grounded

TEMPERATURE
Operating: −4°F (−20°C) to +160°F (+71°C) without derating, forced air, or heatsinking. Storage: −67 to +185°F

TEMPERATURE COEFFICIENT
0.03% per degree Centigrade

ALTITUDE
10,000 feet above sea level

SHORT CIRCUIT PROTECTION
Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION
180 VAC for 0.1 sec in accordance with MIL-STD-704A, figure 2, limit 1

LOAD TRANSIENT RECOVERY TIME
Output voltage returns to regulation limits within 75 microseconds after a 50% step change in load current

REMOTE ERROR SENSING
Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

SERIES OPERATION
Two or more power supplies can be operated in series so that the output voltages of the supplies are additive. Total output voltage is not to exceed 200 VDC

OUTPUT IMPEDANCE
DC to 1K Hz — 0.003 R_L or 0.03 ohms max., whichever is greater.
1K Hz to 10K Hz — 0.008 R_L or 0.08 ohms max., whichever is greater.
10K Hz to 100K Hz — 0.015 R_L or 0.30 ohms max., whichever is greater.
R_L = rated load resistance.

RELIABILITY
The mean time between failure (MTBF) per MIL-HDBK-217 under worst case operating conditions of full output current, max. input voltage, and +160°F ambient is 22,026 hrs. for 20 amp models, increasing to 47,281 hrs. for 0.15 amp models. At +104°F ambient, the MTBF increases to 63,898 hrs. and 141,243 hrs., respectively (Consult factory for complete reports)

MOUNTING
Threaded inserts are provided on two surfaces for versatile mounting of cases A through F (see case drawings).

MODEL DESIGNATION (For Model "R" series only)

For your assistance and understanding, we have included a complete explanation of our model designation for this series of units, using Model **R28S2.5-14** as an example.

R Designates the general series of the power supply.

28 Designates the nominal output voltage of the unit.

S Designates the output connector as follows:

S — 8 pin solder hook terminal. Standard on all units with case size A through F.

T — Terminal strip. Standard on all units with case size G through J.

P — Octal plug. Optional on case sizes A through F at $10 for one piece and $5 each for two to four pieces.

C — Cannon connector MS3112E-16-8P with mate. Optional on case sizes A through F at $30 for one piece and $20 for two to four pieces.

2.5 Designates the continuous full load output current.

14 Designates the inclusion of the desired optional features. For a list of the features available, and their numbers, please see the "Optional Features" section for Model R series, below. For example, R28S2.5-14 designates a 60 Hz to 28 VDC at 2.5 amps unit using an 8 pin solder hook terminal, having the optional features "overvoltage protection" and "remote voltage adjustment".

OPTIONAL FEATURES (For Model "R" series only)

To include the optional features desired in the power supply, simply add a dash and the feature number to the end of the model number. (See "Model Designation" section above.)

Feature	Description	Feature Number	Price 1 pc.	Price 2-4 pcs.
Overvoltage Protection	If the output voltage rises 10% or 2V WIG above the nominal setting, the overvoltage protection circuitry reduces the voltage to approximately 1 volt within 15 microseconds. Under worst case conditions the output voltage could rise an additional 10% max during this 15 microsecond period.	1	$30	$20
Connector Location	The output connector can be supplied on the surface labeled "Optional Location" on the dimensional drawing for case size B through F.	2	10	5
230 VAC Operation	Units can be modified to operate with an input voltage of 210 to 250 VRMS, 50 to 420 Hz.	3	20	10
Remote Voltage Adjustment	Provision is made for locating an adjustment potentiometer in a remote location from the power supply.	4	20	10
Output Voltage Resolution	Provisions can be made to increase the output voltage adjustment resolution as follows:	5	20	10

Nominal Output Voltage	Resolution
5V through 16V	1.5 mv max.
18V through 50V	3.0 mv max.
55V through 95V	5.0 mv max.

NOTE: If parallel operation of these units is desired, please consult the factory.

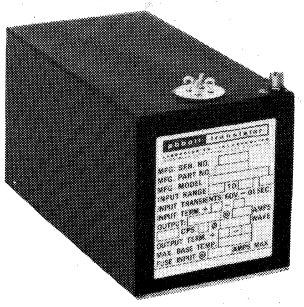
abbott transistor
LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS

abbott 60 ⏦ to DC (Reg.) Hermetically Sealed



POWER MODULES

features

- Close regulation
- 5 to 10,000 volts
- Hermetically sealed
- Compact
- Low ripple
- For aerospace application

specifications

Input Voltage Range
105-125 VAC

Input Frequency Range
55-65 Hertz, 1 phase

Line Regulation
±0.2% for input 105-125 VAC on Model V's, HA's, HAL's and HC's

±0.5% for input 105-125 VAC on Model HAK's, HCK's and HN's

Voltage Regulation
±0.5% — for input 105-125 VAC and from ½ load to full load on Model V's

±1.5% — for input 105-125 VAC and from ½ load to full load on Model HA's

±2.5% — for input 105-125 VAC and from ½ load to full load on Model HAK's, HAL's, HC's and HN's

Ripple
0.2% RMS — RMS Model V's
0.5% RMS — Model HA's
1% RMS—Model HAK's, HAL's & HC's
2% RMS — Model HN's

Voltage Adjustment Range
12% by screwdriver adjustment

Environment
+160°F max. at mounting base, using adequate heat sink
−4°F (−20°C) min. at mounting surface
Altitude: to vacuum (true hermetic seal)
Vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage and Current
See specific models listed in the following pages
(Outputs and inputs are isolated)

Output Voltage Range	Output Current (Amps)	Size (See Dwg.)	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

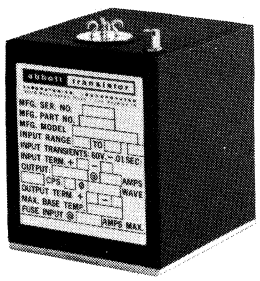
† To have the header located on the mounting base, change the model number character preceding the first dash of Model Number to "B". (Example: V05B-5A indicates a header out the base.) See page 1851. No increase in price for this service.

Send us your special requirements for a comprehensive proposal with price and delivery

abbott transistor LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS

abbott 400 ~ to DC (Regulated)



POWER MODULES

features

- Close regulation
- 5 to 10,000 volts
- Hermetically sealed
- Compact, low cost
- Low ripple
- For aerospace application

specifications

Input Voltage Range
105-125 VAC

Input Frequency Range
380-420 Hertz, 1 phase

Line Regulation
±0.2% for input 105-125 VAC on Model T's, GA's, GAL's, and GC's
±0.5% for input 105 - 125 VAC on Model GAK's, GCK's and GN's

Voltage Regulation
±0.5% — for input 105-125 VAC and from ½ load to full load on Model T's
±1.5% — for input 105-125 VAC and from ½ load to full load on Model GA's
±2.5% — for input 105-125 VAC and from ½ load to full load on Model GAK's, GAL's, GC's and GN's

Ripple
0.2% RMS — Model T's
0.5% RMS — Model GA's
1% RMS — Model GAK's, GAL's & GC's
2% RMS — Model GN's

Voltage Adjustment Range
12% by screwdriver adjustment

Environment
+160°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal)
Vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage & Current
See specific models listed in the following pages
(Outputs and inputs are isolated)

Output Voltage Range	Output Current (Amps)	Size (See Dwg.)	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

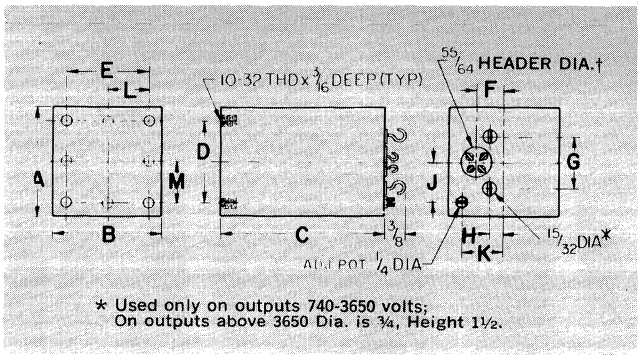
DIMENSIONAL TOLERANCES: FRACTIONS ±1/32; DECIMALS .XX ±0.015.



* Used only on outputs 740-3650 volts;
On outputs above 3650 Dia. is ¾, Height 1½.

400 HERTZ TO DC (Regulated)

INPUT VOLTAGE: 115 VAC, 400 Hz, 1 PHASE

Output Voltage Range	Output Current (Amps)	Size (See Dwg.)	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

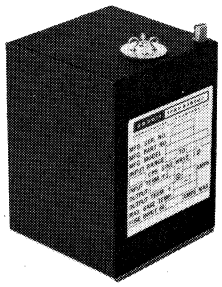
† To have the header located on the mounting base, change the model number character preceding the first dash of Model Number to "B". (Example: T05**B**-5A indicates a header out the base.) See page 1851. No increase in price for this service.

abbott transistor
LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS

abbott 400~ to DC (Reg.) Hi-Temp.



POWER MODULES

features

- Hi-temp. +212°F.
- 5 to 3500 volts
- Hermetically sealed
- Compact, low cost
- Low ripple
- For aerospace application

specifications

Input Voltage Range
105-125 VAC

Input Frequency Range
380-420 Hertz, 1 phase

Line Regulation
±0.2% for input 105-125 VAC on Model U's and GB's
±0.5% for input 105-125 VAC on Model GBK's

Voltage Regulation
±0.5%—for input 105-125 VAC and from ½ load to full load on Model U's
±1.5%—for input 105-125 VAC and from ½ load to full load on Model GB's
±2.5%—for input 105-125 VAC and from ½ load to full load on Model GBK's

Ripple
0.2% RMS—Model U's
0.5% RMS—Model GB's
1% RMS—Model GBK's

Voltage Adjustment Range
12% by screwdriver adjustment

Environment
+212°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal).
Vibration, shock, sand, dust, humidity, salt-spray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage & Current
See specific models listed
(Outputs and inputs are isolated)

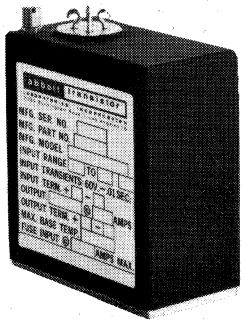
† To have the header located on the mounting base, change the model number character preceding the first dash of Model Number to "B". (Example: U5**B**-5A indicates a header out the base.) See page 1851. No increase in price for this service.

abbott transistor
LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS

abbott 28 VDC to DC (Regulated)



POWER MODULES

features

- Close regulation
- 5 to 10,000 volts
- Hermetically sealed
- Short circuit protection
- Compact, low cost
- Input spike protection

specifications

Input Voltage Range
24 to 30 volts DC

Line Regulation
±0.2% for input 24 to 30 VDC on Model A's, AL's and C's
±0.5% for input 24 to 30 VDC on Model AK's, AN's and CK's

Voltage Regulation
±1.5% for input 24 to 30 VDC and from ½ load to full load on Model A's
±2.5% for input 24 to 30 VDC and from ½ load to full load on Model AK's, AL's, AN's and C's

Ripple
0.5% RMS — Model A's
1.0% RMS—Model AK's, AL's and C's
2% RMS — Model AN's

Voltage Adjustment Range
12% by screwdriver adjustment

Environment
+160°F max. at mounting base, using adequate heat sink
−65°F min. at mounting surface
Altitude: to vacuum (true hermetic seal)
Vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage and Current
See specific models listed in the following pages
(Outputs and inputs are isolated)

Output Voltage Range	Output Current (Amps)	Size (See Dwg.)	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

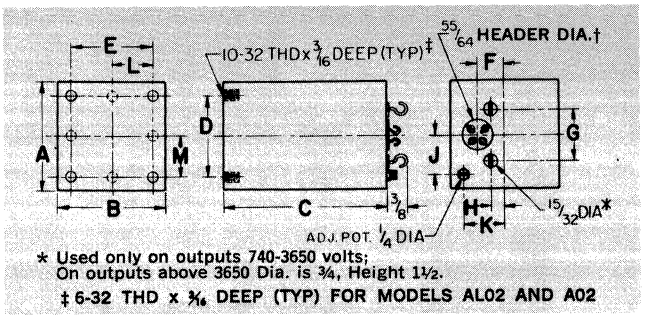
DIMENSIONAL TOLERANCES: FRACTIONS ±1/32; DECIMALS .XX ±0.015.



* Used only on outputs 740-3650 volts; On outputs above 3650 Dia. is ¾, Height 1½.

‡ 6-32 THD x 3/16 DEEP (TYP) FOR MODELS AL02 AND A02

DC TO DC

INPUT VOLTAGE RANGE: 24 TO 30 VOLTS, DC

Output Voltage Range	Output Current (Amps)	Size (See Dwg.)	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

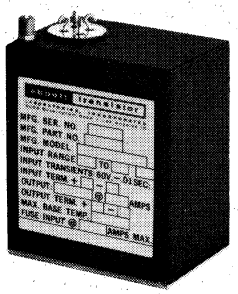
† To have the header located on the mounting base, change the model number character preceding the first dash of Model Number to "B". (Example: AL05**B**-5A indicates a header out the base.) See page 1851. No increase in price for this service. Not available on Model A02 series.

abbott transistor
LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS

abbott 28 VDC to DC (Reg.) Hi-Temp.



POWER MODULES

features

- Hi-temp. +212°F.
- 5 to 3500 volts
- Hermetically sealed
- Short circuit protection
- Input spike protection

specifications

Input Voltage Range
24 to 30 volts DC

Line Regulation
±0.2% for input 24 to 30 VDC on Model B's and BL's
±0.5% for input 24 to 30 VDC on Model BK's

Voltage Regulation
±1.5% for input 24 to 30 VDC and from ½ load to full load on Model B's
±2.5% for input 24 to 30 VDC and from ½ load to full load on Model BK's and BL's

Ripple
0.5% RMS — Model B's
1.0% RMS — Model BK's and BL's

Voltage Adjustment Range
12% by screwdriver adjustment

Environment
+212°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal). Vibration, shock, sand, dust, humidity, salt-spray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage & Current
See specific models listed
(Outputs and inputs are isolated)

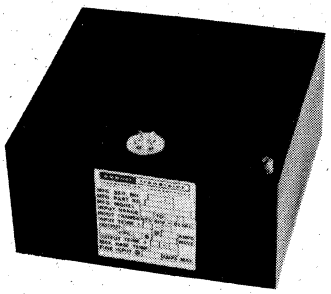
† To have the header located on the mounting base, change the model number character preceding the first dash of Model Number to "B". (Example: BL5B-5A indicates a header out the base.) See page 1851. No increase in price for this service. Not available on Model B02 series.

abbott transistor
LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd. / Los Angeles 90016
(213) WEbster 6-8185 Cable: ABTLABS

abbott DC to Sine Wave 1φ or 3φ

POWER MODULES



features

- Close regulation
- 400 or 800 Hertz
- Hermetically sealed
- No moving parts
- Compact
- For aerospace application

specifications

Input Voltage Range
24 to 30 volts DC

Line Regulation
±0.2% for input 24 to 30 VDC

Voltage Regulation
±1% for input 24 to 30 VDC and from ½ load to full load

Frequency Stability ±1%

Phase Displacement (3 φ only)
120° ±5° from ½ to full load and P.F. 0.7 lag or lead

Voltage Adjustment Range
12% by screwdriver adj.

Short Circuit Protection
on all models except N3, N6, and N12

Environment
+160°F max. at mtg. base (1 φ only) using adequate heat sink
+212°F max. at mtg. base (3 φ only) using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal)
Vibration, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage, Current and Frequency
See specific models listed (Outputs and inputs are isolated)

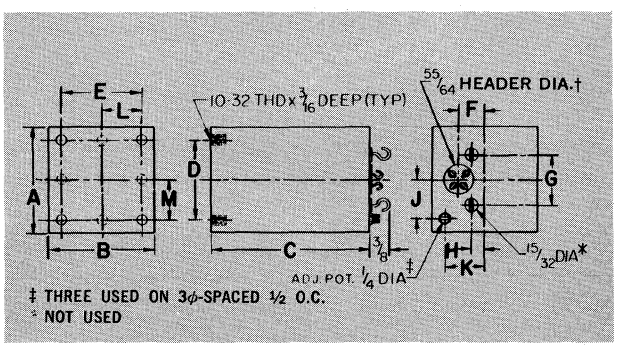
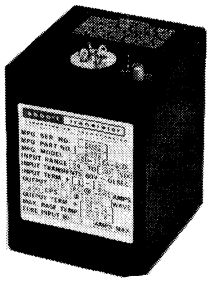
Other voltages and frequencies available on request.



For quantity discount or for any special design, please send us your requirement.

abbott DC to Sine Wave 1φ Hi-Temp.



POWER MODULES *specifications* FOR SINGLE PHASE OUTPUTS

features

- Close regulation
- 400 to 1600 Hertz
- Hermetically sealed
- High Reliability
- Compact
- For aerospace
- Short circuit protected

Input Voltage Range
24 to 30 volts DC

Line Regulation
±0.2% change of output voltage for input 24-30 VDC

Load Regulation
±0.5% from ½ load to full load

Frequency Stability
±1%

Voltage Adjustment Range
12% by screwdriver adjustment

Environment
+212F° max. at mounting base, using adequate heat sink
−65°F min. at mounting surface
Altitude: to vacuum (true hermetic seal)
Vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, and explosion to MIL-E-5272C

Output Voltage, Current and Frequency
See specific models listed below
(Outputs and inputs are isolated)

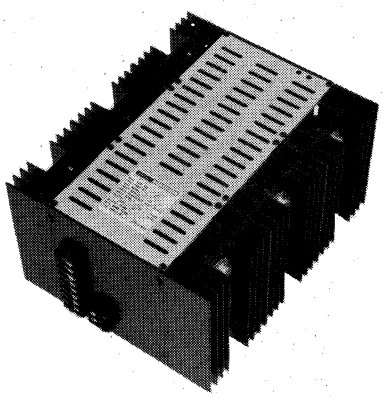
abbott DC to 60 ∿ (Regulated)



POWER MODULES

features

- −4° to +160°F ambient
- 115, 220 and 440 VRMS Models
- 30 to 240 VA
- All Silicon
- High Reliability
- Short Circuit Protection
- Reverse Polarity Protection
- Close Regulation

specifications

Input Voltage Range
11-13 VDC on 'K' Models
22-26 VDC on 'P' Models

Load Regulation
±1% for load change of ½ load to full load

Line Regulation
±0.2% for specified input voltage range

Output Frequency
Adjustable between 55 and 65 Hz by screwdriver adjustment

Frequency Stability
±1% from −4°F to +160°F
±1% over eight hour period at constant temperature

Wave Form
Sinusoidal, with maximum distortion into a resistive load as shown in table below.

Synchronization
Terminals are provided for external synchronization. Input of 6.3 vrms ±20%, 55 to 65 Hz required

Load Power Factor
Full rated output VA from unity to 0.7 PF lagging or leading

Efficiency
45% minimum on 'K' Models at nominal input voltage. 50% minimum on 'P' Models at nominal input voltage

Operating Temperature
−4°F to +160°F ambient without derating, forced air, or heatsinking

Input Transient Protection
45 VDC for 0.1 seconds

Output Voltage and Power
See specific Models listed in the table below

Input Voltage Range (VDC)	Output Voltage Range* (V RMS)	Output Power (VA)	Harmonic Distortion (%)	Size (See Dwg.)	Weight (Lbs.)	Model Number	Price 1 Pc.	Price 2 - 4 Pcs.

16A	6¾	7½	4¼	6.25	7.00	3.50	3.12	1½	1½	—
17	6	12	4	5.50	11.50	5.75	2.75	2¾	—	2
17A	7	8	4¼	6.50	7.50	3.75	3.25	1	—	2
18	8¾	9¾	5	8.25	9.25	4.62	4.12	2⅞	—	2

* Used on outputs 740-3650 volts; not available on mounting base above 3650 volts.

‡ 6-32 THD x 3/16 DEEP (TYP) FOR MODELS AL02, A02, BL02 AND B02.

† 2 7/16 on Models HA3B and HAK3B

⅞ on Models T12B, U10B, T6B-5A thru T6B-7A and U5B-5A thru U5B-7A

DIMENSIONAL TOLERANCES: FRACTION ±1/32; DECIMAL .XX ±0.015.

SPECIAL CONNECTORS

The following military type hermetically sealed connectors are available on all Abbott power modules with output voltages up to 740 volts. A special high voltage ceramic connector (manufactured by AMP, Inc.) is available on power modules with output voltages above 3650 volts DC. The additional costs for various connectors, together with their mating part are listed. Simply change the model number character preceding the first dash to "A" to have a connector extend out the top surface (opposite the mounting base). **Example:** V05A-5A indicates a connector out the top surface. V05C-5A indicates a connector out the mounting base.

MILITARY CONNECTORS

CONNECTOR	MFGR.	MATING PART	MODIFY MODEL NO.	PRICE 1 PC.	PRICE 2-4 PCS.
MS3113H-12-10P	BENDIX or CANNON	MS3116F-12-10S	See Above	add $30	add $20
833589	AMP. INC.	832692-2 (2 ft. leads)	Add "AMP" and see above	add $60*	add $40

*Price includes two each high voltage connectors and their mates, one for each polarity.

OTHER OPTIONAL FEATURES are available at additional cost:

SHORT CIRCUIT PROTECTION — All regulated modules listed in this catalog have built-in electronic short circuit protection (a short circuit across the output terminals will not damage the unit) except Model T's, U's, and V's. Special short circuit protection is available on these models at an additional cost of $25 for its inclusion in one unit, and $20 in 2-4 units. Simply add an "S" after the character preceeding the first dash of the model number. Example: V05DS-5A indicates short circuit protection has been included.

REMOTE OUTPUT ADJUSTMENT — Provision for locating an adjustment potentiometer in a remote location from the power supply can be made at an additional cost of $30 for its inclusion in one unit and $20 in 2-4 units. Simply add an "R" after the character preceeding the first dash of the model number. Example: V05DR-5A indicates the remote output adjustment feature has been included. (Special terminal arrangement includes two additional terminals for connection to a remote potentiometer.)

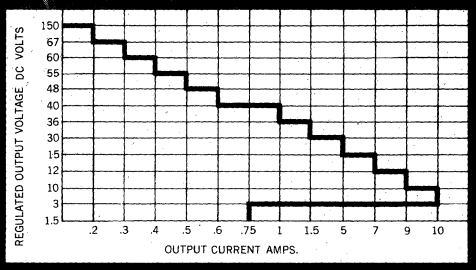
"Hello...Acopian...Do you people power supply shipments in

Yes, we do. In fact, we haven't failed to meet this promise in more than seven years. Place an order for any of Acopian's 82,000 different AC to DC plug-in power supplies and three days later your order will be on its way to you. To save more time, your buyer can phone your needs, then follow with the paperwork. For complete information, contact your local Acopian representative or call us directly at (215) 258-5441.



ACOPIAN SINGLE OUTPUT POWER SUPPLIES

Output voltages from 1 to 150 volts available in 1-volt increments. Graph shows range of maximum current ratings. Most models have ±1-volt adjustments.

Input voltage: 105-125 volts AC, 50 to 400 Hz, single phase.

Line regulation: Choice of ±0.05% or ±0.5%

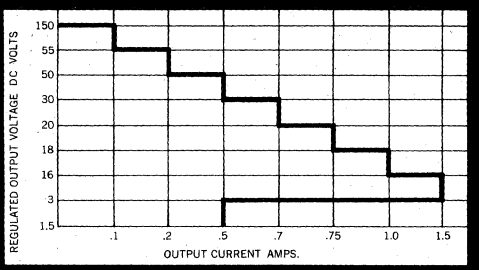
Load regulation: ±0.05% to ±0.5% depending on model.

Polarity: Output is floating, either positive or negative side may be grounded.

Size: Housing size varies according to voltage and current rating. Sizes begin at 3⅜ x 3¼ x 4-11/16 inches high.

Features: Short circuit protection. No additional heat sinking required.

Prices: From $45. to $175.



ACOPIAN DUAL OUTPUT POWER SUPPLIES

In addition to the common dual voltages used for powering operational amplifiers, a broad range of identical or different dual power supplies are available in 1-volt increments. Graph shows the voltages and maximum current rating per section. Consult factory for compatible section ratings, model number and price.

Input voltage: 105-125 volts AC, 50 to 400 Hz, single phase.

Line regulation: 0.05%

Load regulation: 0.05% (most models)

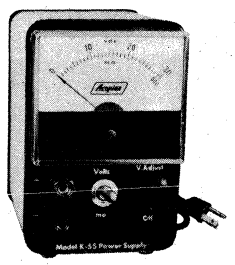
Ripple: 1 to 5 mv, depending on model

Polarity: Outputs are floating. Each power supply may be connected as a separate supply with floating output. Either the negative or positive side of one power supply may be grounded irrespective of the other supply.

Size: Housing size varies according to voltage and current rating. Sizes begin at 3⅜ x 3¼ x 4-9/32 inches high.

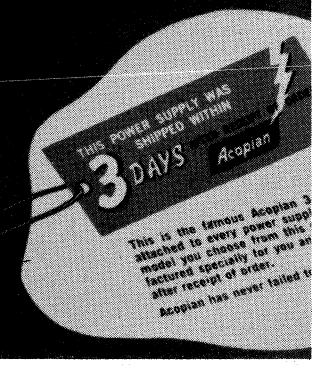
Features: Short circuit protection. No additional heat sinking required.

Prices: From $88. to $230.



VOLTAGE REGULATED LABORATORY POWER SUPPLY FOR ONLY $98.

Acopian's compact K55 laboratory power supply delivers 300 ma over an adjustable range of 1.25 to 30 volts. Load regulation is ±0.5% or 50 mv, whichever is greater. Ripple is 1 mv rms. The K55 contains all-silicon semiconductors and is short-circuit proof. It stands only 5¾ inches high, weighs only 3 pounds, and costs only $98. Availability . . . only 3 days.



Do you have Acopian's newest catalog? It contains complete information about 82,000 different power supplies, all available for shipment in only 3 days. Included are single and dual regulated supplies, unregulated supplies for operating lamps and relays, and chassis assemblies for rack mounting. Write or call for your copy.

INVERTERS
and ENERGY CONVERSION SYSTEMS
for undersea, airborne and other space-limited applications

NEW CREATIVE APPROACHES TO ENERGY CONVERSION YIELD SUPERVERTERS* and MULTIPLE INVERTER SYSTEMS

Continuing, long range energy conversion studies by Aerospace Avionics, Inc. have provided a firm engineering base for the development of a wide spectrum of energy conversion devices for the maximum utilization of available power. Many of these products are now operational aboard aircraft, undersea vessels, nuclear-powered craft and in the field. *Superverters* and *Multiple Inverter Systems* are two current examples of this Aerospace capability.

Now replacing rotary inverters in single-phase applications, *Superverters* offer significant advantages in terms of performance, reduced size and maintenance. These units incorporate state-of-the-art waveform synthesis techniques, provide excellent voltage regulation and sustained overload capability.

Multiple Inverter Systems achieve utmost efficiency in utilization of minimal space. They consist of three electrically independent, all-silicon, solid state inverters providing 600 VA, single-phase, 400 Hz; 400 VA, single-phase, 60 Hz; and 100 VA, 3-phase 400 Hz from a single 28 VDC source. In addition they afford significant economies in terms of spares provisioning, common documentation and continuity of maintenance.

Both inverter lines are readily available in the models specified herein or modified to meet your particular project requirements.

* Trademark

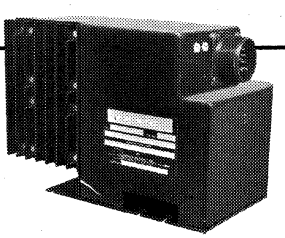
INVERTERS, POWER AND FREQUENCY CONVERTERS 5 VA TO 10 KVA

- **Single and 3-phase sine and square wave outputs**
- **Voltage and current regulated, short circuit protected**
- **Efficiencies to 95%**
- **Packaging variations in accordance with most military and commercial specifications including:**

Airborne:
MIL-E-5400, TSO C7C

Shipboard:
MIL-T-945, MIL-T-21200, MIL-T-16400

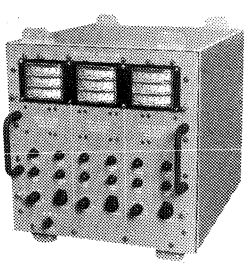
Undersea:
Pressure housings for pressures to 20,000 psi



MODEL SV250,
250 VA
Static Inverters

FEATURES:

- *Delivers up to 250% of rated current*
- *Continuous duty operation*
- *Altitude to 70,000'; Temp. —54° to +71°C*
- *Overload, transient and short circuit protected*
- *Convection cooled*
- *Replaces MS rotary inverters*



MODEL NO. SV1500
Multiple Inverter System

FEATURES:

- *Automatic shutdown with front panel indication for: (1) Voltage deviation greater than ± 10%, (2) Frequency deviation greater than ± 10%, (3) Heat sink temperature greater than 120 C.*
- *Overload current limiting*
- *Continuous duty operation*
- *Plug-in circuit cards*
- *Internally illuminated meters with dimmer*
- *Off ground input and output operation*
- *Small size (14"x14"x16")*

ARNOLD MAGNETICS

POWER CONVERSION EQUIPMENT

SMALL SIZE • LIGHT WEIGHT • SOLID-STATE RELIABILITY
Arnold's complete line of miniature modularized converters and power supplies features an extremely high power-to-volume ratio . . . exceptionally light weight . . . and solid-state reliability in the smallest power packages available anywhere.

WIDE RANGE OF INPUTS and OUTPUTS
The Arnold line of power modules includes output voltages from 2 volts to 20,000 volts DC, output current from 100 micro amperes to 15 amperes.

BROAD RANGE OF APPLICATIONS
Applications cover the entire spectrum of industry power requirements from the smallest to the largest, from 3 watts in 3 cubic inches to 400 watts in 190 cubic inches — available, in most instances, as standard off-the-shelf equipment.

SPECIAL LOW PRICE ON SMALL QUANTITIES
Arnold's present pricing formula incorporates a sharp price drop in the 2 - 4 unit range as well as in the larger quantities. The delivery is from stock to two weeks.

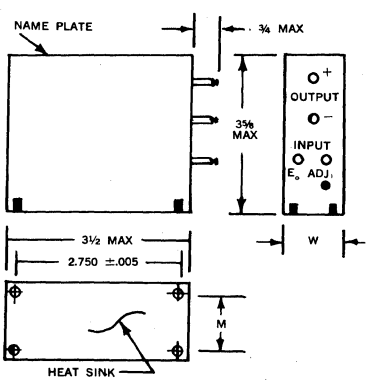
PERSONAL SERVICE
Regardless of the size of the order, Arnold's policy is one of personal service through our Project Manager - Technician team concept. This concept is based upon personal monetary gain for the team unit . . the faster the delivery in an efficient, quality controlled effort, the greater the personal gain for the individual members of the team through participation in a percentage of the gross sale **after delivery.** During the past 14 years, the participation by the product team involved in the order has produced an unparalleled ability to deliver quality products per customer requirements, and has developed a tremendous bank of personal and company knowledge to solve the most exacting power problems.

NEW FACILITIES
In 1968, Arnold moved into new facilities, especially designed to meet their individual needs for some years to come. Located in the heart of the Southern California electronics industry, the additional space will be devoted to development, display and manufacture of an expanding number of state-of-the-art products. In addition, both the progressive increase in production and the new space available now make it possible for Arnold to again seek men with backgrounds in either the technical or sales engineering areas to form new Project Manager - Technician Teams. Inquiries are invited.

THE ARNOLD TOROIDAL WINDING MACHINE

Arnold's Toroidal Winding Machine has been a production and laboratory "standard" for more than 14 years. Virtually unchanged since its introduction, it sets up quickly . . . is easy to operate . . . accommodates a wide range of wire sizes . . . winds at high speeds . . . and is portable. The Arnold Toroidal Winder offers a single compact design, equally suitable for winding toroidal coils for both laboratory and production requirements. And, it is priced low enough to permit only occasional use . . . ready to wind any quantity from a single coil into the thousands.

AC-DC CONVERTER MINIATURE, SOLID-STATE



FEATURES
- MINIATURE SIZE (21 CU IN)
- ANY VOLTAGE, SINGLE OR DUAL OUTPUT
- HIGH RELIABILITY
- SHORT CIRCUIT AND TRANSIENT PROTECTED
- FULLY ENCAPSULATED
- ADJUSTABLE OUTPUT
- MEETS MIL-E-5272C
- OUTPUTS ARE ISOLATED
- RFI **QUALIFIED** (MOD "I")

SPECIFICATIONS
INPUT VOLTAGE: 108 - 130 VRMS, 50 to 500 Hz
OUTPUT CURRENT: 5A MAX (OR 40 WATTS)
VOLTAGE ADJUST: +5%, −25%
LINE REGULATION: 0.1% TYP.
LOAD REGULATION: (½-FL): 0.9% TYP.
RIPPLE (RMS): 0.1% TYP.
TEMP. COEF: .05%/°C MAX.
TEMP. RANGE: −10° to +71°C AT CASE
ENVIRONMENTAL: PER MIL-E-5272C
ALTITUDE: 60,000 FT.

MODIFICATIONS
A — REMOTE ADJUST

VOLTAGE ADJUSTMENT ±5%
TEMPERATURE −55° to +70°C
ENVIRONMENT MIL-E-5272
TOTAL HARMONIC DISTORTION 3% MAX.

HOW TO ORDER
FOR STANDARD UNITS
Specify simply: Model "SKB" static inverter (This standard unit will have an input of 28 VDC and an output of 115V 400 cps).

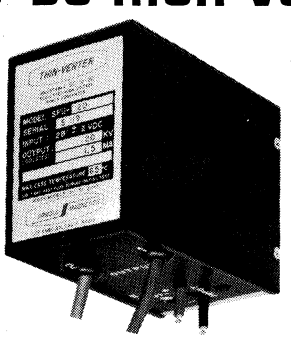
FOR SPECIAL UNITS:
Specify Model "SK" followed by termination desired, nominal input voltage, output voltage and output frequency.

EXAMPLE
SKA-28-115-400-40

SK Model	A Termination	—	28 Nominal Input Voltage	—	115 Output Voltage	—	400 Output Frequency	—	40 Output Power

TERMINATION DESIGNATION:
Wire leads out end "B" (standard configuration)
A/N connector: "A" (Add $25.00)
Wire leads out bottom: "C" (Add $15.00)

DC-DC HIGH VOLTAGE MINIATURE, SOLID-STATE, REGULATED 5KV-20KV

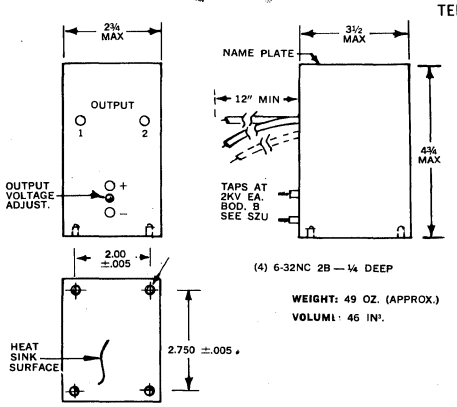


FEATURES
- MINIATURE SIZE (46 CU. IN.)
- RELIABLE — TOTALLY ENCAPSULATED
- OVERVOLTAGE, OVERLOAD AND POLARITY REVERSE PROTECTION
- ADJUSTABLE OUTPUT: (40% TO 105% E_o)
- INTERNAL CORONA CONTROL
- DELIVERY — STOCK TO 6 WEEKS

SPECIFICATIONS
INPUT VOLTAGE: 26 to 30 VDC AT 2.5A MAX.
LOAD REGULATION: ½ TO FULL LOAD 0.2% — NO LOAD TO FULL LOAD 0.5%
LINE REGULATION: FOR VARIATIONS OF INPUT FROM 26 TO 30 VDC LESS THAN 0.24%
TEMPERATURE: 0° TO 50°C LESS THAN .05% 1°C

Model	KVDC	MA (FL)	1 Pc.	2-4 Pcs.
SFU-6	6	5	$550	$467
SFU-8	8	3.7	580	493
SFU-10	10	3	620	526
SFU-12	12	2.5	655	556
SFU-14	14	2.1	680	578
SFU-16	16	1.8	725	616
SFU-18	18	1.6	760	646
SFU-20	20	1.5	795	676

MODIFICATIONS
B — Taps in 2KV steps
T — Built in time delay



HOW TO ORDER
Specify Model Number, Output Voltage in K.V.D.C. Example: SFU-20T will deliver 20,000 VDC at 1.5 MA with built in time delay.

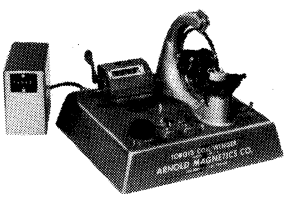
TOROIDAL COIL WINDER

Sets up quickly . . . easy to operate . . . takes wide range of wire sizes

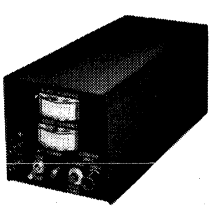
• Min. finished hole size: .18 in. • Max. finished toroid O.D.: 4.0 in. • Winding speed: 1500 turns/min. • Wire range: AWG 44 to AWG 26 • Dual, self-checking turns counting system • Loading (wire length) counter • Core range: 3/32" I.D. to 4" O.D. to 1½" high.

LABORATORY USE — Change wire and core size in 45 sec. • **PRODUCTION USE** — 1500 turns per minute • Insert core and load in 20 sec. • **Model WTA — $890.00** includes all rings, counters and accessories • **Model WTB — $750.00** without electronic counter or extra rings.



ELECTRONIC LOADS (OR CURRENT LIMITERS) MODEL LGA

GENERAL SPECIFICATIONS • Load Voltage Range: 2-50 Volts DC • Load Current Range: 0-30 Amps DC • Load Power: Continuous 200 Watts, 50% more power for short periods • Excitation Source: 120V 50-500 Hz, 50 Watts • FEATURES • Used in place of load resistors for testing power supplies, batteries & amplifiers • Maintains constant current at value selected (will, therefore, limit the maximum current delivered to another load (connected in series) 0 to ½, to full current setting • May be switched from 0 to ½, to full current setting • No switching — continuous current adjustment with near infinite resolution • May be paralled for increased current rating • USES • Power resistor substitute • Load bank substitute • Constant current load • PRICE: From $350.00 (in single piece quantity) • DELIVERY: 4-6 weeks ARO.



LINE SPIKE FILTER MODEL FLD

Missile and aircraft applications
VOLTAGE: to 35 VDC
CURRENT: to 4 AMPS
CONSTRUCTION: Steel can with mounting studs and pin terminals on bottom
TEMPERATURE: −25°C to +85°C
ENVIRONMENT: MIL-T-27A
ATTENUATION: Of transient currents & voltages

0 - 1.2 KC: 3 db min.
1.2 - 2.4 KC: 10 db min.
2.4 KC - UP: 27 db min.
WEIGHT: 8 Oz.
PRICE: 1 pc. $45.00

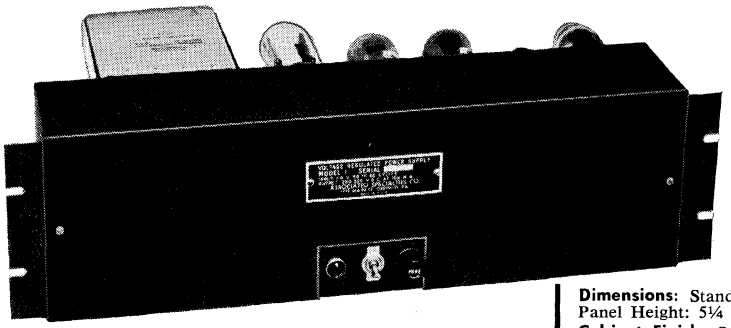
Associated Specialties Co.

1751 MAIN STREET, OREFIELD, PENNSYLVANIA



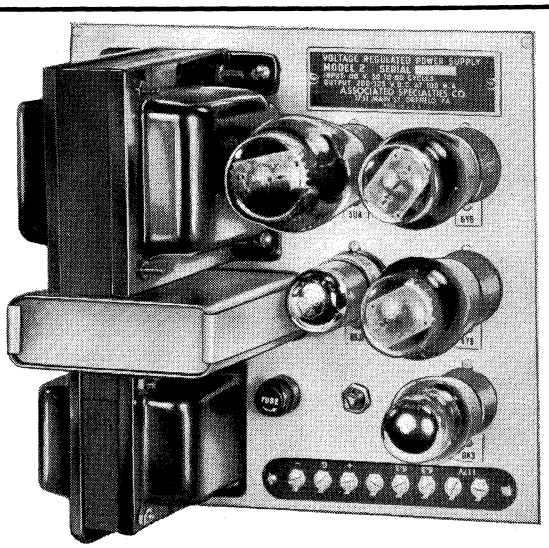
ELECTRONICALLY REGULATED D.C. CONSTANT VOLTAGE POWER SUPPLIES

RELAY RACK MOUNTING TYPES
—BK (BLACK RIPPLE FRONT PANEL)
—GR (GRAY RIPPLE FRONT PANEL)

Input: 105-125 volts AC. 50-60 cycles.
Regulation of DC Voltage: Better than 1% for loads of 0 to 100 ma. and line voltage variations from 105 to 125 volts.
Isolated Output: Both positive and negative sides of the output are isolated from ground. Either side may be grounded or the output may be left floating.
AC Output for Filaments: An isolated AC voltage of 6.3 volts AC at 3 amperes is available at the output terminal connections.
Overload Protection: A fuse mounted on the front panel protects supply against external overloads or internal failure.
Input and Output Connections: All input and output connections are made to a single terminal strip conveniently located on the rear of the chassis.

Dimensions: Standard 19" relay rack mounting. Panel width: 19 inches, Panel Height: 5¼ inches; Depth Behind Panel: 7¼ inches.
Cabinet Finish: Standard Black ripple enamel.
Controls: Rear Chassis—DC output voltage control. Front Panel—Pilot light, input power switch, and fuse.
High Quality Components: Only components of the highest quality are used in this equipment insuring you years of trouble-free dependable operation.
Accessibility: By removing two small screws, the front panel may be removed while the supply stays mounted on a relay track or cabinet. This allows quick and easy inspection.

MODEL	OUTPUT VOLTAGE	RIPPLE
1	200-325 V.D.C.	10 M.V. MAX.
11	75-200 V.D.C.	5 M.V. MAX.



SUB-CHASSIS MOUNTING

Sub-chassis mounting type regulated power supplies are designed to save space and money. They can be mounted on a chassis along with other components and thereby save space which would be used by a relay rack mounting supply. Savings are made in the size and cost of the cabinet required for a job along with the lower cost of the sub-chassis mounting supplies.

SAME AS MODEL 1 AND 11 EXCEPT

Dimensions: 9" wide, 8¾" long, 4¾" high above chassis, 1¾" clearance required below chassis. Size of cut-out required, 8¼" wide x 8" high. Location of four mounting holes: 8⅝" wide x 8 11/32" high.
Chassis Finish: Aluminum.
Controls: DC output voltage control adjustable from the top side of the chassis.

MODEL	OUTPUT VOLTAGE	RIPPLE
2	200-325 V.D.C.	10 M.V. MAX.
12	75-200 V.D.C.	5 M.V. MAX.

CABINET MOUNTING

An ideal unit for bench work or assembly into equipment.

SAME AS MODEL 1 AND 11 EXCEPT

Input Connections: A line cord at rear of cabinet.
Output Connections: 5 way binding posts.
Dimensions: 5" wide, 7" high, 16" deep.
Panel Finish: Aluminum.
Cabinet Finish: Gray enamel.
Controls: D.C. output voltage on front panel.
Meters: Output voltage.

MODEL	OUTPUT VOLTAGE	RIPPLE
3	200-325 V.D.C.	10 M.V. MAX.
13	75-200 V.D.C.	5 M.V. MAX.

MODEL P2 PANEL $9.00

Mounts two Model 2 or 12 power supplies side by side in a 19 inch relay rack space 8¾" high.

CUSTOM POWER SUPPLIES DESIGNED & BUILT TO YOUR SPECIFICATIONS

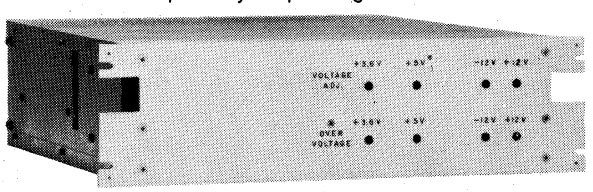
Astro-Metrix Corporation, division of J.K.F. Industries, has the complete in-house capabilities for design and production of custom and O.E.M. system power supplies. Our entire DC power supply capability is directed toward filling the **volume** requirements of the original equipment manufacturer. We are currently manufacturing computer power supplies based on **constant voltage transformer** pre-regulators, **high frequency switching** pre-regulators, **phase controlled SCR regulators** as well as standard transformer input. Extensive use of integrated circuits reduce circuit complexity. With the in depth experience available at Astro-Metrix Corporation the **most ideal** fundamental design can be applied in manufacturing, resulting in low cost and high reliability.

Typical multiple output O.E.M. power supplies:

MODEL AMC-M-338

SPECIFICATIONS

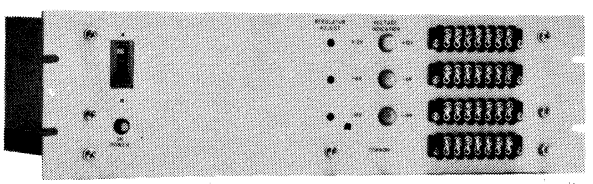
Input: 105-125 VAC 47-65 CPS
Output: 5v - 13a
+12v - 6a
−12v - 4a
+ 6v - 2a
+12 volt sequence by computer logic
Regulation: .1%
Ripple: 10mV
Size: 5″ x 19″ x 20″
Price: $530.00 - 100 up



MODEL AMC-M-270

SPECIFICATIONS

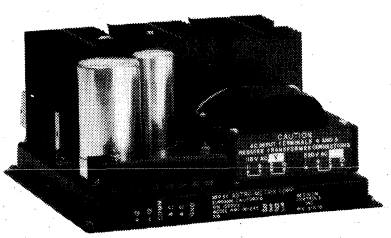
Input: 105-125 VAC 47-470 CPS
Output: +18V @ 3.5a
+12V @ 1a
− 6V @ 1.5a
Regulation line and load: .1%
Ripple: 10mV P-P
Price: $175.00 Production Quantities



MODEL S-1070

SPECIFICATIONS

Input: 105-125 VAC 47-470 CPS
Output: +12V @ 6 amp
Regulation line and load: .1%
Ripple: 10mV P-P
Price: $165.00 Production Quantities



MODEL AMC-VA-125-30

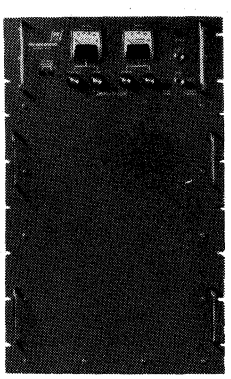
SPECIFICATIONS

Input: 0-125V dc
Regulation: ±10%
Ripple: 1%
Current: 0-30 Amps dc
Price: $725.00 ea

MODEL AMCRC-36-200

SPECIFICATIONS

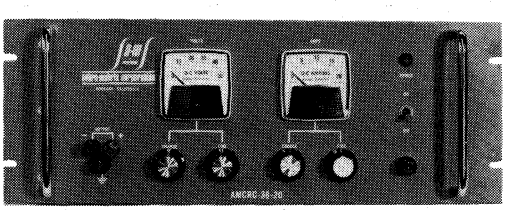
Input: 220/440 VAC
Output: 0-36V dc
0-200 Amps
Regulation line and load: .1%
Ripple: .1%
Output impedance: .005 ohms
Price: $3,950.00 ea



MODEL AMCRC-36-20

SPECIFICATIONS

Input: 105-125V dc
Output: (Volts) 0-36V dc
(Amps) 0-30
Regulation: .005% line
.005% load
Ripple: 1mV RMS
Output Impedance: .005 ohms
Programmable: 1,000 ohm/volt
Ambient: 0-70°C



SOLID STATE SINE-WAVE OUTPUT FREQUENCY CONVERTERS / 400 CPS and 60 CPS

- **All Silicon • Short-Circuit Proof • MIL-Type Construction**
- **High Efficiency • Low Cost • Compact • Light Weight**
- **3 ϕ Models Have Independent Voltage Regulation/Phase.**

This NEW type of frequency converter was researched and developed by ASTRO-METRIX CORPORATION to meet the ever growing market for smaller, lower cost A.C. power supplies. The industry-praised design employs a high-efficiency switching regulator coupled with an equally high-efficiency filter network. By providing transformer isolation in the higher frequency output end of the power supply, the need for a heavy weight and bulky (50-60 cps) input power transformer has been eliminated, which also reduces much of the heat generated inside the unit. The magnetics are also "Class F" for reliability and overload capability, and can be ordered to meet MIL-T-27 if desired.

The standard Models come with input circuit-breaker, pilot lamp and output terminals on the front 19" Relay panel; the rear panel is blank except for 6 ft. line cord. The list of OPTIONS (below) enables you to CUSTOMIZE a unit to your individual needs simply by adding the appropriate suffix letters after the Model Number.

SPECIFICATIONS COMMON TO ALL STANDARD MODEL FREQUENCY CONVERTERS

Input: 105 to 125 VAC, 47 to 65 CPS
Voltage Regulation: Less than ±1.0%
Voltage Modulation: Less than ±0.5%
Frequency Stability: ±0.25% (See Options)
Recovery Time: 25 msec
Output: 105 to 125 VAC, 400 CPS (see Option)
Distortion: Less than 3.0%
Ambient Temperature: 0°C to +55°C (see Option)
Semiconductors: Silicon
Power Factor: ±0.7%

AVAILABLE OPTIONS

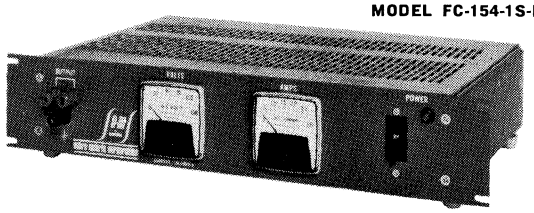
Select from the chart below the desired Model Number to meet your needs by Phase and VA rating. Then select from the list of OPTIONS the suffix letter(s) that corresponds to the option(s) needed to customize the standard model to your requirements and add them to the Model Number. EXAMPLE: FC-104-1S-V-H would be a 100 VA, 1ϕ unit with a volt meter and handles added.

Add SUFFIX

A Adjustable output voltage — 0 to 130 VAC at full-rating. Not available on 3 ϕ or low distortion models.
C Current Meter ±3% accuracy.
D Distortion less than 0.5%.
F Frequency stability of 0.01%.
H Handles on front panel.
J Voltage adjust ±10% control on rear panel.
K Frequency adjust ±5% control on rear panel.
M Frequency meter 400 CPS ±20, Accuracy ±0.1%.
P 47 to 480 CPS operation.
R Rear panel terminals for Output.
S Synchronization terminals on rear panel to sync two identical units.
T Temperature range from −55°C to +71°C.
V Voltmeter ±3% accuracy.

Other output frequencies and voltages are available on request. Please contact the factory or our representatives to obtain other modifications not listed above.

MODEL FC-154-1S-M



Model Number	Output VA	Width	Height (Inches)	Depth	Appr. Weight
1-Phase

FC-754-3S	750	19	15¾	22	90

SOLID STATE SINE-WAVE OUTPUT FREQUENCY CONVERTERS / 60 CPS

SPECIFICATIONS COMMON TO ALL STANDARD MODEL FREQUENCY CONVERTERS

Input: 115/200 VAC, 400 CPS, 3 Phase, Steady State per MIL-STD-704.
Voltage Regulation: ±2%.
Frequency Stability: ±0.5%.
Protection: Short Circuit, Overvoltage, Undervoltage.
Efficiency: 85%.
Output: 105/125 VAC, 60 CPS.
Distortion: 5%.
Ambient Temperature: 0°C to 55°C.
Semiconductors: Silicon.
Power Factor: ±0.7.
RFI: Designed to MIL-I-6181D.

Model Number	Output VA	W	H	D	Appr. Weight

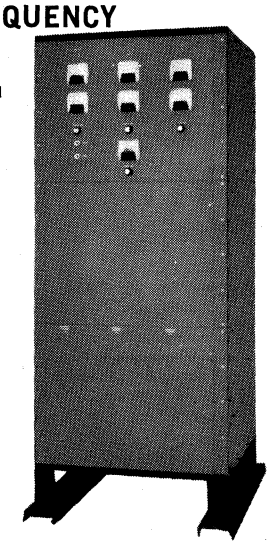
POWER CONVERSION using (Silicon Controlled Rectifier)



MILITARIZED FREQUENCY CHANGERS — Astro-Metrix Corporation Frequency Converters are designed to convert Mil 400 CPS 3 phase power to 60 CPS single phase at high efficiency thru the use of silicon semiconductors operating in switching mode.

The converters provide power for **teletypewriters, test equipment, communication equipment** and various other ground support equipment.

SPECIFICATIONS:

Input Voltage: 115/200 VAC ±13%.
Input Configuration: Three Phase, 4 Wire Wye.
Input Frequency: 360 CPS, 440 CPS.
Ouptut Voltage: 115 Volts RMS.
Output Frequency: 60 CPS ±1%.
Voltage Regulation: ±3 Volts for 0 to 100%. Change in load and for ±13% change in Input Line Voltage.
Power Factor: 0.75 Lagging to Unity. No Load to Full Load.
Distortion: 5% Maximum Distortion for All Conditions of Line, Load and Temperature.
Starting Time: 3 Seconds Maximum.
Common Connection: Input and Output Completely Isolated.
Overload: Overcurrent protection in Both Input and Output Lines.
Efficiency: 82% Minimum at Rated Load.
RFI: Radiated MIL-STD-826 Class G. Conducted MIL-STD-826 Class G.
Circuit Breaker: Self Contained Magnetic Circuit Breaker in Input Lines.
Temperature Range: STD −30°C to +71°C. OPT −50°C to +71°C.
Time Indicator (Optional): Elapsed Time Indicator Non-Resetting 9999.9 Hours Numerical Form.

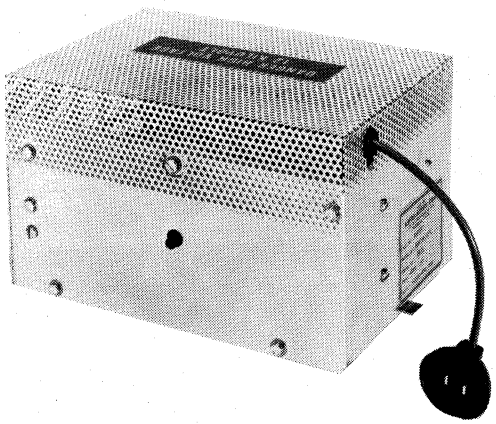
HIGH VOLTAGE - SOLID STATE - POWER CONVERSION

Astro-Metrix Corporation has developed unique high frequency switching circuitry which combined with our in-house high voltage transformer capability results in truly outstanding high voltage power supplies for **CRTs** display and monoscope character generator display tubes. The power supplies can withstand repeated HV arcing and short circuiting without damage. We have produced thousands of regulated HV dc power supplies for the industry in the last two years resulting in over 1,000,000 operating hours. These proven designs can be adapted to your requirement usually with a minimum of change.



SPECIFICATIONS

Typical Unit: HIGH VOLTAGE

Input: 25V dc
Output #1: −1800V 1.5mA
Regulation Line and Load: .1%
Ripple: .01%

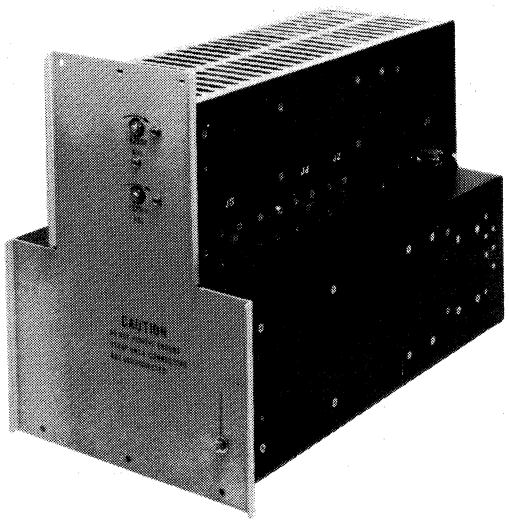
Output #2: +12 KV
Regulation Line and Load: .5%
Ripple: .1%

Output #3: +400V 5mA
Regulation: .1%
Ripple: .1%

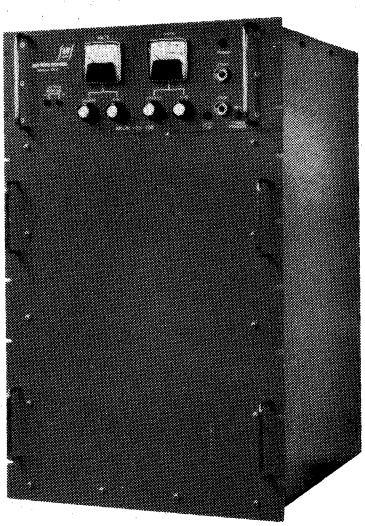
Output #4: +1500 to 2000V dc
Adjustable for focus
10uA output

Price: 500 up less than $150.00

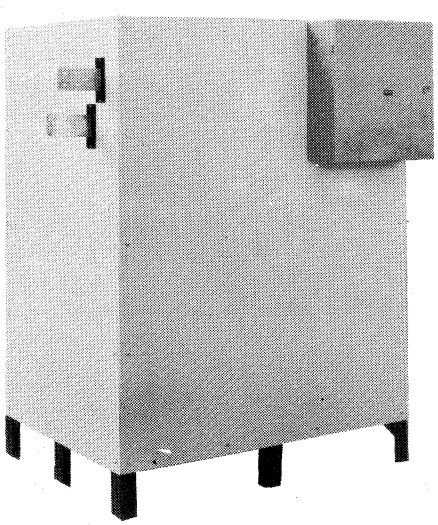
Similar circuitry is being applied to airborne HC power supplies to be used in radar display for both commercial and military aircraft.



SPECIAL HIGH CURRENT POWER SUPPLIES

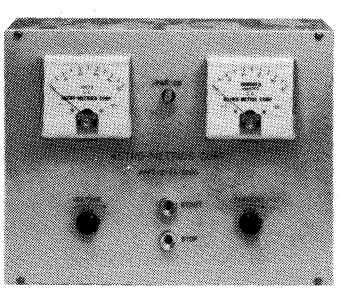


MODEL AMCRC 36-200B



MODEL ARPS 12-24-5000

30,000 Amps up to 36Vdc. Astro-Metrix Corporation is currently producing commercial and industrial regulated power conversion units with output to 30,000 Amps at up to 36V dc. This equipment is used in anodizing, precious metal plating, chemical milling, and hard chrome plating. All units are available both current and voltage regulated to ±1%. Regulation is by either saturable reactor magnetic amplifier or silicon controlled rectifier.



CONTROL UNIT

65 MODELS . . . IN 3 BASIC SIZES

For 10 to 42-Cell Nickel-Iron Alkaline Batteries and 6 to 24-Cell Lead Acid Batteries
Ratings 300 to 2,000 Ampere Hours

COMPLETE RECHARGING IN 8 HOURS OR LESS

** Complete with control circuit.

*** Available in Two non-interchangeable Models. (1) 104/110/120 Single Phase Input. (2) 208/220/240 or 416/440/480 Single Phase Input. When ordering specify AC Input required.

All units operate from 60 cycle sources. AC input standard voltage taps are as follows:

▲ All Three-Phase Inputs: 208/220/240 or 416/440/480.
For other AC Inputs, consult nearest AMC Sales Representative.

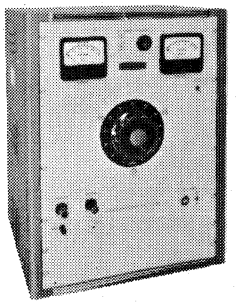
* Single Phase Inputs: 104/110/120.
† Single Phase Inputs: 208/220/240 or 416/440/480.

STANDARD EQUIPMENT: Extra-flexible 10 ft. cable, ammeter, a-c and d-c fuses. Charger is terminated by timer which is activated by AMC control circuit.

Beckman®

HIGH VOLTAGE POWER SUPPLIES

HEAVY DUTY POWER SUPPLIES



These industrial type power supplies are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is simple and the units contain a number of safety features for protection of personnel and equipment. Output is continuously variable from zero to full rated values. These supplies are unregulated and standard ripple is 5% or less. Ripple of from 0.01% to 1%, and regulated supplies are available on special order. All power supplies have automatic overload cutout control circuits.

MODEL	VOLTAGE	CURRENT	MODEL	VOLTAGE	CURRENT

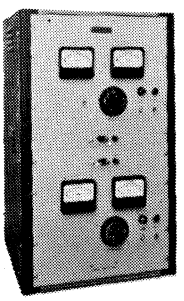
F-6005-A1-H	0-5000	100 MA.	F-6030-A3	0-30,000	300 MA.

CONSTANT CURRENT POWER SUPPLIES



Designed for application where output current must remain constant regardless of loading resistance changes. Used for magnet fields, plating applications, gaseous lamps. Dependable magnetic current stabilizer has no moving parts, no tubes, no transistors to replace. Simply set current to desired level, no balancing or other adjustments needed. Ideal for lamp operation since operating state ionizing voltage in no way affects lamp current. Standard hum level 5%. Lower hum levels available on order.

MODEL	MAX. VOLTAGE	CURRENT	MODEL	MAX. VOLTAGE	CURRENT
C-25-100	25 V.	100 Amp.	C-1000-5	1000 V.	5 Amp.

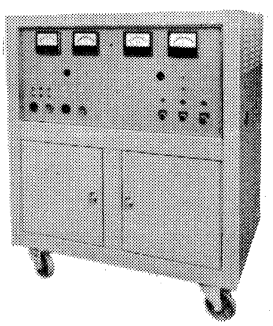
C-500-10	500 V.	10 Amp.	C-10K-5H	10 KV	500 MA.
C-Dual-500-10	500 or 1000 V.	10 or 20 Amp.			

3 PHASE HEAVY DUTY POWER SUPPLIES



For use in applications where high voltages at extra high currents are required. Either fixed or fully variable types are available. Automatic circuits protect against over-current conditions, turning off main power in a split second. Used for plasma research, electron beam furnaces, plate power and condenser charging. Voltage or current regulated types available. Input power requirement is 220 or 440 volts, 3 phase 60 cps. Standard ripple is 5% and regulation is approximately 10%.

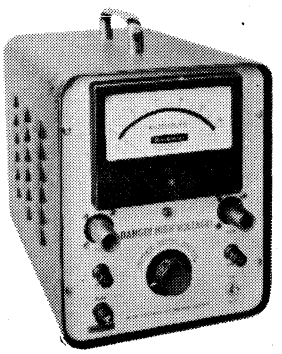
PORTABLE HIGH VOLTAGE DC POWER SUPPLIES



These general purpose supplies are particularly suited for laboratory or production line use to provide a convenient source of high voltage, low current dc power. Widely used for such applications as powering photomultiplier tubes, image intensifiers, condenser chargng, and routine insulation breakdown testing.
Voltage readings are indicated by a 6" precision mirror scale kilovoltmeter of 1% accuracy. Polarity is reversible from the front panel (patent applied for). An ac input protection fuse is included as well as a built-in limiting ballast lamp restricting maximum current output levels. These levels may be adjusted by changing ballast. A single control allows continuous adjustment of output voltage from zero to maximum rated voltage.
The output is unregulated (regulation is 20% for 10 to 100% loading). Current rating is 5 milliamperes. The ripple is 5% (rms) at full voltage and current load.

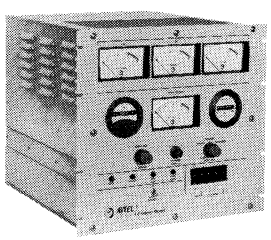
AVTEL SOLID STATE POWER CONVERSION EQUIPMENT

AVTEL

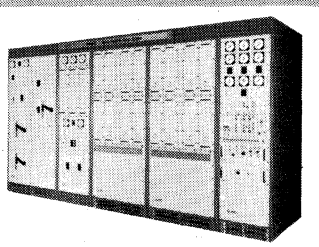
Avtel offers total capability in power conversion systems and components...

- Commercial, industrial, and military applications
- Experience ranges from milliwatts to hundreds of kilowatts
- Proven reliability with unsurpassed performance
- Convert AC-DC, DC-DC, DC-AC, AC-AC

TYPICAL AVTEL PRODUCTS



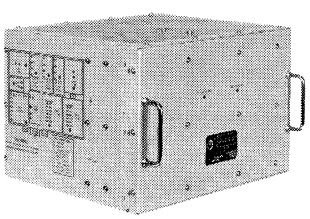
FREQUENCY CHANGER
7.5 KVA, 60 Hz to 400 Hz.



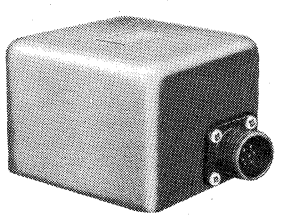
UNINTERRUPTIBLE POWER SYSTEM
50/60 Hz, 250 KVA, 3 Phase.

- AC Regulators
- DC-DC Converters
- DC Regulators
- Frequency Changers
- High Voltage Power Supplies
- Inverters
- Modular Power Supplies
- Motor Speed Controls
- Multi-Output Power Supplies
- Uninterruptible Power Systems

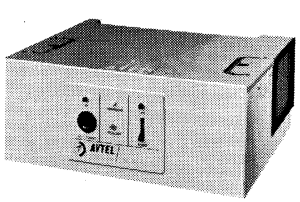
For details, see following pages



MILITARY POWER SOURCE
50-400 Hz input, 28 VDC, 5A and 1 KVA, 400 Hz, 3 phase output.

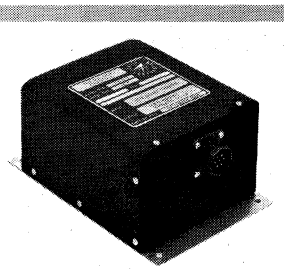


3 PHASE AC LINE REGULATOR
400 Hz input, 1,000 watt output



STATIC INVERTER
500 VA, 25 VDC to 115 VAC, 60 Hz.

Technological leadership, production know-how, and stringent quality assurance are Avtel's hallmark. Every product is system-engineered to ensure performance, reliability and maintainability commensurate with application requirements.



PRECISION GYRO POWER SOURCE
1 phase input, 50 VA, 400 Hz, 3 phase output.

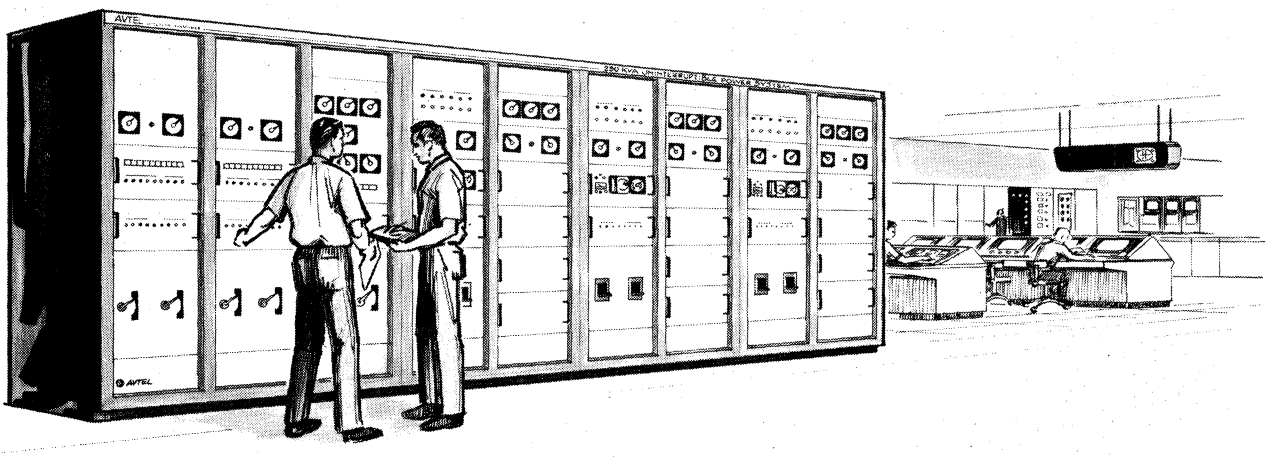
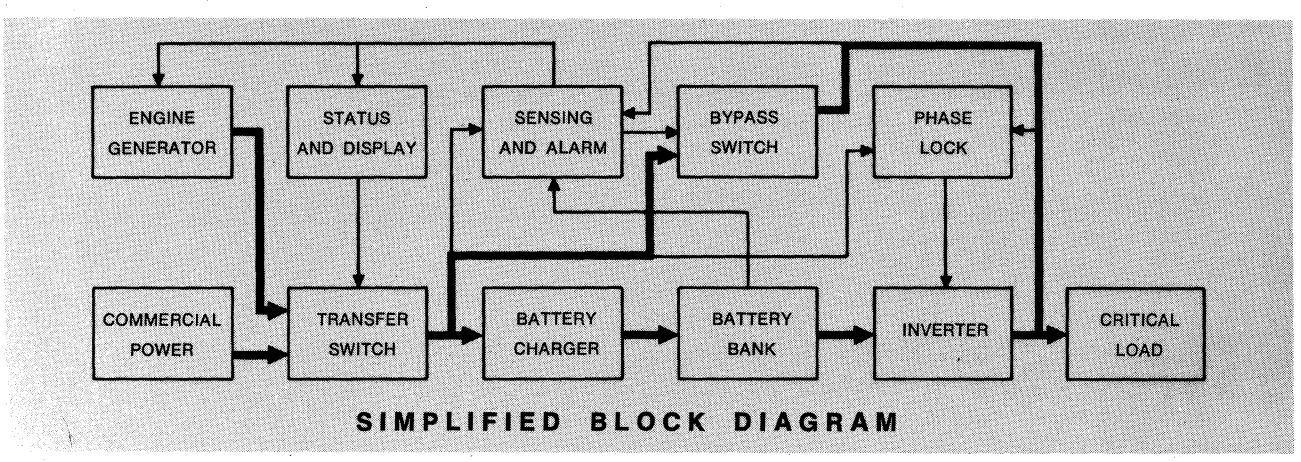
AVTEL

UPS UNINTERRUPTIBLE POWER SYSTEMS



Avtel's Uninterruptible Power Systems (UPS) offer the maximum in reliability and efficiency for applications where even a momentary power failure or disturbance cannot be tolerated. High mean-time-between-failure (MTBF) coupled with modular construction for low mean-time-to-repair (MTTR) make Avtel UPS the most practical systems for continuous on-line operation. Specifically designed to power very critical loads, these systems are offered in power capabilities from 250 VA to 1 MEGA-VA. The specific model availability for power levels up to 50 KVA is detailed in the CR and TR series pages which follow. Larger system requirements are achieved through a building block format utilizing appropriate combinations of 62.5, 125, 250 or 500 KVA modules. Ultra-reliable systems for the most critical applications are achieved by paralleling three units of appropriate capacity such that any two are capable of supporting the full load. Should any section of the system fail, it will automatically clear without causing an interruption of power to the critical load. Alarm and status indicating provisions alert operating personnel and substantially assist in the isolation of the fault. The modular construction of these systems makes possible a MTTR of approximately 30 minutes, exclusive of heavy (input and output) magnetics. Any section of the system can be shut down for maintenance purposes without risking interruption of power to the critical loads or injury to personnel. Following the maintenance functions, sections are brought back into service automatically by the operation of a single switch without causing any disturbance of the power supplied the critical load. In order to further assure reliability, all systems are extensively "burned-in" to ensure that any components containing latent defects of manufacture are replaced prior to shipment of any UPS.



SIMPLIFIED BLOCK DIAGRAM

AVTEL CORPORATION

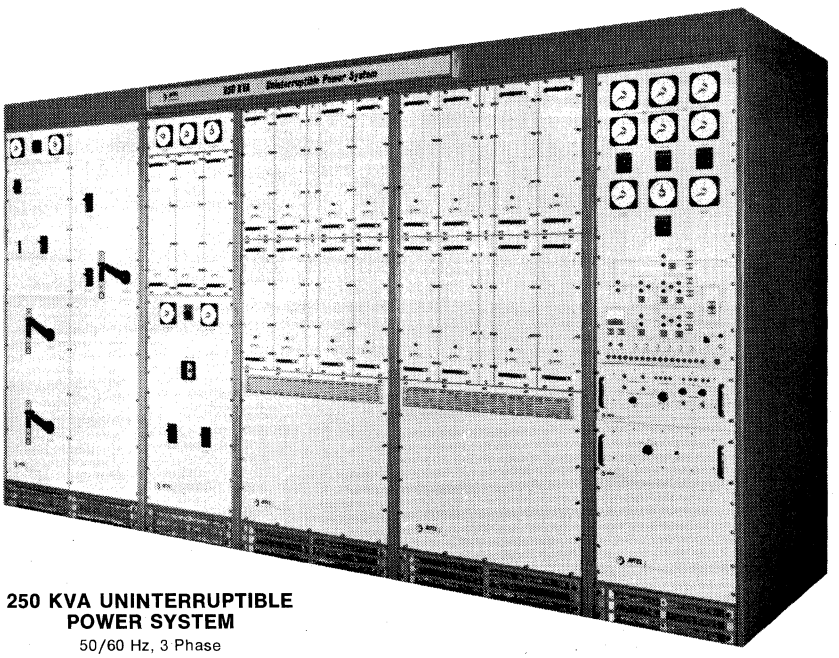
SOLID STATE AC POWER FOR CRITICAL APPLICATIONS

AVTEL



250 KVA UNINTERRUPTIBLE POWER SYSTEM
50/60 Hz, 3 Phase

AVTEL UPS are designed to provide these outstanding advantages:

TRUE SINEWAVE OUTPUT: The maximum harmonic distortion under the worst combination of conditions is less than 2%. Under normal operating conditions, less than 1.5% is typical.

TIGHT FREQUENCY CONTROL: The output frequency is completely unaffected by load and line variations. If desired, the output frequency can be phase-locked to the commercial line or other reference source.

MINIMUM MAINTENANCE: Modular construction throughout permits quick access to and exchange of any component. A MTTR of less than 30 minutes is typical. Cleaning the air filter is the only required preventive maintenance, other than battery watering. In non-redundant systems, the by-pass switch is used to supply power to the critical load directly from the commercial lines during maintenance.

LOW COST OF OWNERSHIP: Avtel's low maintenance, high efficiency, and trouble-free operation yield substantial savings over other approaches to uninterruptible power. This advantage becomes increasingly significant with time, and savings of over 50 percent overall in ten years ownership are not improbable.

SILENT OPERATION: Unlike rotary systems which produce substantial noise and vibration, these compact and silent units can be installed in close proximity to the load with which they are associated thereby avoiding expensive installations.

OPERATING SIMPLICITY: This equipment can be operated safely by non-technical personnel. Logically grouped meters, controls and status-indicating lamps make the operation of this equipment virtually self-explanatory. Fully automatic, instrument free systems are also offered.

HIGH POWER DENSITY: These systems are the smallest and lightest yet offered in these power ranges. For example, a 125 KVA system occupies only 35 square feet of floor space, exclusive of batteries.

UNPRECEDENTED EFFICIENCY: Operating efficiencies normally exceed 85%. This low dissipation allows laboratory operation without special cooling considerations.

COMPLETE INSTRUMENTATION: Meters, status indicators, and other instruments necessary for the measurement of all critical parameters are provided.

PHASE BALANCE: Poly-phase systems supply essentially balanced outputs despite substantial unbalance in phase loading.

IMPERVIOUS TO OVERLOADS: These units cannot be damaged by overloads or short circuits. Normal output is automatically reinstated upon removal of the overload.

RFI SUPPRESSION: Careful and effective filtration of both the input and output lines, together with ample shielding afford RFI attenuation far superior to other uninterruptible systems.

ALARM CIRCUITRY: Visual and audible alarms are provided to indicate loss of incoming power and switchover to secondary sources. Additional alarms pinpoint failures in the UPS itself in the remote possibility that they might occur. A separate alarm system indicates battery bank status including conditions of the atmosphere in the battery room.

CHOICE OF OUTPUTS: Avtel UPS can be ordered in standard 460 V, 60 Hz models or 50 Hz versions at voltage levels found in overseas installations. A complete line of 400 Hz models is also available.

AVTEL CORPORATION

DIVISION OF AIRTRONICS, INC. • 1130 EAST CYPRESS STREET • COVINA, CALIFORNIA 91722 • PHONE (213) 331-0661 • TWX (910) 584-1311

UPS SPECIFICATIONS

AVTEL'S Uninterruptible Power Systems are tailored to meet application requirements. Typical operating characteristics are:

INPUT

VOLTAGE: 460, 380, 208, ±15% as desired, 50, 60, 400 Hz ±20%, 3 or 4 wire.

INRUSH SURGE: Upon application of prime power to the uninterruptible power system, the input current shall not exceed 100% of the normal operating current with a 100% rating resistive load applied prior to turn-on.

EFFICIENCY:

A. Battery Charging System—94% nominal

B. Inverting System—88% nominal

C. Overall System Worse Case—80%

OUTPUT

VOLTAGE: Value as desired. The voltage regulation shall be ±1% relative to the set voltage for the combined effects of line, load and temperature.

FREQUENCY: The output frequency shall be 50, 60, or 400 Hz ±0.5% for the combined effects of line, load and temperature unless tracking the input line.

PHASE BALANCE: Under balanced load conditions, the phase voltages shall be equal within ±½%. Under any combination of phase load unbalance up to 50%, the phase voltages shall be within ±5% of the average of the 3 phases.

LOAD POWER FACTOR: The system shall be capable of producing full-rated power continuously at a load power factor of 0.7 lead to 0.7 lag. All regulation specifications shall be as stated above under the load power factor variation as set forth.

HARMONIC DISTORTION: 2% THD, maximum.

REGULATION RESPONSE TIME: The maximum regulation response time shall be 32 milliseconds under the following conditions: A 100% step function change in load from no-load to full-load, or full-load to no-load, and a step function change in line voltage from low-line to high-line, or high-line to low-line.

TRANSIENT AMPLITUDE: 100% step function variations in line and load shall not cause transients which depart more than ±7½% from the steady-state values existing prior to the initiation of the transient condition. Loss of prime power will cause a maximum transient of +0, −7½% with no output transient when prime AC power is restored.

RECOVERY TIME: The maximum recovery time to within ±2% of initial steady state value shall be 32 milliseconds under a 100% step function variation or loss of prime AC input power.

LOAD RATE: Upon application of AC input power, the battery charging system shall apply load to the AC source at a rate not exceeding 30% per second.

OUTPUT FREQUENCY CONTROL: ±0.5% or by an external synch signal from the input line. The design of the reference oscillators and the common synchronization line shall be so conceived that the failure of an oscillator shall not cause an interruption in power supplied to the critical loads.

PHASE LOCK AND BY-PASS: Manual and automatic systems tailored to applicable requirements are available.

PROTECTION PROVISIONS

INPUT CURRENT – Suitable circuit breakers will be provided on the input circuits to prevent consequential damage to the system in the event of internal fault.

OVERLOAD AND SHORT CIRCUIT: The equipment will contain internal protection against overloads and short circuits. In the event of overload conditions, auxiliary contact closures will provide visual alarms.

OVERHEAT PROTECTION: Each module shall incorporate temperature sensors to monitor the temperature of the components which will experience the greatest immediate temperature rise in the event of cooling system degradation or failure. The temperature sensors shall be so arranged as to provide visual alarms of an impending over-temperature condition. Should the temperature continue to rise to such levels as may result in component failures, the system shall revert to a fail-safe mode and this condition shall be indicated by illuminating an appropriately marked status indicating lamp.

POWER TRANSFER ALARM: In the event that prime power is lost, alarms will be provided to indicate this condition. The alarm shall continue until such time as the diesel standby generator successfully picks up the entire critical load and the battery ceases to discharge. At such time as battery discharge stops and the system is operating from standby power, a status indicating lamp shall illuminate to indicate this condition.

INSTRUMENTATION

QUALITY: All instruments will be 2% accuracy, taut band, ruggedized type.

AC INPUT POWER CIRCUITS: The AC input power shall be monitored by a voltmeter and ammeter with a line selector switch associated with each meter. Also, a frequency meter will be provided to monitor input frequency.

BATTERY DC BUS: The battery bus will be monitored by a DC voltmeter. Also, a center zero scale DC ammeter to indicate charge or discharge of the battery will be provided.

AC OUTPUT CIRCUITS: The AC output circuits shall be monitored by three ammeters and one voltmeter for the output lines. A frequency meter and input/output synchroscope will also be provided.

GENERAL PROVISIONS

BATTERY MOUNTING: The battery shall be mounted on open metal racks of corrosion-resistant material, or suitably protected against corrosion. The battery bank shall be fitted with a locking manual disconnect, and suitable fuses or breakers to prevent serious system and facility damage in the event of fault loads imposed on the bank.

BATTERY CAPACITY: The battery charger shall have sufficient continuous duty power handling capacity to support a full load at the system output and simultaneously recharge the battery from a minimum useful charge condition in a period of 8 hours. The charger shall be capable of supporting a 50% overload for 15 minutes without damage or degradation.

BATTERY EQUALIZATION MODE: The battery charger shall be equipped with an adjustable, automatically regulated circuit which shall raise the charger crossover voltage to equalize potential for the period recommended by the battery manufacturer.

BATTERY CONSIDERATIONS: Considerations relative to the batteries shall be in accordance with Federal Standard PPP-B-140 and W-B-134.

ENVIRONMENTAL CONSIDERATIONS

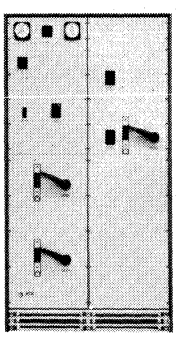
TEMPERATURE: The equipment shall meet all requirements of the specifications over the temperature range of 10-50°C.

HUMIDITY: The equipment shall suffer no degradation in performance in atmospheres containing 95% relative humidity.

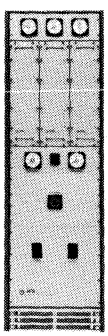
FUNGUS RESISTANCE: The equipment shall not incorporate any materials that are fungus nutrients and shall be thoroughly treated with a fungus-resistant varnish per MIL-V-173.

SHOCK AND VIBRATION: The equipment shall not suffer any damage or degradation of performance when subjected to shock and vibration as encountered in normal transportation and handling.

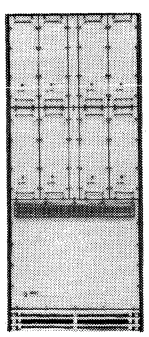
TYPICAL UPS BUILDING BLOCKS



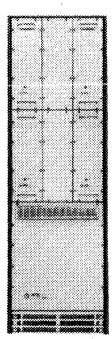
INPUT/OUTPUT/BYPASS MODULE (includes 175 KVA input transformer)



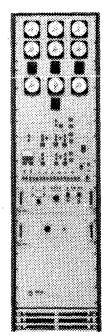
BATTERY CHARGER MODULE (power levels to 150 KVA)



125 KVA INVERTER MODULE



62.5 KVA INVERTER MODULE



STATUS AND CONTROL MODULE (typical for redundant systems)

Avtel offers its experience in the analysis of your requirements and will submit a proposal based on the lowest cost system consistent with these requirements. In addition to supplying the UPS, Avtel is capable of assuming overall installation responsibility providing all necessary standby power engine generator sets, battery banks, switchgear and system installation. Our extensive experience and capabilities are your assurance of a system and installation most ideally suited to your requirements. Contact your area representative or the factory for additional information.

AVTEL CORPORATION

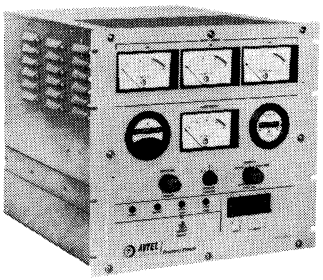
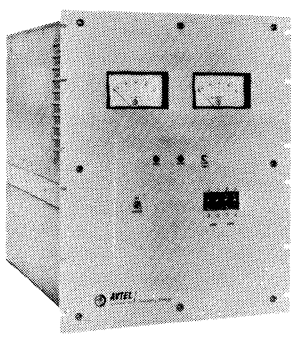
HIGH POWER SOLID STATE FREQUENCY CHANGERS

AVTEL

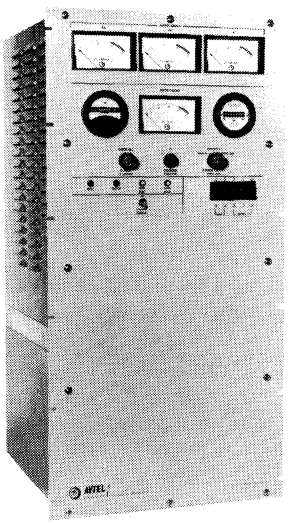


CR 074-3
7.5 KVA, 400 Hz, 3 Phase

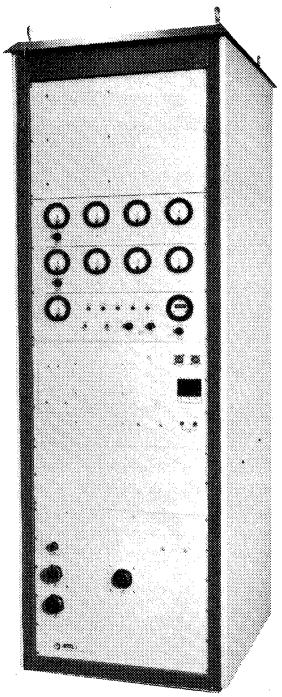
CR SERIES 2.5 TO 50 KVA—45-65 AND 400 Hz INPUT. 45-65, 350-450, OR 700-900 Hz OUTPUT WITH UNINTERRUPTIBLE POWER OPTION AVAILABLE ON MOST MODELS



CR 056-1
5 KVA, 60 Hz, 1 Phase



CR 204-3
20 KVA, 400 Hz, 3 Phase



CR 504-3
50 KVA, 400 Hz, 3 Phase

Efficient, reliable and silent in operation, these completely solid-state electronic systems are ideal for any application requiring AC power in the KVA ranges. In this series, there are 26 standard models in seven power ratings from 2.5 KVA to 50 KVA. Three output frequency bands are available from 45 to 65, 350 to 450, and 700 to 900 Hz. Most frequency and power ratings are available with either single or polyphase output. Unique electronic circuitry provides complete protection from overloads or short circuits.

These highly versatile and rugged units are capable of fulfilling the majority of AC power source requirements. Twenty-nine standard options are offered to meet virtually any special or unusual requirement for AC power.

The CR Series utilize many advanced techniques developed and proved by Avtel for highly critical military and aerospace applications. The unique design of these units, coupled with Avtel's rigid quality assurance and reliability program, ensures uncompromising adherence to published performance criteria.

Constructed with silicon semiconductors exclusively, these units are small, rugged and efficient. Most of the models are available with an uninterruptable power option providing the most reliable, transient free continuous source of AC power obtainable. Many other options are available and are tabulated at the top of the third following page.

The unique design of this equipment results in an AC source which is a direct replacement for motor alternator sets, but with the following superior characteristics:

- **Output frequency unaffected by load.**
- **Low accoustical noise.**
- **Efficiencies over 90%.**
- **Instant starting.**
- **Sinewave output with less than 2% total harmonic distortion.**
- **Ease of frequency variation.**
- **No maintenance required.**
- **Light weight.**
- **Impervious to overloads.**
- **Remote sensing.**
- **Remote programming.**

Specifications subject to change without notice

†Weights given are for unitized versions.

INPUT

VOLTAGE: 187 to 242 for nominally 115/200 volt input units. Allows connection to 230 three wire without modification.
±10% of nominal for all other AC inputs. See Options A thru G.

POWER:

Output Frequency Band:	Percent of Full Load Rating:
45-65 Hz	110
350-450 Hz	120
700-900 Hz	135

FREQUENCY: 45-65 Hz. See Options A, B, C & H.

OUTPUT

VOLTAGE: Adjustable. See Options I & K.

CURRENT: Adjustable. See Options J & L.

POWER RATING: Based on continuous duty.

FREQUENCY: Continuously adjustable over the entire operating band. See Options M thru R.

BANDS: 45-65, 350-450, 700-900 Hz.

REGULATION:
Voltage: ±1% or 0.5 V.
Current: ±1% or 1 ampere.
Frequency: ±0.50% for variable frequency operation. ±0.010% for fixed frequency operation.

DISTORTION: For linear loads, the output sine-wave contains less than 2% total harmonic distortion. See Option U.

POWER FACTOR: 0.7 lead to 0.7 lag for full rated power. Power factor loads to 0.2 are permissible with load ratings of 50%.

PHASE BALANCE: 2% typical deviation for 100% load unbalance in any combination. 0.25% for any balanced load.

TRANSIENT RESPONSE: Typically 20 ms but may vary from 4 to 75 ms depending on model and options.

INCIDENTAL MODULATION:
Amplitude: Varies 0.1 to 1% peak to peak depending on model and options.
Frequency: Less than 0.05% for variable frequency operation and negligible for fixed frequency operation.

PROTECTION CIRCUITS

LOAD: Widely adjustable current limiting capability can be set to the maximum normal requirements of the load. In the event of load malfunction, the unit will become a constant current source at the set limit.

OVERLOAD: The unit cannot be damaged by any overload or short circuit of transient or indefinite duration. Finite overloads are permitted for periods inversely proportional to the magnitude of the overload. When the permissible overload limitations are exceeded, the output voltage will reduce to such value as necessary to produce the load current limit set by the current adjust control. If the load exceeds 300% of ratings, the output voltage will reduce to zero instantaneously. Reduction of the load to specification limits or current control setting will automatically reinstate normal operation.

OVERHEAT: The output is interrupted by thermoswitches in the event of excessive internal temperatures. In such event, the cooling fan continues to operate and upon reduction of internal temperatures to specification limits, normal operation is automatically reinstated.

BACKUP PROTECTION: Both input and output power lines are protected by toggle-operated magnetic circuit breakers which double as the primary input and output power switches. In the event of electronic protection circuitry malfunction or component failure in the power system, these breakers will prevent consequential damage to the unit, its load or the input power source.

CONTROLS

INPUT: Toggle-operated circuit breakers.

OUTPUT: Toggle-operated circuit breakers through 15 KVA.

STANDBY: Toggle switch drives regulator to zero output condition in standby position.

VOLTAGE CONTROL: Adjusts output voltage.

CURRENT CONTROL: Adjusts output current limit.

FREQUENCY CONTROL: Adjusts output frequency.

FREQUENCY SELECTOR: Selects discrete frequencies. Options P & R only.

VOLTMETER SWITCH: Selects voltmeter circuit.

FUNCTION SWITCH: Selects operating mode. Options M thru O only.

METERS & INDICATORS

METER ACCURACY: 2% of full scale.

TYPE: Knife-edged, mirrored scale, taut-band construction.

METER FUNCTIONS: Input/Output voltmeter, Independent ammeter for each output phase.

INDICATORS:
Input power • Output power • Overload • Overheat • Phase sequence (3 phase units)

ENVIRONMENTAL

OPERATING TEMPERATURE: 0 to 50°C.

STORAGE TEMPERATURE: −20 to +71°C.

HUMIDITY: 0 to 95% R.H., non-condensing.

SHOCK & VIBRATION: Normal transportation and handling.

ELECTROMAGNETIC INTERFERENCE

Constructed in accordance with Military EMI/RFI requirements.

CONSTRUCTION

Welded frame covered with easily removable non-structural dust covers.
See Options X and Y.

LOW POWER SOLID STATE FREQUENCY CHANGERS

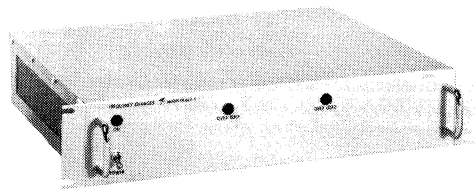
AVTEL

TR SERIES 250 TO 2000 VA — 45-450 Hz

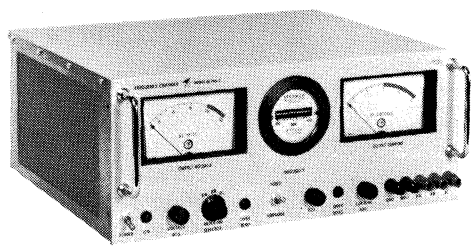
INPUT. 50/60, 400, 800, OR 1600 Hz OUTPUT
WITH UNINTERRUPTABLE POWER OPTION
AVAILABLE ON MOST MODELS

The low power Avtel TR Series Frequency Changers have all the advantages of the larger CR equipment illustrated on the preceding pages. Available in 20 standard models from 250 VA to 2000 VA, the TR Series supplies output frequencies in four different bands: 45-65 Hz, 350-450 Hz, 700-900 Hz, and 1500-1700 Hz.

As in the CR Series, the unique design of TR Frequency Changers ensures that output waveform and frequency are unaffected by changes in the load. The unit is quiet, maintenance free, and impervious to overloads and short circuits. Avtel's TR Series Frequency Changers are the ultimate solution to smaller load applications where well-regulated AC power is essential.



TR 054-3 (System)
500 VA, 400 Hz, 3 PHASE



TR 104-3 (Lab)
1000 VA, 400 Hz, 3 PHASE

*Third (and fourth) digit specifies frequency, for example: TR 024-3 = 400 Hz; TR 028-3 = 800 Hz; TR 0216-3 = 1600 Hz.

The TR Series systems version is designed for continuous operation. It has limited controls on the front panel (status indicators, breaker, and standby switch) with adjustments located on the rear of the unit. The laboratory version is fully metered, with frequency, voltage, and current adjustments on the front panel. This model is ideally suited for use as precision test equipment.

Specifications subject to change without notice

INPUT

VOLTAGE: 115 volts ±10% is standard. ±10% is allowed for Options A, E, F, G and H.

FREQUENCY: 45-65 Hz. See Options A and H. 45 to 1200 Hz also available upon request.

OUTPUT

VOLTAGE: 120 VRMS. Lab models, 95-130 VRMS.

CURRENT: 75-120% of full rating with automatic voltage-current crossover, adjustable on lab models.

FREQUENCY: ±0.5% fixed frequency is standard on system models. Crystal controlled output with 0.01% regulation at 50, 60, 400, 800, or 1600 Hz available. Continuously adjustable frequency over the respective band on lab models.

BANDS: 45-65, 350-450, 700-900, 1500-1700 Hz.

REGULATION:
Voltage: ±1%.
Current: ±2%.
Frequency: ±0.5% for variable frequency, +0.01% for fixed frequency, option Q.

DISTORTION: ±2% THD maximum for linear loads.

POWER FACTOR: 0.7 lead to 0.7 lag.

PROTECTION

Automatic protection and recovery from overloads, short circuits and over heating.

SYSTEM VERSION — CONTROLS AND INDICATORS

INPUT: Circuit breaker.

STANDBY: "Standby" toggle switch.

VOLTAGE CONTROL: Rear mounted screwdriver adjustment for output voltage.

CURRENT CONTROL: Rear mounted screwdriver adjustment for current limit.

FREQUENCY CONTROL: On variable frequency units only, option AE.

INDICATORS: Front panel indicators for input power, output power, overload and overheat.

LAB VERSION — CONTROLS AND INDICATORS

INPUT AND STANDBY: Identical to system version.

INDICATORS: Same as system version.

VOLTAGE, FREQUENCY AND CURRENT CONTROLS: Front panel knobs provided.

VOLTMETER: Input/Output voltmeter.

AMMETER: Output Ammeter.

FREQUENCY METER: On variable frequency models only, option S and T.

VOLTMETER-AMMETER SWITCH: Used to select input or output phase.

ENVIRONMENTAL

OPERATING TEMPERATURE: 0 to 50°C.

STORAGE TEMPERATURE: −20 to +71°C.

HUMIDITY: 0 to 95% R.H., non-condensing.

SHOCK AND VIBRATION: Normal transportation and handling.

ELECTROMAGNETIC INTERFERENCE

Constructed in accordance with Military EMI/RFI requirements.

CONSTRUCTION

Rack mount packaging is standard.
Connectors are rear-mounted with mating connectors provided.

OPTIONS

See top of following page for available options.

PRICE

For price quotations, specify model number, options and system or lab version.

AVTEL CORPORATION
DIVISION OF AIRTRONICS, INC. • 1130 EAST CYPRESS STREET • COVINA, CALIFORNIA 91722 • PHONE (213) 331-0661 • TWX (910) 584-1311

CR AND TR SERIES OPTIONS

Options A through G, and AB, AC, AD available on models indicated in table. Options H through AA available on all models.

OPTION	DESCRIPTION
A	Uninterruptible, on-line, AC/DC input power system. Output remains constant despite commercial line power failure without output transients at time of input power switchover. This option utilizes DC input from a battery bank and includes battery charging circuitry. Charge is controlled at an adjustable constant current to an adjustable voltage crossover and then is automatically reduced to a value sufficient to maintain the battery at full charge. See details on page 2.
B	Same as A with the addition of a manual, make-before-break, by-pass switch for taking UPS off-line for maintenance or other purposes.
C	Same as A with automatic bypass operation which switches the critical bus to the input line in the event of UPS output exceeding specification limits.
D	115 V, single-phase input.
E	230 V, single-phase input.
F	115/200, three-phase input.
G	460 V, three-phase input.
H	115/200, 45-450 Hz three-phase input. (460 V for 20 and 50 KVA units.)
I	Output voltage adjustable from 0 to 135 Vrms via front panel control for CR, 10 to 130 Vrms for TR.
J	Output current limit adiustable from 10-125% of rated output via front panel control.
K	Output voltage adjustable from 95 to 135 Vrms via front panel control for CR, 95 to 130 Vrms for TR.
L	Output current limit adjustable from 75-125% of rated current via front panel control.
M	External synchronization from pulse, sine or complex waveform sources.
N	Output phase lock for parallel on-line operation.
O	Phase lock and load coupler for parallel operation of 2 or more units. This option has provisions for alarm and automatic shut-down of a malfunctioning unit.
P	Fixed frequency operation in addition to standard variable frequency selectable by front panel switch. The fixed frequency has a tolerance of .01% for the combined effects of line, load and environmental extremes and can be supplied at any frequency within the band.
Q	Single fixed frequency operation in lieu of variable frequency. (0.01% tolerance).
R	Multiple fixed frequency operation, switch-selected. No variable frequency. (±0.01% tolerance).
S	Frequency meter, dial and pointer type. Covers full range of unit.
T	Frequency meter, Reed type. Covers full range of unit.
U	Output waveform—1% THD max.
V	Qualified to MIL-I-6181 or MIL-STD-826 as desired.
W	Running time meter, 0-9999 hours. Recycles at 10,000 hrs.
X	Unitized construction for application where rack mounting is not intended.
Y	Unitized construction, mounted on rubber-tired, full castering wheels. (CR models only).
Z	120V Delta Output. (3 phase models only).
AA	Switchable delta/wye output with dual-range meter scales and front-panel mode indicator.
AB	120/240 dual range output voltage for models with single phase output.
AC	120 VDC +15%, −20% input.
AD	240 VDC +15%, −20% input.
AE	Variable frequency operation (TR systems model only).

NOTE

Certain options effect equipment size and weight. When specifying options, please check with the factory on equipment physical characteristics.

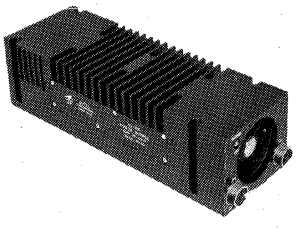
*When combined with option F.

Eleven years ago, Avtel specialized in solid-state power conversion equipment and has concentrated its efforts in this area ever since. Whatever your individual power conversion requirements may be, you are assured that our technical staff will give them prompt and skillful analysis. With over 200 custom designs and years of systems experience, these power conversion specialists appreciate the value of timely recognition and consideration of potential problem areas associated with integrating power sources into complex systems. In the interest of precluding systems interface problems, Avtel offers the assistance of its applications engineers to study your requirements and formulate suitable specifications.

STRAIN GAUGE POWER SUPPLY

This unit, developed for a research rocket aircraft, is one-third the size and weight of the equipment it replaces.
INPUT—115 Volts ac, 400 Hz, 3-phase
OUTPUT—12 Volts dc at 10 amperes
VOLTAGE REGULATION—0.1% for combined effects of line, load and temperature variations.



GUIDANCE SYSTEM POWER SUPPLY

A split phase static inverter, this unit supplies two outputs of 125 VA at 90° ±0.5° phase angle displacement. Output frequency is held to 0.001% and the true rms value of the output voltage is maintained within 0.1%.

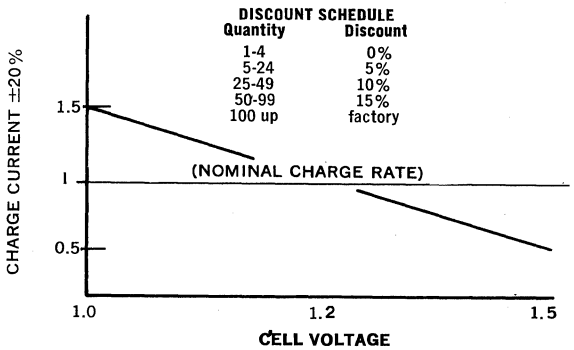
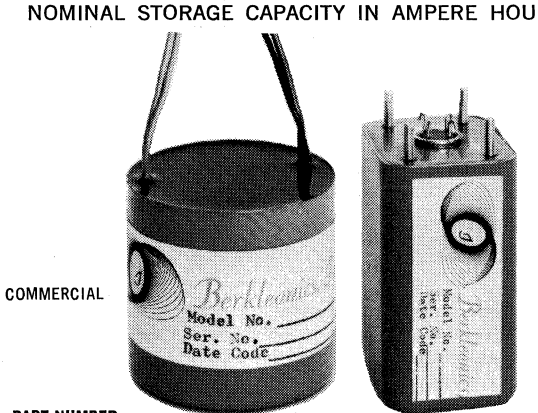
NOMINAL STORAGE CAPACITY IN AMPERE HOURS





These 115V, 60 Hz battery chargers are designed specifically for nickel cadmium and similar rechargeable cells. Average charge time for these chargers is 14 to 16 hours with no damage to cells or charger if the charger is left on indefinitely (See Fig. 1).

Variations of mechanical sizes and electrical specifications for every need are available on special request.

HOW TO SELECT AND SPECIFY A CEA POWER SUPPLY OR VOLTAGE REFERENCE

To select and specify a CEA Power Supply or Voltage Reference, enter the Charts for either the CEA6 Series (80°C) or the CEA5 Series (65°C) according to the required center voltage. The first column of the chart gives the center voltage ranges. The required output current determines the line within the selected center voltage range. The model number and price are found in the column of the required regulation class. The desired center voltage should be inserted in the boxes in the model number.

For example, to select and specify a CEA6 Series (80°C) Module with a center voltage of 16.5 volts and a rated current of 1.00 amps with Regulation Class B the charts should be entered where the first column states, "Choose any center voltage from 12.5-27.4." On the line for 1.00 amps, proceed to the column titled Regulation Class B. The model number as given in the charts should then have the desired center voltage, 16.5 volts, inserted in the boxes. The model number for this unit is then CEA6B165Y102 and the unit price is $130.

If options are required the option designation should be added to the model number. For example, should 100 db shielding with 10,000 megohms insulation resistance be required option designation T1 should be added to the model number producing the model number of CEA6B165Y102T1. Added charges and delivery time along with descriptions of the options are given on the options price list.

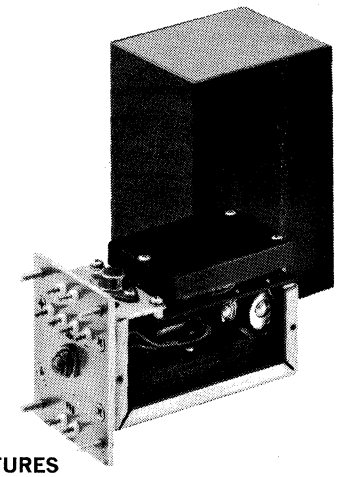
SINGLE OUTPUT MODULES

• CEA6 SERIES AND CEA5 SERIES •

MODULAR DC POWER SUPPLIES AND VOLTAGE REFERENCES



The CEA6 Series and CEA5 Series represent a new concept in power supply design. No other commercially available line offers total regulation including stability, temperature coefficient and ripple that permit use as a voltage reference, no other commercially available line offers standard features such as: regulation to 0.0005%; choice of exact center voltage; 20 db isolation (up to 100 db available optionally); and temperature coefficient to 0.0005%.

OUTPUT VOLTAGE AND CURRENT

Any center voltage from 3.5 to 500 volts may be selected at rated currents of 50 milliamps to 25 amps. The ability to select any center voltage always provides the desired center voltage, eliminating compromise.

REGULATION

CEA offers four classes of regulation to meet the varied requirements for Modular DC Power Supplies and Voltage References. All specifications are GUARANTEED—not typical.

The GUARANTEED stability for forty hours at constant temperature is better than the line plus load regulation specification. For example, the forty hour stability of a Class D regulation unit is better than ±0.0005% of the output voltage. The long term (two months) stability is better than twice the line plus load regulation specification.

For systems which require an absolute minimum ripple, CEA provides modules with RMS readings as low as 0.0003% to satisfy laboratory and standards requirements.

All modules are tested with performance recorded to ensure compliance with specifications.

Class of Regulation	Guaranteed Line Regulation for 10% Line Change	Guaranteed Load Regulation for No Load to Full Load	Guaranteed Temperature Coefficient per Degree C	Guaranteed Stability for 40 Hours	Guaranteed RMS Ripple
A	±0.01%	±0.04%	±0.01%	±0.05%	0.01%
B	±0.002%	±0.008%	±0.005%	±0.01%	0.001%
C	±0.0005%	±0.002%	±0.001%	±0.0025%	0.0005%
D	±0.0001%	±0.0004%	±0.0005%	±0.0005%	0.0003%

FEATURES

- Regulation from 0.05% to 0.0005%
- Temperature Coefficient from 0.01% to 0.0005% per Degree C
- Isolation 20 db Standard, 100 db Optional
- Any Center Voltage from 3.5 to 500 VDC
- Rated Currents to 25 Amps
- Output Voltage Adjustment ±5% Standard, ±50% Optional
- Input 105-125V, 50-420 Hz
- All Silicon and Repairable
- No Turn-On Overshoot
- Series Starting Standard
- Remote Sensing Standard
- Output Floats to ±500 Volts

TABLE W—Heat dissipation area of standard power supply without heat dissipation radiators.

The information presented in this section will enable the designer to determine if cooling is required and if so to select the most optimum method of cooling.

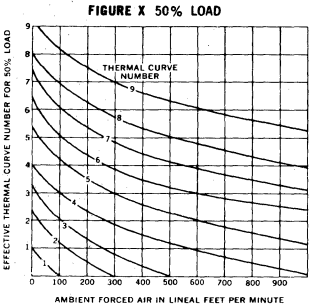
For modules with Thermal Curve Nos. 1, 2 and 3, heat dissipation area in addition to that provided by the standard module is not usually required for operation up to full load. For modules with Thermal Curve Nos. 4 and 5, additional heat dissipation area such as the instrument chassis or heat dissipation radiators will usually be required for operation at full load.

The base (terminal end) is thermally connected to the power output transistor; therefore, the base must make positive mechanical and thermal bond to the mounting body. Silicone grease should be applied to the base of the power supply and the mounting body must be a smooth metallic surface.

The maximum temperature the base will achieve, the heat dissipation area required, the airflow velocity in lineal feet per minute required or the maximum allowable ambient temperature may be determined by following the appropriate procedure given below.

The total heat dissipation area may be determined by totaling the area given for the appropriate case size from Table W, the effective surface area of the mounting body which may be considered as heat dissipation area, and the area of any selected CEA Thermal Radiators.

FIGURE X 50% LOAD



CASE 1

To be determined: MAXIMUM TEMPERATURE BASE WILL ACHIEVE.

Known: 1. Ambient temperature in °C. 2. Airflow velocity in feet per minute. 3. Heat dissipation area provided in square inches.

Procedure: 1. Choose the required Power Supply/Voltage Reference (voltage and current) from the tables. The Thermal Curve Number for the selected unit is given in the next to last column on the chart. 2. Determine the Effective Thermal Curve Number by entering Figure X or Y (according to the intended operation of approximately 50% or 100% of load) along the X-axis at the known velocity of the air which will pass over the Power Supply/Voltage Reference. Proceed up the line representing this airflow velocity to the Thermal Curve Number selected in Step 1. Then proceed to the left to the Y-axis to determine the Effective Thermal Curve Number. 3. Enter Figure Z along the X-axis at the known Heat Dissipation Area. Proceed up the line representing this Heat Dissipation Area to the Effective Thermal Curve Number. Proceed to the left to the Y-axis to determine the Base Temperature Rise above ambient in °C. 4. Add the Base Temperature Rise above ambient determined in Step 3 to the known Ambient Temperature to determine the Maximum Temperature the base will achieve.

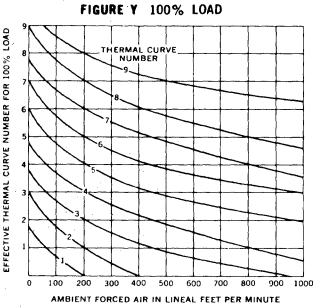
CASE 2

To be determined: HEAT DISSIPATION AREA REQUIRED.

Known: 1. Ambient temperature in °C. 2. Airflow velocity in lineal feet per minute. 3. Maximum base temperature rating (65°C for CEA5 Series or 80°C for CEA6 Series).

Procedure: 1. See Procedure No. 1 of Case 1. 2. See Procedure No. 2 of Case 1. 3. Enter Figure Z along the Y-axis at the known Maximum Base Temperature Rating. Proceed across the line representing the Maximum Base Temperature rating to the Effective Thermal Curve Number determined in Step 2 and then proceed down to the X-axis to determine the total Heat Dissipation Area required. 4. Subtract from the total Heat Dissipation Area required determined in Step 3, the Heat Dissipation Area of the Standard unit without Heat Dissipation Radiators to determine the additional Heat Dissipation Area required. Table W gives the Heat Dissipation Area of the Standard units without Heat Dissipation Radiators. 5. This additional Heat Dissipation Area may be supplied either by the chassis to which the Power Supply/Voltage Reference is mounted or by adding Heat Dissipation Radiators to the base of the Power Supply/Voltage Reference. The correct Heat Dissipation Radiator may be chosen from the table.

FIGURE Y 100% LOAD



CASE 3

To be determined: AIRFLOW VELOCITY IN LINEAL FEET PER MINUTE.

Known: 1. Ambient temperature in °C. 2. Maximum base temperature rating (65°C for CEA5 Series or 80°C for CEA6 Series). 3. Heat dissipation area provided in square inches.

Procedure: 1. See Procedure No. 1 of Case 1. 2. By subtracting the Ambient Temperature from the Maximum Base Temperature Rating, the maximum allowable Base Temperature Rise Above Ambient is determined. 3. Enter Figure Z along the Y-axis at this value of Maximum Base Temperature Rise Above Ambient and proceed to the right to the vertical line representing the Heat Dissipation Area provided. The intersection of these two lines defines the Effective Thermal Curve Number. 4. Enter either Figure X or Y along the Y-axis at the Effective Thermal Curve Number determined in Step 3 and proceed to the right to the intersection of that line and the Thermal Curve Number determined in Step 1. Proceed down from the intersection to the X-axis to determine the required Ambient Forced-Air in lineal feet per minute.

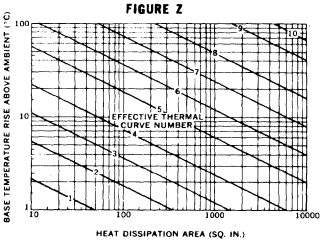
CASE 4

To be determined: MAXIMUM AMBIENT TEMPERATURE ALLOWABLE IN °C.

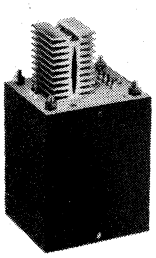
Known: 1. Airflow velocity in lineal feet per minute. 2. Maximum base temperature rating (65°C for CEA5 Series or 80°C for CEA6 Series). 3. Heat dissipation area provided in square inches.

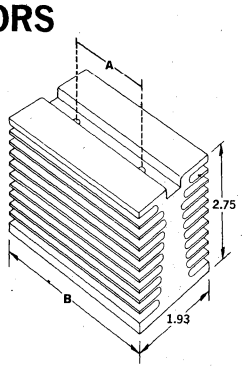
Procedure: 1. See Procedure No. 1 of Case 1. 2. See Procedure No. 2 of Case 1. 3. See Procedure No. 3 of Case 1. 4. The Maximum Temperature allowable is then determined by subtracting the Base Temperature Rise Above Ambient from the Maximum Base Temperature Rating.

FIGURE Z



THERMAL RADIATORS





Models CEATR1 and CEATR2 Thermal Radiators are designed for use with all CEA6 Series and CEA5 Series Modular DC Power Supplies and Voltage References. CEA Thermal Radiators may be mounted directly onto the module base or on the opposite side of the mounting body. The mounting hole configuration in the Thermal Radiators and the base of each Module are symmetrical so that the radiators may be mounted for airflow in either direction across the base of the Module.

Under some operating conditions it may be necessary to employ Thermal Radiators to provide the heat dissipation area required. Procedures to determine the required heat dissipation area are described above.

A coating of silicon grease should be applied on each mating surface of the Module, mounting body and Thermal Radiator. The mounting body must be a smooth metallic surface.

Case sizes MA through NA are designed for mounting one Model CEATR1 Thermal Radiator. Case sizes PA through TA are designed to accept multiple Thermal Radiators according to the requirements of the operating conditions.

Thermal Radiator Model No.	Radiation Area (Sq. In.)	Dimensions A	Dimensions B	Weight (Pounds)	Price Each
CEATR1	75	1.000	1.93	0.75	$10.00
CEATR2	150	2.000	3.93	1.50	$15.00

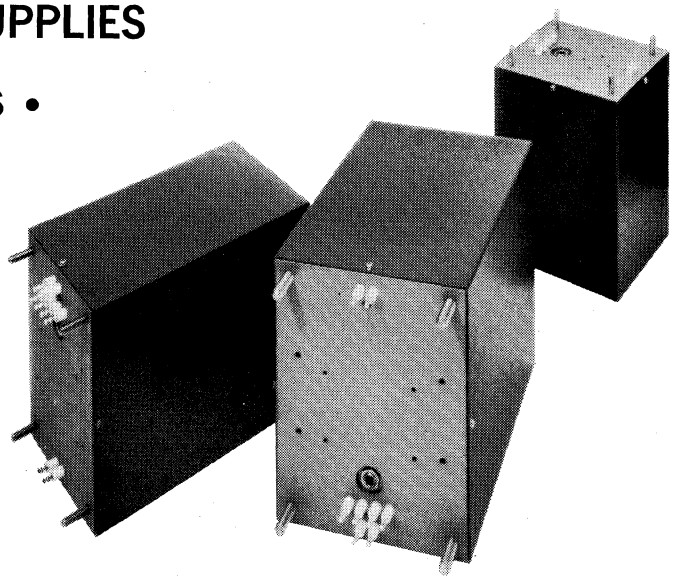
DUAL SUPPLIES

TRACKING MODULAR DUAL SUPPLIES

• CEAD5 AND CEAD6 SERIES •



FEATURES

- Regulation from 0.05% to 0.0005%
- Tracking from 0.1% to 0.001%
- Temperature Coefficient from 0.01% to 0.0005% per Degree C
- Isolation 20 db standard, 100 db optional
- Any Center Voltage from 3.5 to 500 VDC
- Rated Currents to 25 Amps
- Output Voltage Adjustment to ±50% Optional
- Input 105-125V, 50-400 Hz
- All Silicon and Repairable
- No Turn-On Overshoot
- Series Starting Standard
- Remote Sensing Standard
- Output Floats to ±500 Volts

Now get 2 of CEA's high performance modular supplies in one package at less cost. The CEA duals have the same guaranteed specifications as the CEA6 Series, and, in addition, tracking between the units equal to two times the regulation class of the unit. For example, a dual power supply with Class C regulation (.0025%) will have tracking to .005%. The dual outputs can be independent and isolated from each other if specified by option K. Standard duals have fixed output voltages within 1% of specified voltages. Externally adjustable units are available optionally.

Class of Regulation	Guaranteed Line Regulation for 10% Line Change	Guaranteed Load Regulation for No Load to Full Load	Guaranteed Temperature Coefficient per Degree C	Guaranteed Stability for 40 Hours	Guaranteed RMS Ripple	Guaranteed Tracking
A	±0.01%	±0.04%	±0.01%	±0.05%	0.01%	±0.05%
B	±0.002%	±0.008%	±0.005%	±0.01%	0.001%	±0.01%
C	±0.0005%	±0.002%	±0.001%	±0.0025%	0.0005%	±0.0025%
D	±0.0001%	±0.0004%	±0.0005%	±0.0005%	0.0003%	±0.0005%

SELECTING A MODEL NUMBER

The model number of the desired dual supply is obtained by choosing the model number of the single output supply of the CEA5 or CEA6 Series having the desired characteristics and then inserting a D in the model number after the CEA. For example, a dual 15 volt, 100ma, Class B regulation, 80°C unit would be designated as CEAD6B150Y101.

SPECIFICATIONS

The physical size of the dual supply is exactly two case sizes larger than that required for the single output supply. In the example above, the case size would be JA, which is two sizes larger than the GA required for a CEA6B150Y101. The maximum size dual package is limited to size TA, therefore, the choice of single output supplies that can be made into duals is limited to those with case size RA or smaller. There are no other restrictions as to the currents and voltages available in duals from the standard CEA5 and CEA6 Series except that the two outputs will have identical voltages and current ratings. All other specifications are identical to the CEA5 or CEA6 Series, except that standard duals have fixed output voltages within 1%.

PRICE

The price of the dual supply is obtained by taking the price of the single output CEA5 or CEA6 Series equivalent, multiplying by a factor of 2 and then reducing by 10%. For example, if a particular single output CEA6 Series supply cost $100 the dual version would cost $180 (2 x $100 = $200, less 10% = $180).

DELIVERY

3 weeks for Class A & B, 4 weeks for Class C & D.

OPTIONS

Many outstanding features are available optionally, such as isolated dual outputs, shielded transformers to 100db, voltage and current limiting, wide adjustment ranges (to ±50%), etc. Applicable options are shown on the option price list.

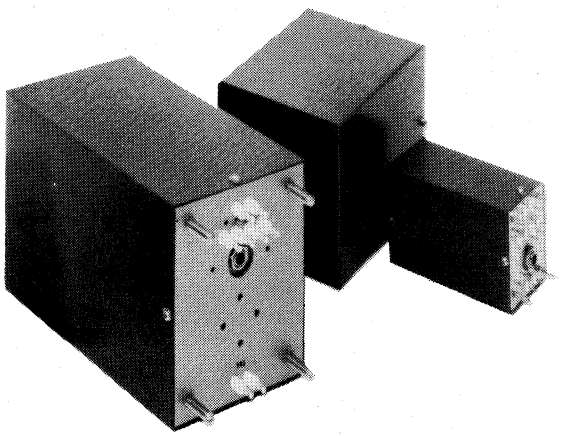
TELEPHONE: (213) 359-9261

CONSTANT CURRENT SUPPLIES

CONSTANT CURRENT MODULAR SUPPLIES



• CEAC5 AND CEAC6 SERIES •

FEATURES

- Current regulations from .5% to .005%
- Temperature coefficients from .1% to .005%/°C
- Isolation 20 db standard, 100 db optional
- Rated currents to 5 amps
- Compliance voltages to 200 Volts
- Output current adjustment to ±50%
- Repairable
- All Silicon
- Output Floats to ±500 Volts

CEA now introduces a constant current version of the CEA5 and CEA6 Series of constant voltage supplies. The constant current units have four regulation classes where all important specs are combined in the proper ratios with each other:

Class of Regulation	Guaranteed Line Regulation for 10% Line Change	Guaranteed 0 to 100% Rated Voltage Change	Guaranteed Temp. Coefficient per Degree C	Guaranteed Stability for 40 Hrs.	Guaranteed RMS Ripple
A	±.1%	±.4%	±.1%	±.5%	.1%
B	±.02%	±.08%	±.05%	±.1%	.01%
C	±.005%	±.02%	±.01%	±.025%	.005%
D	±.001%	±.004%	±.005%	±.005%	.003%

These units operate within specifications into impedances ranging from a short circuit to whatever value gives rated voltage.

HOW TO SELECT THE MODEL NUMBER

1. Multiply the desired rated current (limited to 5 amps) by 5.
2. Determine the maximum compliance voltage desired (limited to 200 volts).
3. Determine the class of regulation desired by letter, A, B, C or D.
4. Determine the base temperature for your application (65°C or 80°C).
5. Using the above four basic specifications, **choose** from the CEA5 (65°C) **or** the CEA6 (80°C) charts the Model number of the equivalent constant voltage supply. This will also give the price, size, weight and thermal curve. **Insert** the letter C after the CEA and before the first number in the Model number.

Example: A constant current supply having a rated current of 100ma and a compliance voltage of 50 volts is desired with Class B current regulation in an 80°C unit. By multiplying the desired current by 5 (500ma) and looking at the CEA6 Model number charts for 50 volts, 500ma, & "B" regulation, we find the equivalent constant voltage Model number to be CEA6B500Y501, priced at $160, case size MA, and thermal curve #5. Convert this model number to the desired constant current supply by inserting a C as shown: CEAC6B500Y501.

In a nutshell, by derating a CEA constant voltage supply to 20% of rated current, it can be converted to a constant current supply with wide output voltage characteristics (zero to rated volts).

PRICE AND DELIVERY: Same as equivalent CEA5 or CEA6 Series.

SPECIFICATIONS: Other than the regulation classes specified above, all other specs are identical to those for the equivalent CEA5 or CEA6 Model, including size, weight, and thermal curve. There is however, a maximum limit of compliance voltage at 200 volts, and a maximum limit on regulated current at 5 amps in the standard line. CEA invites your inquiry for both higher currents and higher voltages.

OPTIONS: As shown in the option price list, constant current supplies can be supplied with a multitude of features, such as 100DB shielded transformers (ideal for strain gage supplies), voltage limiting, wide adjustment range (to ±50%), etc.

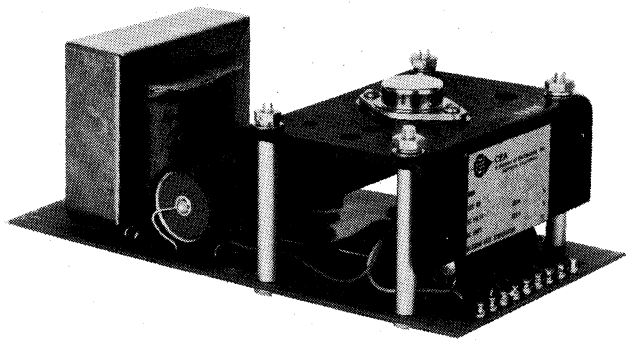
CARD SUPPLIES

CARD TYPE MODULAR SUPPLIES

• CEA7 SERIES •

Precision Voltage on a Card
At The Lowest Price

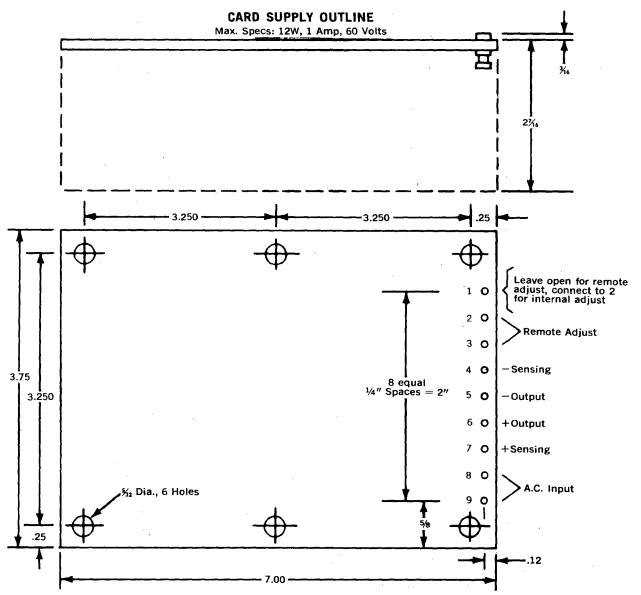


FEATURES

- Regulation from 0.05% to 0.0005%
- Temperature Coefficients from 0.01% to .0005%/°C
- Isolation 20 db standard, 100 db optional
- Rated Voltages to 60 Volts, Currents to 1 Amp
- Input 105-125V, 50-400 Hz
- All Silicon
- No Turn-On Overshoot
- Series Starting Standard
- Remote Sensing Standard
- Output Voltage Adjustment to ±5% Standard, up to ±50% Optional
- Output Floats to ±500 Volts

NOW — CEA's precision power supplies on a card — at less cost! The new CEA7 Series card supplies have identical electrical specifications to the CEA6 Series, including the availability of four classes of regulation. The wide variety of voltages and currents modules are all on one size printed circuit board and adaptable to any plug-in card or mounted In any chassis with four screws and six connections. The CEA7 Series with Class C & D regulation make ideal reference units for many applications in computers and instrumentation systems.

Class of Regulation	Guaranteed Line Regulation for 10% Line Change	Guaranteed Load Regulation for No Load to Full Load	Guaranteed Temperature Coefficient Per Degree C	Guaranteed Stability for 40 Hours	Guaranteed RMS Ripple
A	±0.01%	±0.04%	±0.01%	±0.05%	0.01%
B	±0.002%	±0.008%	±0.005%	±0.01%	0.001%
C	±0.0005%	±0.002%	±0.001%	±0.0025%	0.0005%
D	±0.0001%	±0.0004%	±0.0005%	±0.0005%	0.0003%



SELECTING A MODEL NUMBER

Select the model number from the CEA6 Series charts by using the voltage, current, and regulation desired. Then, after the letters CEA in the model number, merely replace the 6 with a 7. For example, suppose the characteristics of a Model CEA6C100Y101R (10 volt, 100ma, Class C regulation) are desired in the card series; the correct card type model number would be CEA7C100Y101R.

SPECIFICATIONS

The maximum current obtainable in the CEA7 Series is 1.0 amps, the maximum voltage is 60 volts, and the maximum output power is 12 watts. All of these conditions must be met in selecting a card type supply.

The maximum dimensions of the card are 2¾ thick by 3¾ by 7 inches. The card fits wherever it is needed and connections are as shown in the outline drawing.

PRICE AND DELIVERY

Base price of a CEA7 Series supply is calculated from CEA6 Series prices by subtracting $20 from the equivalent CEA6 Series price.

Delivery is 2-3 weeks on Class A & B, and 4 weeks on Class C & D.

OPTIONS

A multitude of features are available optionally as shown on the options price list. Included are shielded transformers (100db), current and voltage limiting, wide adjustment ranges, etc.

LINE ISOLATORS

HIGHLY SHIELDED LINE ISOLATORS

FEATURES

- Stops High-Frequency Line Transients
- Stops 60 cps Leakage Current
- Breaks AC Power Ground Loops
- Portable — Ready to Plug In and Use Anywhere
- 0.1 to 2 KVA Units Available From Stock to Two Weeks

DESCRIPTION

This new series of highly-shielded power Line Isolators offers the systems and laboratory engineers an opportunity to fully isolate electronic test equipment such as oscilloscopes, DVM's, power supplies, oscillators, amplifiers, counters, VTVM's and signal conditioning equipment. For example, with a Line Isolator connected between the power source and an oscilloscope, electrical measurements may be made without fear of tripping circuit breakers or blowing fuses because of power ground loops. Most high-frequency line transients are capacitance-coupled through standard power transformers (500 to 5000 pfd), and cause considerable unexplained interference. Reduction of such coupling capacity is the CEA secret to interference-free performance and high common mode rejection. CEA offers three choices of Line Isolators with reduced coupling capacity; 0.01 pfd, 0.001 pfd, and 0.0005 pfd. The effect of input-to-output coupling capacity is illustrated by the impedance of that capacity at various frequencies (5000 pfd for an unshielded transformer).

Frequency	Impedance of Capacity in Megohms			
	5000 pfd	0.01 pfd	0.001 pfd	0.0005 pfd
60 Hz	0.53	265,000	2,650,000	5,300,000
100 Hz	0.32	160,000	1,600,000	3,200,000
1 KHz	0.032	16,000	160,000	320,000
10 KHz	0.0032	1,600	16,000	32,000
100 KHz	0.00032	160	1,600	3,200
1 MHz	0.000032	16	160	320
10 MHz	0.0000032 (3.2Ω)	1.6	16	32

2000	17.3	9	9	9	55	CEA15	200.00	CEA25	275.00	CEA35	370.00

Aside from the standard models listed, CEA manufactures custom isolators up to 10 KVA and to meet particular requirements such as special shapes, sizes, output and input voltages and environmental conditions. CEA also makes custom shielded power and audio transformers, as well as a standard line of shielded modular DC supplies. Custom item deliveries average 4 weeks ARO.

TECHNICAL SPECIFICATIONS

Isolation:	Input-to-output coupling capacity; less than 0.01, 0.001, or 0.0005 pfd. Input-to-output DC resistance; greater than 10,000 megohms.
Input:	95-135 VAC, 50-65 cps.
Output Voltage:	Within 2% of the input voltage, from no load to full load.
Output Current:	See model chart.
Efficiency:	Better than 95%.
Mechanical:	Unit has chrome handle, deep drawn case with grey baked enamel finish, 6 ft. shielded line cord, and non-scuff feet.

The new CEA Isolators are easily rack-mounted by removing the four mounting feet and using the #8-32 inserts for bolt mounting.

SHIELDED LINE CORDS FOR ISOLATOR OUTPUTS

To make optimum use of CEA Line Isolators, CEA offers specially designed shielded line cords in two styles and several lengths. Style A can be used as an extension cord for equipment that has a line receptacle mounted at the chassis (such as Tektronix scopes). Style B has stripped and tinned leads on one end and can be installed into equipment as a direct replacement for unshielded line cords (such as Hewlett-Packard equipment). The plugs on these cords, as well as the cable, are shielded and are constructed of the finest materials available. Other lengths, current ratings, and connectors are available on request.

BULOVA AC POWER SUPPLIES

Features

All new . . . with more VA per output per dollar . . . Bulova AC Power features—Fully Regulated Sine Wave—All Solid-State Design—Up to 1000-VA Output—Protected Input/Output

Performance Specifications:

OUTPUT:

Frequency Output: 50 or 60 Hz (standard)—any other specific frequency custom

Frequency Accuracy: ±1%, ±.015% or ±.005%

Temperature Range: 0°C to +50°C

Wave Shape: Sine Wave, 3% Distortion max.

Output Voltage: 115 or 230 V AC nominal

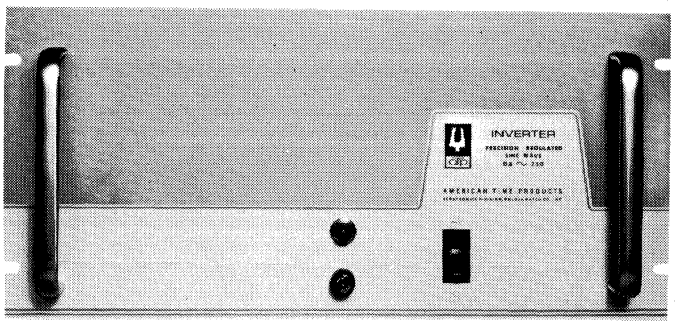
Voltage Regulation: ±1% any combination of full line and load change

INPUT:

115V AC or 230V AC, ±10%; 22 to 30V DC Normal (11 to 15V DC, and 45 to 56V DC available)

Some models available from stock . . . custom designs to meet special needs for systems, equipment or laboratory use, up to 2000 VA and ±.005% frequency accuracy. Meters are optional.

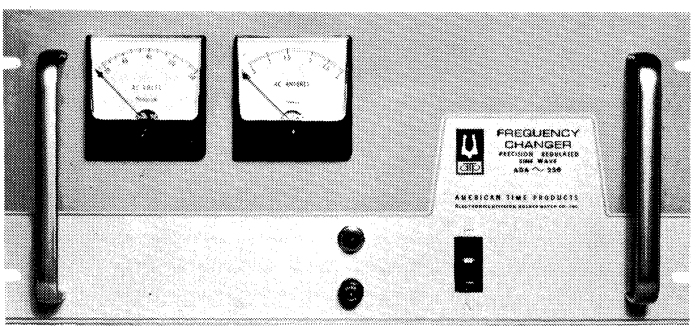
INVERTERS (Standard)



Type	Input VDC	Output VA	Output Freq.	Output Volt	Wt. Lbs. (2)	Ht. In.
DA-250S	22-30	250	50 or 60	115(1)	70	8 3/4
DA-500S	22-30	500	50 or 60	115(1)	130	10 1/2

(1) 230 Volt Available (2) For 50Hz, add about 5 lbs.

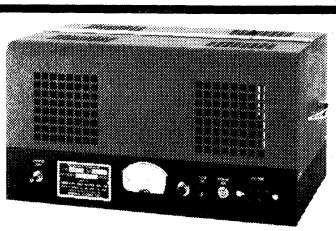
FREQUENCY CHANGERS (Standard)



Type	Input VAC + 10%	Input Freq. Hz	Output VA	Output Freq.	Output Volt	Wt. Lbs. (2)	Ht. In.
ADA-250S	115/230	47-65	250	50 or 60	115(1)	80	8 3/4
ADA-500S	115/230	47-65	500	50 or 60	115	130	10 1/2

(1) 230 Volt Available (2) For 50Hz, add about 5 lbs.

AC POWER SUPPLY Type 211C-75 Watt

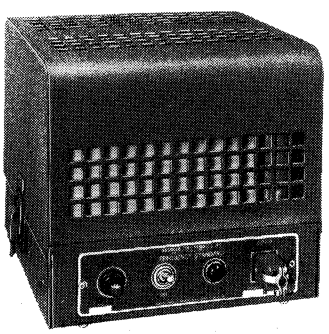


Input Voltage—110-125V, 50 to 400 cycles
Input Wattage—250 at 75 watts out, 125 at 0 watts out
Output Voltage—0 to 125 volts
Output Load—180 ohms and up
Distortion—8% maximum
Source Impedance—Approximately 25 ohms
Output Frequency—As specified on nameplate (50, 60, 100, 400 and 500 cycles are standard, others on special order)
Frequency Accuracy—±20 parts per million .002% from 15°to 35°C.
Size—211C—17" wide, 10" deep, 9" high; 211CP—Rack mounting type, 19" wide, 10" deep, 8 3/4" high.
Weight—211C—25 lbs., 211CP—30 lbs.

AC POWER SUPPLY, 10 and 20 WATTS—MODELS 2005A & 2005A-2

This unit is ideally suited for synchronous motor drives, chronographs, stroboscopes, generator frequency control, running timers and general laboratory use. Five external clocks can be driven from this unit.

SPECIFICATIONS—FREQUENCY: 50 cps to 2000cps. Any fixed frequency; OUTPUT: 10 watts at 115 volts (Model 2005A); ACCURACY: Up to ±.001% from 15°C to 35°C; INPUT: 115V AC, 50cps to 400cps, 75 watts. 220V AC unit available; WAVE SHAPE: Sine wave; TEMPERATURE: As low as −55°C to as high as 85°C.



Manufacturer of the widest range of Frequency Control Components: Crystals ● Crystal Oscillators ● Crystal Filters ● LC Filters ● Tuning Forks ● Fork Oscillators ● Ovens ● Coils ● Servo Amplifiers

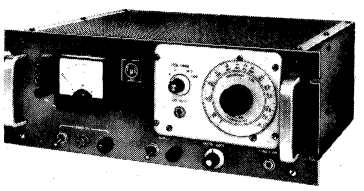
single phase AC power supplies

NS series
70VA to 350VA



MODEL NS175-7A-V

- **Fixed and adjustable output frequencies between 45 and 6000 cycles.**
- **Interchangeable Oscillators** . . . Oscillators are interchangeable via quick disconnect; frequency range and/or frequency stability may be changed at any time merely by replacing oscillator module.
- **Excellent frequency stability** . . . Fixed frequency models stable to ±0.001%. Variable frequency models stable to ±0.1%.
- **Low distortion sine wave output** . . . less than 1% total harmonic distortion between 300 and 1000 cycles, less than 3% between 45 and 6000 cycles.
- **Each model can be operated either as a precision AC power supply or as a wide band audio power amplifier.**
- **Constant voltage output** . . . 0.5% regulation for no load to full load change. Response time less than 50 microseconds.

REGULATED POWER AMPLIFIERS

MODEL	OUTPUT POWER VOLT-AMPERES	*DIMENSIONS H x W x D	WEIGHT (APPROX.) LBS.
NS70	70	7″ x 19″ x 14″	53
NS120	120	7″ x 19″ x 14″	57
NS175	175	7″ x 19″ x 14″	60
NS350	350	8¾″ x 19″ x 20¾″	115

*Dimensions apply to standard rack mount models. Add ¾″ to height if bench adapters are included.

STANDARD OSCILLATORS**

OUTPUT FREQUENCY	FREQUENCY STABILITY ±0.25%	±0.1%	±0.01%	±0.001%

Adjust. 300-2000 cps	—6A	—6B	X	X
Adjust. 45-6000 cps	—7A	X	X	X

****AUDIO AMPLIFIER ONLY:** Each model is also available as an audio power amplifier only (without a built-in oscillator) with a full power range of 45-6000 cps. All standard models (with or without oscillator) include an input signal jack for use with external signal source. Specify the Basic Power Supply Model and Suffix # (—JA) if oscillator is not required.

SPECIFICATIONS

INPUT SERVICE: 115V ±5%, 1ø, 47-65 cps.
OUTPUT CONFIGURATION: Single phase, 2 wire floating.
OUTPUT VOLTAGE: Adjustable 0-125 volts rms-by front panel gain control; full power available at 110-125 volts.
DUTY CYCLE: Continuous duty at rated output.
VOLTAGE REGULATION: Less than 0.5% for no load to full load change; ±0.5% for ±5% input voltage change (from 115V.) .
LOAD POWER FACTOR: 0.7 lead or lag to unity at rated output; wider power factor range at derated output.
OUTPUT WAVE SHAPE: Sine wave with less than 3% total harmonic distortion over the 45-6000 cps frequency range; less than 1% 300-1000 cps.
RESPONSE TIME: Less than 50 microseconds.
HUM and Noise: 60 db below maximum output voltage.
FREQUENCY RANGE: Each model can be driven at full power from an external signal source over a 45-6000 cycle frequency range. Output frequencies of built-in oscillators are tabulated above.
EXTERNAL SIGNAL: 5 volts rms required for rated output. Signal input impedance 600 ohms single ended.

METERS: Output voltmeter is furnished as standard equipment on model **NS350.** Voltmeter is available as accessory for models **NS70, NS120 & NS-175;** specify suffix (—V).
TERMINATIONS: Output terminals are furnished both front and rear, five way binding posts on front and barrier strip on rear. Input power termination is rear mounted barrier strip. Signal input is via jack mounted on front panel.
PROTECTION: Models rated at 175VA or less are protected against overload and short circuit by output fuse. Model **NS350** features output overload relay protection and front panel reset. Internal component failure will remove the power into the system by means of a blown line fuse.
CONSTRUCTION: Standard 19″ rack mount construction with full dust covers. Bench adapters available as accessory, specify suffix (—C).
FINISH: Front panels finished in satin green enamel. Panel marking is white. Chassis surfaces are protected with yellow iridite.

HOW TO ORDER

Standard NS series power supplies may be ordered directly from the catalog by specifying both the Basic Power Supply Model and the Suffix # for the particular oscillator which is required. Thus, the model **NS175-5B** describes a 175VA power supply having an adjustable 350-450 cycle frequency range and a frequency stability of ±0.1%. The same basic unit, but without a built in oscillator, is identified as the model **NS175-JA** Audio Amplifier. If an output voltmeter and bench adapters are required, the same audio amplifier is then identified as the model **NS175-JA-C-V.**

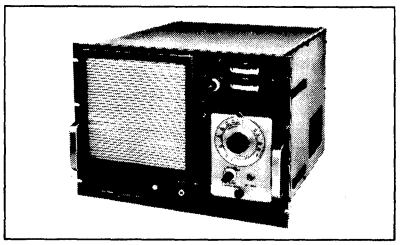
single phase AC power supplies

NA series
500VA to 15KVA



MODEL N1000A
With SG-17A Plug-in Oscillator

The NA SERIES of AC POWER SUPPLIES are exceptionally flexible sources of audio power. Each power supply consists of a **REGULATED AUDIO POWER AMPLIFIER** with interchangeable fixed or variable **PLUG-IN OSCILLATORS** for a wide range of precision AC power applications. The Amplifier has a full power range of 45-6,000 cycles. With the incorporation of a **CML** Plug-in Oscillator precise fixed or adjustable output frequencies are available anywhere within this range. Plug-in Oscillators are Wein Bridge or Tuning Fork controlled.

Regulated Power Amplifiers with Precision Plug-in Oscillators

- **Each Model can be operated either as a precision AC Power Supply or as an Audio Power Amplifier.**
- **INTERCHANGEABLE PLUG-IN OSCILLATORS** . . . 21 standard oscillators are available — to provide fixed or adjustable output frequencies between 45 and 6,000 cps and stabilities to ±0.001%.
- **INSTANTANEOUS OVERLOAD PROTECTION**
- **MINIMUM PACKAGE SIZE** . . . 2000VA in 14" rack height; 750VA in 8¾" rack height.
- **CONSTANT VOLTAGE OUTPUT** . . . 0.5% regulation for no load to full load change — response time less than 50 microseconds.

Frequency stabilities range between ±0.25% and ±0.001%. Plug-in Oscillators include gain control as well as front panel jack for external signal drive. Each Power Amplifier model may also be operated without a plug-in oscillator; however, in that case, the Model SA-2 External Signal Adapter is required.
Precise amplitude stability and low harmonic content are provided by a combination of positive current feedback and inverse voltage feedback.

REGULATED POWER AMPLIFIERS

MODEL	OUTPUT POWER—VA	INPUT	*DIMENSIONS H x W x D			WT. APPROX. LBS.
N500A	500	115V, 1ø, 47-65CPS	8¾	19	21	175
N750B	750	115V, 1ø, 47-65	8¾	19	21	180
N750A	750	208/230V, 3ø, 47-65	14	19	20½	260
N1000A	1,000	208/230V, 3ø, 47-65	14	19	20½	270
N1500A	1,500	208/230V, 3ø, 47-65	14	19	20½	315
N2000A	2,000	208/230V, 3ø, 47-65	14	19	20½	325
N5000A	5,000	208/230V, 3ø, 57-65	51	24	24	850
N15000A	15,000	208/230V, 3ø, 57-65	47	34	24	1600

*500VA to 2000VA units are standard rack mount models. Add ¾" to height if bench adapters are included. 5000VA and 15000VA units are cabinet models. Model N5000A includes casters.

PLUG-IN OSCILLATORS**

SPECIFICATIONS

OUTPUT CONFIGURATION: Single Phase, 2 wire floating.
OUTPUT VOLTAGE: Adjustable 0-125 Volts; full power available at output of 110-125 Volts.
DUTY CYCLE: Continuous duty at full rated output.
OUTPUT POWER: Rated output power for each model is shown in chart above.
VOLTAGE REGULATION: Less than 0.5% for no load to full load change. ±0.5% for ±5% input voltage change.
LOAD POWER FACTOR: 0.7 lead or lag to unity at rated output; wider power factor range with slight derating.
OUTPUT WAVE SHAPE: Sine wave. Less than 3% total harmonic distortion over the 45-6,000 cycle frequency range. Less than 1% 300 to 1000 cycles.
RESPONSE TIME: Less than 50 microseconds.
HUM and NOISE: 60 db below maximum output voltage.
PROTECTIVE CIRCUITS: All models are equipped wtih instantaneous overload protection and front panel reset.
METERS: All standard models are furnished with front panel meters to monitor output voltage and plate currents of final amplifier tubes.
FREQUENCY RANGE: Each amplifier model is rated at full power 45-6,000 cps with the exception of the Model N15000A which is rated at full power 200-6,000 cps. Each model may be driven from an external signal source over the rated frequency range. When driven by a PLUG-IN OSCILLATOR the output frequency range is determined by the particular plug-in which is selected. Standard oscillator frequencies are tabulated above.
FREQUENCY STABILITY: Determined by the plug-in oscillator or external signal source which is utilized. Stabilities of standard plug-in oscillators are tabulated above.
EXTERNAL SIGNAL: Signal input voltage of 5 volts rms required for full rated output. Signal input impedance 600 ohms, single ended.
OUTPUT & INPUT TERMINATIONS: Units rated at 500VA to 2000VA include output terminals on front and rear, five way binding posts on front and barrier strip on rear; input power termination is rear mounted barrier strip. Models N5000A and N15000A have input and output terminals accessible via knockouts at cabinet rear.
CONSTRUCTION: Models rated 500VA to 2,000VA are standard 19" rack mount units with full dust covers. Bench adapters available as accessory for these models; specify suffix (—C). Side support is recommended for rack mount models. Slides available as optional accessories; specify suffix (—S). 5 KVA and 15 KVA models are furnished complete in cabinet enclosure. 5 KVA model includes casters.
FINISH: Front panels finished in satin green enamel. Panel marking is white. Cabinets are green armorhide. Chassis surfaces are protected with yellow iridite.

HOW TO ORDER

Standard NA series power supplies may be ordered directly from the catalog by specifying both the regulated power amplifier model and the model number of the plug-in oscillator (or external signal adapter if no oscillator is ordered). Thus, the model **N1000A** with model **SG-15A** describes a 1000VA power supply having an adjustable 350-450 cycle frequency range and a frequency stability of ±0.25%. The model **N1000A-C** with **SG-15A** describes a similar unit with bench adapters and the model **N1000A-S** with **SG-15A** describes a similar basic unit with slides.

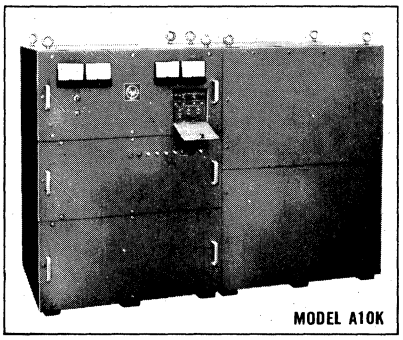
wide band power amplifiers for audio and ultrasonic testing

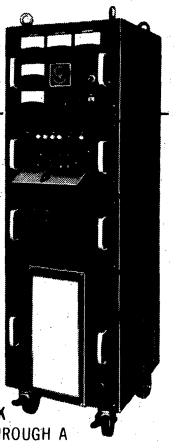
SPG series
1KVA to 200KVA



MODEL A10K

- Full power into reactive loads.
- Low distortion.
- ±0.5 db frequency response.
- Ideal for CW and PULSED duty.
- Selectable output taps for matching wide range of load impedances.
- Rugged construction for marine or airborne installations.

APPLICATIONS
SONAR TESTING
VIBRATION TESTING
INDUSTRIAL PROCESS CONTROL
HIGH INTENSITY ACOUSTIC SYSTEMS



MODEL S5K
PASSES THROUGH A STANDARD SUBMARINE HATCH

MODEL B5K

** MODEL	OUTPUT POWER KVA	LOAD POWER FACTOR RANGE AT RATED KVA	STANDARD OUTPUT IMPEDANCE TAPS OHMS	DIMENSIONS* H x W x D (APPROX.) INCHES	WEIGHT (APPROX.) LBS.	TYPE OF COOLING

VA200K	200	±0.1 to Unity	16/64/144/256	3 sections, ea.: 90 x 72 x 57	14,100	

*Models A1K and A2K are standard 19" rack mount units; bench adapters available on special order. All other models are furnished complete in cabinet enclosures. Models A3K, S5K and B5K include casters.

**Refer to pages 2 and 3 for lower powered amplifiers.

SPECIFICATIONS

OUTPUT FREQUENCY: Standard full power frequency range is 100-10,000 cps except for Model A3K which has a 200-15,000 cps range. **Other frequency ranges** between 5 cps and 200KC are available on a custom basis.

OUTPUT CONFIGURATION: 2 wire floating.

DUTY CYCLE: Continuous duty at full rated output power. Please consult CML for pulsed or intermittent duty ratings.

FREQUENCY RESPONSE: ±0.5 db, 100-10,000 cps. Model A3K ±0.5 db 200-15,000 cps.

HARMONIC DISTORTION: Less than 3%, 100-10,000 cps; less than 1.5% mid-band.

HUM AND NOISE: At least 60 db below rated output tap voltage.

OUTPUT IMPEDANCE SELECTION: Taps are selected by link change. Front panel tap select switches are available at additional charge.

INPUT SERVICE: Models rated 1KVA to 20KVA require 208/230 volts ±5%, 3 phase, 57-65 cycles. However, the Model S5K is also available with input of 440/460/480 volts, ±5%, 3 phase, 57-65 cycles – specify Model S5KM5963. Models rated at 30KVA output and higher require 440/460/480 volts ±5%, 3 phase, 57-65 cycles.

SIGNAL INPUT VOLTAGE: 1.0 volt RMS for rated output.

SIGNAL INPUT IMPEDANCE: 600 ohms, single ended.

KEYED OPERATION: All models are suitable for operation with keyed input signals.

METERING: All models include complete front panel metering. In addition, models rated at 3KVA to 200KVA have recessed front panel section with test points for critical circuit parameters — to keep down-time to a minimum.

PROTECTIVE CIRCUITS: CML instantaneous overload circuitry protects both amplifier and load. Rapid front panel reset permits return to normal operation with minimum down-time.

FINISH: Panels are satin green enamel; cabinets are green armorhide. Special colors are available on a custom basis.

VAPOR COOLING

All CML models rated at 30KVA output or higher feature modern vapor cooling systems to dissipate heat generated in the "final" amplifier. Use of this method, with its high efficiency heat transfer, reduces "raw water" requirements appreciably when compared with older "water cooled systems." In addition, it eliminates the need for a pump in the closed loop cooling system and greatly reduces contamination of distilled water in the closed system — thus greatly reducing maintenance.

CML, Inc.
A Subsidiary of Tenney Engineering, Inc.

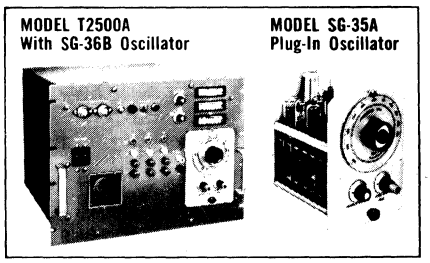
three phase frequency converters

TA series
150VA to 20KVA



The new TA Series of Three Phase Frequency Converters are exceptionally versatile sources of AC power. Each converter consists of a regulated **THREE PHASE AMPLIFIER** with interchangeable fixed or variable frequency **PLUG-IN OSCILLATORS** for a wide range of precision AC power applications. The amplifier has a full power range of 45-6,000 cps. With the incorporation of a CML plug-in oscillator (which includes 120° phase shift network) precise fixed or adjustable frequencies are available anywhere within this range.

- **MINIMUM PACKAGE SIZES** . . . 2500VA in 14" rack height.
- **INTERCHANGEABLE PLUG-IN OSCILLATORS** . . . 21 standard oscillators are available — to provide fixed or adjustable output frequencies between 45 and 6,000 cps and stabilities to ±0.001%.
- **INSTANTANEOUS OVERLOAD PROTECTION** . . . An overload of any one phase causes complete output shutdown, protecting 3 phase load.
- **DUAL OUTPUT VOLTAGE FOR △ OR Y LOADS** . . . Adjustable voltages 0-125 volts line-to-line as well as 0-217 volts line-to-line are presented at output terminals; output is isolated for maximum versatility.
- **CONSTANT VOLTAGE OUTPUT** . . . 0.5% regulation for no load to full load change — response time less than 50 microseconds.
- **OUTPUT VOLTAGE UNAFFECTED BY UNBALANCED LOADS.**

Plug-in oscillators are Wein bridge or tuning-fork controlled for frequency stabilities ranging between ±0.25% and ±0.001%. Dual output taps are standard for matching either Delta or Wye loads (output may be connected either 120 volts line-to-line or 208 volts line-to-line). Precise amplitude stability and low harmonic content are provided by a combination of positive current feedback and inverse voltage feedback.

THREE PHASE AMPLIFIERS

MODEL	3∅ OUTPUT POWER — VA	INPUT	*DIMENSIONS H x W x D			WT. (APPROX.) LBS.
T150A	150	115V, 1∅, 47-65	7	19	17	105
T300B	300	115V, 1∅, 47-65	12¼	19	20	180
T500B	500	115V, 1∅, 47-65	12¼	19	20	190
T750A	750	208/230V, 3∅, 47-65	14	19	20½	275
T1200A	1,200	208/230V, 3∅, 47-65	14	19	20½	285
T1750A	1,750	208/230V, 3∅, 47-65	14	19	20½	355
T2500A	2,500	208/230V, 3∅, 47-65	14	19	20½	365
T5000A	5,000	208/230V, 3∅, 47-65	45	24	24	950
T15000A	15,000	208/230V, 3∅, 57-65	78	35	36	1700
T20000A	20,000	208/230V, 3∅, 57-65	78	35	36	1900

*150VA to 2500VA units are rack mount models with dimensions as shown above. Add ¾" to height if bench adapters are included.

PLUG-IN OSCILLATORS

3∅ OUTPUT FREQUENCY	FREQUENCY STABILITY ±0.25%	±0.1%	±0.01%	±0.001%
	MODEL #			
Fixed 400 cps	SG-34A	SG-34B	SG-34E	SG-34G

Fixed 60 cps	SG-32A	SG-32B	SG-32E	Special Order
Fixed 50 cps	SG-31A	SG-31B	SG-31E	Special Order
Adjustable 350-450 cps	SG-35A	SG-35B	X	X
Adjustable 45-70 cps	SG-33A	SG-33B	X	X
Adjustable 300-2,000 cps	SG-36A	SG-36B	X	X
Adjustable 45-6,000 cps	SG-37A	X	X	X

5000VA-20,000VA units are cabinet models. Model T5000A includes casters.

SPECIFICATIONS—Standard Frequency Converter Models

OUTPUT CONFIGURATION: Three Phase, 4 wire wye, neutral floating.
OUTPUT VOLTAGE: 0-125 Volts line-to-line and 0-217 Volts line-to-line; both sets of terminals are presented at output. Full power available at output of 110-125 volts and 190-217 volts. Master gain control and phase 2 and 3 trim controls provided on front panel.
DUTY CYCLE: Continuous duty at full rated output.
OUTPUT POWER: Rated output power for each model is shown in chart above. Maximum power per phase is 1/3 of 3∅ output.
VOLTAGE REGULATION: Less than 0.5% for no load to full load change. ±0.5% for ±5% input voltage change.
LOAD POWER FACTOR: 0.7 lead or lag to unity at rated output; wider power factor range with slight derating.
UNBALANCED PHASE LOADING: Separate power amplifiers and regulation circuits are provided for each output phase. Therefore unbalanced phase loading has negligible effect as long as the rated output power per phase is not exceeded.
PROTECTIVE CIRCUITS: All models are equipped with instantaneous overload protection and front panel reset. An overload in any phase causes all phases to shut down, thus protecting 3∅ loads. Front panel lamps also indicate which phase has been overloaded.
OUTPUT & INPUT TERMINATIONS: Output terminals are furnished both front and rear, five way binding posts on front, barrier strip on rear. Input is via rear mounted barrier strip.
FREQUENCY RANGE: Each amplifier model is rated at full power 45-6,000 cps except for the models T15000A and T20000A which have a 300-500 cycle full power range. The operating output frequency range is determined by the particular plug-in oscillator which is used.
FREQUENCY STABILITY: Determined by the particular plug-in oscillator which is selected. Stabilities of standard oscillators are tabulated above.
RESPONSE TIME: Less than 50 microseconds.
WAVE SHAPE: Sine Wave.
HARMONIC DISTORTION: Less than 3% over the entire 45-6,000 cycle amplifier range; less than 1%, 300-1000 cps.
HUM AND NOISE: 60 db below maximum output voltage.
OUTPUT PHASE SEPARATION: 120 ±1° for fixed frequency models as well as 350-450 cycle models. 120 ±2° for 45-70 and 300-2,000 cycle models. 120 ±3° for 45-6,000 cycle models.
METERS: Models rated 150VA to 500VA are furnished with output voltmeter and selector switch to monitor any line-to-line and line-to-neutral voltage. Models rated 750VA to 20KVA have three (3) combination output voltmeter/plate current ammeters with selector switch to monitor any line-to-line and line-to-neutral output voltage as well as plate current of 3∅ amplifier.
CONSTRUCTION: Models rated 150VA to 2500VA are standard 19" rack mount units with full dust covers. Bench adapters available as accessories for these models; specify suffix (—C). Side support is recommended for rack mount models. Slides are available as optional accessories; specify suffix (—S). 5KVA-20KVA models are furnished complete in cabinet enclosure. 5KVA model includes casters.
FINISH: Front panels finished in satin green enamel. Panel marking is white. Cabinets are green armorhide. Chassis surfaces are protected with yellow iridite.

HOW TO ORDER

Standard TA series frequency converters may be ordered directly from the catlog by specifying both the three phase amplifier model and the model number of the plug-in oscillator. Thus, the model **T750A** with model **SG-34B** describes a 750VA frequency converter having a fixed 400 cycle output frequency and a frequency stability of ±0.1%. The same unit, except for the addition of bench adapters, is designated as the model **T750A-C** with **SG-34B**, whereas model **T750A-S** with **SG-34B** describes a similar unit with slides.

SINGLE PHASE & TWO PHASE OUTPUT

Standard 3 phase amplifiers may be used to provide a 2 phase output at 2/3 of rated output power. Special plug-in oscillators are available with selectable 90° or 120° phase separation for 2 phase or 3 phase operation respectively.

Standard 3 phase amplifiers may be used to provide a single phase output at 57% of rated output power over an adjustable voltage range of 110-125 volts.

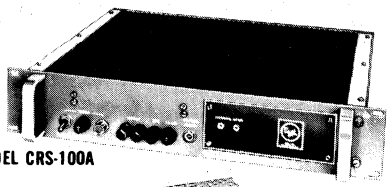
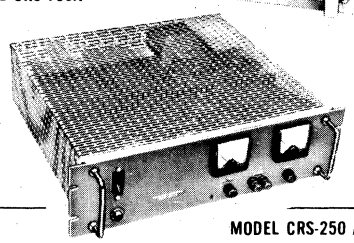
solid state frequency converters CML

LRS series
60 or 400 cycles to 60 cycles

CRS series
50/60 cycles to 400 cycles



MODEL CRS-100A



MODEL CRS-250 A

- 50VA to 2KVA output.
- Low distortion sine wave output.
- Rugged construction for airborne, marine and ground support installations.
- 0.5% frequency regulation & 1% voltage regulation.
- Full output power into both leading & lagging power factor loads.
- High efficiency switched mode operation.
- TRANSISTORIZED POWER STAGES rather than Silicon Controlled Rectifiers — thus insuring positive, controlled turn-off & turn-on characteristics for reliable, continuous operation.
- SILICON SEMI-CONDUCTORS used throughout.

LRS series
60 OR 400 CYCLE TO 60 CYCLE CONVERTERS

*350-450 Cycle input also available on a special basis.

SPECIFICATIONS

OUTPUT CONFIGURATION: Single phase, two wire, isolated.
INPUT CONFIGURATION: Single phase, two wire, isolated except for model **CRS-2000A** which has 3 phase input.
OUTPUT VOLTAGE: Adjustable 105-125 Volts RMS.
VOLTAGE REGULATION: ±1% for combined no load to full load change and rated input voltage variation.
FREQUENCY REGULATION: ±0.5% for combined no load to full load change and rated input voltage variation.
HARMONIC DISTORTION: 1% for 400 cycle models, 3% for 60 cycle models when powering linear (resistive or reactive) loads; slightly higher into switching type loads.
LOAD POWER FACTOR: 0.7 lead or lag to unity at rated output; wider power factor range with slight derating.
AMBIENT TEMPERATURE: Operating: —20°C to +50°C
Storage: —40°C to +85°C
COOLING: CML frequency converters require no auxiliary cooling. There is no need for special base plate heat sinks. Units rated at 500VA to 2000VA include quiet built-in fan.
TEMPERATURE STABILITY: Frequency: Max. 0.05%/degree C. Voltage: Max. 0.01%/degree C.

TERMINATIONS: Output terminals are furnished both front and rear, five way binding posts on front & barrier strips on rear. Input is via rear mounted barrier strip.

CONSTRUCTION: Standard models furnished as rack mount equipment with full dust covers. Modified rack mount or modular supplies packaged in accordance with customer specification are also available.
Slides available on special order.

CONTROLS AND METERS: All models include front panel voltage adjust. Models rated at **250** to 2000VA include input circuit breaker. Lower power models have "power-on" switch. Models rated at **250** to 2000VA include output voltmeter and output ammeter. Meters are available for lower powered units on special order.

PROTECTION: All models rated **250** to 2000VA are protected against overload, short circuit, and internal faults by input circuit breaker. Units rated 50 to 150VA include input and output fuses.

FINISH: Front panels finished in satin green enamel. Panel marking is white.

CUSTOM REQUIREMENTS

We invite your inquiries for modified or custom frequency converters designed and manufactured in accordance with applicable military or commercial specifications. We would be happy to submit our proposal for converters having the following features:

- Special lightweight designs.
- Three phase outputs.
- Square wave outputs.
- Multiple output voltages.
- Adjustable output frequencies.
- Modular construction.
- Frequency stabilities to .001%
- Frequency synchronized with external signal.

Output: 115 Volts rms, Single Phase.
Input: 22-30 Volts D. C.
Voltage & Frequency Regulation: 0.5%

MODEL	OUTPUT VA	DIMENSIONS H x W x D	NET WT. LBS. (APPROX.)
MRS-500	500	12 x 14 x 14	150
MRS-1000	1000	14 x 17 x 19	175
MRS-2000	2000	17 x 17 x 22	300

DRS series — 400 CPS

Output: 115 Volts rms, Single Phase.
Input: 22-30 Volts D. C.
Voltage & Frequency Regulation: 0.5%.

MODEL	OUTPUT VA	DIMENSIONS H x W x D	NET WT. LBS. (APPROX.)
DRS-50	50	5 x 11 x 8	25
DRS-100	100	5 x 11 x 8	26
DRS-500	500	8 x 14 x 16	70
DRS-1000	1000	14 x 17 x 18	160

SPECIFICATIONS

INPUT CONFIGURATION: Two wire, isolated.
OUTPUT CONFIGURATION: Single phase, two wire isolated.
OUTPUT VOLTAGE: MRS & DRS Models are preset at 115 volts rms. MNS Models have taps available at 105/115/125 volts rms — These values measured at nominal input voltage with half load.
DUTY CYCLE: Continuous duty at full rated output.
HARMONIC DISTORTION: 1% for 400 cycle models, 3% for 60 cycle models when powering linear (resistive or reactive) loads; slightly higher into switching type loads.
LOAD POWER FACTOR: 0.7 lead or lag to unity at rated output; wider power factor range with slight derating.
FREQUENCY REGULATION: Load: 0.5% for no load to full load change. Line: 0.5% for rated input line change.
Units providing frequency regulation and stability to ±0.001% available on special order. Units in which the frequency may be synchronized with an external source available at slight additional charge.
VOLTAGE REGULATION: MRS & DRS Series: Load: 0.5% for no load to full load change. Line: 0.5% for rated input line change.
MNS Series: Load: Approximately 6% for half load to full load change. Line: Approximately proportional to input line change.
EFFICIENCY: MNS series typically 72% at full load. MRS & DRS series typically 67% at full load.
AMBIENT TEMPERATURE: Operating: —20°C to +50°C. Storage: —40°C to +85°C.
TEMPERATURE STABILITY: Frequency: Max. 0.05%/degree C. Voltage: MRS & DRS Series max. 0.01%/degree C. MNS Series max. 0.03%/degree C.
PROTECTIVE CIRCUITS: 50 & 100 VA models have input and output fuses. Input fuse will blow on application of input polarity reversal. 500 to 2000VA models have circuit breaker protection against overload, shorted output, DC overvoltage and overtemperature. Protection is also provided for DC polarity reversal.
COOLING: CML Inverters require no auxiliary cooling. There is no need to provide special base plate heat sinks. Units rated at 500 to 2000VA include quiet built-in fan.
HOUSING: Two part modular housings with heat radiating finish.
MOUNTING: Tapped inserts are provided for base mount.
INPUT-OUTPUT TERMINATION: 50 & 100VA models have quick disconnect on top surface. Mating connector is furnished with inverter (dimensions listed do not include connector). 500 to 2000VA units have terminals accessible via removable top cover plate.

CUSTOM REQUIREMENTS

Modified or custom supplies which embody many techniques incorporated in the fine catalog units described above are also available on a relatively short term delivery basis. We invite your inquiries regarding **completely militarized** power supplies and those requiring special frequency/voltage configurations, as well as those requiring minimum size and weight.

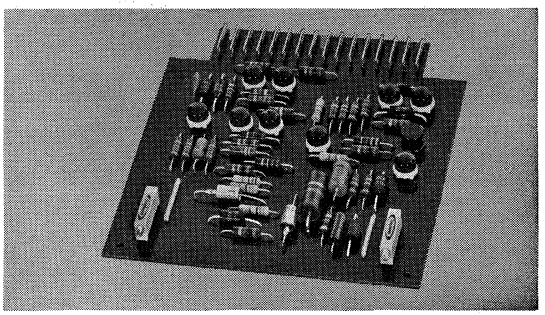
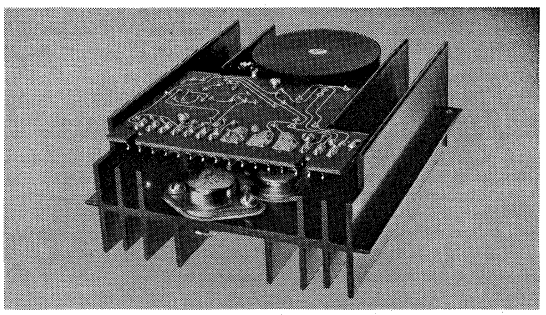
SYSTEM POWER SUPPLIES



Omnimod Control Amplifier



Omnimod Power Control Module

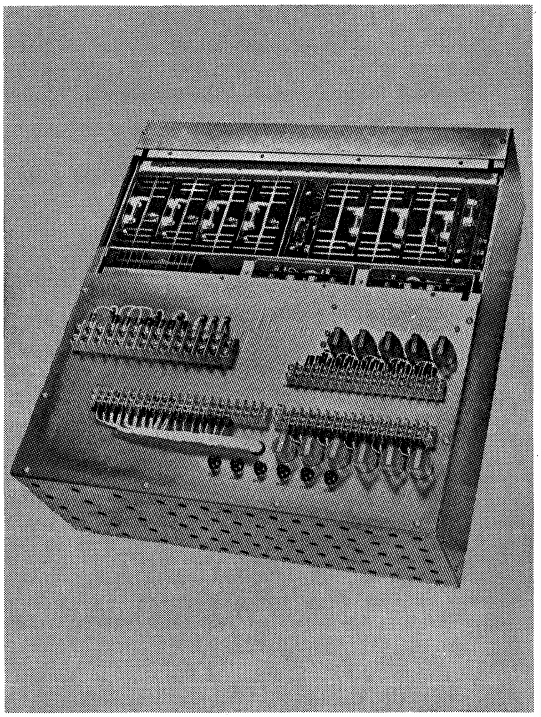
Build your own Custom Power Supplies

. . . as easy as 1, 2, 3 . . .

To design your own custom power supply using Contemporary Electronics components, simply:

1. Design one input power converter to change unregulated line ac power to unregulated dc power. We can supply power transformers, filter chokes and other items or they can be purchased from another source.
2. Select the proper number of the right dc to dc regulator module types for each output.
3. Package these modules with the correct output filter components in the space available.

Write for Application Note #600 which will help you design a successful custom power supply with our dc to dc regulator modules. Contemporary Electronics' engineers are available to help you develop the best design for your need.



Custom System Power Supplies Designed and Produced to your Specification

. . . using Contemporary Electronics' award winning OMNIMOD concept.

Our application engineers will help you to develop a specification that will assure delivery of a custom power supply adequate for your need, at lowest cost.

Contemporary Electronics will design a power supply and produce it to meet this specification.

Designs will utilize available OMNIMOD modules wherever possible to provide plug-in interchangeability of most components, add-on capability and the high efficiency, ruggedness and small size of the OMNIMOD switching technique.

Write for Data Sheet #101 describing the OMNIMOD concept

POWER SUPPLIES

CONTROL CIRCUITS, INC., 66 TUTTLE RD., MIDDLETOWN, CONN., PHONE (203) 347-7223

AC - DC MODULAR SUPPLIES:

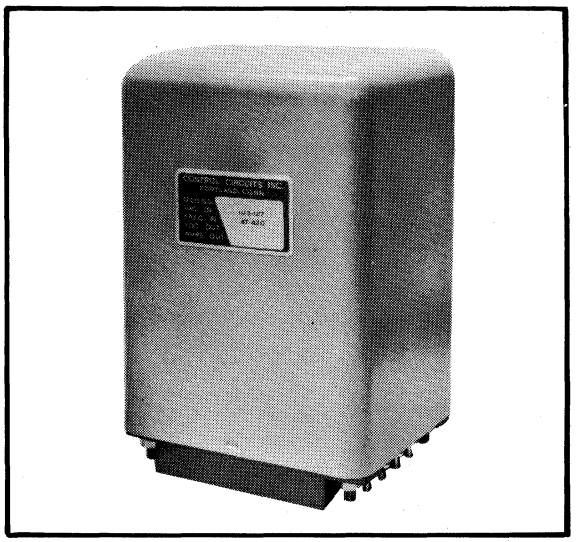
Single, Dual, and Multi-Outputs

FEATURES:

Industrial, Computer, Ground Support Models
Fully Repairable — removable case
Instant Short Circuit Protection
Rugged Design — all units meet highest MIL-Shock and vibration tests

SPECIFICATION RANGES:

Output Voltage ..... 4.5 VDC - 1,000 VDC
Output Current ..... 0-30 Amps
Regulation ..... .5% - .05% - .02%
Base Temperature ..... 75°C to 115°C



FULL MILITARY SPECIFIATION LINE DESIGNED TO COMPLY WITH:

MIL-T-27A	Transformers
MIL-Std-701, MIL-S-19500	Semiconductors
MIL-C-3965	Capacitors
MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200	Workmanship and Environmental

CERTIFIED TEST DATA ON MILITARY COMPLIANCE

CUSTOM - SPECIALS

- Integrated Circuit Types
- Open Frame
- Micro-Miniature Versions
- Commercial Types

HIGH VOLTAGE EQUIPMENT

HIGHLY REGULATED ADJUSTABLE HIGH VOLTAGE MODULES SERIES "HRM"

SPECIFICATIONS

Input: 115V ±10% 60 cps
Output: Regulation for 10% line change .03% max. Regulation for NL to FL .03% max
Ripple: .03% RMS max
Temp. Range: −54°C to +65°C operating
Temp. Coefficient: 0.02%/°C

- No voltage overshoot
- Adjustable output
- Short circuit proof (no fuses)
- Meet environmental and transient requirements of MIL-E-16400

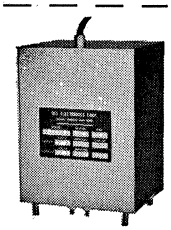
REGULATED MODULES TRANSISTORIZED SERIES "TRHV"



The TRHV series of regulated power supplies are all solid state units. Reference and regulating circuitry is accomplished at low voltage. The units are completely self-contained and require only 115 Volt AC 60/400 cycle excitation to be operative. These supplies are rugged and feature good line, load and thermal stability. The operating temperature range is −20°C to +55°C. Regulation better than 0.25% for 10% line change & NL to FL. Ripple 0.5% RMS at max current.

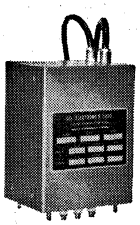
UNREGULATED MODULES COMPACT HIGH VOLTAGE

SERIES "S"



These power supplies are designed for operation from either a 0-115 volt or 0-125 volt line at 60/400 cycles. Three input terminals are provided to permit proper line connection. The output is available from shielded polyethylene cables and may be varied over the full range by varying the input AC line. The two output cables are insulated for the full output voltage, so that either the positive or negative terminal may be grounded.* All units have selenium rectifiers and are hermetically sealed in an epoxy, vacuum filled, metal case.

Units for 50 cycle operation at various line voltages are available on request.

*Model 40-2-4 is designed with one output cable for single polarity operation. When ordering, please specify polarity.

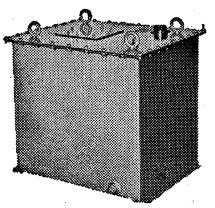
SERIES "O" OIL INSULATED TANK UNITS



DEL SERIES "O", oil insulated, High Voltage Power Supplies offers one of the most comprehensive lines of basic high voltage units available to industry and laboratories. These D.C. supplies are designed to provide long, reliable service in such applications as dielectric testing, capacitor chargers, electrostatic precipitators, electron microscopes, image intensifiers, plasma research and accelerators. Series "O" supplies feature reversible polarity on most units, shielded polyethylene output cables, high quality insulating oil in dust free tank, quiet, long life operation with low corona.

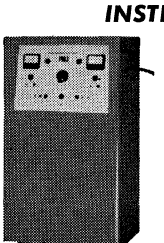
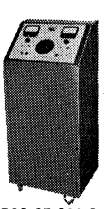
NOTE: Larger units are shipped without oil to reduce transportation costs. See notations on price list.

COMPLETE LINE OF CONTROL PANELS AND REGULATED CONTROLS AVAILABLE FOR ALL SERIES "O" POWER SUPPLIES.

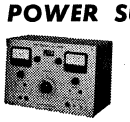
INSTRUMENTED POWER SUPPLIES



PSC 120-5-2



PSC 25-200-2



PSC 30-5-1

DEL Series "PSC" Instrumented, High Voltage Power Supplies provides a broad selection of units designed for reliable and dependable use in research and industry.

All units: Input 115V, 60 cps unless noted otherwise.
All units up to 20KV are air insulated and utilize epoxy components.
All other units have high voltage section immersed in high grade insulating oil to insure freedom from electrical noise.

HIGH VOLTAGE EQUIPMENT

RACK MOUNT POWER SUPPLIES
"RHPT" SERIES HIGH POT TESTER

The Del RHPT series of rack mounted Hi Pot Testers are general-purpose power supplies which are fully instrumented, completely enclosed, and fully protected. These units are designed for standard 19-inch racks and have light gray panels. They are recommended for all cmmercial, industrial, and laboratory uses where reliable dc high-voltage sources are required.

"HIGH POT" TESTERS
"TC" SERIES POWER SUPPLIES

DEL TC Series multi-purpose D.C. Power Supplies are compact, fully instrumented and fully protected units providing ratings up to 80,000 volts D.C. continuously variable.

Seleninum Rectifiers used throughout to provide long life and instantaneous operation. No filament warm up time required.

All high voltage components immersed in special high grade insulating oil. This assures LONG trouble-free LIFE.

ALSO AVAILABLE FOR OTHER INPUT AND OUTPUT VOLTAGES

LHRM SERIES

The Del LHRM Series of High Voltage Power Supplies offer the HRM module power supply with its high regulation, low ripple, short circuit protection and other desirable features in a lab. type rack mountable supply.

Full voltage control by ten-turn potentiometer, ammeter and voltmeter, line switch, etc., make this unit essential in lab. development and testing of high voltage equipment such as high resolution CRT displays, and other applications requiring a precision high voltage power supply. It offers the great advantage in that the characteristics are identical to the HRM modules which can be then utilized in the final equipment.

FEATURES

- Short Circuit Proof
- Full Adjustable Output
- Excellent Thermal Stability
- No Voltage Overshoot on Turn On or Turn Off
- Single Shielded Output Cable
- Fast Response
- No Warm-up Required
- All Silicon Transistors
- No r.f.i., Chopper or Hhigh Frequency Oscillator
- Automatic Resetting Thermal Cutout

Enhances selection of final power supply module.
Ten Turn Potentiometer with 0.15% Linearity.

SPECIFICATIONS — ALL MODELS

INPUT: 115V ±10% 60 to 400 Hz. single phase for units up to 10 KV.
115V ±10% 60 or 400 Hz. for units 15 KV and above.

OUTPUT: See table

REGULATION:

LINE: Less than 0.03% from 50% to 100% of max. rated output voltage increasing to 0.5% at 10% of max. rated output voltage for a ±10% line votlage change.

LOAD: Same as line regulation above from no load to full load.

RIPPLE: Less than 0.03% rms of max. rated output voltage.

LINEARITY: Better than 0.15" with a ten turn potentiometer. Models marked (*) 0.7%.

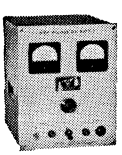
"HI-POT" TESTERS



Del D.C. "HI-POT" supplies are fully instrumented and fully protected units providing output voltages up to 160,000 volts D.C. Supplies are well designed to provide conservative ratings.

Thirteen models offer a wide selection to meet all applications. Portable units as well as floor type with rack mountable control panels* are available

Input 115 VAC - 60 cycle.

Model No.	Voltage Range Full Load	Current Range MA	Ripple at Full Load % RMS/MA	Size	Polarity

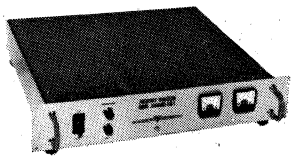
AUXILIARY EQUIPMENT DEL TRANSFORMERS

TRANSISTORIZED FREQUENCY CONVERTERS



ATA SERIES

The ATA Series of frequency converters is a source of stable 400 cycle power which operates directly from a standard 50 to 60 cycle line. These units feature excellent frequency characteristics, waveform purity, voltage regulation and low dynamic impedance.

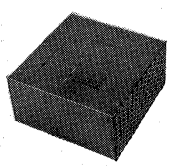
SPECIFICATIONS

INPUT VOLTAGE	105-125 VAC, 50-70 cps
OUTPUT VOLTAGE	Adj. 105-125 VAC
OUTPUT FREQ.	400 cps, adjustable, 398 to 402 cps.
DISTORTION	0.8%, Max.
POWER FACTOR	±0.7 to Unity
VOLTAGE REG.	
LOAD	Within 0.5% for no load to full load.
LINE	±0.5% for 105-125 V
METERS	Output voltage and current.
CONSTRUCTION	Designed for rack mounting.

MODEL	OUTPUT V.A.	SIZE W x D x H (in.)	TYPE
ATA 400RS-100	100	19 x 16 x 3½	Regulated
ATA 400RS-500	500	19 x 16 x 8¾	Regulated
ATA 400RS-1000	1000	19 x 16 x 14	Regulated

TRANSISTORIED DC/AC INVERTERS

DTA 60 SERIES



The DTA 60 Series of DC to 60 cycle AC and the DTA 400 Series of DC to 400 cycle AC inverters include regulated units, for those applications requiring precise output voltage, and unregulated units where the output voltage is not critical. All units operate from a 22 to 30 volt DC source, are capable of frequency synchronization to an external source, and are protected against overvoltage, reverse polarity, overload and over-temperature.

SPECIFICATIONS

INPUT VOLTAGE: 22-30 VDC
OUTPUT VOLTAGE: 115 VAC for regulated units; 115 VAC Nom. with ±10% taps for unregulated units.
POWER FACTOR: ±0.7 to unity.
DISTORTION: 2½% for DTA 60 Series 0.8% for DTA 400 Series.
VOLTAGE REG. LOAD: Approx. 6% for 50% load change, unregualted units. 0.5% no load to full load for regulated units.
LINE: Output proportional to input for unregulated units. 0.5% for 22 to 30 VDC for regulated units.
FREQUENCY REG. 60 SERIES: 0.5% for 22 to 30 VDC 0.5% for no load to full load.
400 SERIES: 0.2% for 22 to 30 VDC. 0.2% for no load to full load.
ISOLATION: Between input, output, gnd.
HOUSING: Modular, with heat radiating finish.
MOUNTING: Tapped inserts in base.
TERMINATIONS: Input, output, ground and synchronization signal, all available under removable access plate.

UNREGULATED MODEL	OUTPUT V.A.	SIZE W x D x H (in.)	WEIGHT LBS.	TYPE
DTA 60RS_100	100	10 x 10 x 5	25	Regulated
DTA 60RS-500	500	12 x 14 x 12	95	Regulated

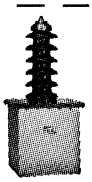
METER MULTIPLIERS



Del Electronics' line of multipliers is designed and built to provide high voltage DC measurements with safety and minimum corona at reasonable cost. Each unit consists of resistors immersed in high grade insulating oil and hermetically sealed grounded case. All units are designed for use with 100 ua full scale meter. Can be furnished with panel type 4½" rectangular 100 ua meter (2% accuracy), with KV scale to match.

Type	Maximum Kilivolts	Case Dimension (Max.) W	D	H	Insulator Height
M-5	5	2 5/16"	2 1/16"	2½"	1"
M-10	10	2 5/16"	2 1/16"	2½"	1¾"

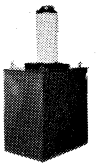
M-150	150	11"	11"	12"	20"
M-250	250	16½"	16½"	22"	28¾"

ALSO AVAILABLE FOR OTHER INPUT AND OUTPUT VOLTAGES

ISOLATION TRANSFORMERS

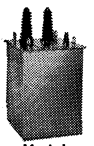


Model 2-TR-250-21

DEL ELECTRONICS' line of High Voltage Isolation Transformers are designed and manufactured for use in industry and in research and development laboratories.

These DEL High Quality Transformers have the following features:

- Complete vacuum varnish impregnation
- Immersed in high grade insulating oil
- Electrostatic shield between primary and secondary
- Good regulation



Model 3-TR-60-22

STANDARD 60 HZ TYPE ISOLATION TRANSFORMERS

Model No.	Max Kva	Kvdc Insulation	Tank Size (in., w x d x h)	Insulator Height (in.) ††

Reliability

Short Circuit Protected

Filtered Input

Crestronics DC to DC Converters are designed as a power supply for electronic circuits with a minimum of interference in the audio and rf ranges. The 20 KHz & 30 KHz conversion employed eliminates all audio range problems and an internal input filter reduces the rfi conductance noise to a level of less than 30 mv P-P across a one ohm resistor in series with the input.

REGULATION:

Regulated Units
- Line ..... .01 % /V
- Temperature ..... .02 % /°C
- Load 10 % to Full load.
  - 2 to 9 VDC ..... 6 %
  - 10 to 24 VDC ..... 4 %
  - 25 to 6000 VDC ..... 3 %

Unregulated Units
- Line ..... Proportional to input
- Load 10 % to full load
  - 2 to 9 VDC ..... 10 %
  - 10 to 24 VDC ..... 5 %
  - 25 to 6000 VDC ..... 4 %

No permanent damage will result if CRESTRONICS Power Supplies are operated without a load.

The conversion frequency of all units will vary in proportion to the output voltage.

RECTIFIER SYSTEMS — RIPPLE

Rectifier	Without Filter RMS	Without Filter P-P	With Filter RMS	With Filter P-P*
FW	.2 %	1 %	.05 %	.2 %
B	.2 %	1 %	.05 %	.2 %
BCT	.2 %	1 %	.05 %	.2 %
VD	.3 %	.6 %	.1 %	.3 %
VQ	.3 %	.6 %	.1 %	.3 %
BVD	.2 %	.3 %	.05 %	.15 %

*1—An external filter is required to further reduce switching spikes.
2—Because of common mode ripple it is necessary to know the ground polarity when filter is ordered.

Plasma-power Gas Laser Power Supplies

PS 177/2-A input $132.00—PS 178/4-A input $156.00

Input: 10-35 VDC Current regulated

ORDERING INFORMATION

PS 101 — 5000 — VQ+F

Basic part number — Output Voltage — Rectifier System

1. **Basic Part Number determines: Size, Wattage, Regulator, Conversion frequency, and input voltage.**
2. **Output Voltage: May be any voltage between 2 and 6000VDC**
3. **Rectifier System: Select rectifier system for desired output voltage and ripple.**
   If filter is required designate positive or negative ground. (Sample is for positive ground.)

QUANTITY DISCOUNTS: 1 to 4, Unit Price — 5 to 19, 10 % — 20 to 49, 20 % — 50 to 99, 30 %.

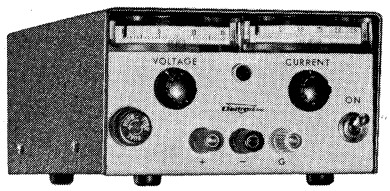
REGULATED POWER SUPPLIES

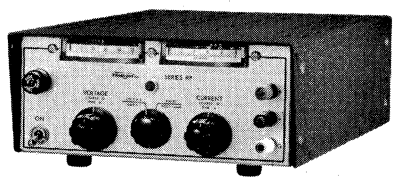
LABORATORY TYPES

SERIES ED/EA — Bulletin 109
0.01% Regulation



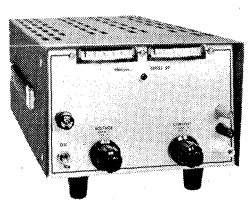
25 MODELS . . . to 100V . . . to 2A . . . 24W.
Silicon metered supplies in 1/3 rack size, current limit and automatic crossover models. One twin range dual supply in the series.
Prices . . . $129. to $159.

SERIES RP — Bulletin 101
0.01% Regulation



26 MODELS . . . to 100V . . . to 5A . . . 200 W.
Silicon metered supplies in 1/2 rack size, with automatic crossover. Six twin range supplies in the series.
Prices . . . $159. to $325.

SERIES SP — Bulletin 105
0.01% Regulation



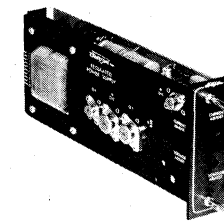
36 MODELS . . . to 100V . . . to 50A . . . 1200W.
Silicon metered supplies in 1/2 and full rack sizes, with automatic crossover and SCR pre-regulator for high efficiency.
Prices . . . $195. to $925.

FEATURES — ALL LAB MODELS

Remote programming and sensing.
Series and parallel operation.
Rack adapters for up to 3 units.

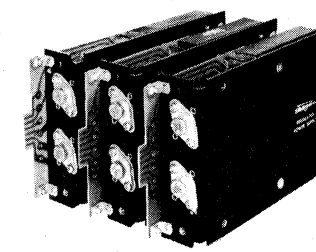
CARD MODULE TYPES

SERIES CD/CA — Bulletin 106
0.01% Regulation



24 MODELS . . . to 100V . . . to 2A . . . 24 W.
Silicon full range supplies in 1/8th rack size, current limit and automatic crossover models. Accessory front panel. Universal mounting also fits card cage.
Prices . . . $86. to $119.

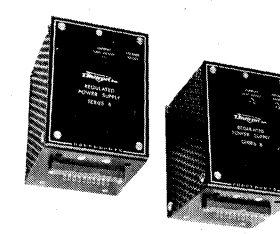
SERIES OS/PS — Bulletin 406
0.05% Regulation



2 MODELS . . . to 15V . . . to .3A . . . 9W.
Silicon dual output tracking supplies in 1/8th rack size, especially for operational amplifiers. Universal mounting and also fits card cage.
Prices . . . $69. to $89.

MODULAR TYPES

SERIES B — Bulletin 110
0.05% Regulation



6 MODELS . . . to 40V . . . to 1.2A . . . 16W.
Silicon full range supplies in compact box type construction. Use for powering integrated circuits, digital logic, etc. Accessory crowbar ($15.) protects IC's.
Prices . . . $59. to $69.

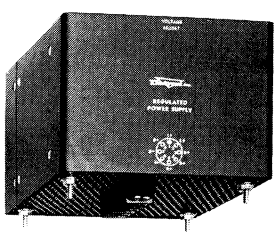
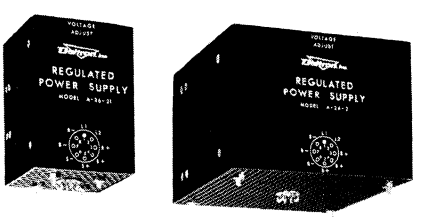
12 MODELS . . . to 15V . . . to 1.5A . . . 45W. Silicon dual independent output supplies in compact box type construction. Ideal for operational amplifiers and integrated circuits.
Prices . . . $118. to $179.

SERIES C — Bulletin 111
0.02% Regulation



300 MODELS . . . to 262V . . . to 36A . . . 700W. Silicon slot adjustable box type supplies designed to meet MIL environmental specs. Units feature most power at lowest cost and smallest size in the industry.
Prices . . . $65. to $470.

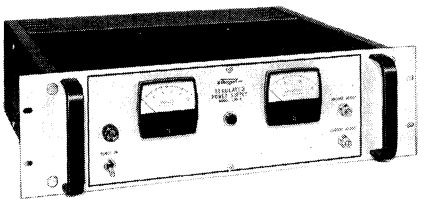
SERIES A — Bulletin 103
0.01% Regulation



261 MODELS . . . to 264V . . . to 37A . . . 800W. Silicon slot adjustable box type supplies offering premium specs, but otherwise similar to series C units.
Prices . . . $95. to $773.

SYSTEM RACK TYPES

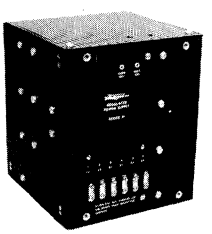
SERIES L — Bulletin 107
0.01% Regulation



720 MODELS . . . to 200V . . . to 86A . . . 1.2KW. Silicon slot adjustable rack mounted supplies well suited for digital and analog systems. Conservative design insures uninterrupted service in exacting applications. Adjustable current cutback limiting.
Prices . . . $190. to $924.

SERIES N — Bulletin 112
0.005% Regulation

Integrated Circuit Regulation System



112 MODELS . . . to 50V . . . to 36A . . . 650W. Silicon slot adjustable supplies featuring integrated circuit regulation system for unprecedented performance. Units are designed for automated manufacture resulting in low cost. Metered control panels fully pre-wired, rack adapters, crowbars available for economical system assembly.
Prices . . . $85. to $330.

CUSTOM SUPPLIES

Modern air conditioned plant houses an outstanding power supply design and manufacturing facility including a well staffed engineering department, an in—plant transformer department, printed circuit department, and sheet metal department to insure prompt service on custom units. Call or write for your special requirements.

FIRST IN DC POWER

DRESSEN-BARNES ELECTRONICS CORPORATION SHORT FORM CATALOG

5 YEAR WARRANTY

5 YEAR WARRANTY

Dressen-Barnes Electronics Corporation warrants each power supply manufactured by them to be free from defects in material and workmanship, for a period of five years from the date of delivery to the original purchaser, except for vacuum tubes which are warranted for one year.

Dressen-Barnes obligation under this warranty is limited to servicing or adjusting any power supply returned to the factory for that purpose, and replacing any defective parts thereof. If the failure has been caused by misuse, operation in excess of specification guarantees or modification by the customer, repairs will be billed at cost.

Permission must be obtained from Dressen-Barnes before a supply may be returned for warranty examination. Transportation charges are to be prepaid. Warranty is transferable by the original purchaser as long as it is sold for use in original equipment.

This warranty is expressly in lieu of all other obligations or liabilities on the part of Dressen-Barnes Electronics Corporation and Dressen-Barnes Electronics Corporation neither assumes nor authorizes any other person to assume for them, any liability in connection with the sale of Dressen-Barnes power supplies.

IMPORTANT ANNOUNCEMENT: The Ferrodyne Corporation, a wholly owned subsidiary of Dressen-Barnes Electronics Corporation, has considerably expanded its line of transformers. Long recognized as a leader in the design of custom transformers, particularly miniature, toroidal, inverter and box shielded transformers, Ferrodyne now offers a line of standard transformers. Contact your local Ferrodyne Representative or write direct for a product, engineering and production capability brochure. Ferrodyne Corporation, 4240 Glencoe Avenue, Venice, California 90291, (213) 870-9891.

NEW ULTRA-HIGH PERFORMANCE, LOW PROFILE, FIXED VOLTAGE ALL SILICON DC POWER SUPPLIES

Modular and Rack Mounted

SPECIFICATIONS FOR SUPPLIES MODEL 301 THROUGH 901

Regulation: Line: .01% +1 mv for line variation from 105 to 132 VAC. Load: .02% +1 mv from zero to full rated load.
Ripple: ½ millivolt RMS with plus or minus output terminal grounded at 60 Hz and 115 VAC line input.
Temperature Range, Operating: —20°C to +71°C.
Temperature Range, Storage: —55°C to 85°C.
Input Voltage: 105 to 132 VAC or 210 to 264 VAC at no extra cost.
Transient Recovery: Less than 100 microseconds.
Temperature Coefficient: .01% per degree centigrade.
Overload Protection: Automatic current limiting at 110% to 130% of rated current. Automatic recovery on removal of overload.
Remote Sensing: Standard feature.
Remote Voltage Adjustment: Standard feature.
Remote Programming: 100 ohms per volt.
Thermal Protection: Built in Thermostat on Heat Sink.
Overvoltage Protection: Optional at extra charge; internal or external mounting. 75% relative humidity on standard units, 95% relative humidity and fungus proofing optional at extra charge.

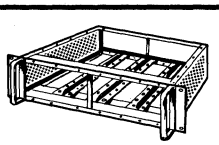
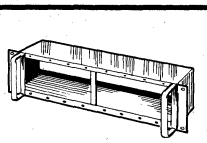
3-1/2" x 19" x 17-1/2" max.

RACK ADAPTERS FOR 301 THROUGH 801 SERIES DC POWER SUPPLIES

Dressen-Barnes Electronics offers a variety of rack adapters for mounting combinations of power supplies. Consult the factory for the correct rack for your particular requirement.





Prices and specifications subject to change without notice. Minor modifications can be made on all units to meet customer requirements. Quantity discounts on 10 units or more, depending on the model, available from the factory.

REGULATED HIGH-DENSITY, CONVECTION COOLED, ULTRA-HIGH PERFORMANCE, ALL SILICON DC POWER MODULES — IN STOCK

SPECIFICATIONS

Regulation: Line: 105-125 VAC: 0.01% or 5 MV (whichever is greater)
Load: NL to FL: 0.01% or 5 MV (whichever is greater)
Ripple: 1 MV RMS max. (2 MV RMS max. above 100V)
Ambient Temperature Range: 0 to 71°C
Storage Temperature Range: —55°C to 85°C
Input: 105-125V; 50-400 CPS, single phase, 0.2 amperes
Transient Recovery Time: Less than 100 microseconds
Temperature Coefficient (Typical):
0.03%/°C for Voltages below 45V
0.01%/°C for Voltages 45V and above
Stability (Typical):
0.5%/8 hrs. for Voltages below 45V
0.1%/8 hrs. for Voltages 45V and above
Output Impedance: Less than 1 ohm @ 500 KC
Overload Protection: Resistor-fuse protection above 40 volts output. Automatic current limiting up to 40 volts set between 110 and 130% of full load.
Remote Sensing: Standard feature.
Remote Voltage Adjust: Standard feature.
Remote Fuse: Standard feature.

*Price and delivery information for these models and other models, from 1-200V, available from the factory.
**The model number consists of the series indicated, plus a dash number to indicate voltage. Examples: The model number 15-3S is a 3 VDC, 750 MA unit; the 30-28S is a 28 VDC, 1.13 AMP unit.
†Any supply can be adjusted 10% in voltage by a screw adjustment on the supply. Slight current derating will result. Contact factory for exact values.
‡Lineal Feet per Minute over the surfaces of the power supply. Temperature is of the air, measured 2 inches up stream.

Many modifications can be made to fit individual customer requirements. For example: different input voltages, parallel operation and wider output voltage swings. Consult the factory for your specific modification requirements.

OVERVOLTAGE LOAD PROTECTOR (OVLP) for overload detection

For use with DB Electronics power supplies and other equipment requiring overload protection. Primarily designed for protecting IC circuitry from line transients but can also be used to protect any load sensitive to momentary or continuous overvoltage conditions. Features high speed overvoltage detectors in conjunction with "Crowbar" SCR. Units available in fixed trip voltages. SCR's are sized for current loads.

TYPICAL UNITS

NOTES

* Models available with higher input voltages upon request.

** Unit set at factory for nominal value ±2%. Unit may be adjusted within range indicated.

† Information necessary to adjust the unit to any output within the range specified furnished with each unit.

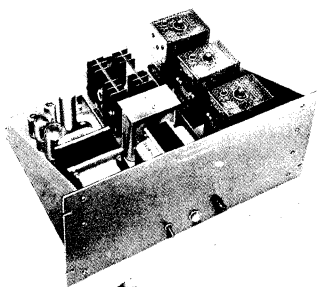
†† Above 320 volts, maximum current is from 55MA at 340V to 50MA at 350V.

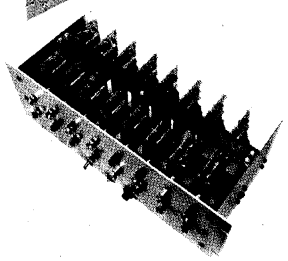
CUSTOMIZED POWER SUPPLIES

Dressen-Barnes makes many modifications to its standard lines of power supplies to meet special or custom supply requirements of its customers. These fall into three general types of modifications:

Type I

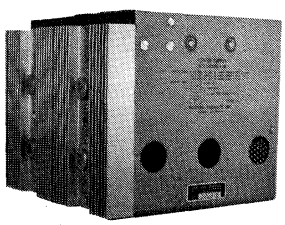
Multiple output packages made from assemblies of standard modules

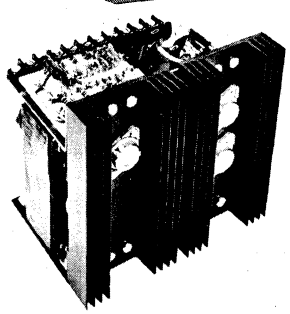




Type II

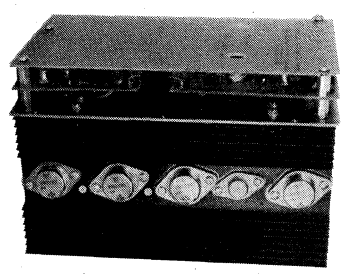
Modification of Standard units to meet special customer requirements.

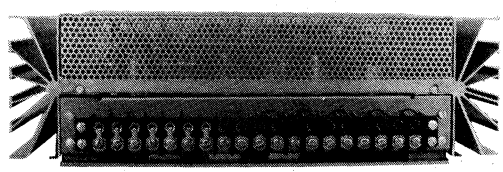




Type III

Standard Circuitry in special packages for volume requirements to meet customer specifications.





With this broad capability and with our modern Quick Reaction Facilities, Dressen-Barnes over the past 22 years has delivered nearly 4,000 different models of custom power supplies.

Prices and specifications subject to change without notice. Minor modifications can be made on all units to meet customer requirements. Quantity discounts on 10 units or more, depending on the model, available from the factory.

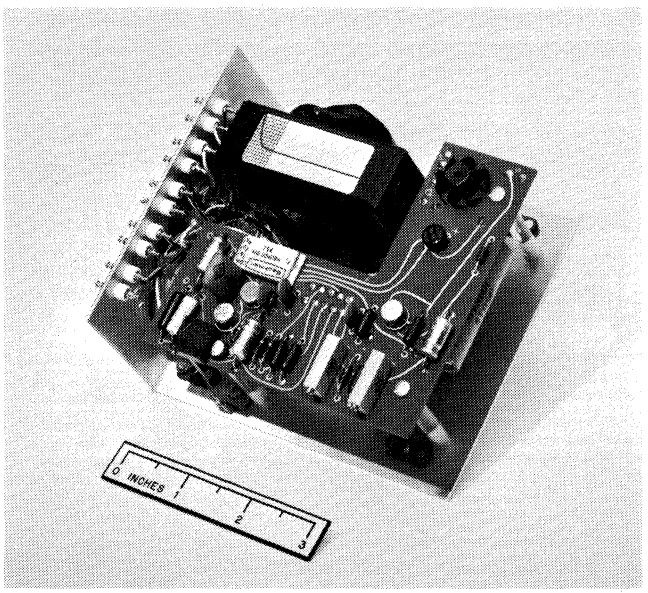
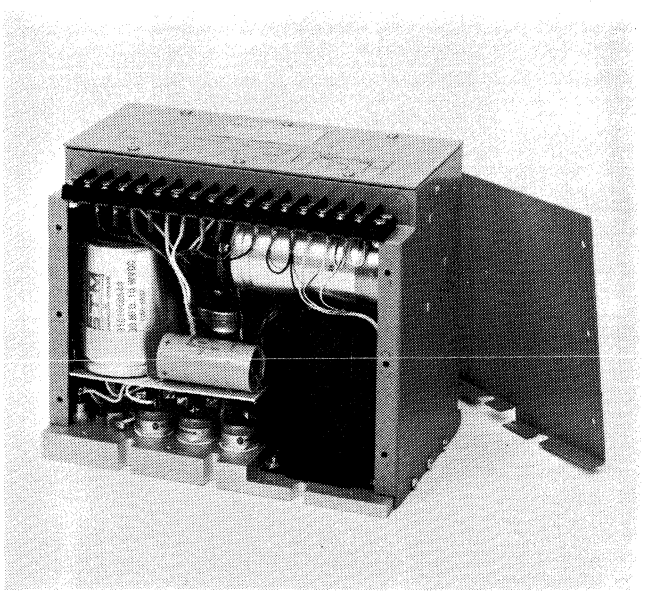
Now... from Diversified Electronics

Low Cost—Custom Engineered POWER SUPPLIES





OFF-THE-SHELF COST WITH CUSTOM ENGINEERED RELIABILITY

Our pre-designed circuits are combined to achieve the electrical performance you require giving you flexibility of package configuration. Our modular techniques approach cost and delivery advantages of catalog, off-the-shelf units while the performance, size, and reliability is custom engineered to your particular power supply requirements.

DIVERSIFIED EXPERIENCE

Diversified system engineered supplies for —

- BWO-VTM-TWT
- Photomultipliers
- Storage and Display Cathode Ray Tubes
- Discrete and Integrated Solid State Devices
- Swept Power Supplies
- Solid State Pulse Modulators

TYPICAL PRODUCT DESIGNS

A high-current 5,000-Hz duty-cycle regulator typifies our design and packaging concept. This high-current regulator is compactly packaged in a 4 x 4 x 3 inch enclosure. The series transistor is recess-mounted on the base plate which forms a heat sink for efficient heat transfer to the chassis on which it is mounted. The unit is ruggedized for shock and vibration resistance and will withstand other extreme environmental exposures. This unit, and any DIVERSIFIED power supply or module, can be qualified to MIL-E-5400 or other military specifications. It has the following electrical characteristics:

Input Voltage	24 to 40 VDC, Unreg.
Output Voltage	10 to 20 VDC, Adj.
Output Current	1 to 8 Amps
Output Power	160 watts Max.
Efficiency	85%
Built-in overload protection	

FACILITIES TO MEET YOUR REQUIREMENTS

OUR experience in CUSTOM ENGINEERED Power Supply units is backed by the latest equipment for custom prototype fabrication and volume production. A complete machine shop, etched circuit board facility, encapsulation pressure-vacuum chamber, and soldering-assembly section support our fully equipped electronic test-calibration lab.

At your service, is our capability from custom design through production to meet your special power supply requirements with quality controlled reliability and repeatability.

For answers to all your power conversion requirements, call or write:

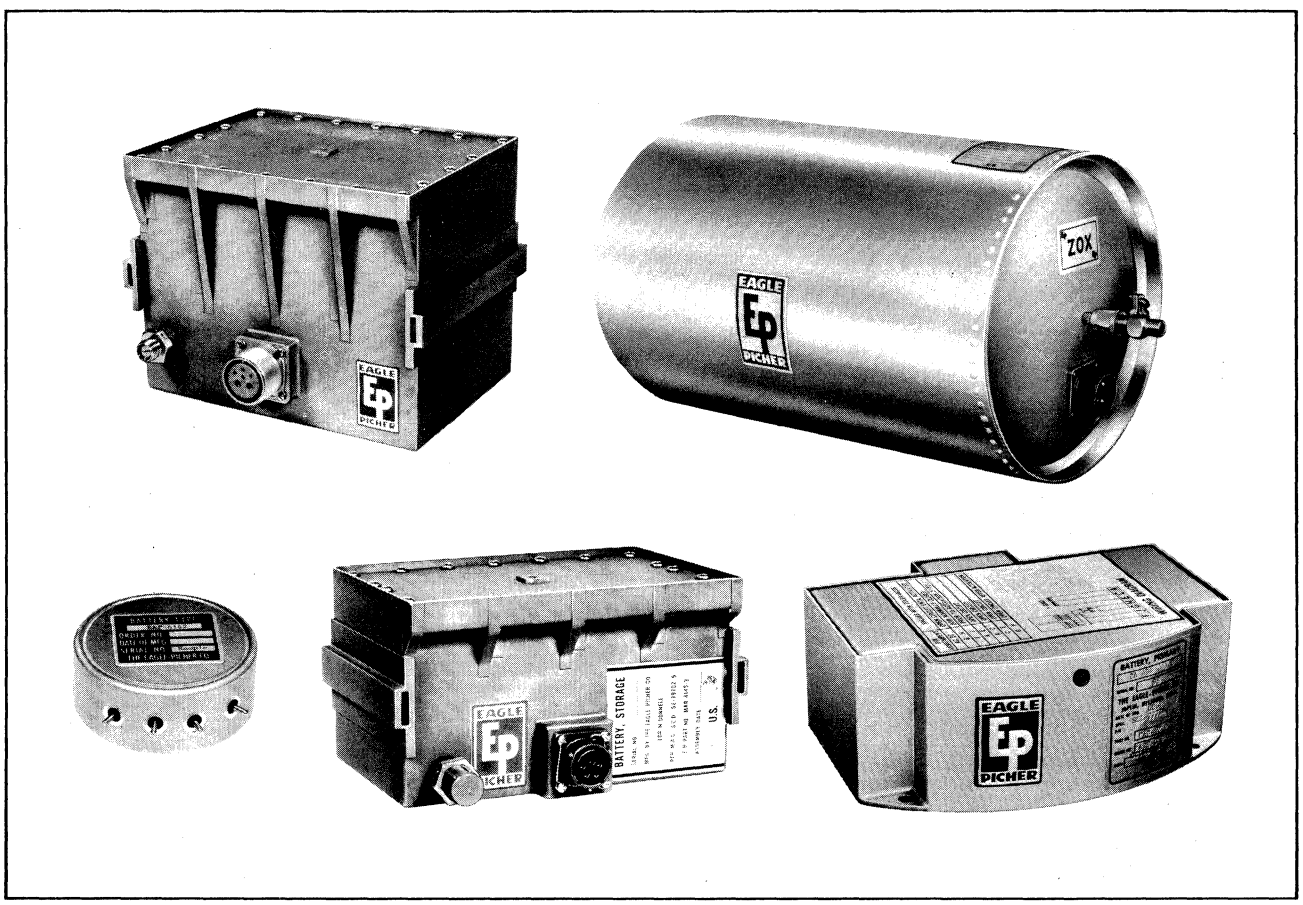
EAGLE EP PICHER CUSTOMIZED BATTERIES

SILVER ZINC • SILVER CADMIUM • THERMAL
NICKEL CADMIUM • WATER ACTIVATED



A complete line of PRIMARY and RECHARGEABLE batteries for consumer, industrial and military applications. The major objective of all Eagle-Picher electrochemical research, dating back to 1922, is the development of reliable power units of the greatest energy per unit weight and volume.

If you need BIG power... from SMALL batteries, count on Eagle-Picher to meet your most demanding requirements. Eagle-Picher has supplied batteries for virtually every major weapon and space system from Agena to Gemini to Zeus.

Eagle-Picher can supply a variety of *shapes*, to meet your most demanding system requirements.

For full technical information and design assistance based on 50 years battery experience and research, contact:

D Series Modular DC Regulated Power Supplies 72-Hour Delivery, Fully Accessible, Fully Repairable, All Silicon

Specifications

Input: 105 — 125 vac, 47 — 420 Hz.
Output (floating): Volts and current: See Table of Models.
Regulation combined:
"A" MODEL — ±0.05% or 1.5 mv, whichever is greater, for a combined ±10 vac input change and 0 to full load change.
STD. MODEL — ±0.5% or 25 mv, whichever is greater, for a combined ±10 vac input change and 0 to full load change.
Ripple:
"A" MODEL — 0.002% or 1 mv, rms, whichever is greater.
STD. MODEL — 0.01% or 5 mv, rms, whichever is greater.
Temperature Coefficient:
"A" MODEL — ±0.01%/°C or 1.2 mv/°C, whichever is greater, over the range of −20°C to +60°C.
STD. MODEL — ±0.04%/°C or 4.8 mv/°C, whichever is greater, over range −20°C to +60°C.
Voltage Adjustment: ±5% @ rated load.
±10% @ 90% load.
Resolution of Adjustment:
"A" MODEL — 0.4% or 30 mv, whichever is greater.
STD. MODEL — 0.7% or 70 mv, whichever is greater.
Temperature, operating: −20° to +71°C ambient (Base of supply must be held at 80°C or less by heat sinking).
Temperature storage: −62°C to +85°C.
Electronic Short Circuit Protection: Set for approx. 150% rated load.
Overtemperature protection: Provided on all models.

Optional Features — See page 1918

H Series Modular DC Power Supplies 72-Hr Delivery Four-Way Mounting, Optional, Built-In O.V. Protector

Specifications

Input: 105 — 125 vac, 47 — 420 Hz.

Output (floating): Volts and current: See Table of Models.

Regulation Combined: ±0.05% or 1.5 mv, whichever is greater for a combined ±10 vac input change and 0 to full load change.

Ripple: 0.002% or 1 mv, rms, whichever is greater.

Temperature Coefficient: ±0.01%/°C or 1.2 mv/°C, whichever is greater, over the range of −20°C to +60°C.

Voltage Adjustment: ±5 % at rated load. ±10% at 90% load.

Resolution of Adjustment: 0.4% or 30 mv, whichever is greater.

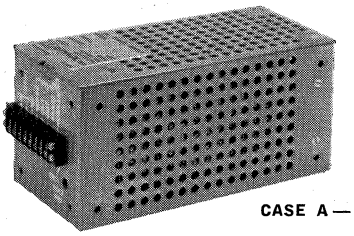
Temperature Operating: −20° to +71°C ambient (See current ratings at 3 temperature).

Temperature Storage: −62°C to +85°C.

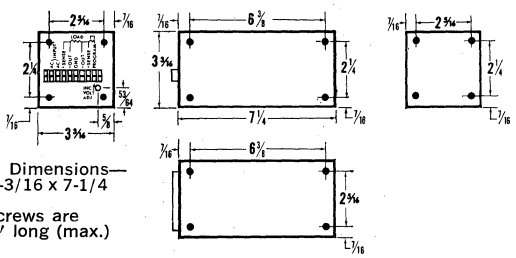
Remote Sensing, Remote Programming, Over Temperature Protection: Provided on all models.

Electronic Short Circuit Protection: Set for approx. 125% rated load.

Optional Features — See page 1918.

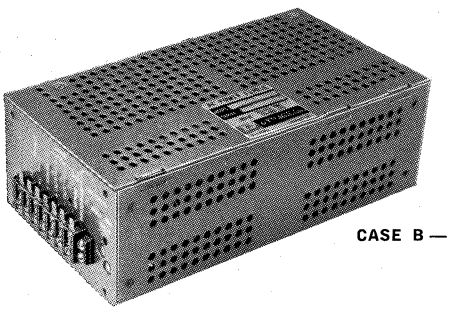


CASE A — 4 lbs.

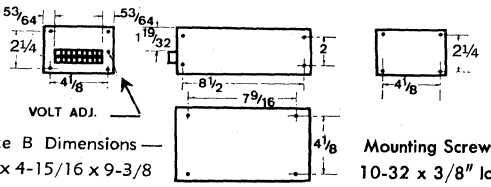


Case size A Dimensions— 3-3/16 x 3-3/16 x 7-1/4

Mounting screws are 10-32 x 3/8″ long (max.)



CASE B — 10 lbs.



Case size B Dimensions — 3-3/16 x 4-15/16 x 9-3/8

Mounting Screws are 10-32 x 3/8″ long (max.)

K & KH Series Dual Output Modular DC Power Supplies 72-Hour Delivery, Fully Repairable

Specifications

Input: 105-125 VAC, 47-420 Hz.

Output (floating): Volts and current: See model description. Master output (positive voltage) adjustable. Slave output (negative voltage) set within ±1% of master output and common to master output.

Regulation, combined: ±0.1% for a combined ±10 VAC input change and 0 to full load change.

Ripple: 2 mv, rms.

Tracking: Negative output will track with positive output to within ±0.02%/°C.

Temperature Coefficient: ±0.03%/°C, over the range of −20°C to +60°C.

Voltage adjustment: ±1 VDC.

Temperature, operating: −20°C to +71°C (Base of K series enclosures must be held at 80°C or less by heat sinking).

Temperature storage: −62°C to +85°C.

Electronic Short Circuit Protection: Set for approximately 150% rated load.

Overtemperature protection: Provided on all models.

Remote Programming: On KH series only. Optional on K series.

Resolution of Adjustment: 70 MV.

Optional Features — See page 1918

FOR OTHER VOLTAGES; CURRENT OR CASE SIZES CONSULT FACTORY

Mounting Accessories (All Series)

Rack Adapters

H R 1-A — 3½" height by 17⅝" depth (can use with chassis slides). Price $60.00. Available power supply mounting combinations by case size are as follows:

2C and 1B	4B
2C and 1A	3B and 1A
1C, 2B and 1A	2B and 2A
1C, 1B and 2A	*1B and 4A
1C and 3A	*5A

With suffix (-1) option (with no meter panels):

1C and 4A	8A

Added cost $10.00

* Only four meter panels can be provided on front panel.

H R 1-B — 3½" height by 17⅝" depth (can use with chassis slides). Price $60.00. Available power supply mounting combinations by case size are as follows:

1D and 1C 1D and 1B 1D and 2A

Note: Only 2 meter panels can be mounted on rack front.

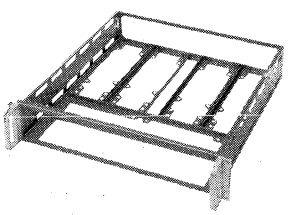
With suffix (-1) option (with no meter panels): 1D and 4A

H R 1-C—3½" height by 17⅝" depth (can use with chassis slides). Picture not shown. Mounts 2D case power supplies. Price $60.00.

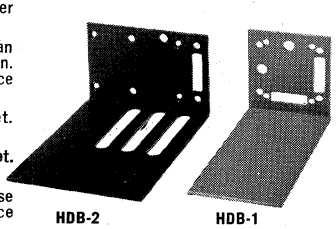
H D B-1 — D Series mounting bracket. F and G case size. Price $10.00.

H D B-2 — D Series mounting bracket. H case size. Price $10.00.

Note: Consult factory for special case mounting configurations and price quantity discount schedule.



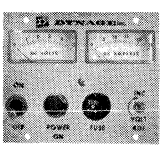
HR1-A
Rack adapter accepts Grant, Jonathan, Chassis Trak and Zero Manufacturing Slides.



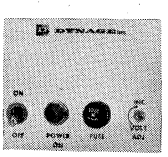
HDB-2 HDB-1

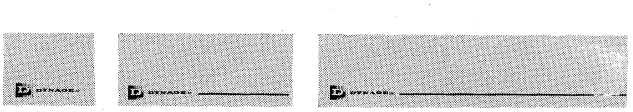
Panels

H M P-1 — ¼ Rack metered panel. 3½" height, for use with rack adapters (includes voltmeter, ammeter, shunt, screwdriver voltage adjust, switch, pilot light and fuse. Price $50.00.



H C P-1 — ¼ Rack control panel. 3½" height, for use with rack adapters (includes screwdriver voltage adjust, switch, pilot light and fuse. Price $25.00.





H B P-1 — Blank panel. 3½" height, ¼ rack. Price $5.00.

H B P-2 — Blank panel. 3½" height, ½ rack. Price $10.00.

H B P-3 — Blank panel. 3½" height, full rack. Price $10.00.

HBP-3 — Mounts 1 in a rack

Send for your free system designer's manual. This manual includes detailed outline drawings printed on reproducible stock for your designing convenience.

DYNAGE inc. • BLOOMFIELD, CONN. 06002 • (203) 243-0315 • TWX 710-425-6063

Optional Features

Improved Combined Voltage Regulation, Suffixes "A", "AA" and "AAA"

K & KH SERIES ONLY

Suffix "A" — Added Cost $10.00

Combined voltage regulation of ±0.05%. To order add a suffix "A" to the model number

D & H SERIES ONLY

Suffix "AA" — Added Cost $10.00 or 5% whichever is greater

Combined voltage regulation of ±0.025% or ±0.75 mv, whichever is greater.

Suffix "AAA" — Added Cost $30.00 or 15% whichever is greater

Combined voltage regulation of ±0.01% or ±0.5 mv, whichever is greater. This feature should only be ordered in conjunction with suffixes "F" or "FF" or "R" or "P" and "T".

Fixed Output, Suffixes "F" and "FF"

Suffix "F" — No Added Cost

Output fixed as specified within model range to ±1% or ±50 mv, whichever is greater.

Suffix "FF" — Added Cost $5.00 or 3% whichever is greater

Output fixed as specified within Model range to ±0.25% or ±15 mv, whichever is greater.

Remote Sensing, Suffix "S" — Added Cost $5.00

D SERIES

Two (2) additional terminals are provided in the base of the supply for connection to the remotely located load. Voltage drops in the load lines should not be allowed to exceed 0.5 vdc. Remote sensing leads should be shielded on long runs to prevent pickup into the amplifier circuitry of the supply.

K SERIES

Three (3) additional terminals are provided in the base of the supply for connection to the remotely located load. Voltage drops in the load lines should not be allowed to exceed 0.5 VDC. Remote sensing leads should be shielded on long runs to prevent pickup into the amplifier circuitry of the supply.

KH SERIES

Three (3) extra terminals are provided above the connection for connection to the remotely located load. Voltage drops in the load lines should not be allowed to exceed 0.5 VDC. Remote sensing leads should be shielded on long runs to prevent pick-up into the amplifier circuitry of the supply.

Remote Programming, Suffix "P" — Added Cost $5.00 (D Series only; Standard on H Series)

Two (2) extra terminals are provided in the base of the supply for connection of the remotely located trimpot. The standard internal trimpot will be shipped as a separate item with the supply. Use shielded leads on long runs to prevent pick-up into the amplifier circuitry of the supply. Programming resistance is as follows:

Output Voltage Model Group	Programming Resistance, ohms/volt	
	"A" Models	Std. Models
0.9 to 10.8	180 to 200	—
12.0 to 57.2	180 to 200	84 to 102
63.0 to 240	300 to 333	260 to 340

Add Suffix "P" to the model number when ordering

Remote Programming, Master Output Only, K Series Only, Suffix "P" Added Cost $5.00

One (1) extra terminal is provided in the base of the supply for connection to the remotely located trimpot. The standard internal potentiometer will be shipped as a separate item with the supply. Programming resistance is 84 to 102 ohms/volt. Use shielded leads on long runs to prevent pickup into the amplifier circuitry of the supply. Add suffix "P" to the model number.

Built-in Overvoltage Protection, Suffix "D" (H Series and J size of D Series). Added Cost $30.00 or 15% whichever is greater.

This feature will drive the output voltage towards zero by electronically shorting the output, if the output increases above the preset level of 125% to 135% of the nominal output voltage. Protection level can be set to other values within a setting accuracy of ±5%. The supply must be turned "off" and then "on" to restore the output after the protection circuit has operated. This feature is available on the J Size and all H series modules only. Minimum voltage set point 5.5 vdc.

230 VAC Input — Suffix "N". H Series Only

Add $5.00 when ordered in A and B case sizes. No additional charge when ordered in C, D and E case sizes.

Wide Input Range — Suffix "W" — Added Cost $10.00 or 8% whichever is greater.

This feature will allow an expanded input voltage range of 95 vac to 132 vac at 57-63 Hz. Derate output current by 25% on all models.

Series connection, Suffix "B" — Added Cost $1.00 or 2% whichever is greater (D & H Series only)

The supplies will operate into either conventional or complex loads with series connection, but should have a silicon rectifier connected externally across each of the two (2) outputs with the cathode of the rectifier being connected to the + output terminal of the supply. The rectifier will protect the pass transistor sections of each supply from being overvoltaged when the supply is driven to cut back by short circuiting the output. Modifications are made internally to the H series supplies only. Added cost: $1.00 or 2% whichever is greater.

Fungus Proofing, Suffix "V" — Added Cost $10.00 or 3% whichever is greater

MIL-V-173 varnish is used for fungi nutrient components.

Improved Resolution of Adjustment, Suffix "R"
Added Cost $10.00 or 5% whichever is greater

Improved resolution of output voltage adjustment can be obtained on the "A" models only by adding suffix "R" to the model number. The resolution and adjust span are listed opposite the range of nominal output voltages of the supplies. Specify the nominal output required when ordering. Available on "A" models only.

D & H SERIES

Output Voltage Model Group	Adjust Span, mv	Resolution (whichever is greater)
0.9 to 4.1 vdc	± 50	1 mv
4.5 to 6.7 vdc	± 75	1 mv
7.3 to 10.8 vdc	± 100	0.01% or 1 mv
12.0 to 19.6	± 200	10 mv
21.6 to 38.8	± 400	0.05% or 16 mv
42.8 to 92.6	± 1000	31 mv
102 to 199	± 2000	39 mv
218 to 240	± 4000	67 mv

K & KH SERIES

±10	±250	12 MV
±12	±250	12 MV
±15	±250	12 MV

Improved Tracking, Suffix "K" Added Cost $20.00

Tracking of the −15 vdc output to the +15 VDC output within ±0.005%/°C. To order add a suffix "K" to the model number.

Lower Temperature Coefficient, Suffix "T" Added Cost $10.00

Temperature coefficient of ±0.015%/°C over the range of −20°C to +60°C. To order add a suffix "T" to the model number.

Lower Temperature Coefficient, Suffixes "T", "TT" and "TTT"

D & H SERIES ONLY

Suffix	Temperature Coefficient (whichever is greater)	Range, °C	Added Cost
"T"	±0.005%/°C or ±0.6 mv/°C	−20 to 60	$20.00 or 10%
*"TT"	±0.002%/°C or ±0.24 mv/°C	0 to 50	25.00 or 15%
*"TTT"	±0.001%/°C or ±0.12 mv/°C	0 to 50	50.00 or 50%

*Suffixes "TT" and "TTT" are only available in conjunction with the following other optional features. Suffix "F" or "FF" or "R" or "P".

Long Term Stability, Suffixes "H", "HH" and "HHH"

D & H SERIES ONLY

Suffix	Long Term Stability (whichever is greater)	Short Term Stability (whichever is greater)	Added Cost
*"H"	±0.05% or ±6 mv/month	±0.01% is ±1.2 mv/8 hrs.	$30.00 or 20%
*"HH"	±0.02% or ±2.4 mv/month	±0.004% or ±0.5 mv/8 hrs.	50.00 or 50%
**"HHH"	±0.005% or ±0.6 mv/month	±0.001% or ±0.12 mv/8 hrs.	90.00 or 100%

*Suffixes "H" and "HH" are only available in conjunction with Suffix "TT" (and other required Suffixes).

**Suffix "HHH" is only available in conjunction with Suffix "TTT" (and other required Suffixes).

Ordering Information

To Order

Specify power supply by model number along with suffixes for any optional features required. As an example, to order Model D-14.6 — 0.200A with improved 0.01% regulation (Suffix "AAA"), with fixed output, (Suffix "F"), and with 0.002% temperature coefficient (Suffix "TT"); the complete model number would be D-14.6 - 0.200AAAFTT.

Cost additions to the base cost of $73.00 for 1-9 quantity are $30.00 for Suffix "AAA", none for Suffix "F", and $25.00 for Suffix "TT" for a total cost of $128.00.

Seventy-two (72) hour delivery can be made on quantities of 2 pieces or less of each model ordered, except those with optional features.
Outline drawings and parts lists only furnished when requested.

* For mixed models and optional feature discounts, consult local rep or Dynage directly.

Terms

Terms are net 30 days, F.O.B. Bloomfield, Conn. Prices and specifications subject to change without notice. Blanket purchase agreements with releases over one (1) year are easily arranged.

Warranty

Dynage, Inc., warrants each product manufactured by them to be free from defects in material and workmanship. Our liability under this warranty is limited to servicing, adjusting or replacing any product returned to the factory for that purpose within two (2) years after date of shipment. We assume no liability for consequential damages of any kind, and the purchaser, by acceptance of each product will assume all liability for the consequence of its use or misuse by the purchaser, his employees, or others.

Elcor HIGH ISOLATION* OUTPUT

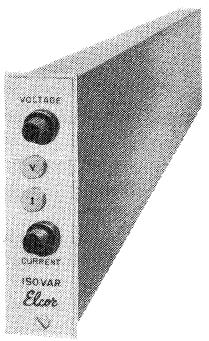
Low Noise DC Power and Transformer Modules

NEW

ISOVAR: Automatic Voltage-to-Current Regulation

- Voltage monitoring in constant current mode
- No compromise of current regulation through load

It's the versatile isolated power supply; two operating modes—voltage and current regulation; 0.002% current and voltage regulation; 0 to 40 V, 175 MA output; 1.4″ width allows 12 channels in standard 19″ rack; 10-turn pots set precise maximum and operating values for current and voltage; guarded remote sensing leads; 0.005%/°C T.C. for both current and voltage; state-of-the-art integrated circuits design. Write for complete details and pricing information. (Tentative Specifications)

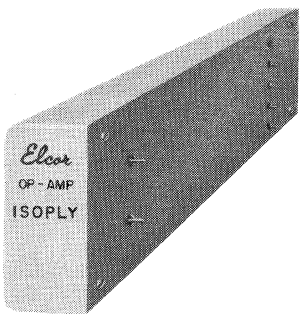


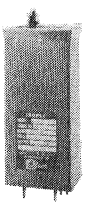
NEW

DUAL POWER ISOPLY

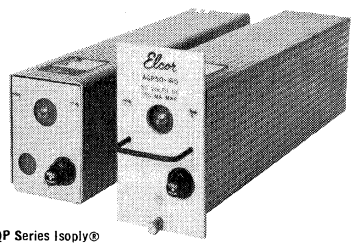
- Isolated power for operational amplifier
- Precise regulation and tracking

Compact power for printed circuit board mounting; ±15 VDC, 200 MA; —15 V output tracks +15 V output; current limiting; 0.005% voltage regulation; 0.005%/°C T.C.; 3″H x 1″W x 8″D. Write for complete details and pricing information. (Tentative Specifications)





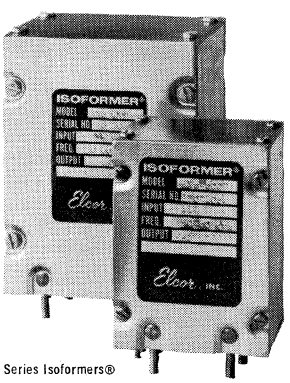
QM Series Isoply®



4QC and 4QP Series Isoply®

ISOPLYS: Isolated-output DC power supplies for bridge circuits. Less than 5 μV p-p noise to ground, when used with a 350-ohm transducer. All silicon transistor regulated power supplies. Output voltage adjustable about ±10% from nominal voltage. Available as chassis mounted with solder terminals (QC series) and as plug-in modules (QP series), 6 per 19-inch rack. Outputs from 1 V, 200 MA to 100 V, 1¢ MA. Adjustable models, 4 to 16 V, 75 MA output (QM series), 15 silicon devices, wire-wound resistors, 10-turn potentiometer stability of 0.05%/8 hours. Current limiting. Regulation, 0.02%; T.C. 0.01%/°F. Ripple: Less than 0.005%. Remote sensing.

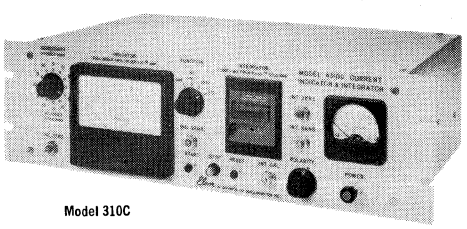
APPLICATIONS: Power modules for use with: bridge circuits, ungrounded amplifiers, traveling wave tubes, screen rooms; for use as: servo references, floating bias, direct coupling, ground loop decoupling, slide wire power supply, battery substitutes.



4X and 25X Series Isoformers®

ISOLATED REFERENCE SUPPLIES: DC outputs of 6.2 V, 8.4 V, 9.0 V, and 11.7 V, currents from less than 1 MA to 20 MA (fixed load). For floating potentiometers, retransmitting slide wires, wide range zero controls, bias, and many other voltage reference applications. Available in mumetal cans for reduced magnetic disturbance.

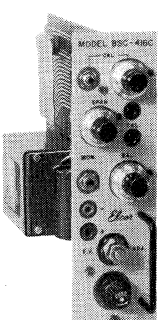
ISOFORMERS: Isolation transformers: 4 W and 25 W; secondary winding and shield have high conductive and capacitive isolation from primary and case (ground or primary common). Line isolation .05pf and ground isolation 15pf. Output voltages from 6.3V to 150V for 4 W models and to 600V for 25 W models. Standard input 117 VAC 50-60 Hz; other inputs from 6.3 VAC to 234 VAC available. Available up to 6 KVA output.



Model 310C

CURRENT INDICATOR AND INTEGRATORS: New solid state instruments; push button start-stop control and/or remote reset. APPLICATIONS: Nuclear experiments, spectroscopic and chromatographic analysis, flow totalizing, stress-strain testing, densitometry, illumination testing. Gives continuous indication of chemical reaction progress in coulombmetric experiments. Sensitivities to 3 x 10^{-10} amperes. Specifications: 0.02% per hour drift, 0.2% reproducibility, 1% accuracy. Digital readout and electrical recorder output.

BRIDGE SIGNAL CONDITIONING UNITS: Conditions and prepares electrical signals from various strain sensitive resistance transducers. Incorporates Elcor 4 to 16V, 75 MA highly isolated low noise power supply. Variable controls—balance, voltage, span, and calibration—are 10-turn, high resolution, low T.C. potentiometers. For 4, 6, or 8 wire systems. Convenient test and remote control features.



Model BSC-416C

*Power supplies with entire output circuitry highly isolated conductively and capacitively from ground (case) and ac input; used without causing a ground loop or adding to the existing noise level. True battery equivalent.

For complete information on all Elcor high isolation products, see your representative or write Elcor.

Elcor 2431 Linden Lane, P.O. Box 986, Silver Spring, Maryland 20910 / (301) 589-6614

MODULAR D.C. POWER SUPPLIES

SELECTED RANGE MODULES & PROGRAMMABLE RANGE MODULES

INTEGRATED CIRCUIT DESIGN

GENERAL SPECIFICATIONS FOR .01% SUPPLIES

INPUT 105-125 volts AC, 50-400 cycles per second

LINE REGULATION Less than 0.01% or 1 mv

LOAD REGULATION Less than 0.01% or 1 mv

RIPPLE NOISE Less than 500 microvolts

STABILITY Less than 0.01% or 5 mv/8 hrs.

RECOVERY TIME Less than 50 microseconds for instantaneous load changes

OUTPUT IMPEDANCE Less than KE/1 ohms

Frequency Range	DC-1KC	1KC-100KC	100KC-1MC
K	0.0004	0.004	0.04

OVERLOAD & SHORT CIRCUIT Circuit reduces voltage current simultaneously for overload or short circuit with automatic recovery after overload is removed.

TEMPERATURE COEFFICIENT Less than 0.01% or 1 mv/°C

OPERATING TEMPERATURE 71°C max.

RESOLUTION Less than 0.05%

REMOTE PROGRAMMING Nominally 200 ohms per volt

CONTROLS Voltage adjust, screwdriver control, self-locking pot on modules.

TERMINALS Input, output and remote sensing, solder terminals

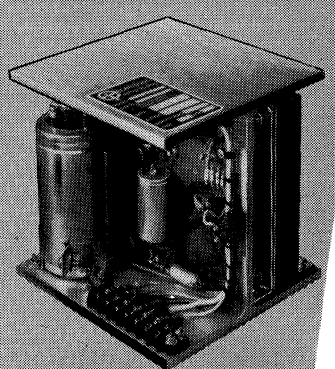
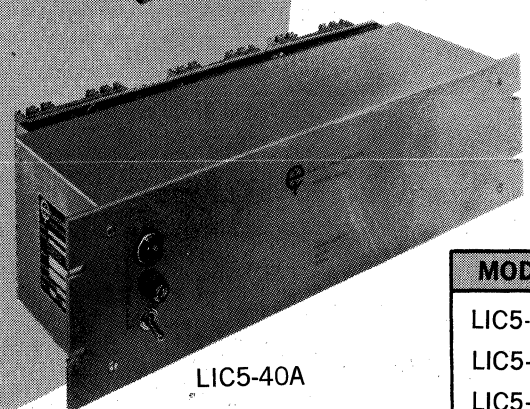
LIC5-1A

New LOW COST POWER SUPPLY SERIES FOR IC'S

ELASCO'S new LIC Series of low-cost high quality power supplies is designed expressly for the IC market. This series delivers 5 Volts D.C. at the power levels indicated in the chart shown below. Ripple and regulation specifications are commensurate with integrated circuit requirements. All units are short-circuit proof and an over-voltage protection option is available.



LIC5-7A
LIC5-20A



LIC5-40A

SPECIFICATIONS

Input:	105-125VAC, 60 to 400Hz
Output Voltage:	5VDC
Line Regulation:	0.5% Max.
Load Regulation:	0.5% Max.
Ripple & Noise:	10MV. RMS Max.
Stability:	±0.1% After warm up
Temperature Coefficient:	Better than .05%/°C
Operating Temperature:	−20°C to +71°C
Storage Temperature:	−20°C to +85°C
Short Circuit Proof	
Overvoltage option available

2Q15-100PC

new DUAL-OUTPUT POWER SUPPLIES

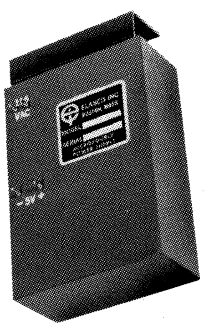
ELASCO'S new 2Q series of low-cost high quality power supplies is primarily designed for use with operational amplifiers. Two power levels are presently available, both mounted on the same size printed circuit card. As many as ten units can be mounted in a standard 5¼ inch basket.

SPECIFICATIONS

Input:	105-125VAC, 60 to 400Hz	Temperature coefficient:	Better than .02%/°C
Output Voltage:	±15VDC, Dual Output	Operating Temperature:	−25°C to +71°C
Line Regulation:	0.1% Max.	Storage Temperature:	−55°C to +85°C
Load Regulation:	0.1% Max.	Short Circuit Proof	
Ripple & Noise:	2MV. RMS Max.	Tracking Outputs	
Stability:	±0.1% after warm up	Size: 4½ x 4½ x 1½"	

MODEL	VOLTAGE	CURRENT	PRICE
2Q15-100PC	±15VDC	.1 Amp. each side	$31.50
2Q15-250PC	±15VDC	.25 Amp. each side	42.00

IC5-5A MICROSOURCE POWER SUPPLY



IC5-5A

The new ELASCO Model IC5-5A power supply represents a real breakthrough in both technology and pricing. The use of a patented input regulator and new low cost silicon semiconductor devices has yielded an ideal source for powering your IC circuits and systems. The IC5-5A is small enough to mount on a P.C. card as an integral part of your system, yet it is completely self-contained and will operate from any input frequency, 50 hertz and up. The input regulator is not frequency sensitive and because of its low dissipation characteristics allows us to attain a power density of better than one watt per cubic inch.

SPECIFICATIONS

Input:	105-125VAC, 50 to 1000Hz	Temperature Coefficient:	Better than 0.05%
Output:	5VDC @ 5 Amperes, (±0.25V adjust)	Operating Temperature:	−25°C to +65°C
Line Regulation:	0.1%	Storage Temperature:	−55°C to +85°C
Load Regulation:	0.1%	Short Circuit Proof	
Ripple & Noise:	0.1%	Protected Against Over-voltage Conditions	
Stability:	±0.1%, after warm-up	Size: 3⅛ x 4⅝ x 1⅜"

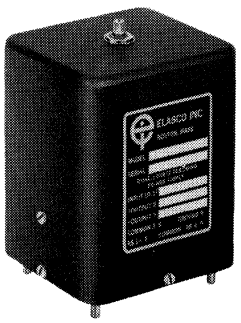
"2MS" SERIES dual-source power supplies



DESCRIPTION

The 2MS Series of Dual-Source power supplies is used for laboratory and system applications where balanced or tracking output voltages are desired. Designed for use with operational amplifiers as well, these units feature twin outputs. The 2MS Series incorporates two separate power sources in a single compact case, typically 3⅝ x 3⅞ x 4½ inches. Special models with wider range of adjustments are available.

• All Silicon • Tracking Outputs • Available in "Z" Option
• Short Circuit Proof • Remote Sensing
• Twin Outputs • 0 to 71°C

"MS" SERIES minisource power supplies

DESCRIPTION

The "MS" Power Supply series delivers essentially fixed output voltage which may be fine adjusted ±1V. This series is designed to deliver full rated power under worst case conditions of line voltage, load current and ambient temperature of 71°C without the use of complex heat sinking and/or referral to thermal design curves. Each and every Elasco power supply is designed to perform under worst case conditions on its own — WITHOUT THE USE OF EXTERNAL THERMAL CRUTCHES. This is why ELASCO can warranty all its catalog items unconditionally for 10 YEARS.

The "MS" series is completely serviceable. All components are accessible for checking and replacement should there be a degradation in performance. The "MS" series is overload and short circuit proof and will recover automatically upon removal of the overload condition.

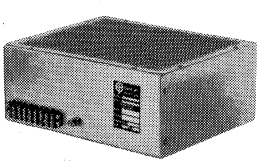
"SVS" SERIES transistorized power supplies



DESCRIPTION

The "SVS" Power Supply series delivers essentially fixed output voltage which may be fine adjusted ±1V. This series is designed to deliver full rated power under worst case conditions of line voltage, load current and ambient temperature of 71°C without the use of complex heat sinking and/or referral to thermal design curves. Each and every Elasco power supply is designed to perform under worst case conditions on its own — WITHOUT THE USE OF EXTERNAL THERMAL CRUTCHES. This is why ELASCO can warranty all its catalog items unconditionally for 10 YEARS.

The "SVS" series is completely serviceable. All components are accessible for checking and replacement should there be a degradation in performance. The "SVS" series is overload and short circuit proof and will recover automatically upon removal of the overload condition. Options for either panel or chassis mounting have been automatically built into this series.

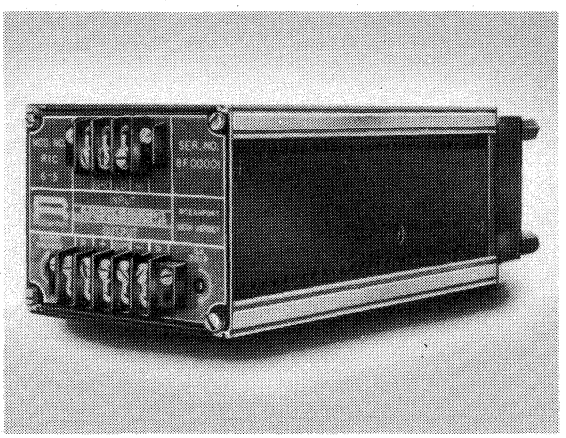
Power Supplies For IC Applications



RIC SERIES

The RIC Series consist of modular power supplies designed specifically for OEM applications requiring power for discrete or integrated circuit logic.

Mechanical Features

- Modular construction
- Separate AC & DC barrier strip
- Transformer has electrostatic shielding

Electrical Features

- ± 0.5% O/A regulation
- Maximum ripple & noise 15MV pk/pk
- Electronic current limiting
- Built-in adjustable overvoltage protection
- Automatic thermal overload protection
- ± 10% output voltage adjustment
- High efficiency
- Remote sensing/programming

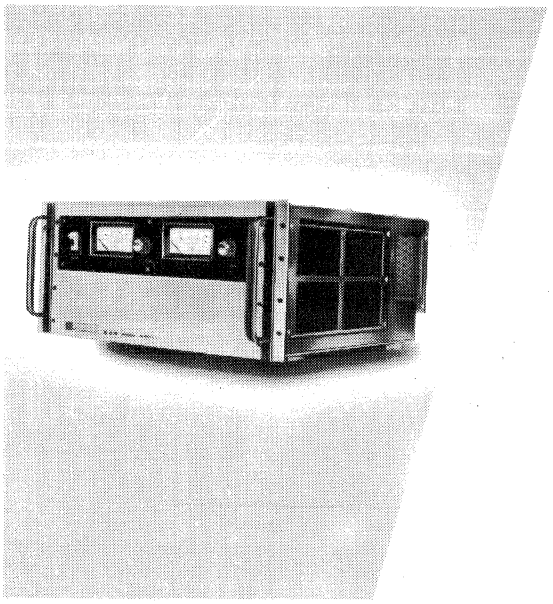
Power Supplies- High Wattage



Electrical Features

- 0.1% regulation constant voltage or constant current mode
- 10 MV RMS ripple maximum either voltage or current
- Remote sensing/programming
- Efficiency up to 85%
- Automatic E/I crossover
- Thermal overload protection

Mechanical Features

- Forced air cooling
- Plug-in circuit boards

SCR SERIES

The SCR Series are high current power supplies designed for a wide variety of applications, particularly where operation in both the constant current mode and in the constant voltage mode is required. Use of active components in the filter section reduces ripple in either mode by factors as high as 100 to 1 over competitive designs. The unique filter design coupled with efficient cooling results in the smallest package size per watt possible.

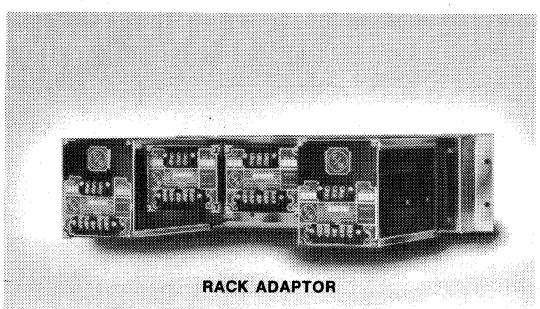
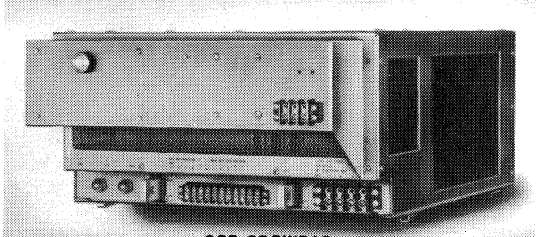
Power Supply Accessories



RACK ADAPTOR



SCR CROWBAR

RIC Accessories

Rack Adapters

Model #	Size	Type	Price
RA 4001-1	3½	w/handles	$35.00
RA 4001-2	3½	w/o handles	25.00
RA 4002-1	5¼	w/handles	35.00
RA 4002-2	5¼	w/o handles	25.00

Accommodate up to 4 quarter-rack supplies or 2 half-rack. 5¼ rack adapters accommodate any combination of 3½ of 5¼ models. Price includes one full size blank panel.

Panel Options

Model	Description	Price
P 4001 F	Blank 3½ full panel	$10.00
P 4001 H	Blank 3½ half panel	10.00
P 4001 Q	Blank 3½ quarter panel	10.00
P 4002 F	Blank 5¼ full panel	10.00
P 4002 H	Blank 5¼ half panel	10.00
P 4002 Q	Blank 5¼ quarter panel	10.00

Other Options

	Price*
Control set, including voltage adj. pot, switch, fuse, pilot light add suffix C to panel option Model #	$15.00
Meter set, including voltmeter and ammeter add suffix M to panel option Model #	25.00
Combination control and meter set add suffix CM to panel option Model #	40.00

* Add to basic panel option price

SCR Accessories

SCR CROWBAR CIRCUIT PROTECTION					
Part No.	Model	Range Adjustment	Response	Size W D	Price
3003	SCR 10-250	4-12V	10, usec	17 x 5″	$300.00
3004	SCR 10-500	4-12V	10, usec	17 x 5″	$400.00
3005	SCR 20-125	8-24V	10, usec	17 x 5″	$250.00
3006	SCR 20-250	8-24V	10, usec	17 x 5″	$300.00
3007	SCR 40- 60	16-48V	10, usec	17 x 5″	$200.00
3008	SCR 40-125	16-48V	10, usec	17 x 5″	$250.00

Factory installed Crowbar type. SCR Crowbar is shorted across load within 10 usec after which power supply is disconnected from line within approximately 10 ms.

Prices and specifications subject to change without notice.

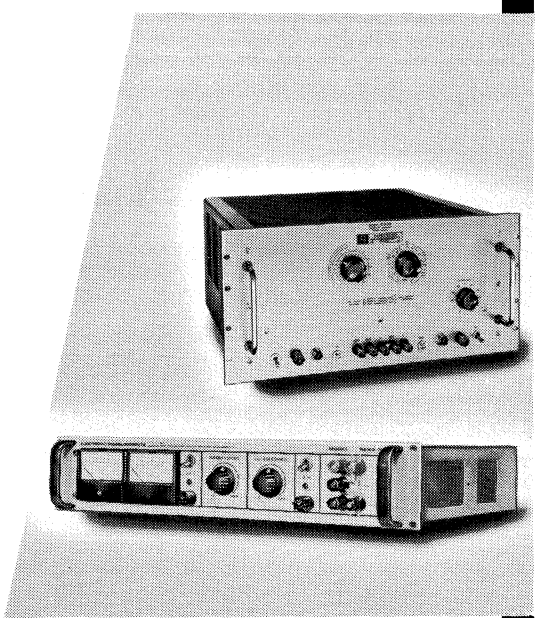
Power Supplies For Lab/Systems



RE Series

The RE Series is designed for both precise laboratory and systems use and features automatic cross-over to either constant voltage or constant current modes of operation.

Features

- .01% regulation
- Remote sensing/programming
- Automatic E/I crossover
- 0.5 MV RMS ripple
- 1000 Ohms/volt programming constant

Ratings

Model #	Output E	Output I	Size	Price
RE 40-5	0-40	5	1	$290.00
RE 40-10	0-40	10	2	370.00
RE 60-2.5	0-60	2.5	1	290.00
RE 60-5	0-60	5	2	415.00

NOTES: All units input: 105-125 VAC 50-63Hz.
For meters add suffix M to Model and $25.00 to price
For meters and front terminals add suffix ML to model and $30.00 to price.
Size 1 — 3½H x 19W x 17¼D.
Size 2 — 5¼H x 19W x 16¼D.

HV Series

The HV Series is a completely solid state medium voltage power supply.

Features

- .02% regulation
- 1MV RMS ripple
- Automatic E/I crossover
- Remote sensing/programming

Ratings

Model #	E	I	Size	Price
HV 150-2M	0-150	2	3½H x 19W x 15¾D	$735.00
HV 330-1M	0-330	1	3½H x 19W x 15¾D	735.00

All units 105-125V AC 50-63Hz

C 600 Series

The C 600 Series is designed for applications where precise constant current operation down to currents as low as 0.5 microamps is required.

Ratings

Model #	Output Compliance Full I	Output Compliance Derated I	Output Current	Regulation Line	Regulation Load	Ripple 0.4% of setting + Neg.	Ripple 0.4% of setting + Pos.	Size	Price
C 612 AM	0-100	100-260	1 ua-100ma	0.15%	0.1%	0.5 ua	0.1 ua	3¼ x 19 x 9¼	$320.00

All units input 105-125Vac 50-63Hz; All units except 612A have a voltage limiter.
For voltage limiting on C 612A add suffix L and $50.00 to price, delete either voltmeter or front terminals.
Chopper stabilization improves stability to 0.2%; add suffix K and $95.00 to price.

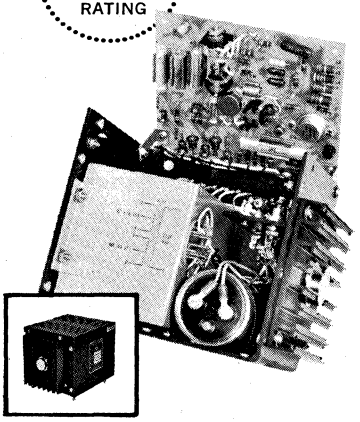
TRANSPAC® Power Modules
MAGITRAN® Power Supplies

MIL SPEC SILICON, REPAIRABLE POWER MODULES

Fully Meets MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200

75°C FREE AIR RATING



0 through 310 VDC, 50 MA through 8 Amps

Transpac **CERTIFIED*** *Militarized Line*

Input: 103.5-126.5 VAC (standard) or 108-132 VAC (specify) 50-440 cps
Ripple: Less than 800 μv RMS except 50 through 310 VDC where ripple is less than 0.005% RMS
Line Regulation: Less than ±0.01% or 5 mv, whichever is greater, for full input change
Load Regulation: Less than 0.05% or 8 mv for 0-100% load change
Transient Response: Less than 50 μsec for step line or load change
Maximum Case Temperature: 115°C
Free Air Operating Temperature: —55°C to +75°C (full tantalum type up to 1 ampere most models) —40°C to +75°C (semi-tantalum type above 1 ampere) full ratings, no external heat sinking
Temperature Coefficient: Less than 0.01% per degree C or 3 mv
Long Term Stability: Within 5 mv for 8 hours after 20 minute warm-up (line, load, temperature constant)
Interconnection: Series or parallel operation
Voltage Adjustment: External screwdriver voltage control
Remote Voltage Control: Provision for external control of output voltage
Remote Sensing: Remote sensing facilities provided
Short Circuit Protection: Automatic short circuit protection and automatic recovery
Output Connection: Ungrounded outputs, either positive or negative terminals may be grounded
Transistor Types: MIL-STD-701 and MIL-S-19500
Military Specs: MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200 where applicable

*Certificate of Conformity by independent laboratory supplied on request.

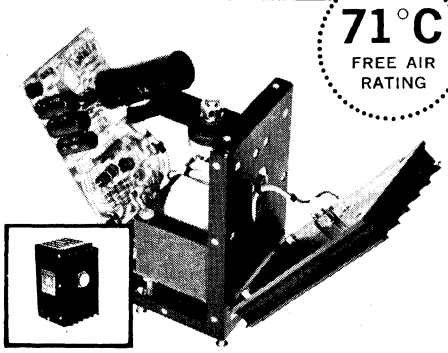
TRANSPAC® SILICON, REPAIRABLE POWER MODULES



71°C FREE AIR RATING

0 through 310 VDC, 50 MA through 40 Amps

Ultra-Compact Standard Silicon Line

Input: 105-125 VAC, 50-400 cps
Ripple: Less than 800 microvolts RMS except 150 through 310 VDC which is .005% RMS
Line regulation: Less than ±0.01% or 5 mv for full input change
Load regulation: Less than 0.05% or 8 millivolts for 0-100% load change
Voltage adjustment: External screwdriver voltage control
Output connection: Ungrounded outputs, either positive or negative terminals may be grounded
Transient response: Less than 50 microseconds
Free air operating temperature: −20°C to +71°C, full ratings, no external heat sinking
Maximum case temperature: 110°C (15 to 40 Amps 125°C)
Temperature coefficient: Less than 0.01% per °C or 3 millivolts
Long-term stability: Within 5 millivolts for 8 hours
Heat sinking: Internal, convection cooled

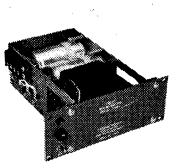
300-310 VDC	0-100MA	4 x 4-11/16 x 5-15/16	SR300P1	$235.00

OTHER DC MODULE TYPES

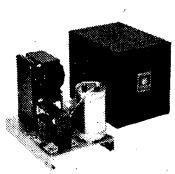
Wide choice of additional stock DC modules covering voltage ranges from 5 VDC through 20 KVDC at low, intermediate, and high current ratings. Military and industrial regulated, unregulated and high voltage types. Write for full catalog data.

NON-REGULATED SILICON HIGH CURRENT POWER SUPPLIES



Non-regulated silicon rectifier designs with all components fully accessible. All units in one-half relay rack dimensions. Two units may be mounted side-by-side for 19" relay rack mounting. Front panel switch and pilot light; rear terminals. Ripple less than 1 volt, 5 models, 28 VDC, 5 to 40 amp ratings. Prices $105 to $260.

SOLID-STATE AC to AC FREQUENCY CHANGERS



Stock units for conversion of 50-1000 cps input to 60 or 400 cps output. Power ratings up to 500 VA. Regulated, unregulated square wave and regulated sinusoidal output types. Prices from $175 through $510 each.

71°C FREE AIR RATING

WIDE RANGE LOW COST DC POWER MODULE

4 through 60 VDC, 750 MA through 10 Amps

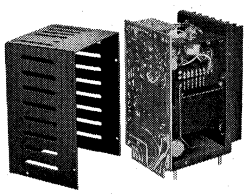
Input: 105-125 VAC, 50-400 cps
DC Output: 4-32 VDC or 30-60 VDC (see table)
Regulator Type: Solid-state, all silicon semi-conductors
Ripple: Less than 800 microvolts RMS or .005%, whichever is greater
Line Regulation: Better than ±0.01% or 5 mv for full input change
Load Regulation: Better than 0.05% or 8 mv for 0-100% load change
Transient Response: Less than 50 microseconds
Operating Temperature: —20°C to +71°C free air, full ratings
Temperature Coefficient: Less than 0.01% per degrees C or 3 millivolts
Long-Term Stability: Within 8 millivolts (8 hours reference)

Features of all ERA Wide Range Modules

- Wide range output voltage flexibility
- Low and high current models
- Single model serves all voltage requirements
- All silicon
- No heat sinking or air blow required
- Compact, fully repairable
- Automatic over-current protection
- Excellent long-term stability
- Minimal temperature coefficient
- Wide input range
- Remote sensing
- Series or parallel operation
- Ungrounded outputs
- Short circuit and transient protected
- Optional accessories

Output Voltage (DC)	Current	Size WxDxH (inches)	Weight (lbs.)	Model	Price
4-32	0-750 MA	4 x 4 x 6½	6.2	LC32P7	$ 95.00
4-32	0-2 amps	5 x 5 x 7	8.5	LC322	$120.00
4-32	0-5 amps	6¾ x 8½ x 7¼	16.8	LC325	$189.00
4-32	0-10 amps	8¾ x 9½ x 7½	29.0	LC3210	$225.00
30-60	0-1 amp	5 x 5 x 7	8.5	LC601	$145.00

Over-Voltage Protector Option: Add $35.00 to above prices and Suffix V to Model No. (i.e. LC325V, etc.)



71°C FREE AIR RATING

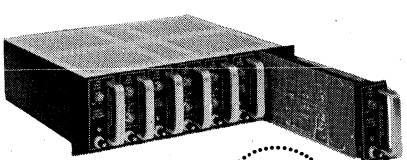
WIDE RANGE ULTRA COMPACT DC POWER COMPACTS

1 through 33 VDC, 500 MA through 8 Amps

The WR Series of DC Compacts features the same high quality engineering and construction as the LC Series above. This series has been designed for applications with minimum space requirements.

Input: 105-125 VAC, 50-400 cps
DC Output: 1-33 VDC or 1-18 VDC (see table)
Regulator type: Solid-state, all-silicon semi-conductors
Ripple: Less than 800 microvolts RMS or 0.005% whichever is greater
Line regulation: Better than ±0.01% or 5 millivolts for full input change
Load regulation: Better than 0.05% or 8 millivolts for 0-100% load change
Vernier voltage: Provision for external adjustment
Transient response: Less than 50 micro-seconds
Operating temperature: —20°C to +71°C free air, full ratings
Temperature coefficient: 0.01% or 3 millivolts per degrees C
Long term stability: Within 5 millivolts or 0.02% (8 hours reference: line, load temperature constant)
Heat sinking: Internal, convection cooled

Output Voltage (DC)	Current (71°C)	Size WxDxH (inches)	Weight (lbs.)	Model	Price
1-33	0-500 MA	3¼ x 3¼ x 5¼	3.5	WR33P5	$130.00
1-33	0-1 amp	3¼ x 4 x 5 15/16	5.1	WR331	$155.00
1-18	0-2 amps	4 x 4 1/16 x 5 15/16	6.5	WR182	$170.00
1-33	0-2 amps	4¼ x 5 x 6⅞	7.8	WR332	$185.00
1-33	0-4 amps	5 5/16 x 7¼ x 6¼	13.3	WR334	$255.00
1-33	0-8 amps	8¾ x 7⅝ x 6 15/16	22.5	WR338	$305.00



71°C FREE AIR RATING

WIDE RANGE SLIM TRAN DC POWER MODULES

1 through 63 VDC, 1 through 2 Amps

Input: 105-125 VDC, 50-400 cps
DC Output: 1-33 VDC or 1-63 VDC depending on model
Regulator Type: Solid-state, all silicon semi-conductors
Ripple: Less than 800 microvolts RMS or 0.005% whichever is greater
Line Regulation: Less than ±0.01% or 5 MV for full input change
Load Regulation: Less than 0.05% or 8 MV for 0-100% load change
Transient Response: Less than 50 microseconds
Operating Temperature: —20°C to +71°C free air, full ratings
Temperature Coefficient: Less than 0.01% or 3 MV per degrees C
Long Term Stability: Within 5 MV or 0.02% for 8 hours (line, load, temperature constant)

The versatile design of these modules permits the use of as many as 7 units to occupy a standard 5½" panel and 19" relay rack assembly.

Due to the wide range characteristics, a single model can serve many voltage requirements. ST series units are available in either single or dual output models.

Output* Voltage (DC)	Current* (71°C)	Size WxDxH (inches)	Weight (lbs.)	Model	Price
1-63	0-1 amp	2⅜ x 16½ x 5¼	7.5	ST 1000	$165.00
1-33 Dual	0-1 amp Dual	2⅜ x 16½ x 5¼	7.8	ST 1000-2	$195.00
1-33	0-2 amps	2⅜ x 16½ x 5¼	7.5	ST 2000	$175.00

*For higher current or voltage ratings two or more units may be connected in series or parallel

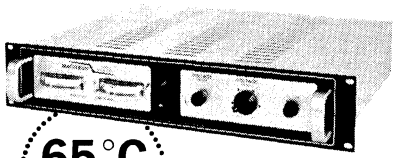
SILICON MAGITRAN® VARIABLE POWER SUPPLIES

0 to 36 VDC, 2 Amps through 25 Amps



65°C FREE AIR RATING

Model SL36-4M Shown

- All-Silicon Design
- Continuously Adjustable 0 to 36 VDC
- Operating Temperature to +65°C
- Automatic Short Circuit Protection
- Remote Sensing
- Convection Cooled
- Relay Rack or Bench Mounting

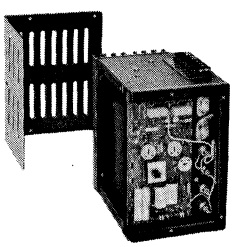
Input: 105-125 VAC, 50-400 cps
Regulation Line: ±0.01% or 5 mv
Regulation Load: 0.05% or 8 mv
Long Term Stability: Less than 8 mv, constant line, load and temperature
Ripple: Less than 1 mv, RMS
Transient Response: Less than 50 μsec
Operating Temperature: —20°C to +65°C
Temperature Coefficient: 0.01%/°C or 3 mv
Short Circuit Protection with automatic recovery
Remote Sensing
Parallel and Series Operation
Vernier Voltage Control
Output Terminals (Ungrounded)
Reverse Voltage Protection
Cooling: Convection
Metering: Separate Current and Voltage Meters

Model	Voltage	Current	Size* HxWxD	Price
SL36-2M	0-36 VDC	0-2 amps	3-1/2 x 7-1/2 x 15-7/8	$235.00
SL36-2/2M	0-36 VDC Dual	0-2 amps Dual	3-1/2 x 17 x 15-7/8	$465.00
SL36-4M	0-36 VDC	0-4 amps	3-1/2 x 17 x 15-7/8	$290.00
SL36-8M	0-36 VDC	0-8 amps	5-1/4 x 17 x 15-7/8	$355.00
SL36-12M	0-36 VDC	0-12 amps	7 x 17 x 15-7/8	$455.00
SL36-25M	0-36 VDC	0-25 amps	10-1/2 x 17 x 15-7/8	$650.00

*Relay rack mounting kit no charge. Provides for 19" rack mounting.

OTHER MODELS: Model TRO 40M, 0 to 40 VDC @ 0 to 500 MA $130.00 / Model THK5-15LM, 0 to 5000 VDC @ 0 to 15 MA $345.00

SOLID STATE AC REGULATOR Sinusoidal Output, Modular Design



Model RT 250

FEATURES

- Sinusoidal output
- Precision RMS regulation
- Compact, modular design
- Minimum magnetic field or RFI
- Wide input range 47-440 cps
- Wide load power factor range
- Remote sensing
- Overload and short-circuit protected
- 71°C Free air rating
- Fully repairable

Model	Rating	Weight	Price
RT 250	250 VA	13 lbs.	$130.
RT 500	500 VA	17 lbs.	$175.
RT 1000	1000 VA	22 lbs.	$235.

Input: 105-130 VAC, 47-440 cps.
Line Regulation (RMS): Within ± 0.1% for full input change, resistive load or within ± 0.2% for +0.7 to —0.7 PF load.
Load Regulation (RMS): Within 0.2% for full load change, resistive, or within 0.5% for +0.7 to —0.7 load PF change.
Wave Form Distortion: Less than 5% (115 VAC input, unity through 0.7 load PF.)
Efficiency: Better than 75% rated load, 115 VAC input.
Load Power Factors Range: +0.7 PF through —0.7 PF.
Response Time: Less than 16 millisec.
Operating Temperature: —20°C to 71°C free air, full ratings.
Heat Sinking: Internal, convection cooled.

TRANSPAC® SOLID-STATE DC to AC INVERTERS

UNREGULATED (Square Wave) IT-B TYPES

Wave form approximately square wave
Self-excited designs with isolating feed-back transformers
Output voltage, RMS value at nominal input with taps provided for 105, 115, 125 VAC
Output voltage and frequency vary proportionately with input voltage change
Voltage regulation is within approximately 6% and frequency regulation within approximately ±2% for 50-100% load change
Unit can be synchronized externally

	POWER OUTPUT	INPUT VDC	OUTPUT (NOM.)	SIZE W x D x H (INCHES)	MODEL	PRICE
60 CPS OUTPUT	15 VA	5-7	115 VAC	2-5/8 x 3-1/16 x 4-1/2	IT616B	$ 80.00
	25 VA	10-14	115 VAC	3-1/16 x 3-9/16 x 4-7/8	IT126B	$ 90.00
	50 VA	19-29	115 VAC	3-7/8 x 3-7/8 x 4-3/4	IT256B	$105.00
	100 VA	19-29	115 VAC	3-1/4 x 4 x 5-15/16	IT2106B	$115.00
400 CPS OUTPUT	15 VA	5-7	115 VAC	2-3/8 x 2-3/4 x 3-13/16	IT614B	$ 80.00
	25 VA	10-14	115 VAC	2-5/8 x 3-1/16 x 4-1/2	IT124B	$ 90.00
	50 VA	19-29	115 VAC	3-1/16 x 3-9/16 x 4-7/8	IT254B	$105.00
	100 VA	19-29	115 VAC	3-1/4 x 4 x 5-15/16	IT2104B	$125.00

REGULATED (Square Wave) SB TYPES

Wave form approximately square wave
MOPA designs, regulated oscillator-driver and isolating power amplifier
Output voltage, RMS value at nominal input with taps provided for 105, 115, 125 VAC
Output voltage varies proportionately with input voltage change
Output voltage regulation within approximately 5% for a 50-100% load change
Frequency regulation within approximately ±1% for ±10% input change or 0-100% load change
Unit can be synchronized externally

60 CPS OUTPUT	50 VA	20-29	115 VAC	5-1/2 x 6-1/16 x 6-5/32	IT256SB	$195.00
	100 VA	20-29	115 VAC	5-1/2 x 6-1/16 x 6-5/32	IT2106SB	$245.00
	250 VA	10-14	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT2256SB(12)	$255.00
	250 VA	19-29	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT2256SB(24)	$265.00
	500 VA	10-14	115 VAC	7-13/32 x 9 x 6-3/16	IT2506SB(12)	$280.00
	500 VA	19-29	115 VAC	7-13/32 x 9 x 6-3/16	IT2506SB(24)	$290.00
400 CPS OUTPUT	50 VA	20-29	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT254SB	$205.00
	100 VA	20-29	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT2104SB	$230.00
	250 VA	20-29	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT2254SB	$270.00
	500 VA	20-29	115 VAC	7-13/32 x 9 x 6-3/16	IT2504SB	$335.00

REGULATED (Sine Wave) RS TYPES

Sinusoidal wave form, approximately 7% RMS distortion
MOPA designs, stabilized oscillator and isolating power amplifier
Output taps provided for 105, 115, 125 VAC
Voltage variation less than ±1% for full input load change
Load voltage variation with 0-100% change is less than 6%
Frequency regulation within ±1% for either 10% input change or 0-100% load change
Magnetic regulator provides voltage regulation
Unit can be synchronized externally

60 CPS OUTPUT	50 VA	26-29	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT256RS	$235.00
	100 VA	26-29	115 VAC	7-13/32 x 9 x 6-3/16	IT2106RS	$260.00
	250 VA	26-29	115 VAC	12 x 9 x 8	IT2256RS	$340.00
400 CPS OUTPUT	50 VA	26-29	115 VAC	6-1/8 x 5-15/16 x 6-1/2	IT254RS	$240.00
	100 VA	26-29	115 VAC	7-13/32 x 9 x 6-3/16	IT2104RS	$275.00
	250 VA	26-29	115 VAC	12 x 9 x 8	IT2254RS	$365.00

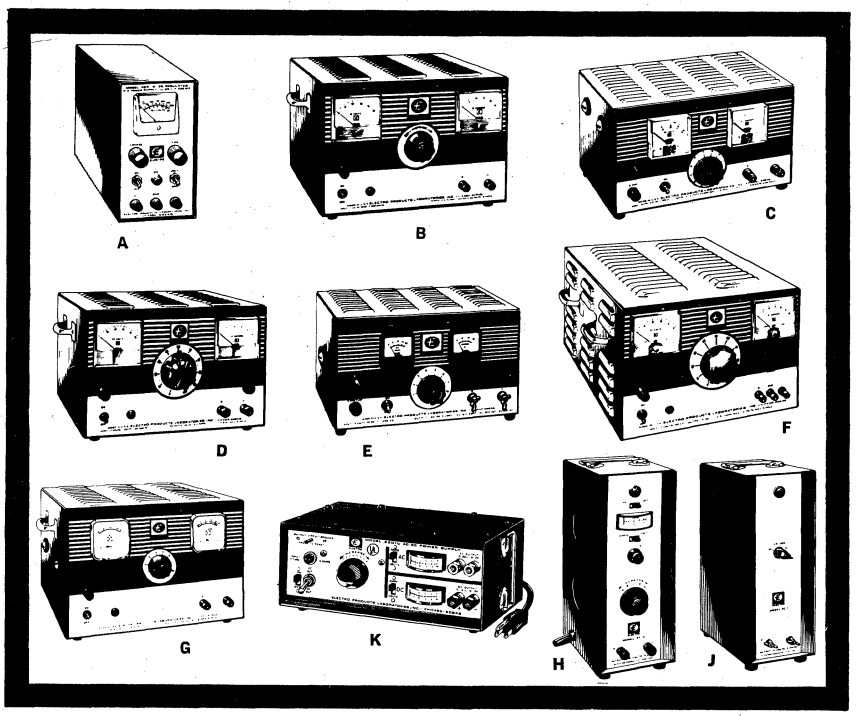
ELECTRO

REGULATED & SEMI-REGULATED POWER SUPPLIES

Electro offers a wide selection of ruggedly-constructed, low voltage dc power supplies for use in design, development and testing of transistor circuitry . . . for servicing and operating auto, aircraft, marinecraft radio and electronic equipment . . . and for production line testing, industrial and educational laboratory work and many other applications.

Each model is precision made and engineered to give unequalled performance life per dollar. Features include: Voltage regulation, ac ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals, 1-year warranty.

INPUT — *Regulated Models*: 105-125 vac. 60 Hz *Industrial* and *General Purpose Models*: 117 vac 50/60 Hz. Models available to fit W.E. and EIA racks. Custom-design or modification of standard units to your specifications.



Selection Guide — Power Supplies for every need

ELGAR
AC Power Sources

ELGAR
Model 201
Single Phase 200 VA
Solid-State
Power Source

Elgar AC power sources are designed for continuous-duty operation and utilizes all-silicon solid-state circuitry as well as the highest-grade components. The basic power amplifier consists of two DC supplies and a multiple-stage amplifier with an adjustable power output transformer.

Control circuitry is mounted on a circuit board with test points, and all adjustment controls are available from the top of the unit.

Standard output voltages of 28 V, 115 V, or 230 V are available at the rear-panel terminal strip and at the front-panel connectors.

The instruments are contained in rack-mount enclosures with a meter for output voltage monitoring, a power-ON indicator, an output voltage amplitude control, and a power switch circuit breaker located on the front panel.

The output power frequency is established by a plug-in oscillator. Output frequency is 45 Hz to 10 KHz depending on the power amplifier selected. A variety of plug-in oscillators are available with frequency accuracies up to 0.0001%.

Single-Phase Power Amplifiers

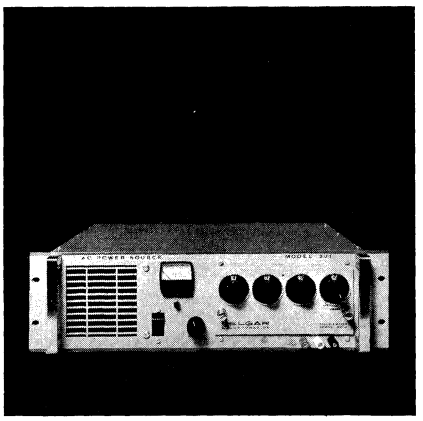
Model	Output Power
201	200 VA
501	500 VA
1001	1,000 VA
1000-1	1,000 VA (2 pieces Model 501 in tandem)
C-1000-1	Model 1000-1 in rack mount enclosure
2000-1	2,000 VA (2 pieces Model 1001 in tandem)
C-2000-1	Model 2000-1 in rack mount enclosure

Two-Phase Power Amplifiers

Model	Output Power (Total)
153	150 VA
400-2	400 VA (2 pieces Model 201 interconnected for 2ϕ)
C-400-2	Model 400-2 in rack mount enclosure
1000-2	1,000 VA (2 pieces Model 501 interconnected for 2ϕ)
C-1000-2	Model 1000-2 in rack mount enclosure
2000-2	2,000 VA (2 pieces Model 1001 interconnected for 2ϕ)
C-2000-2	Model 2000-2 in rack mount enclosure
4000-2	4,000 VA (2 pieces Model 2000-1 interconnected for 2ϕ)
C-4000-2	Model 4000-2 in rack mount enclosure

Three-Phase Power Amplifiers

Model	Output Power (Total)
153	150 VA
400-3D	400 VA (2 pieces Model 201 in 3ϕ delta configuration)
C-400-3D	Model 400-3D in rack mount enclosure
400-3Y	400 VA (2 pieces Model 201 in 3ϕ, 4 wire wye configuration)
C-400-3Y	Model 400-3Y in rack mount enclosure
600-3	600 VA (3 pieces Model 201 in 3ϕ, 4 wire wye configuration)
C-600-3	Model 600-3 in rack mount enclosure
1000-3D	1,000 VA 2 pieces Model 501 in 3ϕ delta configuration)
C-1000-3D	Model 1000-3D in rack mount enclosure
1000-3Y	1,000 VA (2 pieces Model 501 in 3ϕ, 4 wire wye configuration)
C-1000-3Y	Model 1000-3Y in rack mount enclosure
1503	1,500 VA
1500-3	1,500 VA (3 pieces Model 501 in 3ϕ, 4 wire wye configuration)
C-1500-3	Model 1500-3 in rack mount enclosure
2000-3D	2,000 VA (2 pieces Model 1001 in 3ϕ delta configuration)
C-2000-3D	Model 2000-3D in rack mount enclosure
2000-3Y	2,000 VA (2 pieces Model 1001 in 3ϕ, 4 wire wye configuration)
C-2000-3Y	Model 2000-3Y in rack mount enclosure
3000-3	3,000 VA (3 pieces Model 1001 in 3ϕ, 4 wire wye configuration)
C-3000-3	Model 3000-3 in rack mount enclosure
6000-3	6,000 VA (3 pieces Model 2000-1 in 3ϕ, 4 wire wye configuration)
C-6000-3	Model 6000-3 in rack mount enclosure



Output Power: 0-200 VA, 1ϕ, (1 unit); 0-400 VA, 2ϕ, (2 units); 0-400 VA, 3ϕ, (2 units)*; 0-600 VA, 3ϕ, (3 units); continuous duty.

Power Factor: Full current rating into 0.7 lagging to 0.7 leading power factor loads.

Output Voltage: Adjustable 0-32 VAC, 0-130 VAC, or 0-260 VAC.** Full output power range 27-32 VAC, 110-130 VAC, or 220-260 VAC.

Output Configuration: 2-wire isolated from ground; either output can be grounded.

Output Frequency Range: 45 Hz to 5000 Hz at full power output; 5 KHz to 10 KHz at one-half power output.

Wave Shape: Sine wave.

Distortion: Less than 0.9% over 45 Hz to 5000 Hz range at full output power. Less than 0.5% at mid band (100 Hz to 1000 Hz) at full output power. Less than 2% 5 KHz to 10 KHz at one-half output power.

Load Regulation: ±1% no load to full load, 45 Hz to 5000 Hz, adjustable through zero for specific load conditions. ±2% no load to one-half load, 5 KHz to 10 KHz.

Response Time: Less than 50 μsec.

Line Regulation: ±0.25% at full load vesus ±10 VAC change at 115 VAC input. ±0.25% at full load versus ±20 VAC change at 230 VAC input.

Short Circuit Protection: Automatic curcurent limiting protects against overload or short circuit; amplifier recovers immediately when overload or short circuit is removed.

Output Noise: 60 db below full output voltage.

Input Power: 115 VAC ±10 VAC or 230 VAC ±20 VAC***, 47 Hz to 63 Hz, single phase. (50 Hz to 425 Hz optional).

Temperature Range: 0°C to 50°C operational, −20°C to +85°C non-operational.

Weight: Net approx. 60 lbs., shipping approx. 65 lbs.

*For 2 amplifier wye only: frequency range 45 Hz to 2000 Hz at full power; ±1% regulation for balanced load.

**Output voltage range selected by jumper change on rear panel terminal block.

***Input voltage range selected by jumper change on inside terminal block.

ELGAR
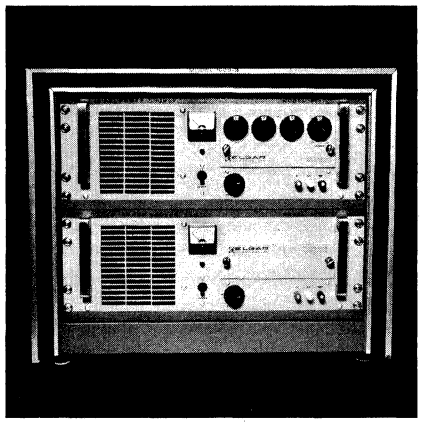
Model 1000
Single, Two or Three Phase
1000 VA Solid-State
Power Source



The Elgar Model 1000 AC power source is an all-silicon, solid-state power source designed for maximum flexibility and reliability.

It utilizes two pieces of our industry-proven Model 501 housed in a single rack mount enclosure. These units can be interconnected to provide the following ouput power configurations:
1000 VA, single phase,
1000 VA, 2 phase,
1000 VA, 3 phase, 3 wire delta, or
1000 VA, 3 phase, 4 wire wye.

Either amplifier will accept any of 40 interchangeable single or multiphase plug-in oscillators covering the range of 45 Hz to 5000 Hz, with accuracies from 1% to 0.0001%. Special oscillator modules are available providing ±0.01% amplitude and phase regulation, or amplitude and frequency BCD programming capability.

The Model 1000 is ideally suited for automated and laboratory testing of gyro, aircraft and missile and space equipment, and for operation of 60 Hz power equipment overseas.

Output Power:
Model 1000-1*, 1φ.
Model 1000-2, 2φ (500 VA/phase).
Model 1000-3D, 3φ, 3 wire delta (333 VA/phase).
Model 1000-3Y, 3φ, 4 wire wye, (333 VA/phase) continuous duty.

Power Factor: Full current rating into zero lagging to 0.7 leading for 1000-1 and 1000-2; 0.7 lagging to 0.7 leading for 1000-3D and 1000-3Y.

Output Voltage:
Model 1000-1, 0-130 VAC or 0-260 VAC, 2 wire.
Model 1000-2, 0-32 VAC, 0-130 VAC, or 0-260 VAC, 3 wire.
Model 1000-3D, 0-32 VAC, 0-130 VAC, or 0-260 VAC line to line, 3 wire open delta.
Model 1000-3Y, 0-32 VAC or 0-130 VAC line to neutral (120/208), 4 wire wye.

Output Configuration: All outputs isolated from ground; any one phase or neutral can be grounded. Voltage ranges are selected by strapping changes on rear panel terminal block.
Output Frequency Range: 1000-1 & 1000-2, 45 Hz to 5000 Hz at full power output. 1000-3D & 1000-3Y, 45 Hz to 2000 Hz at full power output.
Wave Shape: Sine wave.
Distortion: Less than 0.9% full frequency range at full output power. Less than 0.5% mid range (100 Hz to 1000 Hz) at full output power.
Load Regulation: ±1% no load to full load over rated frequency range (1000-3Y with balanced load), adjustable through zero for specific load conditions.
Response Time: Less than 50 μsec.
Line Regulation: ±0.25% at full load versus ±10 VAC change at 115 VAC input. ±0.25% at full load versus ±20 VAC change at 230 VAC input.
Short Circuit Protection: Automatic current limiting protects against overload or short circuit, amplifier recovers immediately when overload or short circuit removed.
Output Noise: 60 db below full output voltage.
Input Power: 115 VAC ±10 VAC or 230 VAC ±20 VAC**, single phase, 47 Hz to 63 Hz. (375 Hz to 425 Hz optional).
Temperature Range: 0°C to 50°C operational, −20°C to +85°C non-operational.
Weight: Net approx. 210 lbs., shipping approx. 230 lbs., with cabinet approx. 280 lbs.

*Model dash numbers are for initial use ordering; units are field changeable for any configuration with appropriate oscillator change.
**Input voltage range selected by jumper change on terminal block.

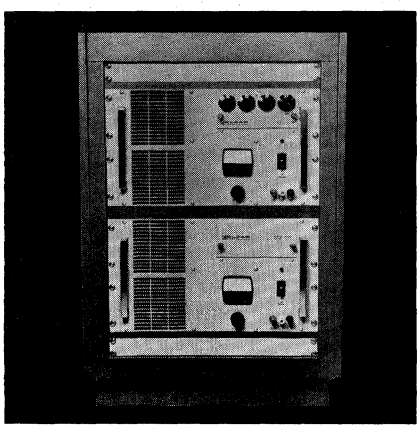
ELGAR
Model 2000
Single, Two or Three Phase
2000 VA Solid-State
Power Source



The Elgar Model 2000 AC power source is an all-silicon, solid state power source designed for maximum flexibility and reliability.

It utilizes two pieces of our industry-proven Model 1001 housed in a single rack mount enclosure. These units can be interconnected to provide the following output power configurations:
2000 VA, single phase,
2000 VA, 2 phase,
2000 VA, 3 phase, 3 wire delta, or
2000 VA, 3 phase, 4 wire wye.

Either amplifier will accept any of 40 interchangeable single or multiphase plug-in oscillators covering the range of 45 Hz to 5000 Hz, with accuracies from 1% to 0.0001%. Special oscillator modules are available providing ±0.01% amplitude and phase regulation, or amplitude and frequency BCD programming capability.

The Model 2000 is ideally suited for automated and laboratory testing of gyro, aircraft and missile and space equipment, and for operation of 60 Hz power equipment overseas.

Output Power:
Model 2000-1, 1ϕ.
Model 2000-2, 2ϕ (1 KVA/phase).
Model 2000-3D, 3ϕ, 3 wire delta, (667 VA/phase).
Model 2000-3Y, 3ϕ, 4 wire wye (667 VA/phase).

Power Factor: Full current rating into zero lagging to 0.7 leading for 2000-1 and 2000-2; 0.7 lagging to 0.7 leading for 2000-3D and 2000-3Y.

Output Voltage:
Model 2000-1*, 0-130 VAC or 0-260 VAC, 2 wire.
Model 2000-2, 0-32 VAC, 0-130 VAC, or 0-260 VAC, 3 wire.
Model 2000-3D, 0-32 VAC, 0-130 VAC, or 0-260 VAC line to line, 3 wire delta.
Model 2000-3Y, 0-32 VAC or 0-130 VAC line to neutral (120/208), 4 wire wye.

Output Configuration: All outputs isolated from ground; any one phase or neutral can be grounded. Voltage ranges are selected by strapping changes on rear panel terminal block.

Output Frequency Range: Model 2000-1 & Model 2000-2, 45 Hz to 5000 Hz at full power output. Model 2000-3D & Model 2000-3Y, 45 Hz to 2000 Hz at full power output.

Wave Shape: Sine wave.

Distortion: Less than 0.9% full frequency range at full output power. Less than 0.5% mid range (100 Hz to 1000 Hz) at full output power.

Load Regulation: ±1% no load to full load over rated frequency range (Model 2000-3Y with balanced load), adjustable through zero for specific load conditions.

Response Time: Less than 50 μsec.

Line Regulation: ±0.25% at full load versus ±10 VAC change at 115 VAC input. ±0.25% at full load versus ±20 VAC change at 230 VAC input.

Short Circuit Protection: Automatic current limiting protects against overload or short circuit, amplifier recovers immediately when overload or short circuit removed.

Output Noise: 60 db below full output voltage.

Input Power: 115 VAC ±10 VAC or 230 VAC ±20 VAC**, single phase, 47 Hz to 63 Hz. (375 Hz to 425 Hz optional).

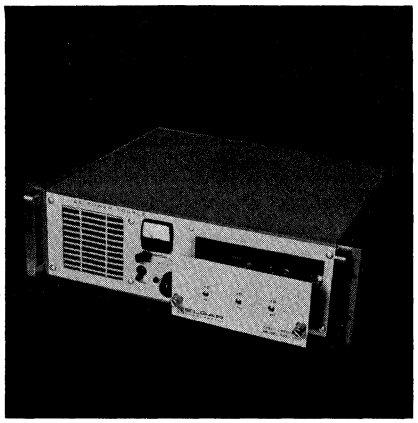
Temperature Range: 0°C to 50°C operational, −20°Cto + 85°C non-operational.

Weight: Net approx. 420 lbs., shipping approx. 440 lbs., with cabinet approx. 500 lbs.

*Model dash numbers are for initial use ordering; units are field changeable for any configuration with appropriate oscillator change.

**Input voltage range selected by jumper change on terminal block.

ELGAR
Super-Stable
Solid-State
Plug-In Oscillator
Modules



For gyro drift and life testing, Elgar Super-Stable (SS) plug-in oscillator modules provide a stable-frequency, low-distortion signal for any of the Elgar AC power amplifiers. The plug-in oscillators are designed for one, two, or three-phase operation depending on the amplifier or combination of amplifiers selected. The Super-Stable oscillators are unique in that they use electronic servo techniques with remote sensing for amplitude and phase regulation. Output frequencies are available from 45 Hz to 9,600 Hz at 0.01% accuracy. The nominal output voltage must be specified along with the frequency when ordering any of the Super-Stable oscillators.

Output Voltages (Typical): 28 VAC, 34 VAC, 115 VAC.

Output Configuration: 1ϕ, 2ϕ or 3ϕ; 3ϕ is 3-wire, open delta (floating).

Output Power: Depends on power amplifier selected.

Power Factor: ±.7 (other power factor optional).

Fixed Frequency (Typical): 400 Hz, 800 Hz, 1,200 Hz, 9,600 Hz; other frequencies optional.

Distortion: Less than 0.35% total.

Amplitude Stability: Load ±0.01% no load to full load; Line ±0.01% for 115 V ±10 V; Time ±0.1% for 1,000 hours under constant conditions; Specifications refer to full wave average value of wave form.

Temperature Coefficient: ±0.005%/°C.

Phase Accuracy: Adjustable to ±0.01%.

Phase Stability: ±0.1° for 1000 hours.

NOTE: Above specifications apply when used with any Elgar AC power amplifier.

Model	Frequency	Accuracy	Phase
441 - .01SS	400 Hz	0.01%	1
442 - .01SS	400 Hz	0.01%	2
443 - .01SS	400 HZ	0.01%	3
481 - .01SS	800 Hz	0.01%	1
482 - .01SS	800 Hz	0.01%	2
483 - .01SS	800 Hz	0.01%	3

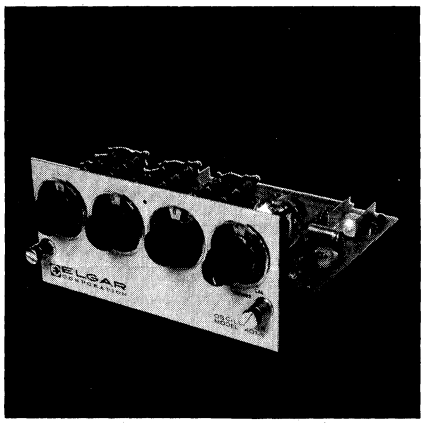
41203 - .01SS	1,200 Hz	0.01%	3

Oscillator modules are available for any frequency from 400 Hz to 9.6 KHz and accuracies to 0.01%.

8159 Engineer Road, San Diego, California 92111, Phone (714) 279-0800

ELGAR Solid-State Plug-In Oscillator Modules



The Elgar oscillators are contained in a plug-in enclosure which can be inserted into the front panel opening of an Elgar power source. The plug-in enclosure contains a horizontally-mounted printed circuit board, and a terminal connector which mates with a similar connector in the power source. The 0.1% model is provided with a front panel access hole for a screwdriver frequency adjustment. The oscillators are available in 50, 60, 400, 800, 3,200 and 4,800 Hz output frequencies, or any frequency from 45 Hz to 10 KHz on special order.

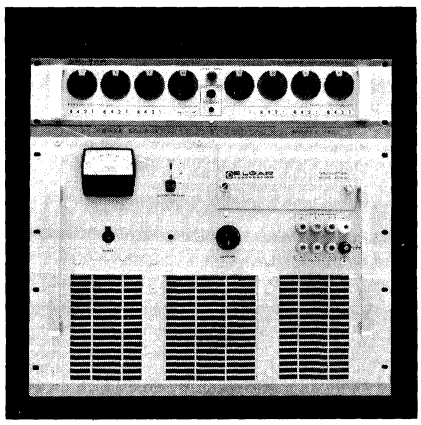
Special Plug-in Oscillator Modules are available for:

- Any frequency and accuracy (to .0001%) from 45 Hz to 5,000 Hz.
- Dual frequency (switchable).
- Special purpose functions (programmable).

ELGAR Decoder Programmer Solid-State Programmable Oscillators



The Elgar DP Series of decoder programmers are precision programmable oscillators which operate in conjunction with Elgar's wide range of AC power sources. The standard output voltage is 0-3 V rms, however, options are available to adapt to power amplifiers requiring other drive levels and, in particular, Option No. 6 which provides 0-150 V rms at 25 milliwatts as a stimulus source.

They are designed for automatic programmed frequency selection, automatic programmed amplitude selection, automatic programmed phase angle selection, and combinations of frequency and amplitude and amplitude and phase angle.

The DP Series is available in 1, 2 or 3 phase configurations, 45 Hz to 10,000 Hz frequency range, and with the appropriate Elgar power amplifier, up to 6 KVA of output power.

Salient Features

Automatic frequency selection
Automatic amplitude selection
Automatic phase angle selection
Continuous waveform amplitude programming
Standard 8421 binary coded decimal system
Frequency response: ±0.1%.
System amplitude stability: ±0.01% versus 100% load change; ±0.01% versus ±10 V line change; ±0.1% for 1000 hours under constant conditions.

Frequency: Frequency Accuracy: ±1% of programmed value; Frequency Stability: 0.02%°C; Frequency Programming Range: 45 Hz to 10 KHz; Frequency Resolution: 3 decades with 3 ranges
Range 1: 45 Hz to 109.9....0.1 Hz steps
Range 2: 100 Hz to 1.099 KHz 1 Hz steps
Range 3: 1 KHz to 10.99 KHz 10 Hz steps
Frequency Response of Amplitude: ±0.1% of full output over frequency range.

Amplitude: Amplitude Programming Range: 0-130 V (0-32 and 0-260 optional); Output Signal to Power Amplifier: 0-3 V RMS (0-150 V at 25 milliwatts optional); Amplitude Resolution: 100 MV from 1-130 V; Amplitude Programming Accuracy: ±0.25% FS of range (half-wave average); Amplitude Stability: ±0.1% for 1000 hours at constant temperature, load and line; Temperature Coefficient: ±0.005%/°C; Distortion: Less than 0.5%, less than 0.2% mid band 200-1000 Hz; System Settling Time: 100ms, includes power amplifier.

Phase (Applicable to 2 phase systems): Phase Programming Range: 0-360° in 1° steps); Phase Programming Accuracy: ±1°.

Programming: BCD 8421 (parallel entry); Option 1: Logic level "O" = 0 to +0.5 V, "I" = +3.5 V to +15 V; Option 2: Contact closures; Option 3: Program storage; storage set time is 5ms; Option 4: External amplitude modulation; Option 5: ±0.1% amplitude programming accuracy; Option 6: Output voltage 0-150 VAC at 25 milliwatts. For two or three phase outputs, phase accuracies will be ±1° 45 Hz to 2 KHz, ±2° 2 KHz to 6 KHz (programmed F and/or A).

Programming Connectors: MS type (mating connectors supplied).

Input Power: 105-125 V or 210-250 V single phase, 47 to 425 Hz 100 watts maximum.

Size: 3½" h x 14" d x 19" wide, standard rack mounting.

Actual output voltage range and output power is dependent on Elgar power amplier selected. Phase programming is not available with frequency programming.

Model DPI-A: Amplitude programming only (fixed frequency .01%).

Model DPI-F: Frequency programming only (fixed amplitude).

Model DP2-P: Phase programming only (fixed frequency .01% and fixed amplitude).

Model DPI-AF: Amplitude and Frequency only (fixed phase).

Model DP2-AP: Amplitude and Phase only (fixed frequency .01%).

Example: DPI-AF-13 would be amplitude and frequency programming with storage, 8421 "IC" logic levels.

Model DP2-XX-XX For two phase.

Model DP3-XX-XX For three phase.

ELGAR
AC Line Conditioners

ELGAR
Series 6000
High-Speed
Solid-State
AC Line Conditioners

Elgar AC line conditioners provide pure AC power by eliminating high-speed line and load transients as well as all other forms of power line disturbance. These versatile instruments feature response times 1,000 times faster (typically 50 microseconds) than the fastest AC line regulator. All Elgar units are designed for continuous operation and are contained in rack-mount enclosures. The front panel has meters to monitor input and output voltages and load current, an overload indicator, and power circuit breaker. Cooling air is drawn in at the front panel and exhausted at the rear. Anyone using voltage-sensitive equipment needs isolation from high-speed line transients. Unconditioned power sources are subject to fluctuating high-speed voltage changes which can cause erratic operation, component failures, and a reduction in equipment life. In the case of sensitive measuring and data handling equipment, high-speed line transients often are the cause of erroneous information. These unwanted transients, which occur on power lines, are voltage surges, high-voltage spikes, voltage dips, and low-voltage spikes. Frequencies are often in the megacycle range, with pulse durations ranging from one millisecond to just a few nanoseconds. High-frequency transients are most frequently caused by the operation of: arc welders, fluorescent lights, heaters cycling on and off, elevators, environmental chambers, shake tables, air conditioners, tape punches, thermal baths, etc. High voltage spikes appear on the power line each time the current is interrupted through an inductive load. Local user conditions such as intermittent heavy loads, long feeder lines, or multiple-customer use of common power sources cause low-voltage dips and low-voltage spikes. The speed and reliability of Elgar line conditioners completely eliminate unwanted transients, providing pure AC power.

Line Conditioner Selection Guide

Output Power (KVA)	Output Voltage (VAC)	Input Voltage (VAC)	Input Freq. (Hz)	Model
0.5	115	95-135	60	7006
1	115	95-135	50	6005
1	115	95-135	60	6006

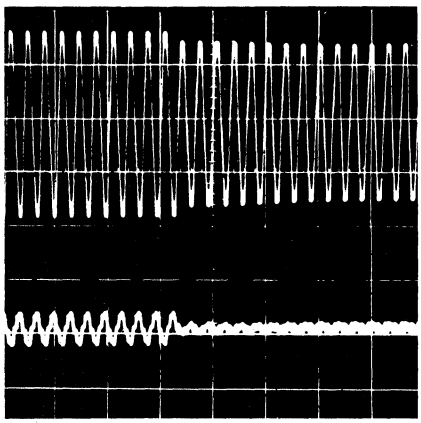
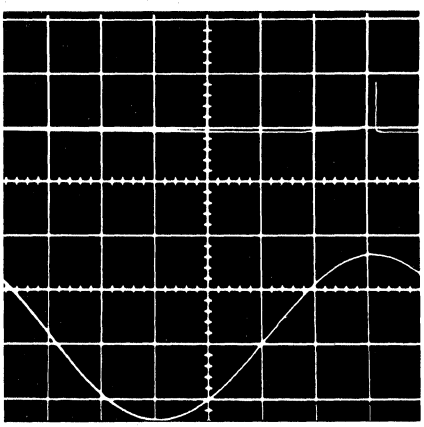
5	230	190-270	60	5236

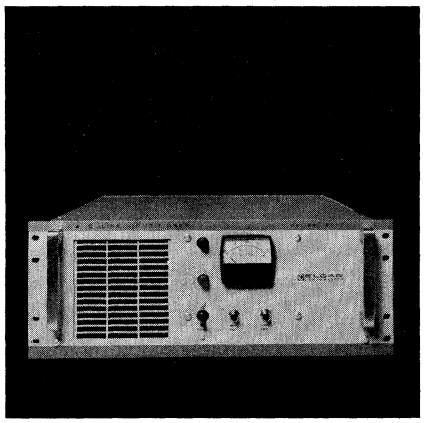
NOTES
1. Step-up or step-down combinations available such as 230 V input & 115 V output.
2. See text for detailed specifications.



The top trace shows a sudden decrease in input line voltage. The bottom trace is the AC Line Conditioner output, showing the instrument's fast response time by lack of variation in sine wave output.



The top trace is a distorted power input to the Line Conditioner. Output of the Line Conditioner shown on the bottom trace, is a pure, distortion-free sine wave.



There are four models in this series: 6005A, 6006A, 6235A, and 6236A. Except where noted, specifications are the same for all models.

INPUT:

Voltage: 95-115 V rms, 105-125 V rms, 115-135 V rms, selectable by tap switch (6005A & 6006A); 190-230 V rms, 210-250 V rms, 230-270 V rms, selectable by tap switch (Models 6235A & 6236A).

Frequency: 47 to 53 Hz (Models 6005A & 6235A); 57 to 63 Hz (Models 6006A & 6236A).

Power: 1,600 watts max.

Harmonic Distortion: 10% max.

Isolation: 100 db common mode isolation; 1 pf power transformer primary to secondary coupling capacitance. Low side of input normally strapped to chassis but may be floated to 300 V rms.

OUTPUT:

Voltage: 115 V rms setable to 0.1% (Models 6005A & 6006A); 230 V rms, setable to 0.1%, with 115 V rms optional (Models 6235A & 6236A).

Voltage Instability: ±0.05% for 24 hours under constant line, load, and ambient temperature conditions.

Power: 1,000 VA from unity to ±0.7 power factor, 4,500 VA max. peak instantaneous power.

Harmonic Distortion: 0.2% max.

Line Regulation: ±0.025% for a ±10 V line change (Models 6005A & 6006A); ±0.025% for a ±20 V line change (Models 6235A & 6236A).

Load Regulation: 0.025% for a zero to full resistive load change; 0.05% for a zero to full load change at ±0.7 power factor.

Amplitude Temperature Coefficient: 0.005% per degree C max.

Peak Amplitude Instability: ±0.01% cycle to cycle.

Maximum Crest Factor: (for rated power output) 2.5 times.

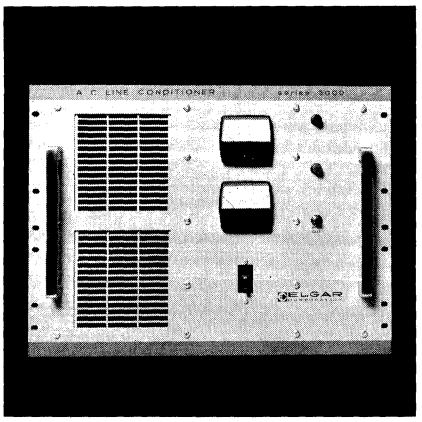
ELGAR
Series 3000 & 5000
High-Speed Solid-State
AC Line Conditioners



There are eight models in this series: Models 3005A, 3006A, 3235A, 3236A, 5005A, 5006A, 5235A and 5236A. Except where noted, specifications are the same for all models.

INPUT:

Voltage: 95-115 V rms, 105-125 V rms, 115-135 V rms, selectable by tap switch (Models 3005A, 3006A, 5005A & 5006A); 190-230 V rms, 210-250 V rms, 230-270 V rms, selectable by tap switch (Models 3235A, 3236A, 5235A & 5236A).

Frequency: 47 to 53 Hz (Models 3005A 3235A, 5005A & 5235A); 57 to 63 Hz (Models 3006A, 3236A, 5006A & 5236A).

Input Power: 4,000 watts max. (Series 3000). 8,000 watts max. (Series 5000).

Harmonic Distortion: 10% max.

Isolation: 100 db common mode isolation; 1 pf power transformer primary to secondary coupling capacitance; low side of input normally strapped to chassis but may be floated to 300 V rms.

OUTPUT:

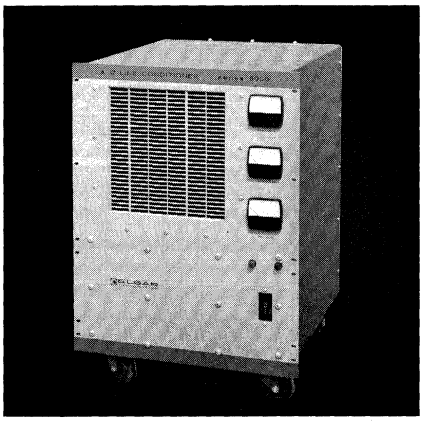
Voltage: 115 V rms, setable to 0.1% (Models 3005A, 3006A, 5005A & 5006A); 230 V rms, setable to 0.1%, with 115 V optional (Models 3235A, 3236A, 5235A & 5236A).

Voltage Instability: ±0.05% for 24 hours under constant line, load and ambient temperature conditions.

Output Power: (3000 Series) 2,500 VA from unity to ±0.7 power factor, 11,250 VA max. peak instantaneous power. (5000 Series) 5,000 VA from unity to ±0.7 power factor, 22,500 VA max. peak instantaneous power.

Harmonic Distortion: 0.2% max.

Line & Load Regulation: ±0.05% for a ±10 V line change and for zero to full load change (Models 3005A, 3006A, 5005A & 5006A); ±0.05% for a ±20 V line change and for zero to full load change (Models 3235A, 3236A, 5235A & 5236A).



Peak Amplitude Instability: ±0.01% cycle to cycle.

Maximum Crest Factor: 2.5 times (for rated power output).

Shunt Capacitance: Unit will operate with up to 100 μf of shunt capacitance.

TRANSIENT CHARACTERISTICS:

Line (10% step change): Output transient will not exceed 0.5% peak amplitude.

Impulse Settling Time: 50 μsec or less.

Overload Indication: Front panel lamp illuminates when load exceeds KVA rating. Raw AC power is applied to load during period of illumination.

Overload Protection: Excessive overload condition actuates front panel circuit breaker.

GENERAL

Metered Input/Output: Switchable input/output AC voltmeter and output current meter. Meter accuracies ±3% full scale.

Ambient Temperature: 0 to 55°C.

Storage Temperature: −20°C to 85°C.

Cooling: A blower provides internal forced air circulation; reversible air flow through front panel.

Dimensions: 3000 Series 19″ w x 14″ h x 19″ d, for standard rack mounting.
5000 Series 19″ w x 24½″ h x 20″ d, for standard rack mounting.

Net Weight: 3000 Series 175 lb.
5000 Series 400 lb.

Shipping Weight: 3000 Series 180 lb.
5000 Series 425 lb.

Shunt Capacitance: Unit will operate with up to 100 μf of shunt capacitance.

Transient Characteristics

Line (10% step change): Output transient will not exceed 0.5% peak amplitude.

Impise Settling Time: 50 μsec or less.

Overload Indication: Front panel lamp illuminates when load exceeds 1 KVA. Raw AC power is applied to load during period of illumination.

Overload Protection: Excessive overload condition actuates front panel circuit breaker.

GENERAL:

Metered Input/Output: Switchable input/output and output current monitoring on AC voltmeter. Meter accuracy ±3% full scale.

Ambient Temperature: 0 to 55°C.

Storage Temperature: −20°C to +85°C.

Cooling: A blower provides internal forced air circulation; reversible air flow through front panel.

Dimensions: 19″ w x 7″ h x 17½″ d, for standard rack mounting.

Net Weight: 105 lb.

Shipping Weight: 115 lb.

ELGAR
Model 7006
High-Speed
Solid-State
Line Conditioner

Output Power: 500 VA.

Response Time: Less than 50 μsec.

Regulation: ±0.05% (line and load).

Output Harmonics: Less than 0.25% for up to 10% input harmonics.

Input Voltage Ranges: 95-115 VAC, 105-125 VAC, 115-135 VAC, selected by tap switch.

Input Frequency: 59 to 61 Hz.

Output Voltage: 115 VAC.

Power Factor: Full current rating up to 0.7 leading or lagging, half current rating to 0 leading or lagging.

Operating Temperature: 0-50°C.

Input Current: 7.5 amps max.

Weight: Less than 35 lb.

Size: 3½″ h x 14″ d x 19″ w, standard rack mounting.

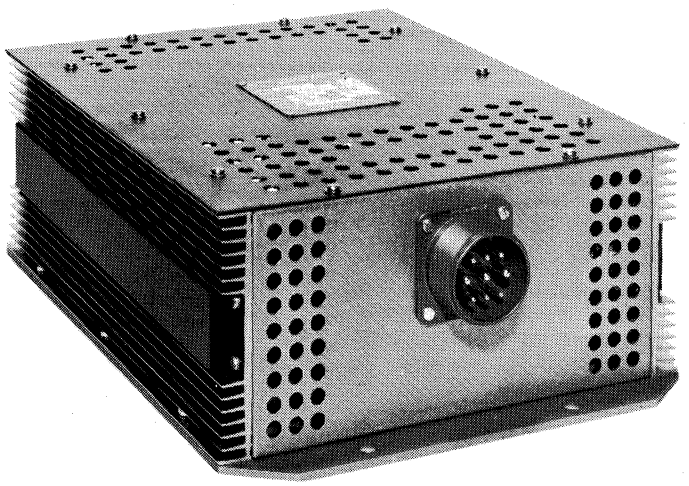
FLITE-TRONICS

60 Hz 400 Hz STATIC INVERTERS



Other Inverters Available:

- **Model PC-14A 60 VA**
- **Model PC-14 100 VA**
- **Model PC-15A 250 VA**
  Specifications same as PC-17
- **12V to 24V Converters**
- **24V to 12V Converters**

For applications requiring greater than 600 VA of continuous power, the Flite-Tronics' Model PC-17 Inverter can be paralleled as necessary to double, triple, or quadruple the output power of a single unit. This is simply done by phase locking the oscillator in the PC-17. Malfunction of a single unit when connected in this manner will not damage the other units in parallel. Each unit has its own overload protection. Each device is capable of self-preservation.

SPECIFICATIONS MODEL PC-17 (600 VA) STATIC INVERTER

INPUT VOLTAGE:
28 VDC ±2.0 VDC

INPUT CURRENT:
31A — full load
1.0A — no load

OUTPUT VOLTAGES:
115 VAC +5% −7%
26 VAC +5% −7%

OUTPUT FREQUENCY:
400 Hz ±1%

OUTPUT POWER:
600 VA continuous for 115 VAC output
125 VA continuous for 26 VAC output
NOTE: Total continuous output power 600 VA.

OUTPUT WAVEFORM:
Sine Wave, Single Phase

HARMONIC DISTORTION:
7% maximum (Typically 3%)

POWER FACTOR:
.8 to 1.0

ALTITUDE:
45,000 feet

EFFICIENCY:
70% typical

TEMPERATURE:
−65°F to 160°F

WEIGHT:
14 lbs.

SIZE:
Width 8½″
Length 12″
Height 4 1/16″

INPUT OVERVOLTAGE:
Withstands 130% overvoltage (37 VDC) for five minutes minimum while delivering full rated 600 VA output power. Output voltage under this condition 115 VAC +5% −7%.

EMISSION RFI:
Radiated & Conducted . . . 90KC to 1000MC.
Far below levels specified in Appendix A of RTCA Paper 120-61/DO-108 Category "A".

HUMIDITY:
Greater than 95% for ten days, temperature cycled between 75°F to 160°F.

VIBRATION:
To withstand at least 10 G's from 10 to 500 cycles per second in three directions for 90 minutes each direction.

SHOCK:
To withstand at least 10 G's for 11 milliseconds in three directions.

OVERLOAD CAPABILITY:
Deliver 150% of rated output current at rated output voltage for a duration of not less than 5 minutes (i.e., 900 volt amp load).

INPUT VOLTAGE PROTECTION:
Unit withstands transients of 88 volts lasting 1 millisecond on the 28.0 VDC input line.

EXCESSIVE OVERLOAD & OUTPUT SHORT CIRCUIT:
Withstands without damage or degradation loads exceeding 150% nominal to an output short circuit. Unit delivers rated output on removal of above condition.

SPECIFICATIONS MODEL PC-16 STATIC INVERTER

POWER OUTPUT:
250 VA Continuous
150% Overload 5 minutes
pf — .8 to 1.0

VOLTAGE INPUT:
1. 28 VDC ±2 Volts
2. Withstands 88 Volt Transient for 1 Millisecond

INPUT CURRENT:
14 Amp — full load
1 Amp — no load

FREQUENCY:
60 HZ ±1 Hz

VOLTAGE OUTPUT:
115 VAC RMS +5% −7%

AMPLITUDE DISTORTION:
Less than 7%

WAVE FORM:
Sine Wave

PHASE:
Single

SHORT CIRCUIT
Withstand for 1 minute or longer

TEMPERATURE:
−10°F to +160°F

ALTITUDE:
45,000 Ft.

WEIGHT:
16 lbs.

SIZE:
7½″ x 12″ x 4″ overall dimensions

For application requiring greater than 250 VA of continuous power Model PC-16 can be paralleled to double or triple the output power of a single unit.

MIL-SPEC MODULES

Meets MIL-E-5272C as follows:
Acceleration—Non-op; Proc III; 10g along each axis for 10 minutes.
Shock—Non-op; Proc V; 30g for 6 ms each axis.
Vibration—Proc XII; 5-20cps double amp. of .25 in.; 20-400cps—5g; 400—3KC—7.5g.
Temp. (operating)——65° C to +75°C
All power supplies described on these pages may be militarized. Below are representative units and prices.

FERROTRAN

POWER SUPPLY DESIGN INFORMATION

220 V.A.C. INPUT POWER MODULES

ELECTRICAL FEATURES

NOMINAL INPUT VOLTAGE — 115 volts.

INPUT VOLTAGE RANGE — Regulated from 105 to 130 volts ac input; max is 140 v.

220 V. AC INPUT—All modules available with 220 v. ac input in a case slightly larger than specified; 220 v. ac input units may be tapped at 115 v. additionally.

INPUT FREQUENCY RANGE — 55 to 450 cycles; 55 to 2 kc at small additional charge.

REGULATION — Load regulation is specified in tables. Line voltage regulation is approximately 3% (105-130 v.a.c.)

RIPPLE — RMS value specified in tables at 60 cycles input and at currents indicated; will be reduced at lower currents; For approximate ripple at 400c divide 60 c. ripple by 6.

OUTPUT VOLTAGE — Fixed voltage units have an output voltage within 5% of values shown; Customers may specify exact output voltage required at no extra charge.

COMPONENTS — All components rated for minimum of 85 degrees C. and are of domestic manufacture. All semi-conductors are silicon.

POLARITY — Outputs are floating off case with 1000 v. d.c. test voltage; may be used positively or negatively.

STABILITY — Fully operable on turn-on; voltage varies within a few percent during first five minutes; after half-hour of operation, voltage remains stable within a small fraction of 1%.

TEMP. (STORAGE) — —54°C to +85°C.

TEMP. (OPERATING)— —30°C to +70°C exc. where specified.

MECHANICAL FEATURES

SHOCK — 70G.

VIBRATION — 2G from 12 cps to 250 cps, in 3 planes.

CASE — Will meet MIL-T-27 specifications.

CONNECTOR — Compression type multi-lead glass headers, 0.900" dia. for all units. Hook type solder pins are standard. Hooks are ¼-inch high. (Transformer type terminals or octal plug-in types may be specified. Transformer terminals are 7/16" high x 3/16" in dia. Octal plug-in terminals fit standard 8-pin sockets.

CONNECTOR MOUNTING — All connectors are mounted dead-center in stud side of case. Clearance hole for standard hook connector is 1 1/16".

BLIND INSERTS — 4/40 and 6/32, blind inserts may be mounted on case in addition to or instead of mounting studs. Case height is necessarily increased thereby.

FINISH — Light grey Alkyd base enamel; high gloss.

NAMEPLATE — Metal foil decal. Completely identifies model and rating.

HEATSINKS — Internal, for all units. No transistors or zeners mounted externally; no fins mounted externally.

CASE MOUNTING — Chassis mounted with four threaded studs.

MARKING — All terminals marked with pin numbers and identification.

DIMENSIONS PER MIL-T-27A

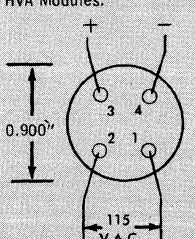
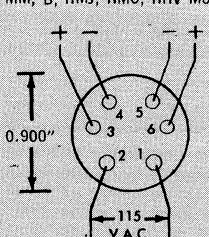
CONNECTIONS

Single D.C. Output Voltage Connections for M, HM, MC, MCH, HV, SMF, SM, SU, SUM, MCS, MV, HVA Modules.



pins 1 & 2 parallel to wide side of case

Dual D.C. Output Voltage Connections for MA, MM, B, HMJ, HMC, HHV Modules.



pins 3 & 4 power supply #1

pins 5 & 6 power supply #2

pins 1 & 2 input

HCV module, as per above sketch. Pins 1 & 2 115 AC input. Pins 3 & 4 DC output. Connect a fuse between Pins 5 & 6 equal to d.c. rated current of module.

These all-silicon, solid state modules operate from either 115 v. a.c. or 220 v. a.c. line voltage to furnish the d.c. outputs shown below. They will operate to 70° C. without derating.

EB Case: 1¾"x1⅞"x2⅜". Wt. Ea., ¾ lb.

Model	D.C. Volts	D.C. Current	% Reg.	% Ripple	Price
M-5-2	5	50	3.0	.30	$44
M-6-2	6	50	1.8	.18	44
M-10-2	10	50	1.4	.12	44
M-12-2	12	45	1.3	.12	44
M-15-2	15	45	1.5	.13	44
M-20-2	20	45	1.5	.15	44
M-24-2	24	40	1.5	.15	45
M-27-2	27	40	1.5	.15	46
M-28-2	28	40	1.5	.15	46
M-30-2	30	40	1.5	.15	46

CONNECTIONS — 5 pin connector dead center on stud side of the case.
Pins 1 & 2 — 115 v. a.c. input. or
Pins 1 & 3 — 220 v. a.c. input.
Pin 4 — positive d.c. output. Pin 5 — negative.

SPECIAL COMPONENTS

In addition to its off-the-shelf products, FERROTRAN designs all types of power supplies and transformers to meet special requirements. This is done at no extra cost to the customer.

AUDIO AMPLIFIER MODULES

These are compact, transistorized units designed to plug into standard 7 or 8-pin tube sockets. Completely tubeless and self-contained, they require no more than a single D.C. applied voltage for complete operation. Component parts are sturdily mounted to withstand shock and vibration conditions.

APPLICATIONS: Public Address, telephone and intercommunication systems, recorder or data amplifiers.

GATES

A single source for all possible types of "brute force" and regulated power supplies that can fill 90% of your design and application needs. Gates Power Supplies give you absolutely lowest cost and long life. The units are excellently constructed of high rated components for trouble free, years of service.

Silicon or Selenium. Single and three-phase units. 1 to 1000 volts, 1 to 1000 Amps. Metered and unmetered Static or variable outputs. Rack, cabinet or chassis mounts. Unit or hundred quantities 48 hour delivery. Two year guarantees. Power supplies for OEM Application, Testing, Prototype, Lab type units, Plating, Motor Control, Cathodic Protection, Transistor power, Anodizing, Battery Charging, Battery Conversions, Marine types, Aircraft Starting.

ECONOMY RANGE DC POWER SUPPLIES — Less Than 1% Ripple - Good Regulation - Rack Mount Type - Heavy Duty Construction - Powerstat - Fused 2% Meters - 115 Vac Input

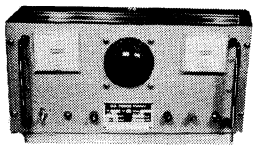
GATES

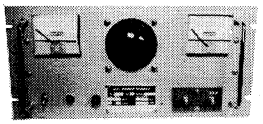
GATES ELECTRONIC COMPANY, INC. • 256 Van Nest Avenue, Bronx, N.Y. 10460 • Telephone: Tulip 1-5900

MODEL GT125-5F



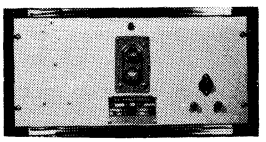
INPUT: 115VAC
OUTPUT: 0-125 @ 5A
RIPPLE: 0.5%
REGULATION: UNREGULATED
METERS: YES
DIMENSIONS: 21″ W x 15″ D x 10½″ H
PRICE: $325.00

MODEL GT14-40



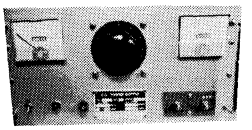
INPUT: 115VAC
OUTPUT: 0-14 @ 40A
RIPPLE: 0.1%
REGULATION: UNREGULATED
METERS: YES
DIMENSIONS: 19″ W x 13½″ D x 8-3/6″ H
PRICE: $275.00 — RACK MOUNTED

MODEL G220-10



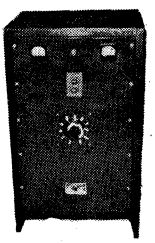
INPUT: 115VAC
OUTPUT: 220VDC @ 10A
RIPPLE: 48%
METERS: NONE
DIMENSIONS: 21″ W x 15″ D x 10″ H
PRICE: $425.00
METERS $50.00 EXTRA

SILICON INDUSTRIAL POWER UNIT
MODEL G30-40F



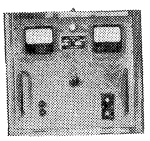
INPUT: 115 Volts AC, 60 cycles, single phase.
OUTPUT: 0-32 Volts DC, 0-40 Amperes DC, continuous duty
RIPPLE: 1% RMS
DIMENSIONS: 12¼″H x 19″W x 13″D
REGULATION: D.C.V. at full load: 32 minimum D.C.V. at 1/10 load: 35 maximum
PRICE: $425.00

SILICON AIRCRAFT BATTERY ELIMINATOR
Model G30-200



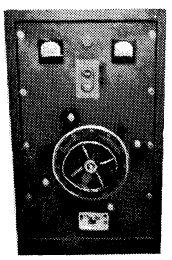
INPUT: 220 Volts AC, 60 cycles, 3 phase
OUTPUT: 0-32 Volts DC, 0-200 amperes continuous duty also avail. 300A
RIPPLE .5% RMS
REGULATION: 5-8% 1/10th load to full load with constant input and maximum output voltage setting
METERS: 2% Accuracy
DIMENSIONS: 25″ x 25″ x 43″

SILICON REGULATED POWER SUPPLY
Model G530-40M



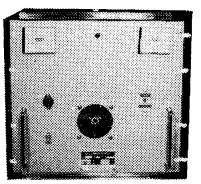
INPUT: 115 Volts AC, 60 cycles, 1 phase
OUTPUT: 5-30 Volts DC, 0-40 amperes
RIPPLE: 1% RMS
REGULATION: ±1% from no load to full load
METERS: 2% Accuracy
DIMENSIONS: 21″ x 15″ 19″

MODEL GT20-200



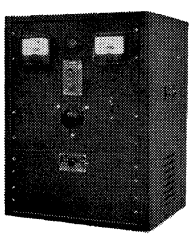
INPUT: 220 VAC 60 cy. 1 Phase
OUTPUT: 0-22 VDC @ 200A
RIPPLE: 1%
CABINET: 35″ x 20″ x 20″
METERS: VOLT & AMP.
PRICE $625.00

SILICON GENERAL PURPOSE RECTIFIER
MODEL G-115



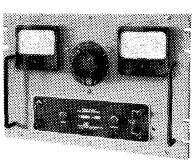
INPUT: 115 Volts AC 60 cycles, 1 Phase
OUTPUT: 0-32 Volts DC, 0-50 Amperes DC, Continuous duty variable over entire range
RIPPLE: 1% RMS
DIMENSIONS: 22″H x 19″W x 15″D
PRICE: $522.00 NET

SILICON POWER RECTIFIER
Model G50-50R



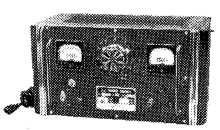
INPUT: 220 Volts AC, 60 cycles, 3 phase
OUTPUT: 0-50 volts DC, 0-50 amperes continuous duty
RIPPLE: 3% RMS
REGULATION: No Load to Full Load 8%
METERS: 2% Accuracy
DIMENSIONS: 21″ x 15″ x 19″

AIRCRAFT BATTERY ELIMINATOR
MODEL G101F



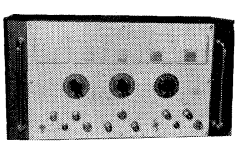
INPUT: 115 Volts AC 60 cycles, single phase
OUTPUT: 0-32 Volts DC, 0-20 Amperes, continuous duty
RIPPLE: 0.5% RMS
Unique overload device prevents needle slam and shows overload condition
REGULATION: D.C.V. at full load: 30
D.C.V. at 1/10 load: 35
METERS: 2% Accuracy
DIMENSIONS: 19″ x 14¼″ x 12¼″
PRICE: $302.50 NET
May be used for Rack or Bench

SILICON POWER RECTIFIER
For transistor circuits electronic equipment
MODEL G92F



INPUT: 115 volts AC 60 cycles, 1 phase
OUTPUT: 0-32 Volts DC, 0-10 Amperes D.C. continuous duty
REGULATION: No load to full load 15%
RIPPLE: Less than 0.3% RMS
METERS: 2% Accuracy
DIMENSIONS: 17″ x 9″ x 9″
PRICE: $169.50 NET
*Also available in 5 Amperes
PRICE: $114.50 NET

VARIABLE AC AND DC POWER SUPPLY



INPUT: 115 Volts AC, 60 HZ, 1 Phase
OUTPUT: (1) 0-22 Volts DC at 4 amperes. (2) 0-22 VAC at 4 amperes. (3) 0-350 Volts DC at 200 MA. All very low filtered.
DIMENSION: 17″ x 9″ x 9″
WEIGHT: 36 Lbs. Approx.

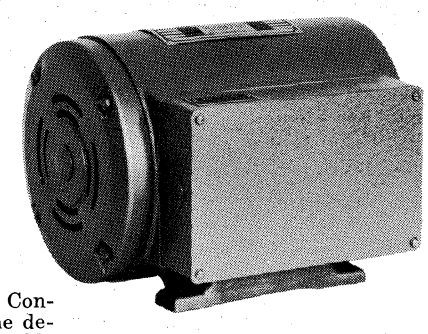
NOBRUSH® FREQUENCY CONVERTERS & GENERATORS

The heart of each "NoBrush" Frequency Converter is a "NoBrush" permanent magnet generator—a revolutionary development in its own right. The "NoBrush" permanent magnet generator features a cast aluminum rotor designed to give amazing voltage stability. It eliminates brushes, commutators, slip rings, resulting in absolute minimum maintenance. Elimination of excitation losses gives amazingly high efficiency, with consequent low heating. Other "NoBrush" advantages are excellent wave form, and immunity to damage by repeated overload or short circuit.

FREQUENCY CONVERTER SERIES 30 UNIT SHELL DESIGN

FOR CONVERSION OF 60 TO 400 CYCLES



FEATURES:

Maximum Dependability
Cool Operation
Very Low Audible Noise
Extremely Low R.F. Noise (zero for most applications)
Compact Construction
Light Weight
High Overload Capacity
Minimum Maintenance
Withstands Short Circuit
Stable Output Voltage
Low Internal Impedance (favorable for pulse loads)
Operates in Adverse Environments

The "NoBrush" Unit Shell Frequency Converter was developed in response to the demand for an efficient, compact, dependable quiet unit, for powering electronic and other high frequency equipment. A "NoBrush" generator is mounted with a high quality induction motor within a single shell. Oversize pre-lubricated ball bearings, sealed for life, insure long term maintenance-free operation. Magnetism is permanently "locked in" at a high level. Problems of radio interference, sparking, fouling, etc., have been eliminated. Because of its simple design and rugged construction, the unit withstands extremes of mechanical and electrical operating conditions, resulting in continuous long-life service.

FUNCTION. The Series 30 Converter is a highly compact motor generator set for conversion of 60 cycle to 400 cycle power. **CONSTRUCTION.** Generator and motor stators contained within aluminum alloy unit shell. Generator and motor rotors pressed on unit shaft, with ball bearings at ends of shaft. Two-bearing construction is utilized, without any projecting shafts, couplings or belts. Single phase input models are provided with starting capacitor and relay, easily accessible in a generous-sized terminal box. **APPLICATION.** Wherever a dependable, trouble-free source of 400 cycle power within the range of 150 VA to 2.5 KVA is required, where 60 cycles (and in some cases, 50 cycles) is available for primary energy. **SPECIFIC APPLICATIONS.** As a source of high frequency power for electronic apparatus; for test and research work; for the servicing of aircraft electrical equipment; for portable radio and military electronic devices; for high frequency motors; for isolated power in computers.

SPECIFICATIONS: INPUT. Low-slip induction motors utilized for drive, available in single and three-phase models. Single phase units are reconnectable for 115 or 230 volts and are capacitor start, induction run. Three phase units normally supplied reconnectable for 208 or 220 or 440 volts. **DUTY.** Continuous. **MOTOR SPEED.** 3500 RPM for ratings up to ¾ KVA. 1750 RPM for ratings from 1 KVA to 2½ KVA. **BEARING TYPE.** Ball bearings, sealed, lubricated-for-life. **ACCESS.** In single phase models—to starting capacitor and relay by removal of external terminal box cover. **OUTPUT VOLTAGE STABILITY.** Within 1% for constant load and constant input frequency. **EFFECT OF INPUT VOLTAGE CHANGE ON OUTPUT VOLTAGE.** Output voltage will change less than 1% for input changes of plus or minus 10%, or for short period input disturbances as great as 30%. **OUTPUT FREQUENCY.** See Chart. **OUTPUT FREQUENCY STABILITY.** Within plus or minus ½% at constant load and constant input frequency. **TEMPERATURE RISE.** 40 degrees, C. (72 degrees F.) **R. F. NOISE.** Extremely low; may be considered zero for most applications. **EXCITATION.** Internal, permanent magnet. **REGULATION.** See typical curves. **DIRECTION OF ROTATION.** Operates equally well in clockwise or counter-clockwise direction. **WAVE FORM.** No sharp peaks or spikes. Total harmonics, single or three phase, within 4% for ratings 1 KVA or over; 5%-8% for ratings under 1 KVA, depending on model. Improved wave form on special order. **OPERATING POSITION.** May be operated with shaft horizontal, vertical or at any angle. **COOLING.** By internally mounted fan. **AUDIBLE NOISE.** Approximately 70 db. (Measurement on "B" scale, at 3 feet distance from unit, in accordance with ASA Standard No. Z 24.7-1950.) **AVAILABLE VARIATIONS.** The following variations are available on special order, in most cases at only a modest addition in price. (Not all variations are available in all ratings.) • Re-lubricable bearings • Militarized construction • Other standard single or three phase input voltages • 50 cycle input • Synchronous motor drive • Other output frequencies—180, 280, 360, 840 cycles • Other standard or non-standard output voltages • Reconnectable output windings for full power at either of two voltages • Low voltage taps • Auxiliary D.C. output at low or high voltage • Two phase output • Class "B" insulation for high ambient temperature operation • Carrying handles for easy portability • Screened openings for unfavorable environments.

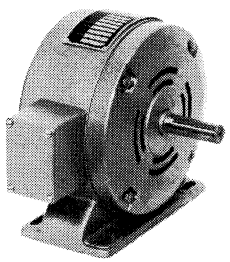
OTHER 400 CYCLE CONVERTERS & GENERATORS

NOBRUSH®

"NoBrush" machines employ permanent magnet excitation — the oldest principle in generator construction — applied in the newest way. By modern principles of engineering design, performance and capabilities previously unheard of in rotating generators are made available — fitting the machine to applications where previously unsuitable. Outstanding advantages exist over other methods of power generation and frequency conversion. Quality has been tested repeatedly in actual military and industrial applications, under most exacting conditions that would have disabled machines of other types.



ALTERNATORS

The original, revolutionary, "No-Brush" generator. Permanent magnets yield stability, reproducibility, ruggedness and virtually zero R.F. noise. Available in large variety of ratings, frequencies and voltages. Supplementary windings with rectifiers available for D.C. output.

Cat. No.	Rating KVA	Phase	Speed RPM	Height	Length	Width	Weight Lbs.

VERTICAL CONVERTER

A rugged 60-400 CPS frequency converter for power output ratings from 2.5 KVA to 10.0 KVA. High quality induction motor is close coupled to a famous "NoBrush" generator for a really outstanding unit. Sealed bearings and totally enclosed motor result in greatly minimized maintenance. Very compact, with high power to weight and size ratio. Available variations include 50 CPS input and other output frequencies.

SYNC. DRIVEN CONVERTER

The ultimate in frequency converter quality. Drive from 1200 R.P.M. brushless synchronous motor. Direct mounted 40-pole "NoBrush" generator delivers stable, almost pure sine-wave voltage. Immune to voltage disturbances on input line. Militarized versions available. Ratings from 2.5 KVA to 10 KVA.

Cat. No.	Rating KVA	Phase	Length	Width	Height	Weight Lbs.

STABILISED HIGH VOLTAGE

STABILIZED HIGH VOLTAGE

BETA RANGE

- **Model 500 — 0.5 to 5 kV .....5 mA.**
- **Model 705 — 1.5 to 15 kV .....2 mA.**
- **Model 800 — 3.0 to 30 kV .....1 mA.**
- **Model 905/906 — 6.0 to 60 kV ..400 μA.**

The BETA range consists of four models of high frequency, high voltage regulated D.C. supplies carefully designed for high reliability and stability. Extremely high standards of engineering and wiring together with extensive use of specially molded polyethylene components combine to provide compact, lightweight units. The front panels are designed for 19 inch rack mounting, but the clean styling of the PVC covered cabinet and the runners make the units equally suitable for bench use. Case and frame are made entirely of aluminum.

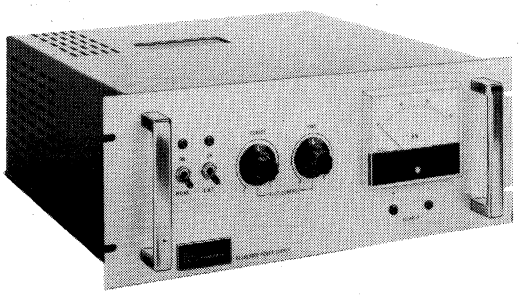
All models except 905/906 (905 negative — 906 positive output) feature extremely simple polarity reversal by means of a specially molded plug and socket on the back panel. This allows the high voltage polarity to be reversed directly; automatically switching the amplifier phase and meter connections with remote relays. Operation of the plug is interlocked for safety to suppress the high voltage during changeover.

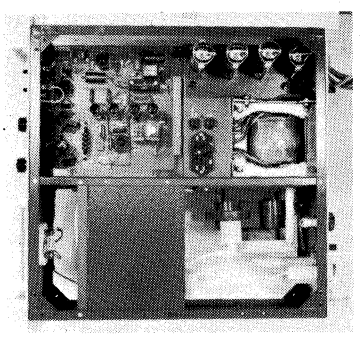
Protection: Both line and high voltage are fused, and in addition an electromagnetic cutout is provided.

Continuously variable output is provided by coarse and fine potentiometers on the front panel. Output is monitored by a 100 μA moving coil meter in series with a high stability resistor chain which also provides feedback to the comparator amplifier. A current metering jack is provided on the back panel.

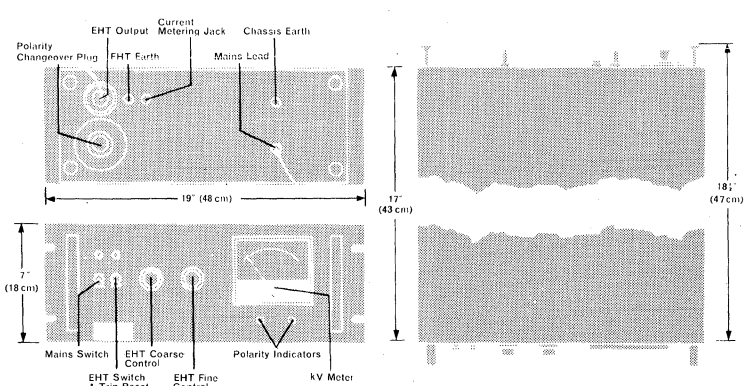
Amplifier: The comparator amplifier and reference are built as a printed circuit board coupled by an edge connector and can be quickly replaced as a unit should it ever become necessary.

Output Ripple is better than 0.1% at full voltage. Stability is better than 0.1% for a line voltage change of +10% to −7½%. Can be supplied for 110 or 220 volt 50/60 cycle operation.





DIMENSIONS AND CONTROLS



Weight: 36 lb (16 kg)

Typical Applications are:

- Cathode Ray Tube Supplies
- Cathode Ray Tube Testing
- Flying Spot Scanners
- Electron Microscopes
- Electron Diffraction Cameras
- High Voltage Testing of Cables Components, Insulation etc.
- Electron MicroProbes
- Electrostatic Deposition Processes
- Chemical Precipitation
- Electrostatic Dust Precipitation
- Testing for Mechanical Defects

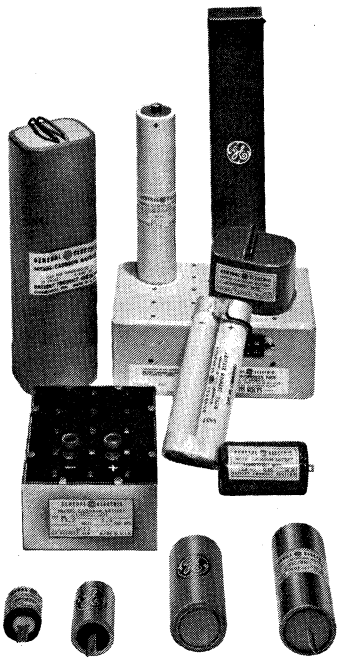
RECHARGEABLE NICKEL-CADMIUM BATTERIES

- **Operate over a wide temperature range**
- **High discharge rate capability with constant voltage output**
- **Long cycle life**
- **Meet severe environmental requirements**
- **Customized battery designs available**



Typical sealed-cell battery designs.

General Electric rechargeable nickel-cadmium batteries are suitable for a wide variety of commercial, military, and aerospace applications. Available battery types include sealed, pressure relieved, and vented cells nominally rated from 0.08 ampere-hours to 160 ampere-hours (at the one-hour rate).

The cells utilize sintered-plate electrode construction to provide the following excellent operating characteristics:

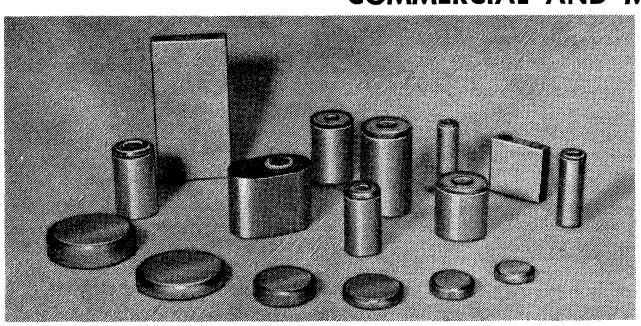
Temperature — the batteries will operate in temperatures ranging from −40°C to +60°C with an optimum range of +15°C to +30°C.

Discharge rates several times rated call capacity are possible up to: 10 times for sealed cells, 20 times for pressure relieved cells, and 30 times for vented cells. Output voltage remains relatively constant over 90 percent of the discharge period.

Cycle life — under specified rated conditions, the number of charge/discharge cycles is normally in excess of 1000. A life in excess of 5,000 cycles is possible at discharge rates not exceeding 25 percent of rated cell capacity.

Shock resistance — the cells exhibit great resistance to shock, vibration, and physical damage. Tests up to 5,000 G's have been performed without causing cell damage.

COMMERCIAL AND MILITARY APPLICATIONS



Sealed cells are available in a wide variety of shapes and ampere-hour ratings to obtain batteries of any needed voltage or size.

SEALED CELLS — Sealed cells are available in three basic shapes: button, cylindrical, and rectangular. No maintenance is required and these cells will operate in any position. In addition, all cylindrical and rectangular cells in this classification feature a resealable vent mechanism that permits maximum cell life, even under infrequent abnormal operation.

Button cells are particularly suited for portable radios, flashlights, photo flash equipment, burglar alarms, and other low-drain high-capacity applications. Available ratings run from 0.08 to 1.60 ampere-hours at the one-hour rate.

Cylindrical and rectangular sealed cells provide maximum discharge rates and capacity. The special resealing vent mechanism on these cells provides added safety and reliability, making them especially suited for portable, cordless, rechargeable consumer products such as TV sets, radio receivers, and transceivers; appliances; and starting small gas engines. Available ratings run from 0.08 to 4.0 ampere-hours at the one-hour rate.

VENTED CELLS — Vented cells provide outstanding performance where large peaks of power and fast recharging are required. Typical applications include aircraft, turbine, and diesel engine starting. Available ratings run from 11.0 to 160.0 ampere-hours at the one-hour rate.

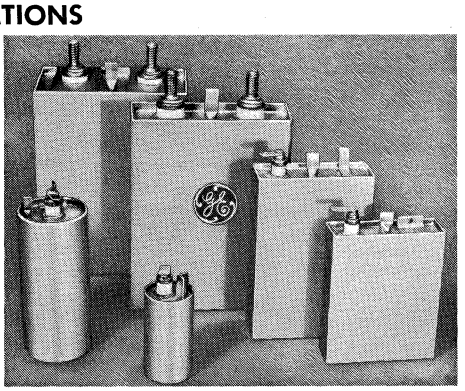
SPECIAL DESIGNS — All of these battery cell types can be customized, through use of special battery design and packaging techniques, to meet individual power and size requirements.

AEROSPACE APPLICATIONS

General Electric nickel-cadmium aerospace batteries are designed to operate for extended periods in an outer space environment. The battery cells employ a hermetic ceramic-to-metal seal (leakage rate less than 1×10^{-8} cc/second of helium per year) construction that effectively insulates the positive terminal or both terminals. The cells are also designed to withstand constant overcharging at specified rates.

Specialized cell and battery designs will be built to meet unusual requirements. This includes special cell terminal arrangements, deep drawn cases, cell case design, and third electrode control circuit to permit faster charging. Available ratings run from 0.75 to 100.0 ampere-hours at the one-hour rate.

WRITE FOR BULLETIN GEA-7287



Hermetically-sealed aerospace cells are available in stainless-steel cylindrical or rectangular case designs.

GENERAL ELECTRIC

REGULATED DC POWER SUPPLIES

Improve Performance of Computers and Other Electronic Equipment

These component power supplies can be used in a wide variety of applications where relatively constant d-c voltage is required despite fluctuating line voltages. Computers, process control equipment, and electronic measuring devices are typical applications where demands for accuracy require constant regulation of voltage.

Performance-proved GE d-c power supplies can be designed to suit your needs for either 50- or 60-Hertz power sources.

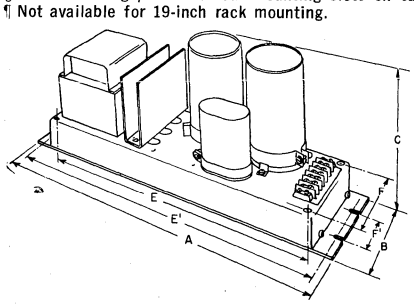
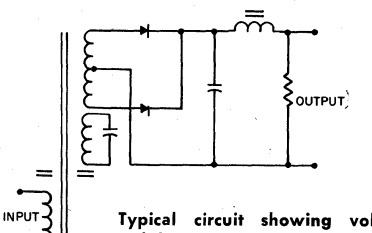
† May vary ±1%. All standard units come equipped with a plate for 19-inch rack mounting.
‡ Indicates approximate percent increase in output voltage due to decrease of load current from full load.
§ Rack mounting plate has four mounting slots on each end. Distance between centers of two outer slots is 7½ In., between two inner slots 3 In.
¶ Not available for 19-inch rack mounting.



Mounting holes suitable for ¼-20 screws. Length of screw may vary with chassis height.



Typical circuit showing voltage stabilizers and filter components.

EFFECT OF INPUT VOLTAGE VARIATION

D-c power supplies can be designed for various input voltages and ranges. With all other variables constant, the output voltage will not vary more than ±1 percent for a change in input voltage over the rated range of 97 to 130 volts input.

EFFECT OF TEMPERATURE CHANGE

For every 40C change in the ambient temperature, the output voltage level will change approximately one percent.

EFFECT OF FREQUENCY

A change of one percent in frequency will change output voltage level approximately one and one-half percent.

ISOLATION

All d-c power supplies provide electrical isolation between the a-c power source and the d-c load.

POLARITY

GE d-c power supplies can be designed with the polarity you require. All standard units listed can be installed with either plus or minus grounded.

RIPPLE

Ripple levels of one percent RMS meet most requirements. However, other levels of ripple content can be designed into GE power supplies.

EFFICIENCY

Efficiency ranges from 70 to 85 percent for normal output voltage levels. For unusually low output voltages or low power ratings, some decrease in efficiency may occur.

REGULATION

Load regulation characteristics depend on the rated output voltage and rated power level of the power supply.

Prices subject to change without notice.

For complete information contact nearest GE Sales Office listed on inside front cover, or write to General Electric Co., Section 998-50, Schenectady, N. Y. 12305.

GENERAL ELECTRIC

AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment

General Electric a-c voltage stabilizers are static-magnetic transformer-type products which provide voltage maintained within ±1% variation while input line voltage fluctuates ±15%. They are offered in the following variations:

Unfiltered output: output voltage waveform is relatively flat-topped, with harmonic content from 15 to 20%.

Harmonic filtered output: output voltage is filtered to near sinusoidal waveshape, with a maximum of 3% harmonic content.

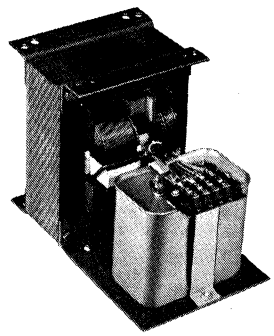
Enclosed construction: completely metal enclosed for safe external mounting.

Open construction: for installation within electronic or electric equipment.

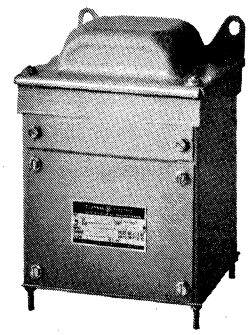
Cord/Receptacle units: for convenient temporary connections.

SINGLE PHASE — Magnetic-capacitor circuitry is frequency sensitive. Stabilizers designed for one frequency are not suitable for use on another.

THREE PHASE — Standard single-phase a-c voltage stabilizers can be connected for 3-phase, 4-wire loads with input connected delta. However, single-phase models cannot be connected for 3-phase, 3-wire loads: select from 3-phase delta-delta models.



Open — small ratings



Enclosed — small ratings

GENERAL ELECTRIC

STABILTRON* AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment Requiring PRECISE Voltage Control

General Electric Stabiltron a-c voltage stabilizers can be used in a wide variety of electronic equipment applications where precise control of voltage is required. The Stabiltron consists entirely of static components — there are no tubes to burn out or moving parts to replace or maintain.

The Stabiltron senses deviations from a predetermined output voltage level by an error detector. The error signal, through the silicon-controlled rectifier circuit, augments the voltage stabilizer action and provides almost instantaneous correction of output voltage.

Typical applications include computers, radar and communications equipment, industrial process control, and X-ray equipment.

Input Voltage — The most common power source voltages can be handled by the standard models listed. Stabiltron units can be provided for special voltage levels on request.

Output Voltage — Stabiltron voltage stabilizers maintain extremely precise voltage output in spite of wide fluctuations of line voltage, frequency, load, load power factor, and ambient temperatures.

The table below illustrates the effect on the output of the maximum steady state excursions, within rated limits of some of these variables.

TABLE 1 — TYPICAL OUTPUT VOLTAGE CHARACTERISTICS

Variable	Excursion	Output Voltage Bandwidth¶
Line voltage†	95 to 130	0.02 to 0.2%
Frequency	57 to 63 Hertz	0.15 to 0.4%
Load	0 to 100% rated load	0.02 to 0.1%
Load power factor	0.4 lagging to unity	0.01 to 0.1%
Ambient temperature	−25C to 40C	0.01%/degree C

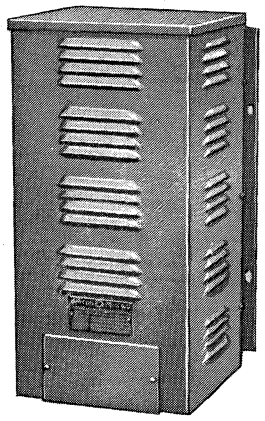
¶ A range is indicated because exact amounts are dependent on the static level of other variables.

† When the Stabiltron unit is operated at less than rated load, the line voltage can be reduced considerably below 95 volts without serious deterioration of the output voltage.

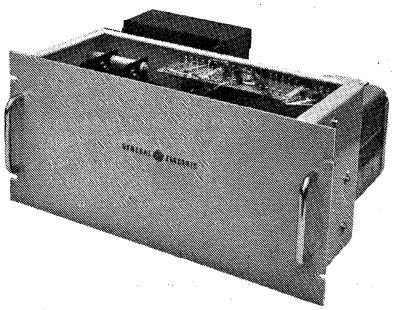
Response — Under transient line or load conditions, elapsed time for correction of output voltage and transient excursion from the normal bandwidth are key considerations to equipment operation.

The Stabiltron provides fast response and small transient excursion through its unique combination of solid state and magnetic circuitry.

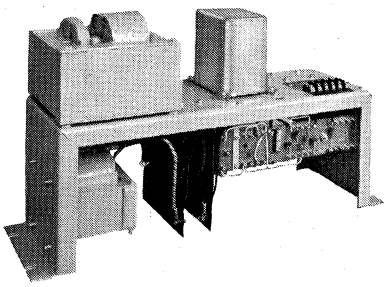
* Trade-name of General Electric Co.



ENCLOSED CONSTRUCTION - 2-kva units are suitable for either wall or floor mounting. 5- and 10-kva units can be floor mounted only.



PANEL CONSTRUCTION is suitable for standard 19-inch rack mounting.



OPEN CONSTRUCTION is suitable for horizontal or vertical mounting surfaces in equipment enclosures.

57-63CPS; 3% HARMONIC: 0.4 LAG TO UNITY LOAD PF

TABLE 2 — TYPICAL TRANSIENT RESPONSE CHARACTERISTICS

Transient Change	Percent Peak Output Voltage Excursion	Response‡ Time	Total Recovery§ Time
0 to 115V input	14%	4 Hertz	13 Hertz
95 to 130V input	14%	3 Hertz	8 Herzt
130 to 95V input	9%	5 Hertz	9 Hertz
0 to 100% rated load	24%	1 Hertz	2 Hertz
20% to 100% rated load	21%	1 Hertz	2 Hertz
100% to 20% rated load	34%	1 Hertz	10 Hertz

‡ The time required for the output to recover 63.3% from its maximum excursion.

§ The time required for the output to recover to normal bandwidth limits.

Harmonic Content — Under all rated ranges of line variation and most load conditions, the total harmonic content of the output wave form will not exceed three percent for a sine wave power source. Even under adverse conditions, when the power source is not a sine wave, the Stabiltron voltage stabilizer will correct the wave form to the load to approximately three percent harmonic content.

Rectifier-filter Loading — Since the output wave form is low in harmonic content, the Stabiltron voltage stabilizer can be connected successfully to a rectifier (capacitor input) filter load to the input of a d-c power supply having capacitor input filters.

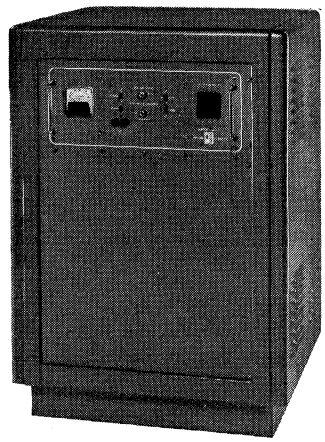
GENERAL ELECTRIC

volt-pac® VOLTAGE REGULATORS

- **New solid-state control**
- **Precise output voltage control**
- **Fast voltage-correction rate**
- **Cabinet or rack-mounted models**
- **Magnetic circuit-breaker protection**



Three-Phase

General Electric's new automatic voltage regulator line provides closely regulated output voltages from varying input voltages. They normally include a motor-operated Volt-Pac variable transformer, associated buck-boost transformers which handle a wide range of input-voltage variation, and a new solid-state SCR control.

These automatic regulators maintain a preselected output voltage level within 1 percent bandwidth, and are temperature compensated from −20 to +40C. They can be bench or floor mounted, or in smaller sizes, mounted in standard relay racks.

* 208-volt nominal output voltage operation requires no change in power connection, but does require selecting correct control transformer ratio. When operated at a nominal 208 volts output, the regulator will correct for an input range of 181 to 236 volts, with the output voltage adjustable from 199 to 217 volts.

† The specified input voltage range is applicable for nominal output voltage. When operating at any other output voltage within specified range, the input voltage range will change proportionately with the change in output voltage level selected.

‡ Load kva based on nominal output voltage.

No Waveform Distortion

No harmonic waveform distortion is introduced at any load or with any input voltage. The output voltage waveform is a precise reproduction of applied input waveform.

Adjustable Output Voltage

Output voltage for units nominally rated 115 volts is adjustable from 110 to 120 volts. Output voltage also is adjustable from 220 to 240 volts for units rated 230 volts; from 440 to 480 volts for nominally ratetd units of 460 volts. Please note that the specified input-voltage range is applicable for nominal output voltage. When operating at any other output voltage within specified range, the input voltage range shifts in proportion with the selected output voltage.

Accurate Static-sensing Control

Solid-state control combined with the new Sylvan-Kettler static-sensing device achieve the optimum in automatic accuracy. The voltage regulator is governed automatically by a dead-band-type voltage-sensitive control utilizing either lamp or zener bridges. The circuit includes magnetic input circuit breakers and an output voltmeter.

TYPICAL SPECIFICATIONS

Regulation Accuracy	±1.0%
Speed of correction	10.4 volt/sec
Output voltage	Adjustable from 110-120 volts
Input voltage	95 to 135, single-phase
Frequency	60-Hertz
Load Range	Zero to full load
Efficiency	Up to 99%
Power Factor Range	0 to 100%
Wave Form Distortion	None
Output Meter	0-150 Volts AC
Ambient Temperature Operating Range	−20C to +40C
Protection	Magnetic Circuit Breaker in Power Input Line—Control Circuitry Fused

Prices subject to change without notice.

Inverters

Glentronics offers complete in-house capabilities for the design and development of electronic equipment, including production test and prototype development laboratories, and manufacturing facilities for the production of transformers and chokes, printed circuit boards, mechanical assemblies, heat dissipators and component ovens.

Facilities have been approved by Government agencies and aerospace manufacturers. Glentronics' reputation is built on quality commensurate with application requirements, performance, comparable pricing, and delivery on schedule. A proven record of achievement is exemplified by the nearly 200 customer facilities served by Glentronics, Inc.

how to select a Hewlett-Packard DC Power Supply for your application

DC Power Supplies — you might think of them in other terms. Such as battery substitutes, rectifiers, AC-DC converters, power amplifiers, operational amplifiers or maybe even as SCR's.

No matter what you call them, Hewlett-Packard offers more than 100 models of DC power supplies. These offer a wide range of voltages and currents, a sophisticated variety of control versatility and solid-state reliability. One of them may prove suitable for your application — whether it be for OEM use, a special system, the production table, or the research bench.

To this end, we offer the following guidelines for helping you select the right power supply. See the next three pages for a condensed listing of DC power supplies from Hewlett-Packard.

power supplies

Voltage Output: A power supply with a voltage rating about 10% higher than that required is recommended. This provides the necessary flexibility for testing and adjusting analytical and other systems.

Current Output: For optimum performance, the current rating of the selected power supply should equal or exceed the maximum instantaneous (not average) output demanded by the load. Built-in fast-acting protection circuits of Hewlett-Packard instruments limit the output current to a preselected value; this protects both the power supply and the load from damage.

Output Mode: Most hp power supplies are designed to provide either a constant voltage or a constant current output. However, many hp power supplies are designed to operate in either mode and to automatically switch (cross over) from one mode to the other at any preselected point in the output range. If flexibility in operating mode is desired, these versatile hp power supplies are recommended.

Specifications: Most applications will call for well regulated power supplies. These: fluctuate less than 0.01% for a maximum change in input AC line voltage or output load resistance. With no change in load or line conditions, a well regulated supply will drift less than 0.03% in eight hours and experience an output change of less than 0.01%/°C change in room temperature. Ripple and noise are functions of internal filtering and isolation; 200uv RMS is typical of well regulated hp supplies (for a 24V output, this is less than 10 parts per million). Performance specifications a factor of 10 times better are available from more precise units — while moderate regulation of .5 to .1% is typical of units with output ratings above 2 kW.

All Supplies: 50°C maximum ambient temperature rating. Floating output (ground either side), continuously variable output, low output impedance at all frequencies, 3-wire input, computer-quality electrolytics, 1 year warranty. No turn-on, turn-off overshoot; short-circuit-proof, all semiconductor except as noted by‡.

Transistor Supplies: Glass-epoxy printed circuit board construction, fully automatic overload protection — short-circuit-proof.

Our 1969 Catalog/Handbook

In it you will find more guidelines for selecting the right power supply for your specific application. It contains AN-90, our application note which gives specifications, definitions, explanations, illustrations, and applications for the complete hp line of DC power supplies. You need only ask your local hp sales office for assistance, or write Hewlett-Packard Company, 110 Locust Avenue, Berkeley Heights, New Jersey 07922. Europe: 1217 Meyrin, Geneva.

Applications Service

Hewlett-Packard staff engineers are available for additional technical assistance, for applications information, and technical data on DC power supplies. He's as near as your telephone. Moreover, the field office engineer is backed by factory specialists. Many times the problem is directed there: at New Jersey Division, 110 Locust Avenue, Berkeley Heights, New Jersey 07922. Telephone: (201) 464-1234.

Additional Literature

Additional literature on applications are available. Besides the 1969 DC Power Supply Handbook described here, there is other applications information available. These are described below by title:

AN-82 — Power Supply Amplifier: Concepts and Modes of Operation

TL-2 — Constant Voltage/Constant Current Regulated Power Supplies

TL-5 — Method of Achieving Constant Current Operation Utilizing a Constant Voltage Power Supply

TL-7 — Notes on DC Power Supply Isolation Measurement

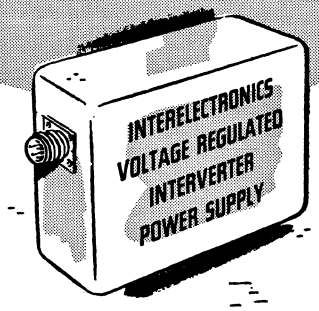
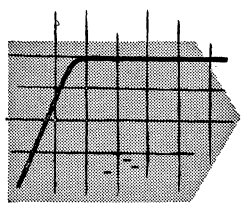
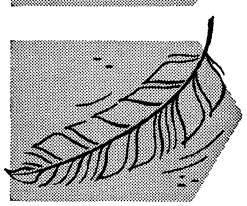
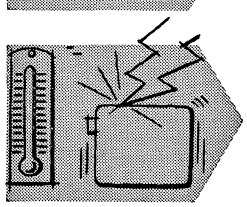
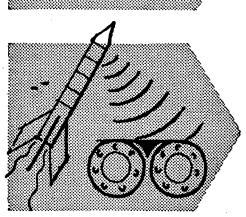
PROVEN RELIABILITY—
DC-DC, DC-AC, SOLID-STATE POWER INVERTERS
over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—

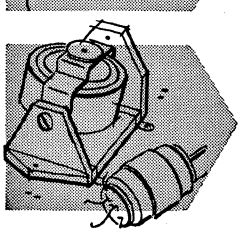












Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. High conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Wide input voltage range (1 to 250 volts DC). Wide input voltage regulation (output voltage maintained with variations up to 50% in input voltage).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2%) with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards.

Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit to actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call (914) EL 8-8000 in Congers.

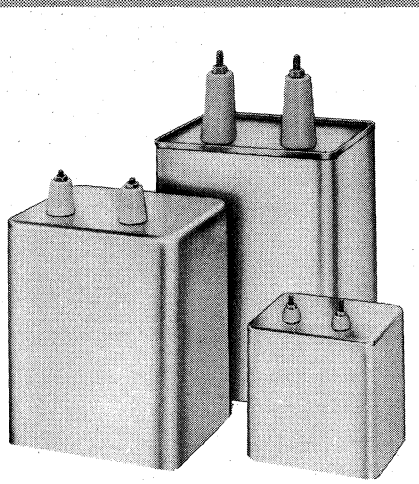
HIPOTRONICS INC.

HIGH VOLTAGE POWER PACKS



The Hipotronics wide range of compact miniaturized power packs with output voltages from 2 to 100 KV and current ratings of 2, 5 or 10 milliamperes are designed for long life and trouble free operation. Advanced high voltage techniques developed by Hipotronics permit greater size and weight reduction than previously possible.

All units are housed in a hermetically sealed MIL-T-27A can and vacuum filled with mineral type transformer oil or epoxy. The insulating medium insures corona-free operation and allows for running the supply at 3 or 4 times normal current rating for long periods of time. The corona free operation precludes component failure caused by long term corona degradation of insulation and guarantees a pure DC output free of any interfering high frequency signals which might possibly influence or affect the system which it is powering.

Every component in the supply is operated at well below its design rating and pre-assembly hipotted at one and one half times its operating voltage.

The output connections are high voltage ceramic type on models 30 KV and below and through plug in re-entrant receptacles for coaxial cables on greater than 30 KV units. Three foot cable assemblies are supplied with each re-entrant bushing type and longer ones are easily assembled if required.

Output Voltage Kilovolts	Current Milliamperes	Model	Height	Width	Depth	Price

FEATURES

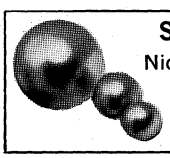
- **Hermetically sealed, oil or epoxy filled**
- **Solid state rectifiers**
- **10 year life**
- **Low ripple**
- **Good regulation**
- **Compact, highly miniaturized**
- **Reversible polarity**

Inquiries are invited for units with outputs different than our standards, with built in line regulation, short circuit current limited units, lower output ripple, with 220V, 50/60 cycle inputs or with center tapped output etc.

SPECIFICATIONS FOR ALL MODELS

Input	0-125 volts, output voltages and currents stated for nominal 117 volt input.
Regulation	10 to 15% no load to full load
Ripple	1/2% rms per milliampere output
Life	10 years at 25°C ambient with rated output voltage and current
Terminations	Ceramic bushings on 30 KV and below models Re-entrant receptacles with 3 foot mating coaxial cables on 40 KV and up models

HV TERMINATIONS



SPHERES
Nickel plated with threaded insert

HIGH VOLTAGE POWER SUPPLIES AND POWER PACKS

Hipotronics has a complete line of unregulated high voltage power supplies with output voltages ranging from 1 to 600 KV and with current outputs from 2.5 ma to 10 amperes.

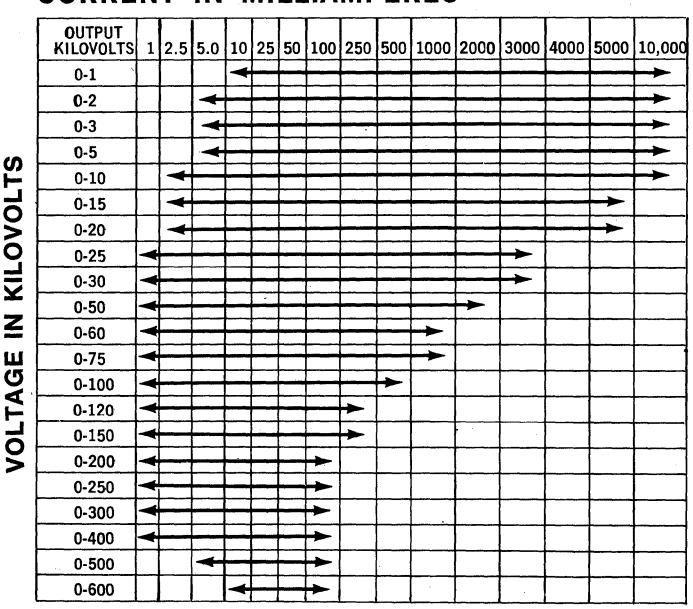
All units are conservatively designed for continuous use and are available with fully instrumented control consoles or less controls for use in OEM equipment or with existing controllers.

They are designed for maximum equipment and operator protection. The surge devices preclude injury to any component from repeated short circuits at full output and the many safety devices insure operator protection.

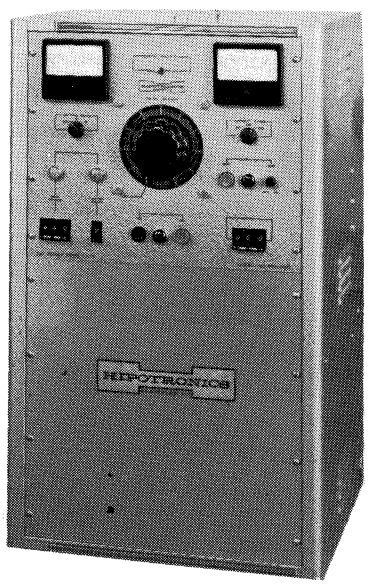
FEATURES

- **Reversible polarity**
- **Output shorting relay with discharge resistor**
- **Surge limiting resistor in output lead**
- **Continuously variable output control**
- **Continuously variable overvoltage control (optional extra)**
- **Continuously variable overcurrent control**
- **Zero start interlock**
- **External interlock provision**
- **Door interlocks**
- **HV on and off push buttons**
- **Circuit breaker input**
- **Functional pilot lights**
- **Triple range KV meter, 2% accuracy**
- **Triple range current meter, 2% accuracy**
- **Surge protection on meters, relays, transformers**
- **Vernier output (optional extra)**

CURRENT IN MILLIAMPERES



MODEL NUMBER FORMED BY PREFIXING 8 to KV and hyphenating current i.e. 60KV, 50ma is Model No. 860-50; 1KV at 1000 ma. is Model 81-1000. WRITE FACTORY for size, weights, prices, specifications etc. of any model in arrowed area. If your requirement can not be satisfied with one of our standard models listed above, send us specifications for prompt proposal.



Model 810-500

SELECTION CHART

Model No.	OUTPUT Volts D.C. (Specify a Voltage)	Current Ma.	Nominal Output Voltage Tolerance
501-**	1 to 10.0 in ½ V Steps	0 - 50	0.5%
502-**	1 to 10.0 in ½ V Steps	0 - 50	0.1%

** When ordering select case number from case illustrations.
Other voltages, currents and specifications available. Please contact factory or representative for additional information.

SPECIFICATIONS:

UNIT CHARACTERISTICS

INPUT: 117 V A.C. ±17 V — 50-60 C 8 Watts (other line voltages and frequencies available).
OUTPUT: Volts: Available in any one nominal voltage ½ V steps from 1.0 through 10.0 V D.C.
Current: 0 - 50 Ma.
Output Impedance: Maximum .01 ohm.
Regulation: Line Voltage Changes: 0.5% Maximum for ±17 V A.C. Load Changes: .05% Maximum for 0 to 50 Ma. Load.
Temperature Coefficient: Maximum ±.003%/°F.
Overall Accuracy: ±0.15%.
Ambient Temperature Range: 0 to 120°F.
Ripple: Maximum 0.01%.
Isolation: Output to A.C. input line — less than equivalent of 2 picofarads.
Cases: Available in Case Nos. 03, 05, 09 and 11. See outline drawings. Specify case number on your order.
Shipping Weight: 2½ lbs.

900 SERIES

RESISTANCE TO CURRENT CONVERTERS

SPECIFICATIONS:

INPUT:
Signal: 3-Wire or 2-Wire Potentiometer-Type Resistive Element with standard nominal spans of 100, 200, 500 and 1,000 ohms as specified. 1.0 Volt D.C. will be impressed across resistive element unless otherwise specified. Input lead resistance unbalance of 2% of span allowable.

Power: 117 Volts, 50-60 CPS ±15 Volts, 7 Watts.
CONTROLS:
Zero: Live zero, adjustable ±2% of total span.
Span: Adjustable ±5% over specified input span of 100, 200, 500, or 1,000 ohms.

900 SERIES (Continued)

OUTPUT:

	D.C. CURRENT	(Nominal Load (ohms) Includes Lead Resistance MINIMUM	MAXIMUM
Model 903	−2.5 to 0 to +2.5 Ma.	0	1,000
Model 905	0 to 5 Ma. basic with 1-5, 0-4 to 2.0 Ma. as specified.	0	5,000
Model 920	4 to 20 Ma.	0	1,500
Model 950	10 to 50 Ma.	0	—

Outputs are easily changed. -Other output currents from spans of 100 μa. minimum to 40 Ma. maximum can be provided on special order.

CASE:
No. 18: For surface mounting 6″ L x 3 1/16″ W x 3⅝″ H
No. 61: For panel mounting 3 7/16″ W x 7″ H x 12¼″ D
No. 91: Plug-in rack mounting 3 7/16″ W x 7″ H x 12¼″ D
May be used in 91 A rack adapter for multiple unit mounting. (Maximum 5 units/rack)
Above cases for non-hazardous locations. Other cases available on request.

PERFORMANCE:
Interference Rejection: Output effect less than 1% full scale when 100 V (rms) at 60 CPS is applied as interference signal.
Frequency Response: ½ second (speeds to ½ millisecond available).
Ripple: 0.02% RMS or 1 microamp pk to pk whichever is greater.
Output to Input Isolation: None. Either positive or negative ground can be used.
Output or Input to Line Isolation: Less than 5 picofarads equivalent capacitance.
Operating Temperature Range: 0 to 125°F.
Accuracy: ±0.5% or ±5 microamps, whichever is greater.
Repeatability: ±0.1% or ±5 microamps, whichever is greater.

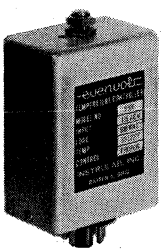
930 SERIES

PROGRAMMABLE CONSTANT CURRENT SUPPLY

SPECIFICATIONS

Type: Solid state current regulated power supply.
Range: As specified continuously adjustable or step-selected from 0.1 thru 50 Ma.
Compliance Voltage: 15 volts D.C. maximum.
Line Regulation: 0.005% or 0.5 μa (whichever is greater) for 10% line change. Long and short term.
Load Regulation: 0.005% or 1.0 μa (whichever is greater) for 0 to 100% load change.
Temperature Coefficient: ±0.002% per °C. (0.0005% per °C available).
Time Stability: 0.005%/24 hrs., non-cumulative.
Output Impedance: Greater than 0.5 megohms.
Ripple & Random Noise: 0.01 μa RMS maximum.
Output Selector: Front panel mounted.
Terminal Connections: Rear mounted terminal board for output, meter and ground.
Power Supply: 100 to 135 volts, 60 cycles, 6 watts with 3 conductor line cord and fuse.
Case: 19″ rack, 3½″ H x 8⅞″ deep with handles.

9511 SERIES



TEMPERATURE CONTROLLER

SPECIFICATIONS FOR A MINIATURIZED TEMPERATURE CONTROL SYSTEM

INPUT: 115 V AC ±15% 60 Hz.
LOAD: Power handling capabilities up to 500 watts* (non-inductive) without relays.
OFF CURRENT: 20 Ma. Maximum.
CONTROL ACTION: Proportioning; Adjust internal potentiometer (accessible through side of case) to adjust proportioning band sensitivity. (Range of proportional band sensitivity can be varied for the applications.)
AMBIENT TEMPERATURE: 80 - 120°F.
SIZE: 4.0 H x 2.5 x 1.6 inches (Space Saver Size).
TEMPERATURE RANGE ADJUSTMENT: Adjust potentiometer on top of case for temperature set.
RANGES AVAILABLE: 210 to 300, 280 to 400, 350 to 500, 420 to 600°F. Other ranges and wattages and case configurations available.
***1 KW @ 220 VOLTS** — specify Model 9521.
Other temperature controllers are available with readout, manual reset for high limit, and adjustable set point.

9519 SERIES

TEMPERATURE CONTROLLER

SPECIFICATIONS:

INPUT: 115 VAC ±15%, 50-60 Hz, 1.5 kw max. load @ 65°C; or 200 VAC ±15%, 50-60 Hz, 3.0 kw max. load @ 65°C. — Specify Model 9529.
TEMPERATURE RANGES: See chart.
SENSOR: Thermistor, 5% interchangeability (approx. ½°C).
ADJUSTABLE SET POINT: External.
CONTROL ACTION: Close proportioning control is provided by varying the off time to control output power according to load requirements.
CONTROL SENSITIVITY: Internally adjustable. See chart below for specific models.
AMBIENT OPERATING TEMPERATURE: 32°F to 175°F (0°C to 80°C). Load de-rates linearly from rated power at 65°C to "0" watts at 85°C.
RADIO FREQUENCY INTERFERENCE: Exceptionally low because of zero angle electronic switching.
HOUSING: Black Anodized Aluminum case provides ample cooling.

REGULATED DC POWER SUPPLIES

TRANSISTORIZED MODELS "ECONOMY SERIES"

MODEL	DC OUTPUT		RIPPLE (mVp-p)	REGULATION (mV)	
	VOLTS	AMPS		LINE (±10%)	LOAD
7314A	1～15	0.5	3	20	30
7315		1	2	10	10
7316		2	2	10	10
7315A	0.5～20	1	2	10	10

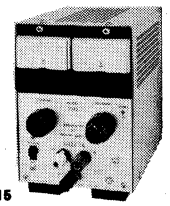
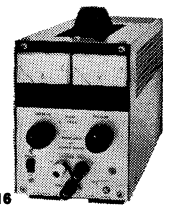
7372	5～300	0.15	3mVrms	40	60



MODEL 7315



MODEL 7316

* Compact, light weight and rich variety as below:
* In the event of overload or output short-circuit trouble, an output current limiting circuit of accurate performance works accordingly.
* Limiting current can be set continuously within the range of 10%～100% of the maximum range. Also can be used as the constant-current power supply.
  (However except model 7314A・7315A)
* By using same types more than 2 sets, the operation can be made either in series connection or in parallel connection (However except model 7314A)
* The panel size is 1/4 rack, and these types can be set four models in 19-inch rack or 500mm standard rack.
* Dimensions of these series-types have two divisions as follows;
  "A type" 7314A, 7315, 7315A, and 7324 types:.....
  .....111W×158H×205Dmm Net Weight: 3Kg approx.
  "B type" Except the above types:.....
  .....111W×158H×345Dmm Net Weight: 5.7Kg approx.

TRANSISTORIZED MODELS "SERIES-TYPES"

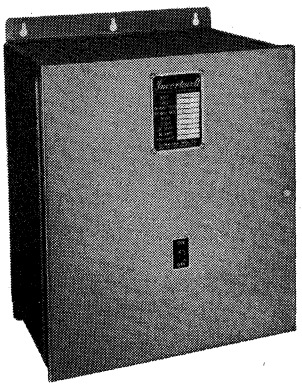
LA MARCHE

INVERTERS POWER SUPPLIES



DC to AC Power Source with Regulated Sine Wave Output

DESCRIPTION

The La Marche MODEL A-51 is a completely solid state SCR inverter which provides a regulated, sine wave output for such applications as:

- Boiler Controls
- Telephone and Microwave Communications
- Burglar Alarms
- Supervisory Control Equipment
- Data Processing and Telemetering Equipment
- Nuclear and Missile Installations
- P.A. Systems
- Fire Alarms

SPECIFICATIONS

AC OUTPUT VOLTAGE .....120 Volts Nominal
LINE REGULATION .....±1% for ±15% DC Change
LOAD REGULATION .....±2% No Load to Full Load
FREQUENCY .....60 Cycle Nominal
FREQUENCY STABILITY .....±1% for Load, Input Voltage and Temperature Variations
WAVE SHAPE .....Sine Wave
DISTORTION .....Approximately 7%
OVERALL EFFICIENCY .....Approximately 65%
AMBIENT TEMPERATURE .....−20° to 60°C (0° to 140°F)

INVERTER ACCESSORIES

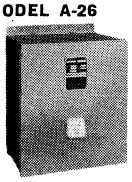
1. A.C. or D.C. Voltmeter $25.
2. A.C. or D.C. Ammeter $25.
3. Frequency meter $95.
4. A.C. Power Failure Relay $25.
5. Low D.C. Voltage Alarm Relay $38.
6. D.C. Circuit Breaker $35.
7. A.C. Circuit Breaker $25.
8. Ground Detection Relay $50.
9. Automatic Demand Panel $95.

ORDERING SPECIFICATIONS

1. La Marche model number.
2. Number and type of battery cells.
3. Ampere hour capacity of batteries.
4. AC loads.
5. Application.
6. Type and capacity of charging equipment.
7. Type of mounting, wall or rack mount.
8. Optional accessories.

FILTERED D.C. POWER SUPPLIES

MODEL A-26



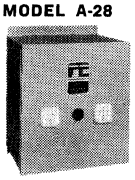
DESIGN FEATURES

1. Automatic in operation and self-regulating.
2. No moving parts. Nothing to arc or wear out.
3. No external controls. Cannot be tampered with.

The La Marche A-26 power supply features automatic load regulation and semi-automatic current limiting. The model A-26 is filtered to 10% ripple. There are no controls to be set for different applications because the amount of loading determines the current output.

The La Marche model A-26, like all La Marche units, is a solid state device employing a balanced isolation power transformer, a magnetic amplifier and sealed silicon diode rectifiers. These power supplies have no contacts, relays, switches, fans, tubes, time clocks or other moving parts.

MODEL A-28



DESIGN FEATURES

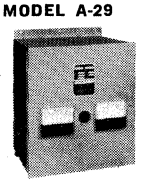
- Silicon diode rectifiers.
- Current limiting circuit.
- Automatic A.C. voltage compensation.
- D.C. voltage regulation.
- Output ammeter and voltmeter.

The model (A-28) is a solid state, fully automatic, constant voltage D.C. power supply designed for all regulated applications.

Standard features include automatic A.C. line compensation, D.C. voltage regulation and current limiting. The La Marche transistor controlled magnetic amplifier circuit is designed to automatically provide a D.C. output regulation of ±5" from no load to full rated output. Accurate output regulation is maintained with A.C. line variations of ±10%. The A-28 is offered in a wide range of sizes and voltages.

The reliability of the La Marche circuit has led to its selection for critical communication and control systems, nuclear powered ships, missile firing stations, and utility power standby systems.

MODEL A-29



ORDER SPECIFICATIONS

1. La Marche model number
2. A.C. input voltage, cycles, phase
3. Intermittent D.C. loads and duration
4. Continuous D.C. load
5. Amount of filtering — measured how?

The model (A-29) is a solid state, fully automatic, constant voltage D.C. power supply designed for all regulated applications.

Standard features include automatic A.C. line compensation, D.C. voltage regulation and current limiting. The La Marche transistor controlled magnetic amplifier circuit is designed to automatically provide a D.C. output regulation of ±1% from no load to full rated output. Accurate outputs regulation is maintained with A.C. line variations of ±10%. The A-29 is offered in a wide range of sizes and voltages.

The reliability of the La Marche circuit has led to its selection for critical communication and control systems, nuclear powered ships, missile firing stations, and utility power standby systems.

FLOAT BATTERY CHARGERS

LaMARCHE

GENERAL DESCRIPTION

The model A-11 Float Battery Charger is a completely automatic, solid state, constant voltage device having:

A.C. VOLTAGE COMPENSATION — D.C. VOLTAGE REGULATION — CURRENT LIMITING

The model (A-11) charger is designed and built to carry continuous and intermittent loads up to its maximum rated output. The A-11 is current limited at 140% of rated output. Each unit is designed and built to charge a specific type of battery containing a specific number of cells.

The La Marche Transistor Controlled magnetic-amplifier circuits provide continuous taper charging. Maintains rated output voltage within ±1% from no load to full load with A.C. input variations of ±10%. Silicon diodes are used for rectification.

The model A-11 charger floats lead-acid batteries at 2.17 volts per cell and by means of a front panel switch equalizes at 2.33 volts per cell. Both float and equalize voltages are adjustable to meet battery manufacturers recommendations. This type of charging imparts the longest battery life and is the accepted method for charging batteries used in standby service.

DESIGN FEATURES

1. Quality parts throughout. Silicon diode rectifiers and transistor magnetic amplifiers used exclusively.
2. A.C. power loss relay, output voltmeter/ammeter and fused input-output are standard on all models.
3. Eighty sizes available in five input voltages.
3. Eighty sizes available in five input voltages.
4. Adjustable equalize and float levels; float/equalize controls located on face panel for easy operation.
5. Design and operation tested and approved by battery manufacturers, utilities, railroads and military.

SPECIFICATIONS

STANDARD ACCESSORIES SUPPLIED:

1. Potentiometer for desired float and equalize charge voltage adjustments.
2. Quality D.C. ammeter and voltmeter with 50 millivolt movement, 2% accuracy.
3. Power failure relay with terminals for connections to a remote alarm system.
4. Fused A.C. input and D.C. output for complete protection.
5. Convenient switch to transfer from float charge to high rate equalize charge.
6. Internal terminal board for easy connection of A.C. input, D.C. output and power failure equipment.

OPTIONAL ACCESSORIES:

1. A.C. circuit breaker replacing fuse.
2. 0-24 hour equalizing timer.
3. Ground detection switch.
4. Low D.C. voltage alarm relay.
5. High D.C. voltage alarm relay.
6. Special paint.
7. Export packing add 5%.
8. Individual float/equalize adjustments, specify model A-11B.
9. Filtered units available, see model A-12.
10. Dual fusing for A.C. input and D.C. output replacing single input and output fusing.
11. Dual voltage A.C. input.
12. 1% taut band meters replacing 2% meters.
13. Relay rack mounting.

HOW TO USE THIS CATALOG

This edition of Kepco's annual product catalog is laid out in a significantly changed way from previous versions. Products are grouped by a shared major characteristic rather than an alphabetical listing.

A cross reference in each group will direct you to other models that also share the characteristic but which are described elsewhere—in another category.
Prices and shipping weights are imprinted directly on each spec page, eliminating the requirement for a separate price list.

You may enter the catalog in a number of ways. If you know the model designation, you'll find its group classification in the Design Features Chart on the facing page. Example: the data on CC models will be found in the section entitled Special Purpose powed supplies—and it will be cross referenced in the High Speed Section. Turn to Page 1997 to find the Special Purpose section.

If you are looking for modular supplies—and have no specific model type in mind, the index will refer you to Page 1975, the start of the Modular, section in which six separate groups are listed and three are cross referenced.

KEPCO POWER SUPPLIES

ORDERING INFORMATION:

All Kepco products are marketed on a direct-factory basis. There are no mark-ups or discounts (other than for quantity buyers) so that there is but one price for our products throughout the United States. Kepco maintains independent sales representatives in most states—and overseas. These factory-trained men will be most pleased to give you any required assistance in procuring and applying these products.

Power supplies are identified by a multipart model number, usually comprising a letter group prefix (identifying the design) followed by a series of numbers that specify the model (usually in rated volts and amperes.) Options will be identified by letter suffix specifying meters, cases, special controls, etc.

It is important for the expeditious handling of inquiries, orders, etc., that the full Kepco model number be used for identification, even if local specification control numbers have been assigned by your organization.

DISCOUNTS:

Discounts are available to quantity buyers. For details please consult with the Kepco Sales Department.

SHIPMENT:

Prices shown in this catalog are f.o.b. Flushing, New York. Please contact our sales office in Flushing for f.o.b. destination (delivered) prices. Our usual means of shipment is by insured motor freight or, location permitting, UPS. Air shipments or special routing available on request.

WARRANTY:

All Kepco products are backed by a firm one (1) year warranty, covering all parts and labor. The warranty is honored at our factory Service Department, Flushing, New York, and at field service depots maintained at strategic cities. Consult your local sales representative concerning the availability of local service.

PARTS:

Maintenance parts may be obtained through the field representative or from Kepco directly. When ordering parts, please use the identifying Kepco part number, and give the model and serial number of the instrument for which they are intended. Do *not* return any parts to Kepco unless authorization tags and instructions are provided.

TM

COMMUNICATIONS:

Address all mail to:
Kepco, Inc., 131-38 Sanford Avenue, Flushing, N.Y. 11352
Telephone: 212-461-7000
TWX Number: 710-582-2631
Telex: 12-6055
Cable Address: KEPCOPOWER NEWYORK

APPLICATIONS ASSISTANCE:

Questions concerning the facilities, features, behavior, and characteristics of any product may be directed to the Kepco Applications Engineering Department. A staff of specialists is happy to provide any assistance in the application of Kepco's Power Supplies to your requirements.

PUBLICATIONS:

From time to time Kepco publishes papers, articles, handbooks and supplements designed to further the state of utilization of modern power supply technology. The Kepco Power Supply News is a regularly published compendium of timely news articles. For a subscription to the Power Supply News—or copies of available publications, use the enclosed business reply card to order your personal copy. Copies of Kepco's publications are also available through Kepco's field representatives.

KEPCO PAR MODULAR POWER SUPPLIES

The PAR modules couple a high gain d-c feedback regulator with convection cooled NPN pass transistors to a conventional power transformer for 50–440 Hz power frequency accommodation. The PAR modules produce a fixed voltage with a ±5% adjustment range at a current rating which depends upon the ambient temperature (see table). PAR models may be programmed to a lesser nominal voltage (with current derating) by substituting for the resistor wired across the control terminals. (See *Operating Region Graph.*) When operating with external current feedback—as a current regulator—the compliance voltage must lie within the shaded region of the graph.

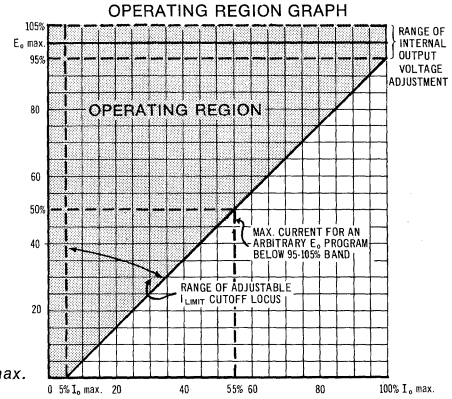
†Uncased: ††Cased ♦ For case, add Suffix "C" to model number and $11.00 to price.

SPECIFICATION	VOLTAGE MODE	CURRENT MODE** (External Sensing)
OUTPUT RANGE	±5% †	1 mA to I_{limit} cutoff locus
REGULATION, LINE	<0.005%	<0.005% at rated sample**
REGULATION, LOAD	<0.01% or 0.5 mV*	<0.01% at rated sample** ‡
STABILITY (8 HR.)	<0.02% or 2 mV*	<0.02% or 1 mA*
TEMP. COEFFICIENT	<0.02% per °C	<0.02% per °C at rated sample**
RIPPLE, rms	<0.25 mV	<0.01% of I_O max.

OPERATING REGION GRAPH



*whichever is greater
**Rated sample is 1 volt across external current sensing resistor with external current control.
†Adjustable to zero with corresponding current derating (see operating region graph).
‡The compliance voltage range lies within shaded operating region from the I_{limit} locus to 105% E_O max.

INPUT: 105-125V a-c or 210-250V a-c, (selected), 50-440 Hz, single phase; approximately 2 amperes, 200 watts.

TEMPERATURE, AMBIENT OPERATING: *Uncased:* –20°C to + 65°C maximum (see rating chart). *Cased:* –20°C to +55°C maximum (see rating chart).

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROL/PROGRAMMING: ±5% internal trimmer (voltage or current). External resistance programming ratio is 1000 ohms per volt. A 1% fixed resistor is supplied to program the tabulated nominal voltage. When programmed below the ±5% output band, derate current per operating region graph.

VOLTAGE RECOVERY, (for step load current): <50 μseconds.

OVERLOAD CURRENT CUTOFF: Adjustable cutoff locus pivots about the $E_O \approx 0$, $I_O \approx 5\%$ point, reducing the output current into an overload. *Note:* Nonlinear loads drawing a high starting current may be locked out by the cutoff locus, and require a starting resistance to be contained within the shaded regions of the operating region graph.

REMOTE ERROR SENSING: Compensates for up to 0.5 volt drop per output lead.

OVERSHOOT: (Turn-on/off): None in ±5% operating band. When output is set below 25%, load to approximately 10% to maintain negligible overshoot.

SERIES/PARALLEL: Connections are provided for parallel operation of identical units. Series operation to rated isolation.

OVERVOLTAGE PROTECTOR: Provision is made for attachment of an optional crowbar overvoltage protector, type VP-PAR. See Crowbar section for detailed description of the protector.

TERMINALS: All input, output, sense and control connections are made via a single multiterminal barrier strip.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Case:* Royal Blue, epoxy.

MOUNTING: A cased model is ordered by appending suffix "C" to the model number. If ordered separately, specify Case CA-200. Rack mount with adapters RA 25-1, RA 8-2 or RA 9-3. *See hardware section.*

All terms used in the specifications are defined in the Kepco Glossary

KEPCO PAT MODULAR POWER SUPPLIES

The Kepco PAT series of voltage regulated modular power supplies features compact repairable construction of a precision programmable regulator. The output is a self-cooled series NPN transistor driven by a monolithic linear I-C amplifier and protected by adjustable current limiting. The regulator will control current when equipped with an external pair of sensing and feedback resistors.

voltage/current regulation

full range operationally programmable

all silicon design

RIPPLE: (rms)	<0.1 mV	<0.02% of I_o max.	——	——	——

*whichever is greater.

**External sensing, using a 1V sample. Specs are measured at rated sample voltage with 20 PPM external current feedback control.

***Offsets and the reference contribute to output change ΔE_O, by the equation $\Delta E_O = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations when external input/feedback elements are substituted for the internal reference and voltage control in special applications.

†See OPTIONS for 0.005% per °C voltage mode – 0.01% per °C current mode temperature coefficient.

INPUT: 105-125V a-c or 210-250V a-c (selected), 50-440 Hz, single phase.

TEMPERATURE, AMBIENT OPERATING: Cased: –20°C to +71°C.

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

PROGRAMMING: Approximately 1 mA control current, externally adjustable by resistance at ≅1000 ohms per volt. May be operationally controlled as an amplifier using voltage or current signals; common positive.

OPEN LOOP d-c GAIN: $>0.5\times10^6$ volts per volt.

VOLTAGE RECOVERY (for step load current): <50 μseconds for recovery to within 0.005% or 2 mV of setting.

CURRENT LIMITING: Adjustable from 10% to 105% of rated full current with provision for remote control.

REMOTE ERROR SENSING: Compensates up to 0.5 volt drop per output lead.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

SERIES/PARALLEL: Series operation to rated isolation; also master/slave capability. Current limiting design permits self-determined parallel load sharing.

TERMINALS: All input, output and control connections are made via a multi-terminal barrier strip.

DIMENSIONS: See Page 2005 for listings.

FINISH: Black anodized aluminum.

MOUNTING: Rack mount with adapters RA 26-1, RA 27-2 or RA 28-4. *See Hardware section.*

OPTIONS: (add designator as a suffix to the model number).

"–R" ADJUSTMENT OF CONTROL CURRENT: A ±10% trimmer is installed to allow precision programming calibration.

"–T" LOW TC OPTION: A special reference provides 0.005% per °C temperature coefficient in voltage mode, 0.01% per °C in current mode.

"–E" OFFSET VOLTAGE NULLING CONTROL: To zero the fixed part of E_{io}, the voltage amplifier's voltage offset.

Data subject to change without notice

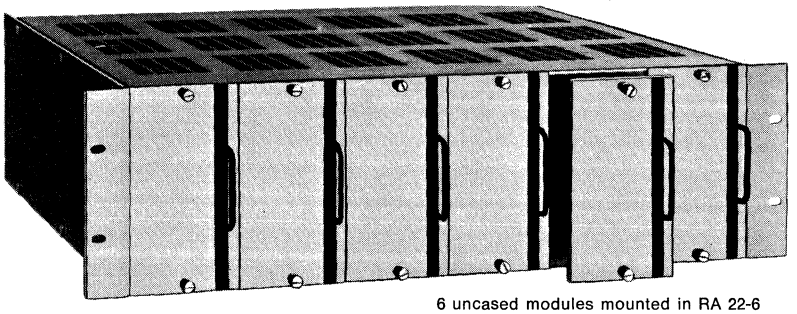
KEPCO PAX MODULAR POWER SUPPLIES



6 uncased modules mounted in RA 22-6 housing using BPA-22 slide adapters

PAX modules are low cost, single-amplifier power supplies that can be used with voltage or current feedback. The HS models (high speed) are especially recommended for current control because of their fast-recovery characteristics. In the PAX design, a convection-cooled PNP series pass transistor is used, the negative output terminal is common to the signal input. The PAX models are thus the signal-complement of the PCX and OPS designs.

♦ For Case–add suffix "C" to model number and $11.00 to price.
Calibration Control–add suffix "R" to model and $10.00 to price.

SPECIFICATION	VOLTAGE MODE	CURRENT MODE** (External Sensing)
OUTPUT RANGE	0–100% E_O max.	1 mA to 100% I_O
REGULATION, LINE	<0.05% or 1 mV*	<0.1% at rated sample**
REGULATION, LOAD	<0.05% or 1 mV*	<0.1% at rated sample**
STABILITY (8 HR.)	<0.05% or 3 mV*	<0.1% or 1 mA*
TEMP. COEFFICIENT	<0.05% per °C	<0.1% per °C at rated sample**
RIPPLE, (Standard Speed)	<0.25 mV, rms.	<0.1% I_O max.
RIPPLE, (High Speed)	<0.1% of maximum output (grounded)	<0.1% of maximum output (grounded)

*whichever is greater

**Rated sample is 1V d-c across external current sampling resistor, with external current control.

INPUT: 105-125V a-c or 210-250V a-c (selected), 50-440 Hz, single phase.

TEMPERATURE, AMBIENT OPERATING: –20°C to + 50°C

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

PROGRAMMING: Approximately 1mA control current. Externally adjustable, by resistance at ≈1000 ohms per volt. Specify suffix "R" to obtain model with integral ±10% control current adjustment. May be operationally controlled as an amplifer using voltage or current signals; common negative.

VOLTAGE RECOVERY: (for step load current): <50 microseconds.

CURRENT LIMITING: Adjustable from 25% to 150% of rated full current.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

HIGH SPEED MODELS, (Suffix HS):

Slewing: >50,000 volts per second, measured as the chord to the first time constant on the exponential response.

Sinusoidal Frequency Response: $f_{max} = \frac{16}{E_{pp}}$ kHz

(E_{pp} is the peak-to-peak voltage excursion.)

Maximum Capacitive Loading: 0.001 microfarad.

Transient Response:

Voltage Mode: Recovery is an exponential with a 50 microsecond time constant.

Current Mode: To a step load voltage, recovery is at the rate of 0.05 millisecond per volt.

SERIES/PARALLEL: Series operation to rated isolation; also master/slave capability. Current limiting design permits self-determined parallel load sharing.

TERMINALS: All input, output and control connections are made via a multi-terminal barrier strip and printed circuit connector.

FINISH: Blue anodized aluminum.

DIMENSIONS: See Page 2005 for listings.

MOUNTING: The uncased model can be mounted to a BPA-22 slide adapter for use with the RA 22-6, CA-3, CA-4 and CA-5. *See hardware section.* The cased model can be rack-mounted on adapters RA 12-1, RA 13-4 or RA 11-6.

KEPCO PCX MODULAR POWER SUPPLIES

The PCX group of voltage regulators are available in two forms—as programmable modules for OEM's or (with the suffix "MAT") as metered plug-ins with a built-in, 10-turn voltage control. The regulator is a self-cooled series NPN transistor driven by Kepco's monolithic linear I-C amplifier and protected by adjustable current limiting. The regulator will control current when equipped with an external pair of sensing and feedback resistors. The PCX series, with its I-C regulator replaces Kepco's PBX design group.

◆ Options: "–R" add $10.00 "–T" add $30.00 "–E" add $10.00
For Case–add suffix "C" to model number and $11.00 to price. Do not use case with "MAT" models.

*whichever is greater.

**External sensing, using a 1V sample. Specs are measured at rated sample voltage with 20 PPM external current feedback control.

***Offsets and the reference contribute to output change ΔE_O, by the equation $\Delta E_O = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations when external input/feedback elements are substituted for the internal reference and voltage control in special applications.

†See OPTIONS for 0.005% per °C voltage mode – 0.01% per °C current mode temperature coefficient.

INPUT: 105-125V a-c or 210-250V a-c (selected) 50-440 Hz, 1Ø.

TEMPERATURE, AMBIENT OPERATING: Cased: –20°C to +65°C. Uncased: –20°C to +71°C.

TEMPERATURE: STORAGE: –40°C to +85°C.

ISOLATION VOLTAGE: 500 volts to chassis.

PROGRAMMING: Approximately 1mA control current. Externally adjustable, by resistance at ≈1000 ohms per volt. Specify suffix "R" to obtain model with integral ±10% control current adjustment. May be operationally controlled as an amplifier using voltage or current signals; common positive.

OPEN LOOP d-c GAIN: $>0.5\times10^6$ volts per volt.

VOLTAGE RECOVERY (for step load current): <50 μseconds for recovery to within 0.005% or 2 mV of setting.

CURRENT LIMITING: Adjustable from 10% to 105% of the rated full current.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

SERIES/PARALLEL: Series operation to rated isolation; also master/slave capability. Current limiting design permits self-determined parallel load sharing.

COOLING: Convection.

TERMINALS: All input, output and control connections are made via a multi-terminal barrier strip and printed circuit connector.

DIMENSIONS: See Page 2005 for listings.

FINISH: Blue anodized aluminum.

CASES/MOUNTING: Model number without suffix specifies an uncased open model. Add suffix "C" for wraparound case – or order Case CA-1 separately. Cased models can be rack mounted on adapters RA 12-1, RA 13-4 or RA 11-6. Uncased models can be used with BPA-22 slide adapter for plug-in mounting. These fit interchangeably with metered "MAT" – option models in cases CA-3, CA-4, CA-5 or RA 22-6. *See Hardware section.*

OPTIONS: (add designator as a suffix to the model numbers).

"–MAT" Metered: This option specifies a plug-in style metered panel with voltage control (10-turn). The uncased unit must be plugged into accessory case. *See CASES/MOUNTING.*

"–R" ADJUSTMENT OF CONTROL CURRENT: A ±10% trimmer is installed to allow precision programming calibration.

"–T" LOW TC OPTION: A special reference provides 0.005% per °C temperature coefficient in voltage mode, 0.01% per °C in current mode.

"–E" OFFSET VOLTAGE NULLING CONTROL: To zero the fixed part of E_{io}, the voltage amplifier's voltage offset.

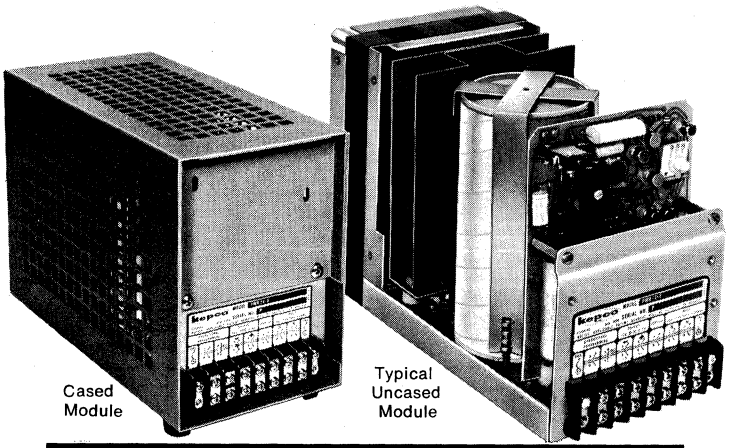
KEPCO PWR MODULAR POWER SUPPLIES



The PWR modules couple a high-gain, d-c feedback regulator and convection-cooled NPN series pass transistors to a ferroresonant Flux-O-Tran® power transformer to provide well regulated voltage with a ±5% adjustment range around the nominal level. The nominal voltage for each model is set by a fixed resistor wired externally across the connection barrier strip. This resistor may be changed, or a variable resistor substituted, to alter the nominal setting. The output current derates when the nominal setting is reduced (See *Operating Region Graph*) when operating with external current feedback—as a current regulator, the compliance voltage must lie within the shaded region of the graph.

MODEL	DC OUTPUT RANGE VOLTS	AMPS	OUTPUT IMPEDANCE Ohms + Microhenries d-c to 100Hz	100 Hz to 1kHz	1kHz to 100kHz+μH	PRICE◆	SHIP WGT. (lbs.)

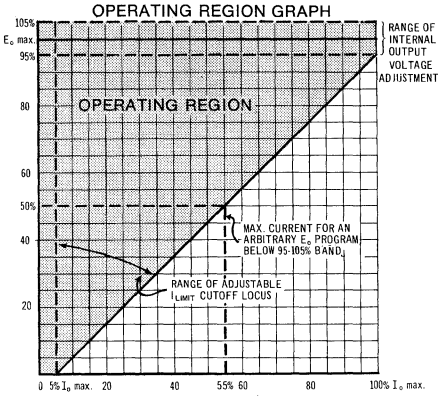
STABILITY (8 HR.)	<0.05% or 3 mV*	<0.1% or 1 mA
TEMP. COEFFICIENT	<0.05% per °C	<0.1% per °C at rated sample**
RIPPLE, rms.	<0.25 mV	<0.1% of I_O max.

whichever is greater
***Rated sample is 1 volt across external current sampling resistor with external current control.*
†Adjustable to zero with corresponding current derating (see operating region graph).
‡Compliance voltage range lies within shaded operating region from limit locus to 105% E_O max.

OPERATING REGION GRAPH



INPUT: 100-130V a-c, 60 Hz ±1 Hz single phase; approximately 2 amperes, 200 watts.

Overseas Units: Specify suffix "–50" for selectable 104 ±13.5V a-c, 115 ±15V a-c, 208 ±27V a-c, or 230 ±30 V a-c, 50 Hz ±1 Hz. Derate *output current* by 20% when ordering with "–50" option. Add $15.00 to unit price

TEMPERATURE AMBIENT OPERATING: *Uncased:* –20°C to +65°C. *Cased:* –20° to +55°C.

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROL/PROGRAMMING: ±5% by internal trimmer for voltage or current. External resistance programming ratio is 1000 ohms per volt, 1 mA control current. A 1% fixed resistor is supplied to program the tabulated nominal voltage. When programmed below ±5% output band, derate current per operating region graph.

VOLTAGE RECOVERY: (for step load current): <50 microseconds.

REMOTE ERROR SENSING: Compensates for up to 0.5 volt drop per output lead.

OVERLOAD CURRENT CUTOFF: Adjustable cutoff locus pivots about the $E_O \approx 0$, $I_O \approx 5\%$ point, reduces current into an overload. *Note:* Non-linear loads drawing a high starting current may be locked out by the cutoff locus, and require a starting resistance to be contained within the shaded regions of the operating region graph.

OVERSHOOT: (Turn-on/off): None in ±5% operating band. When output is set below 25%, load to approximately 10% to maintain negligible overshoot.

SERIES/PARALLEL: Connections are provided for parallel operation of identical units. Series operation to rated isolation.

TERMINALS: All input, output, sense and control connections are made via a single multiterminal barrier strip.

FINISH: *Case:* Royal Blue, epoxy.

DIMENSIONS: See Page 2005 for listings.

MOUNTING: A cased model is ordered by appending suffix "C" to the model number. If ordered separately, specify Case CA-200. Rack mount with adapters RA 23-1, RA 8-2 or RA 9-3. *See hardware section.*

KEPCO PRM MODULAR POWER SUPPLIES

The Kepco PRM voltage regulated modules are simple, reliable, efficient, fixed output sources. The design is based on a ferroresonant power transformer called Flux-O-Tran® which provides both regulating and overload current limiting. The extra-filtered models (suffix F) have a Pi section LC filter, reducing their ripple to about a tenth that of the single section capacitor-filtered models. The *dual* output models have two independent d-c circuits that may be used in series or in parallel or separately.

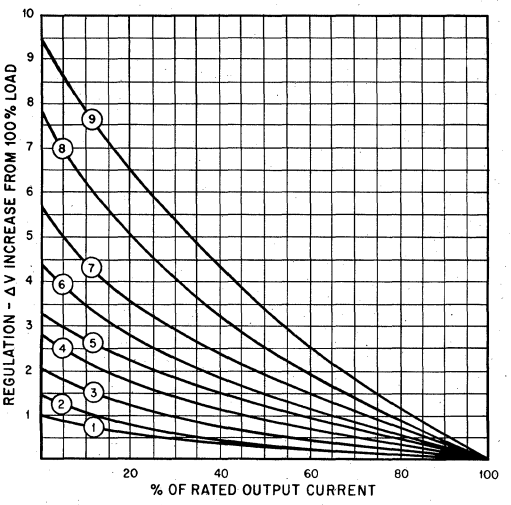

FIGURE 1: TYPICAL LOAD REGULATION FOR ALL PRM MODELS

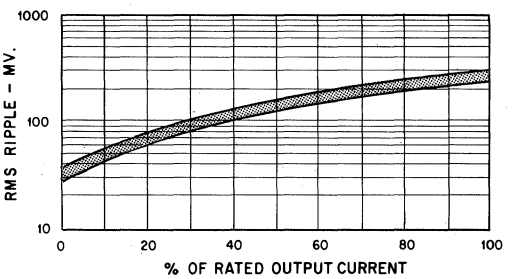

FIGURE 2: TYPICAL RIPPLE AS A FUNCTION OF LOAD FOR ALL PRM MODELS EXCEPT EXTRA FILTERED MODELS

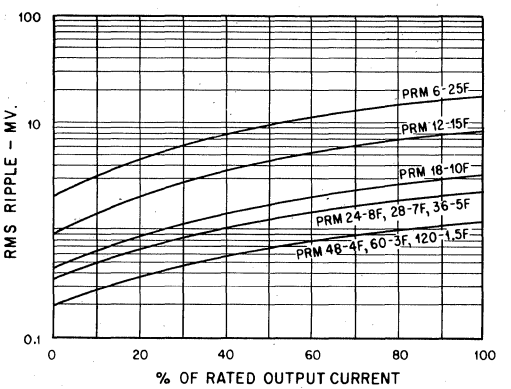

FIGURE 3: TYPICAL RIPPLE AS A FUNCTION OF LOAD FOR ALL EXTRA FILTERED MODELS

SPECIFICATION	SIZE A 180 SERIES	SIZE B 120 SERIES	SIZE C 180F (EXTRA FILTERED SERIES)	SIZE C 300 (DUAL 150 SERIES)
ACCURACY*	± 2%	± 2%	±2%**	2%†
REGULATION, LINE	±1%‡	±1%‡	±1%‡	±1%▼
STABILITY (8 hr.)	1% or 0.1V•	1% or 0.1V•	1% or 0.1V•	1% or 0.1V•
TEMP. COEFFICIENT	0.05% per °C	0.05% per °C	0.05% per °C	0.05% per °C
INPUT (115Va-c, 60 Hz)	3A (280w)	2A (190w)	3A (280w)	5A (465w)

**At 115V a-c, full load, 30°C. Initial (cold) output is 1% higher. •whichever is greater*
***The filter introduces an added 2% drop, a 10% reduction in load current will compensate for the loss.*
†Interaction is less than 2% as the other supply in the dual package is loaded from zero to maximum.
‡For ±15V a-c line variation, at 25-100% load. For loads below 25%, line regulation is ±1.5% output change.
▼For ±15V a-c line variation, at 50-100% load. For loads below 50%, line regulation is ±1.5% output change.

INPUT: 115V a-c, ± 15 V a-c, 60 Hz ±5% single phase.
Overseas Models: for 50 Hz ±5% specify suffix "–50". Inputs: (selectable) 104 ±13.5V a-c, 115 ±15V a-c, 208 ±27V a-c or 230 ±30V a-c. Output *current* rating is derated 20% in the 50 Hz version. Add $15.00 to unit price.
NOTE: Input frequency variations produces an approximate equal percentage output voltage change.
TEMPERATURE, AMBIENT OPERATING: –20°C to +55°C
TEMPERATURE STORAGE: –40°C to +85°C
COOLING: Convection.
OUTPUT IMPEDANCE: 1 kHz–10 kHz: 0.05 ohms, 10 kHz–100kHz: 0.05 ohms + 0.5 microhenries. Below 1000 Hz impedance is a function of a load current and may be derived from the slope of load regulation curve ΔE/ΔI.
VOLTAGE RECOVERY: (50-100% current): <400 milliseconds.
OVERLOAD PROTECTION: Current limiting transformer restricts short circuit current to safe value. A thermal circuit breaker is employed in *dual* models.
ISOLATION VOLTAGE: 600 volts to chassis (or between the outputs of dual models.
SERIES/PARALLEL OPERATION: Identical models, or halves of a dual supply can be paralled for approximately double current (allow for 10% imbalance). Series operation to rated isolation.
ACCESSORIES: Various rack adapters available, *See Hardware Section.* *Cases:* Size A uses CA-200
Size C uses CA-300
Size B has non-removable integral enclosure.
Add suffix "C" for cased Size A & C models.
FINISH: *Cases:* royal blue.

All terms used in the specifications are defined in the Kepco Glossary.

KEPCO CK

AUTOMATIC CROSSOVER

POWER SUPPLIES

The CK Power Supplies are twin-amplifier voltage and current autocrossover power supplies with VIX® mode indicators. The amplifiers drive a forced-cooled PNP pass transistor series regulator. The CK models are equipped with a 16-terminal access barrier strip for programming connections to externally control voltage and current. The panel controls for both voltage and current are precision 10-turn, 20 PPM TC wirewound rheostats.

- *VIX® indicators, automatic crossover*
- *10-turn voltage and current controls*
- *programmable*

RIPPLE, rms	<0.5 mV	<0.05% of output setting or 0.01% of I_O max.*	

**whichever is greater*
***Rated Sample is 1.0V d-c across external current sampling resistor with external current control*

INPUT: 105-125V a-c or 210-250V a-c (selected), 50–65 Hz, single phase.

TEMPERATURE, AMBIENT OPERATING: –20°C to +50°C
TEMPERATURE, STORAGE: –40°C to +85°C

COOLING: Forced air lateral circulation. Built-in blower.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROLS: Independent 10-turn controls for voltage and current. **Resolution:** 0.05%.

PROGRAMMING: 1 mA control current, by resistance at 1000 ohms per volt. May be operationally controlled as an amplifier, using voltage or current signals; common negative. Voltage and current regulators may be independently programmed.

VOLTAGE RECOVERY, (for step load current): 50 microseconds.

AUTOMATIC CROSSOVER: Selects voltage regulation or current regulation operating mode automatically.

VIX CIRCUIT: Mode indicators display operating condition, a ±8V, ±1 mA control signal is provided at rear terminals.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

SERIES/PARALLEL: Automatic crossover design permits self-determined paralellel load-sharing; also master/slave capability. Series operation to rated isolation.

METERS: Suffix "M" designates a pair of 2½ inch, 2% meters. Delete suffix for unmetered unit.

TERMINALS: Binding posts on front panel, plus, minus, and ground. Sixteen (16) terminal barrier strip on rear contains output, sensing and control terminals.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Brushed aluminum. *Case:* Charcoal gray texture.

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware section.*

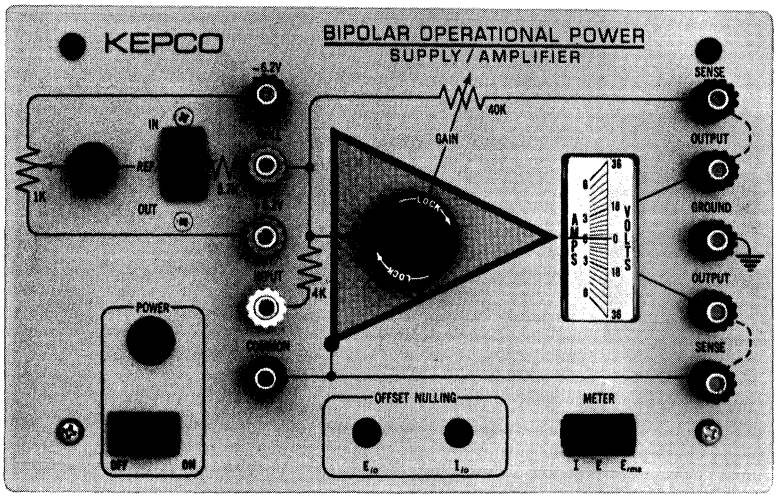
KEPCO BOP

BIPOLAR OPERATIONAL POWER SUPPLIES



Model BOP 36–5M

The Bipolar Operational Power Supply is a distinctly different sort of instrument, capable of responding to programming commands in either direction from zero. The BOP employs a d-c coupled NPN/PNP complementary-symmetry output stage, force-cooled for efficient dissipation.

The standard laboratory BOP is equipped with a patch board panel containing input/output reference and feedback elements. The unmetered instrument has a blank panel for OEM's. Barrier strip access to all control points is provided on both styles.

MODEL	DC OUTPUT RANGE VOLTS	AMPS	CURRENT SINK	PRICE ♦	SHIP WGT. (lbs.)
BOP 36–5M	+36 to –36	+5 to –5	±1A	$585.00	42
BOP 36–5	+36 to –36	+5 to –5	±1A	515.00	40

SPECIFICATION	VOLTAGE AMPLIFIER OFFSETS** ΔE_{io}	ΔI_{io}	6.2V REFERENCES
LINE: 105-125/210-250V a-c	<0.1 mV	<10 nA	<0.0005%
LOAD: No Load/Full Load	<1.0 mV	<10 nA	——
TIME: 8 Hours. (Stability)	<0.1 mV	<50 nA	<0.005%
TEMP: Per °C (Coefficient)	<0.05 mV	<50 nA	<0.005%

***E_{io} is the offset voltage and I_{io} is the offset current referred to the input of the voltage comparison amplifier.*

****Offsets and the reference contribute to output change ΔE_o, by the equation $\Delta E_o = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations*

OPEN LOOP d-c GAIN: 35,000 volts per volt.

OUTPUT SLEWING RATE: *Fast:* 4 volts per microsecond
Slow: 0.36 volts per microsecond
(Measured as the chord to the first time constant.)

SINUSOIDAL FREQUENCY RESPONSE (with gain–feedback set to 20db): *Fast:*—3db at 20 kHz. *Slow:*—3db at 1.8 kHz
Model BOP 36-5M is unconditionally stable for any feedback to 100% and any load reactance in its "slow" mode. The instrument is stable in its "fast" mode for any feedback to 100% and load capacitance up to 0.001 microfarad.

DISTORTION: *Harmonic:* 0.5% @ -3db point.
Intermodulation: <0.1% (60 Hz and 7 kHz, 4:1 in *Fast* mode).

TRANSIENT RESPONSE (measured to first time constant on the exponential response):

Fast Mode: *Voltage:* 50 microseconds for step current.
Current: 0.25 microsecond/volt for step voltage.

Slow Mode: *Voltage:* 500 microseconds for step current
Current: 2.8 microseconds/volt for step voltage.

RIPPLE: Less than 0.01% of maximum output or 3 mV rms, whichever is greater.

OUTPUT IMPEDANCE: d-c $< 1.5 \times 10^{-3}$ ohms.
Source inductance 100μh max.

OFFSET NULLING: The fixed parts of the offset voltage and offset current can be nulled using recessed front panel controls.

REFERENCES: Two at +6.2V and –6.2V (nominal); maximum loading (each) 1 milliampere.

PROGRAMMING: A built-in input control spans the ±6.2V reference and provides plus and minus output control with approximately 10% linearity (because of the 1 mA input current). A built-in vernier type rheostat acts as a variable gain control. (with the internal input resistor, its range is 0–10). All nodes and terminals are accessible at the panel for control as a high powered operational amplier (summing, scaling, integrating, etc.)

INPUT: 105-125/210-250V a-c. 50-65 Hz.

TEMPERATURE, AMBIENT OPERATING: –20°C to +65°C.

TEMPERATURE, STORAGE: –40°C to +85°C

COOLING: Forced air; built-in blower.

ISOLATION 500 volts to chassis.

CURRENT LIMITING: Fixed, factory-set to 5.5 amperes (plus and minus).

TERMINALS: Ten-terminal front panel patch board. Ten-terminal rear mounted barrier strip duplicates functions. Unmetered model has rear barrier strip terminals only.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Light gray, Color 26440 per Fed. Std. 595.
Case: Charcoal gray texture.

MOUNTING: Rack adapter RA-24. *See Hardware section.*

All terms used in the specifications are defined in the Kepco Glossary.

Data subject to change without notice
PATENT NOTICE: Applicable Patent Nos. will be supplied on request.

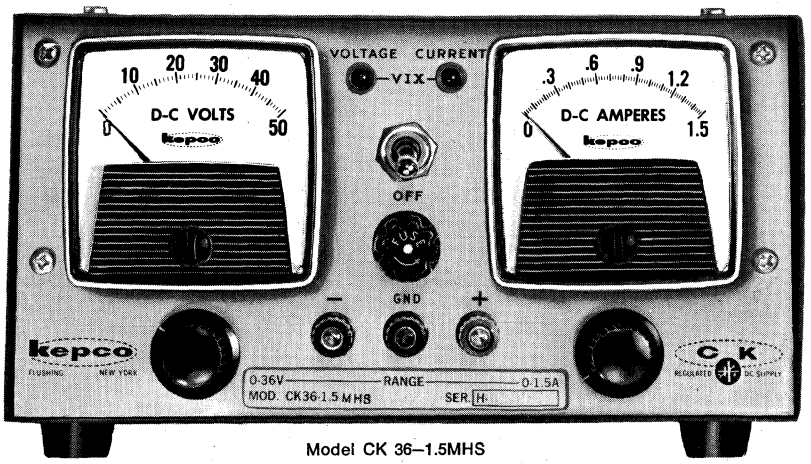
KEPCO
CK-HS
AUTOMATIC CROSSOVER
POWER SUPPLIES

This is a high speed (fast programming) version of the Kepco CK design. The high speed is achieved by removing output and feedback capacitances, reducing the stability margin. For this reason, CK-HS models should not be used in place of a voltage source in applications where its fast-programming voltage agility is not required. It is ideal as a current source because of the quick recovery characteristic. Offset nulling controls are built-in. The series pass transistor is a PNP element, making the negative output terminal signal-common.



Model CK 36–1.5MHS

MODEL	DC OUTPUT RANGE VOLTS	DC OUTPUT RANGE AMPS	MAX. INPUT AMPS at 125V a-c	PRICE ♦	SHIP WGT. (lbs.)
CK 8–5MHS	0–8	0–5	1.2	$410.00	21

TEMP.: Coefficient per °C	<0.01%	<0.05% of I^o max.	<0.5 mV	<100 nA

**whichever is greater.*

***Rated sample is 1 volt across external current sensing resistor with external current control.*

****Offsets and the reference contribute to output change ΔE_O, by the equation $\Delta E_O = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations*

DC VOLTAGE GAIN: 35,000 volts per volt.

OUTPUT SLEWING RATE: 100,000 volts per second (0.1V/μsec.) measured as the slope of the chord to the first time constant on the exponential response.

SINUSOIDAL FREQUENCY RESPONSE: $f_{max.} = \frac{32}{E_{pp}}$ kHz. (E_{pp} is the peak-to-peak voltage excursion.)

MAXIMUM CAPACITANCE LOADING: 0.001 microfards. Excess capacitance slows response and causes peaking of response and instability. Adjustable lag networks provide for small range of load reductance.

RIPPLE: (rms) Voltage Mode: <0.1% of maximum output (grounded) **Current Mode:** <0.5% of maximum output

TRANSIENT RESPONSE: Voltage mode *(for step load current)* recovery is an exponential with a 50 microsecond time constant. **Current Mode** *(for step load voltage)* recovery is at the rate of 10 μsec. per volt.

OUTPUT IMPEDANCE: At d-c $Z_O = \Delta E_O/I_O$; dynamically, add the reactive impedance of 5 millihenries.

OFFSET NULLING: The initial part of the input offset voltage and input offset current can be nulled with internal controls.

REFERENCES: Two; +6.2V and –6.2V; maximum current 1 mA.

AUTOMATIC CROSSOVER: Selects voltage regulation or current regulation operating mode automatically.

VIX® CIRCUIT: Mode indicators display operating conditions, also produce a ±8V, ±1 mA control signal.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

PROGRAMMING: 1 mA control current, by resistance at 1000 ohms per volt. May be operationally controlled as an amplifier, using external voltage or current signals; common negative.

INPUT: 105-125V a-c or 210-250V a-c (selectable), 50-65 Hz single phase.

TEMPERATURE, AMBIENT OPERATING: –20°C to +50°C.

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Forced lateral circulation, built-in blower.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROLS: 10-turn voltage and current controls, 0.05% resolution.

METERS: Suffix "M" designates a pair of 2½", 2% meters.

TERMINALS: Binding posts on front panel, plus, minus, and ground. Sixteen (16) terminal barrier strip on the rear contains output, sensing, and control terminals.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Brushed aluminum. *Case:* Charcoal gray texture.

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware section.*

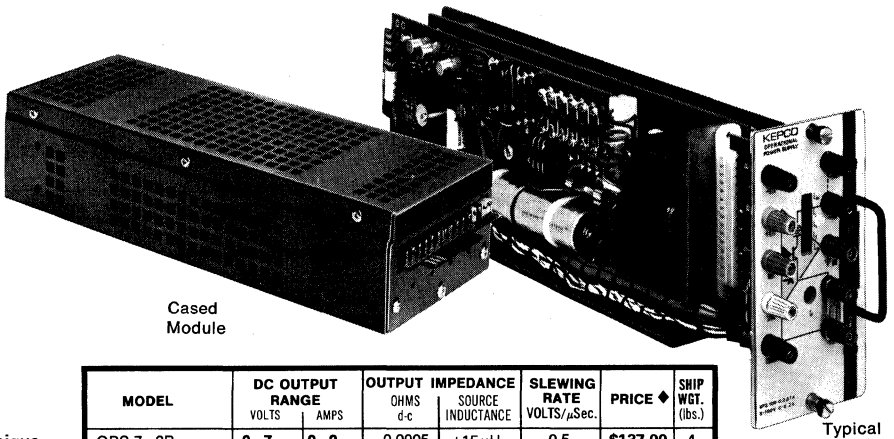
KEPCO OPS-B

PLUG-IN MODULAR POWER SUPPLIES



Cased Module

Typical "BTA" Panel Plug-in Model

The Kepco Operational Power Supply is a unique instrument; a combination self-powered operational power amplifier and d-c power supply. The OPS group is suitable for a wide variety of signal processing chores: scaling, summing, integrating and impedance transformation. The "B" models, incorporating a linear I-C input amplifier, are in modular form for OEM's; the "BTA" versions are plug-in modules which offer a 10-terminal patch panel for bench-type operational manipulations. Model OPS 2000 is a hybrid type utilizing a high voltage vacuum tube. Their fast output slewing enables the OPS models to be fast-recovery, programmable, current controllers or audio spectrum voltage amplifiers.

MODEL	DC OUTPUT RANGE VOLTS	DC OUTPUT RANGE AMPS	OUTPUT IMPEDANCE OHMS d-c	OUTPUT IMPEDANCE SOURCE INDUCTANCE	SLEWING RATE VOLTS/μSec.	PRICE ◆	SHIP WGT. (lbs.)

Bench Style Model OPS 2000

Offsets and the reference contribute to output change ΔE_O, by the equation $\Delta E_O = \pm\Delta E_{ref}(R_f/R_i) \pm \Delta E_{io}(1+R_f/R_i) \pm \Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations.

OPEN LOOP d-c GAIN: $>0.5\times10^6$ volts per volt.

OUTPUT SLEWING RATE: See chart. (measured as the chord to the first time constant on the exponential response).

SINUSOIDAL FREQUENCY RESPONSE: $f_{max.} = \frac{\text{Slew Rate}}{\pi E_{pp}}$ (E_{pp} is the peak-to-peak voltage excursion.)

RIPPLE: <0.01% of max. output, or 3mV whichever is greater.

MAXIMUM CAPACITIVE LOADING: 0.001 microfarads. Excess capacitance slows response and causes peaking of response and instability. Adjustable lag networks provide for small range of load reactance.

TRANSIENT RESPONSE Voltage Mode (for step load current): recovery is an exponential with 50 microsecond time constant. **Current Mode (for step load voltage):** recovery is the reciprocal of the slew rate.

OFFSET NULLING: Fixed part of input-offset voltage and input offset currents can be nulled. OPS-BTA models feature front panel nulling, modules have internal trimmers.

REFERENCES: Two at +6.2V and −6.2V; 1 mA max.

PROGRAMMING: May be controlled by external voltage or current signals, common positive.

INPUT: 105-125V a-c or 210-250V a-c (selected), 50-440 Hz single phase. Model OPS 2000: 50-65 Hz single phase.

TEMPERATURE, AMBIENT OPERATING: −20°C to +65°C.

TEMPERATURE, STORAGE: −40°C to +85° C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis. (OPS 2000: 1000V).

CURRENT LIMITING: Adjustable from 10% to 110% of rated current. Model OPS 2000 is an automatic-crossover current regulator, see table for performance specifications.

TERMINALS: Connections via a rear mounted barrier strip. Modules and OPS-BTA include a PC connector. Bench models have front panel terminal pattern.

DIMENSIONS: See Page 2005 for listings. Models OPS-20 and OPS-2000 are available in a bench style case only. OPS 7-2 to OPS 100-0.2 are available uncased, with CA-1 case (-C), or as plug-in patch board units (-TA).

FINISH: *Modules:* Blue anodized aluminum.
Panels: Light gray, color 26440 per Fed. Std. 595.
Bench style Cases: Charcoal gray texture.

MOUNTING: Cased modules may be racked with adapters RA 12-1, RA 13-4 or RA 11-6. Uncased modules with BPA-22 adapter and the (-TA) plug-in units, mount in housings CA-3, CA-4, CA-5 or RA 22-6. Bench style units may be rack mounted with RA-24. *See Hardware Section.*

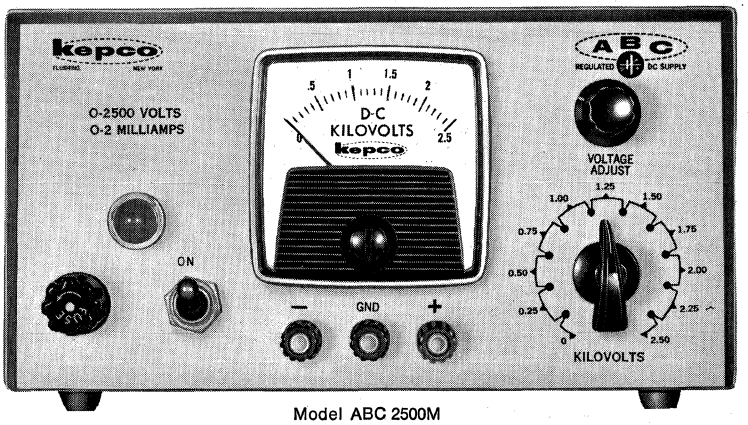
All terms used in the specifications are defined in the Kepco Glossary on Page 33.

KEPCO ABC HYBRID POWER SUPPLIES



Model ABC 2500M

The ABC group of bench-style programmable voltage regulators span a wide range of voltages. The transistor group covers 0–2V to 0–100V; the hybrid group 0–200V to 0–2500V. Hybrid models employ a high voltage vacuum tube series regulator, convection cooled, driven by a high gain transistor amplifier. The 0–200 and 0–425 volt models employ a continuous 10-turn wirewound, 20 PPM TC voltage control. The 0–1000 volt, 0–1500 volt and 0–2500 volt models employ a 10-step voltage selector with 10-turn vernier. They may be programmed, however, continuously from zero to their rated voltage.

MODEL	DC OUTPUT RANGE VOLTS	DC OUTPUT RANGE AMPS	RIPPLE (max) RMS MV.	OUTPUT IMPEDANCE Ohms + Microhenries d-c to 100Hz	100 Hz to 1kHz	1kHz to 100kHz+μH	MAX. INPUT AMPS at 125 V a-c	PRICE ♦	SHIP WGT. (lbs.)

REGULATION, LINE	<0.05% or 5 mV*	<0.1% at rated sample**
REGULATION, LOAD	<0.05% or 5 mV*	<0.1% at rated sample**
STABILITY (8 HR.)	<0.05% or 50 mV*	<0.1% or 10 μA*
TEMP. COEFFICIENT	<0.05% per °C	<0.1% per °C at rated sample**
RIPPLE, rms.	See Table above	<0.1% I_O max.

*whichever is greater
**Rated sample is 10V d-c across external current sampling resistor, with external current control.

INPUT: 105-125V a-c or 210-250V a-c (selected) 50-440 Hz single phase.

TEMPERATURE, AMBIENT OPERATING: –20°C to +55°C.

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 1000 volts to chassis.

AC OUTPUT: 6.5V AC, 2A unregulated, available at the rear terminals of Models ABC 200M and ABC 425M.

CONTROL RESOLUTION: 0.05%, 10-turn voltage control on Models ABC 200M and ABC 425M. Resolution is 0.005% with 10-position selector and 10-turn vernier voltage control on Models ABC 1000M, ABC 1500M and ABC 2500M.

PROGRAMMING: 1 mA control current, by resistance at 1000 ohms per volt. May be operationally controlled as an amplifier using voltage or current signals; common positive.
Model ABC 2500M is restricted to the upper ⅔ of its output range in operational control. Fast slewing models available on special order.

VOLTAGE RECOVERY (for step load current): <50 μseconds.

CURRENT LIMITING: Single turn panel adjustment sets limit from 25% to 150% of rated full current on Models ABC 200M and ABC 425M. A fixed limit set to approximately 150% is provided on Models ABC 1000M, ABC 1500M and ABC 2500M.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

SERIES/PARALLEL: Series operation to rated isolation; also master/slave capability. Current limiting design permits self-determined parallel load sharing.

METERS: Suffix "M" designates a single dual scale 2½", 2% volt-ammeter with selector switch, for models ABC 200M and ABC 425M. Voltmeter only for Models ABC 1000M, ABC 1500M and ABC 2500M.
Delete suffix "M" for unmetered unit.

TERMINALS: Binding posts on front panel, plus, minus and ground. Multi-terminal barrier strip at the rear contains output and control terminals.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Brushed aluminum. *Case:* Charcoal gray texture.

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware section.*

Model BHK 1000–0.2M

KEPCO
BHK
HIGH VOLTAGE
POWER SUPPLIES

The high voltage hybrid BHK models employ twin-transistor amplifiers (one for voltage, the other for current) to drive a series pass tube regulator in either voltage or current mode, with automatic crossover and VIX® mode indicators. By restrapping for high speed, the same model is also a fast programmable voltage or quick recovery current source. Built-in offset nulling controls allow precision operational programming. Panel controls are 10-turn, 20 PPM TC wirewound, with a 10-position selector for additional voltage resolution.

MODEL	DC OUTPUT RANGE VOLTS	DC OUTPUT RANGE AMPS	OUTPUT IMPEDANCE Ohms + Microhenries d-c-100Hz	0-1-1kHz	1-100kHz+μH	PRICE◆	SHIP WGT. (lbs.)

**whichever is greater.*

***Offsets and the reference contribute to output change ΔE_O, by the equation $\Delta E_O = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations.*

OPEN LOOP d-c GAIN: $>0.5\times10^6$ volts per volt.

OUTPUT SLEWING RATE: *(Fast slewing connection):* Greater than 500,000 volts per second, measured as the chord to the first time constant on the exponential response.

SINUSOIDAL FREQUENCY RESPONSE:

Fast Slewing Connection: $f_{max} = \frac{160}{E_{pp}}$ kHz.

(E_{pp} is the peak-to-peak excursion).

RIPPLE, Fast Slewing Connection:

Ungrounded: <0.1% E_o max.

Grounded: <0.001% E_o max.

TRANSIENT RESPONSE:

Voltage Mode, Fast Slewing: For step load current, recovery is an exponential with a 50 microsecond time constant.

Current Mode, Fast Slewing: For step load voltage, recovery is at the rate of 2 μsec. per volt.

Voltage Mode, Normal Speed: For step load current, recovery to regulation band within 50 microseconds.

OUTPUT IMPEDANCE:

Voltage Mode, Normal Speed: See table.

Voltage Mode, Fast Slewing: Above 1kHz, add the reactive impedance of 500 microhenries.

OFFSET NULLING: The initial part of the input offset voltage and input offset current can be nulled with internal controls.

REFERENCES: Two: +6.2 volts and –6.2 volts; maximum current 1 milliampere.

PROGRAMMING: 1 mA control current, by resistance at 1000 ohms per volt. May be operationally controlled as an amplifier using voltage or current signals. Common positive.

AUTOMATIC CROSSOVER: Selects voltage regulation or current regulation operating mode automatically.

VIX® CIRCUIT: Voltage/Current mode indicators display operating conditions; also 115V a-c control signal (0.5A max.)

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

TEMPERATURE, AMBIENT OPERATING: –20°C to +55°C.

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

INPUT: 105-125 V a-c or 210-250V a-c (selected), 50-65 Hz single phase. Approximately 4 amperes at 125V a-c.

ISOLATION VOLTAGE: 1000 volts to chassis.

CONTROL RESOLUTION: Voltage: 0.01% 10-turn vernier control and 10 position selector. *Current:* 0.05% 10-turn control.

OVERSHOOT: (Turn-on/off): None above 10% voltage setting; negligible below 10% when preloaded to 10% minimum.

SERIES/PARALLEL: Automatic crossover design permits self-determined parallel load sharing, or use of master/slave connection. Series operation to rated isolation.

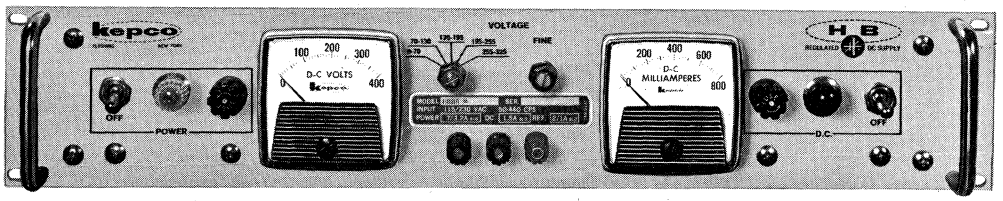
METERS: Suffix "M" designates a pair of 2½", 2% meters. Delete suffix "M" for unmetered unit.

TERMINALS: Safety (recessed) output connections on front panel; two multi-terminal barrier strips at the rear contain output, sensing and control functions. Fast slewing/normal strapping is internal.

DIMENSIONS: See Page 2005 for listings.

FINISH: Light gray, color 26440, per Fed. Std. 595.

All terms used in the specifications are defined in the Kepco Glossary.



Model HB 8AM

KEPCO

HB

HYBRID

POWER SUPPLIES

The high voltage hybrid HB power supplies use a high gain transistor comparison amplifier to drive the series pass tube regulator. Voltage feedback is by means of a 5-position range switch and 10-turn, 20 PPM TC wire-wound vernier control with remote programming within the span of any one range (to zero with derating). Current may be regulated with external sensing and feedback using the rating chart to determine the allowable compliance range.

REGULATION, LINE	<0.01%	<0.01% at rated sample**
REGULATION, LOAD	<0.01% or 2 mV*	<0.01% at rated sample**
STABILITY (8 HR.)	<0.01% or 2 mV*	<0.05% or 0.2 mA*
TEMP. COEFFICIENT	<0.01% per °C	<0.05% per °C at rated sample**
RIPPLE, rms.	<1 mV	<0.01% of I_O max.

**whichever is greater*

***Rated sample is 10V d-c across external current sampling resistor, with external current control.*

INPUT: 105-125 V or 210-250V a-c (selected), 50–440 Hz, single phase.

TEMPERATURE, AMBIENT OPERATING: −20°C to +55°C.

TEMPERATURE STORAGE: −40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 600 volts to chassis.

AC OUTPUTS: Two unregulated, 6.5V a-c, 6A outputs.

CONTROL RESOLUTION: 0.02%, 5 step range selector, 10-turn vernier.

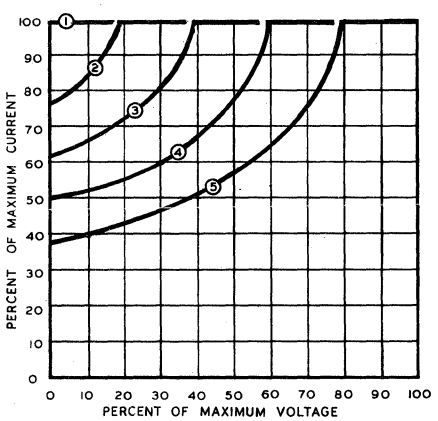
PROGRAMMING: 10 mA control current, by resistance at 100 ohms per volt. May be operationally controlled as an amplifier using voltage or current signals; common positive.

VOLTAGE RECOVERY (for step load current): < 50 microseconds.

REMOTE ERROR SENSING: (Models HB 250M and HB 525M only) compensate up to 0.5 volt drop per output lead.

OVERSHOOT (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded 10% minimum.

RATING CURVES: Output is designed to deliver 100% of rated current within the span of any one range. When operating outside the selected range, either by remote programming, or as the compliance voltage in current mode, use the graph to determine the maximum current that can be drawn at reduced voltage.



RATING CURVES

Curves represent the volt-ampere rating for range switch positions 1–5. To use, determine which position covers the desired voltage. Read the maximum current for each voltage on the left scale.

METERS: Suffix "M" designates a pair of 2½", 2% meters. Delete suffix for unmetered unit.

TERMINALS: Binding posts on front panel, plus, minus and ground. Multi-terminal barrier strip at the rear contains output, sensing and control terminals.

DIMENSIONS: See Page 2005 for listings.

FINISH: Light gray, color 26440, per Fed. Std. 595.

◆ Available metered only.

All terms used in the specifications are defined in the Kepco Glossary on Page 33.

INPUT:
105-125V a-c, 50-65 Hz, single phase, 400 Hz, input available on special order.

TEMPERATURE, AMBIENT OPERATING:
−20°C to +55°C

TEMPERATURE, STORAGE:
−40°C to 85°C

COOLING: Convection.

ISOLATION VOLTAGE:
400 volts to chassis.

CONTROL RESOLUTION:
0.5% single turn controls on all models except 2400B, 430D, 800B and HB 2500, which employ a coarse and fine adjustment. The "fine" control covers a 1% voltage range with 0.005% resolution.

VOLTAGE RECOVERY, (for step load current):
< 50 microseconds.

TERMINALS:
Output and ground terminals are on the front panel, except Models 2400B, HB 2050 and HB 2500, which have the terminals at the rear.

DIMENSIONS:
The dimensions for each model are tabulated, models with the ✧ symbol are supplied in a rack cabinet. They may be removed for mounting in any standard 19" equipment rack.

The equipment rack dimensions are:

MODEL	H	W	D
1250 B	26¼"	19"	13⅞"
1520 B	21"	19"	13⅞"
HB 2050	31½"	19"	17⅞"
103	(Use with Rack Adapter RA-1)		

FINISH:
Panel: Light gray Color 26440 per Fed. Std. 595.
Cabinet: Charcoal gray texture.

Data subject to change without notice
PATENT NOTICE: Applicable Patent Nos. will be supplied on request.

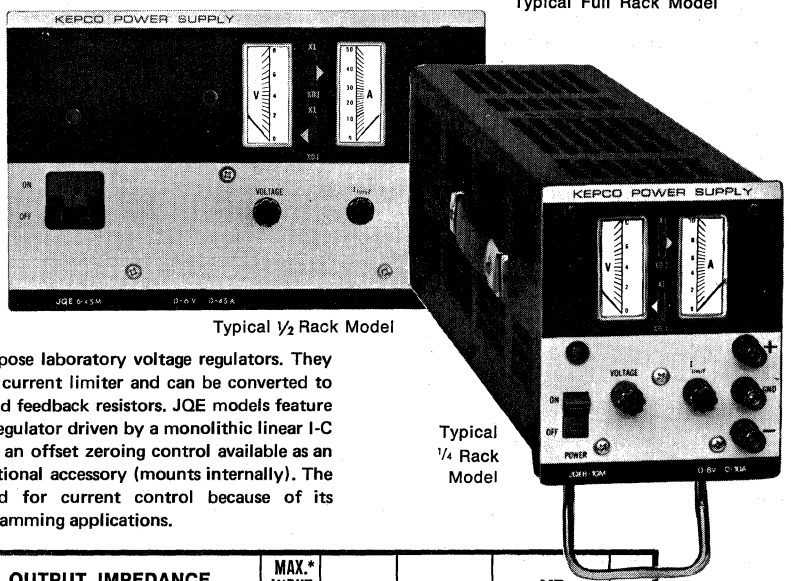
JQE
COMPACT
POWER SUPPLIES



Typical ½ Rack Model

Typical ¼ Rack Model

JQE power supplies are compact general-purpose laboratory voltage regulators. They are equipped with a panel-adjusted overload current limiter and can be converted to current regulation by using external sensing and feedback resistors. JQE models feature a linear full-dissipation series NPN transistor-regulator driven by a monolithic linear I-C amplifier. Output is fully programmable with an offset zeroing control available as an option. An overvoltage crowbar is also an optional accessory (mounts internally). The JQE-HS high-speed option is recommended for current control because of its fast-recovery characteristics, and for fast programming applications.

RIPPLE: (rms)	<0.2 mV	<0.02% of I_o max.	———	———	———

*whichever is greater.

**External sensing, using a 1V sample. Specs are measured at rated sample voltage with 20 PPM external current feedback control.

***Offsets and the reference contribute to output change ΔE_O, by the equation $\Delta E_O = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations when external input/feedback elements are substituted for the internal reference and voltage control in special applications.

†See OPTIONS for 0.005% per °C voltage mode — 0.01% per °C current mode temperature coefficient.

INPUT: 105-125V a-c or 210-250V a-c (selected) 50-65 Hz, 1Ø

TEMPERATURE, AMBIENT OPERATING: –20°C to + 71°C

TEMPERATURE, STORAGE: –50°C to + 85°C

COOLING: Forced air, built-in blower.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROLS: *Voltage:* 10-turn, 20 PPM TC, wirewound rheostat, ±0.25% linearity
Current: Multiturn vernier potentiometer.

PROGRAMMING: 1 mA control current (built-in reference) resistance program at 1000 ohms per volt with built-in calibration control. Program by voltage or current operationally as an amplifier, positive output terminal common. See OPTIONS for wide band "high speed" models and offset (E_{io}) nulling control.

OPEN LOOP d-c GAIN: $>0.5\times10^6$ volts per volt.

VOLTAGE RECOVERY (for step load current): <50 μseconds for recovery to within 0.005% or 2 mV of setting.

OVERSHOOT (Turn on/off): Conventional speed models exhibit no overshoot when set above 25% of rated voltage or at any voltage setting when loaded to 10% of rated current (not applicable to HS models).

CURRENT LIMITING: Adjustable from 10% to 105% of the rated full current.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

SERIES/PARALLEL: Series operation to the rated isolation voltage. Units may be paralleled by employing their current limiters.

METERS: Two dual range, 2-inch, 2% taut band recessed meters, monitor output voltage and current. 10:1 range switching. Unmetered versions available as modules, delete suffix "M" and deduct $30.00 from listed price (any quantity).

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Light gray, Color 26440, per Fed. Std. 595.
Case: Charcoal gray texture.

MOUNTING: JQE 1/4 rack and 1/2 rack size models fit the RA-24 hardware system (*see hardware section*). Full rack sized models have accessory flanges for direct installation in standard 19" racks. Unmetered JQE models are in modular form for chassis mounting — or may be mounted in RA-24 by use of an adapter plate RAP 24 -1J for 1/4 rack size; RAP 24-2J for 1/2 rack size.

OPTIONS: (add designator as a suffix to the model number, e.g.: JQE6-10MHS for high speed option).

"–HS" HIGH SPEED OPTION for fast programming.
Programming speed: 100,000V/sec. models up to 25 amperes, 50,000V/sec. models over 25 amperes. Programming speed measured as the chord of the exponential to its first time constant. **Offset voltage nulling control** included with HS option.
Ripple: <0.01% of E_o max. — or 3 mV, rms, whichever is greater.

"–VP" OVERVOLTAGE CROWBAR: Shorts output terminals through an SCR if voltage attempts to exceed preset limit. Not available with HS option.
Limit level range: 3V d-c to 110V d-c.
Trigger time: 5-10 μsec., adjustable delay to minimize false alarms.
Threshold: 5% of output level — or 0.25 volts, whichever is greater.

"–T" LOW TC OPTION: A special reference provides 0.005% °C TC in voltage mode, 0.01% per °C TC in current mode.

"–E" OFFSET VOLTAGE NULLING CONTROL: To zero the fixed part of E_{io}, the voltage amplifier's voltage offset.

KEPCO ABC®

ALL-TRANSISTOR

POWER SUPPLIES

The ABC group of bench-style programmable voltage regulators span a wide range of voltages. The transistor group covers 0–2V to 0–100V; the hybrid group 0–200V to 0–2500V. All-transistor models employ a PNP series regulator, convection cooled, driven by a high gain transistor amplifier. These models feature 10-turn wirewound, 20 PPM TC voltage controls and panel-adjustable current limiting.

- *voltage and current regulation*
- *10-turn voltage control*

◆ Price includes volt/ammeter, for unmetered models, delete suffix "M" and deduct $20 from price (any quantity order).

SPECIFICATION	VOLTAGE MODE	CURRENT MODE** (External Sensing)
OUTPUT RANGE	0–100 % E_0 max.	1 mA to 100% I_0
REGULATION, LINE	<0.05% or 1 mV*	<0.1% at rated sample**
REGULATION, LOAD	<0.05% or 1 mV*	<0.5% at rated sample**
STABILITY (8 HR.)	<0.05% or 3 mV*	<0.1% or 1 mA*
TEMP. COEFFICIENT	<0.05% per °C	<0.1% per °C at rated sample**
RIPPLE, rms	<0.25 mV	<0.1% of I_0 max.

**whichever is greater*
***Rated sample is 1V d-c across external current sampling resistor, with external current control.*

INPUT: 105-125V a-c or 210-250V a-c (selected), 50-440 Hz, single phase

TEMPERATURE, AMBIENT OPERATING: –20°C to +50°C.

TEMPERATURE, STORAGE: –40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROL RESOLUTION: 0.05%, 10-turn voltage control.

PROGRAMMING: 1 mA control current, by resistance at 1000 ohms per volt. May be controlled operationally as an amplifier using voltage or current signals; common negative.

VOLTAGE RECOVERY: (for step load current): <50 microseconds.

CURRENT LIMITING: Single turn panel adjustment sets limit from 25% to 150% of rated full current.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting. Negligible below 25% when preloaded to 10% minimum.

SERIES/PARALLEL: Series operation to rated isolation; also master/slave capability. Current limiting design permits self-determined parallel load sharing.

METERS: The suffix "M" designates a single dual scale volt-ammeter, 2½", 2%, with selector switch. Delete suffix for unmetered unit.

TERMINALS: Binding posts on front panel, plus, minus and ground. Multi-terminal barrier strip at rear contains output, sensing and control terminals.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Brushed aluminum
Case: Charcoal gray texture.

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware section.*

Model PR 155–1M

KEPCO PR

RESONANT TRANSFORMER

POWER SUPPLIES

The Kepco PR design consists of a ferroresonant power transformer (Flux-O-Tran®) coupled to a variable autotransformer for adjustable output. The regulating transformer provides line stabilization and current limiting. The husky silicon rectifiers and capacitive filter provide large amounts of d-c in a simple, reliable package.

◆ Price includes meters, for unmetered models, delete suffix "M". In quantities of 12 or more units deduct $30.00 from price.

LINE REGULATION: ±1% for 115V a-c ±10V *Group I* ±2% for 230V a-c ±20V *Group II* *(See Figure 4)*

LOAD REGULATION: 2% for half to full load except 5% for 15V and 20V models. 4% for quarter to full load except 8% for 15V and 20V models. *(See Figure 3)*

STABILITY: (8 HRS.): 1% or 0.1V, whichever is greater.

TEMPERATURE COEFFICIENT: 0.05% per °C

AMBIENT OPERATING TEMPERATURE: −20°C to +55°C.

STORAGE TEMPERATURE: −40°C to +85°C.

COOLING: Forced air lateral circulation; built-in blower.

INPUT: *Group I:* 115 ±10V a-c, 60 Hz ±5% single phase. *Group II:* 208 or 230V a-c, (selectable) ±10%, 60 Hz, ±5% three phase.

Overseas Units: Specify suffix "–50" for selectable 104 ±9V a-c; 115 ±10V a-c 208 ±18V a-c; 230 ±20V a-c, 50 Hz ±5%. Group II models with –50 suffix have 208 or 230V a-c input options only. Derate *output voltage* range by 20% when ordering with –50 option. Add $30.00 to price of Group I models and $90.00 to price of Group II models. *NOTE:* A 1% line frequency change will produce approximately 1% output voltage change.

ISOLATION VOLTAGE: 600 volts to chassis.

CONTROL RESOLUTION: Approximately 1%. *Range:* 0.2% to 100% E_O max. (in two ranges on 3½" high models of Group I).

VOLTAGE RECOVERY (50-100% current): <400 milliseconds.

SERIES/PARALLEL: Units can be paralleled by adjusting their outputs to share the load. Series operation to rated isolation.

OVERLOAD PROTECTION: Constant voltage transformer limits current at maximum voltage setting; circuit breaker protection at lower settings.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded 10% minimum.

METERS: Suffix "M" designates a pair of 2½", 2% meters. Delete suffix for unmetered unit.

TERMINALS: Binding posts on front panel, plus, minus and ground (except Group II models which have a heavy duty output connector at the rear.

DIMENSIONS: See Page 2005 for listings.

FINISH: Light gray, color 26440, per Fed. Std. 595.

Model SM 14-7AM

KEPCO SM-A TRANSISTORIZED POWER SUPPLIES

SM Power supplies combine the line stabilization of Kepco's PR design with a feedback-controlled, high gain d-c amplifier—using series PNP power transistors. The Kepco Flux-O-Tran®, a ferroresonant power transformer, drives a variable autotransformer mechanically coupled to the feedback amplifier's voltage control permitting the SM design to offer all-transistor regulation up to 0—325 volts at 2 amperes.

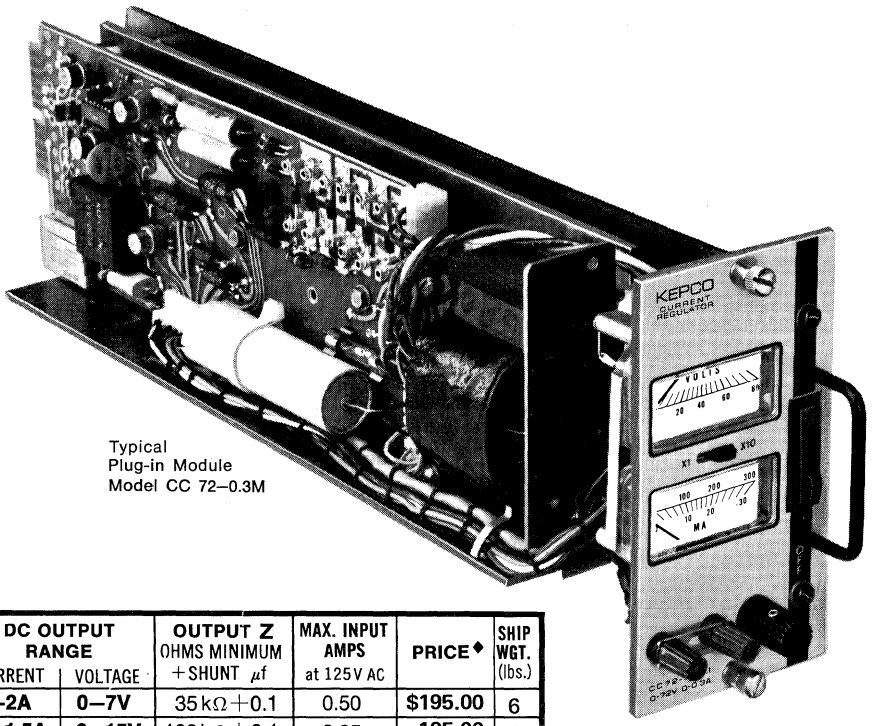
KEPCO CC CONSTANT CURRENT POWER SUPPLIES

The CC plug-in modules are current controllers with built-in dual-range, current-sensing resistors and 10-turn control. They employ Kepco's monolithic linear I-C amplifier driving a self-cooled NPN series transistor-regulator. Capacitorless output filtering ensures rapid recovery from switching or load transients. Output current ranges from true zero (no minimum) to the selected range (10% or 100% of the current rating) with 10-turn resolution. Metering is isolated by means of an I-C voltage follower.



Typical
Plug-in Module
Model CC 72–0.3M

◆ Uncased, available metered only.

SPECIFICATION	CURRENT MODE
OUTPUT RANGE	0–100% or 0–10%, switched
REGULATION, LINE	<0.0005% or 0.2 μA* (105–125/210–250V a-c)
REGULATION, LOAD	<0.005% or 2 μA* (no load–full load)
STABILITY (8 HR.)	<0.02% or 2 μA*
TEMP. COEFFICIENT	<0.01% per °C
RIPPLE, rms.	<0.02% of selected scale

whichever is greater

INPUT: 105-125V a-c or 210-250V a-c (selected)

TEMPERATURE, AMBIENT OPERATING: −20°C to +65°C.

TEMPERATURE, STORAGE: −40°C to +85°C.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROLS: A panel mounted output range selector switches the output either 0–100% I_o max. or 0–10% I_o max. A 10-turn precision current control operates full span through either range. Resolution: 0.05% of the full scale value. A combination on-off slide switch and pilot light provides primary power control.

PROGRAMMING: Control loop uses 0.1 milliampere, current sample is approximately 1V d-c. Supply may be programmed through either current range by a 0-10,000 ohm rheostat. (range switch is not programmable).

MAXIMUM CAPACITIVE LOADING: 0.001 microfarads.

CURRENT RECOVERY (for step load voltage): <2 μsec/volt, except Model CC 7-2M: 4 μsec/volt, measured to the first time constant on the exponential response.

VOLTAGE LIMITING: Fixed at approximately 150-200% of the rated compliance voltage.

SERIES/PARALLEL: Parallel operation of current sources may be made without restriction. Series operation through the use of master-slave interconnection.

COOLING: Convection.

METERS: Two 2% taut-band recessed meters monitor output current and compliance voltage. Current is displayed on a dual-scale meter whose range is switched with the range switch. The compliance voltmeter is a high impedance TVM to minimize the loading error.

TERMINALS: Output terminals (shorted) are located on the front panel, a-c input, output and control terminals are via a rear PC connection which mates with the connector mounted in the various housings and rack cabinets. These connectors are, in turn, wired to barrier strips for easy access.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Light gray, color 26440, per Fed. Std. 595.
Housings: Charcoal gray texture.

MOUNTING: Power supplies are uncased, must be plugged into one of the following available housings: CA-3, CA-4, CA-5 or RA 22-6. *See Hardware section.*

All terms used in the specifications are defined in the Kepco Glossary.

TEMP. COEFFICIENT	<0.01% per °C	<0.01% per °C
RIPPLE, rms	<0.25mV	<0.5mV

**whichever is greater*

***Specifications are for the individual supplies, changes in the master supply (plus output) are repeated 1:1 in the slave supply.*

INPUT: 105-125V a-c or 210-250V a-c (selected) 50-440 Hz.

TEMPERATURE, AMBIENT OPERATING: —20°C to +65°C.

TEMPERATURE, STORAGE: —40°C to +85°C.

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

OUTPUT: The individual power supplies are wired in series, controlled with a single voltage control. They may be loaded in series or separately.

CONTROL RESOLUTION: <0.05%, 10 turn voltage control adjusts the output of the positive supply, designated "master", this voltage in turn controls the negative supply or "slave" in a 1:1 ratio. The two power supplies are connected in series.

TRACKING: ±5% range of adjustment is controlled by a recessed front panel control. Units can be adjusted to within ±0.5% using panel meter. Closer adjustment with external instrumentation.

PROGRAMMING: 1 milliampere control current, or resistance: 1000 ohms per volt. Common positive.

VOLTAGE RECOVERY, (for step load current): <50 μseconds.

CURRENT LIMITING: Each supply is individually limited with a 10 to 105% range of adjustment.

REMOTE ERROR SENSING: Compensates for up to 0.5 volt drop per output lead.

OVERSHOOT: (Turn-on/off): None above 25% voltage setting. Negligible below 25% when preloaded to 10% minimum.

METERS: Voltmeter monitors output of MASTER, or the difference between MASTER and SLAVE, displayed as a percentage error (range ±5%). Ammeter monitors current from either supply (selectable).

TERMINALS: Binding posts on the front panel for plus, common and minus outputs, also sensing terminals and separate ground. Barrier strip at the rear has duplicate output, sensing and control terminals.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Light gray Color 26440 per Fed. Std. 595.
Case: Charcoal gray texture.

MOUNTING: Rack adapter RA-24. *See Hardware section.*

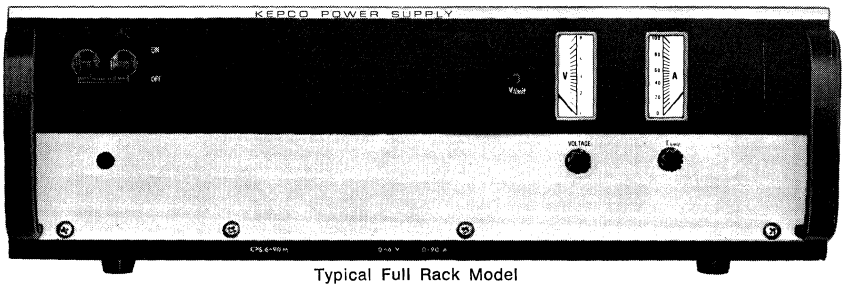
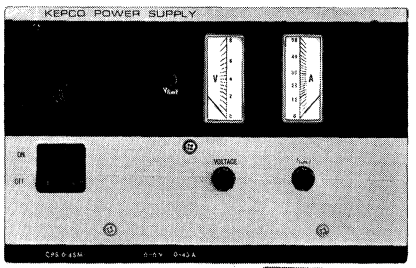
KEPCO CPS
COMPUTER I-C
POWER SUPPLIES



Typical Full Rack Model

CPS Power Supplies are especially designed for driving digital I-C's. They feature an integral overvoltage crowbar and a linear full-dissipation series NPN transistor-regulator driven by a monolithic linear amplifier. On/off switching and crowbar reset is accomplished by a panel-mounted circuit breaker. The metered models feature panel-mounted, 10-turn voltage controls and dual meters. The CPS Power Supplies are also available unmetered, in modular form for OEM's with controls recessed.



Typical ½ Rack Model

SPECIFICATION	VOLTAGE MODE	CURRENT MODE**	VOLTAGE AMPLIFIER OFFSETS*** OFFSET VOLTAGE ΔE_{io}	OFFSET CURRENT ΔI_{io}	VOLTAGE REFERENCE (INTERNAL)***
OUTPUT RANGE	0–100% E_o max.	1 mA–100% I^o max.	——	——	Fixed 6.2V±5%
LINE: 105–125/210–250V a-c	<0.0005%	<0.005%**	<10 μV	<2 nA	0.0001%
LOAD: No Load/Full Load	<0.005% or 0.2 mV*	<0.01%**	<200 μV	<5 nA	——
TIME: 8 Hours. Stability	<0.01% or 1 mV*	<0.02**	<20 μV	<2 nA	0.005%
TEMP.: Coefficient per °C	<0.01%†	<0.02**†	<20 μV	<5 nA	0.005%
RIPPLE: (rms)	<0.2 mV	<0.02% of I_o max.	——	——	——

*whichever is greater.
**External sensing, using a 1V sample. Specs are measured at rated sample voltage with 20 PPM external current feedback control.
***Offsets and the reference contribute to output change ΔE_o, by the equation $\Delta E_o = \pm\Delta E_{ref}(R_f/R_i) \pm\Delta E_{io}(1+R_f/R_i) \pm\Delta I_{io}(R_f)$ where R_f is the feedback resistor and R_i is the input resistor from the signal reference. Use the offsets to calculate output variations when external input/feedback elements are substituted for the internal reference and voltage control in special applications.
†See OPTIONS for 0.005% per °C voltage mode — 0.01% per °C current mode temperature coefficient.

Option "–E": add $10.00, Option "–T": add $30.00

INPUT: 105-125V a-c or 210-250V a-c (selected) 50-65 Hz, 1Ø.

TEMPERATURE: AMBIENT OPERATING: –20°C to +71°C

TEMPERATURE, STORAGE: –50°C to + 85°C

COOLING: Forced air, built-in blower.

CONTROLS: *Voltage:* 10-turn, 20 PPM TC wirewound rheostat.
Current: Multiturn vernier potentiometer.

Unmetered models (without suffix M) are designed for chassis mounting as modules and have their voltage control and current limit control recessed.

PROGRAMMING: Control loop uses 1 milliampere. Supply may be programmed by resistance at 1000 ohms per volt, or may be operationally controlled as an amplifier (common positive) using voltage or current signals.

VOLTAGE RECOVERY (for step load current): <50 μseconds for recovery to within 2 mV of setting.

OVERSHOOT (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

CURRENT LIMITING: Adjustable from 10% to 105% of the rated full current.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead.

SERIES/PARALLEL: Series operation to the rated isolation voltage. Units may be paralleled by employing their current limiters.

ISOLATION VOLTAGE: 500 volts to chassis.

METERS: Units with the suffix "M" contain a pair of taut band 2-inch, 2% meters to monitor voltage and current. The unmetered CPS power supplies are in modular form, suitable for chassis mounting.

DIMENSIONS: See Page 2005 for listings.

FINISH: (Metered models only have a panel).
Panel: Light gray, Color 26440 per Fed. Std. 595.
Case: Charcoal gray texture.

MOUNTING: Fits the RA-24 system of rack housings. Unmetered units mount on a chassis or in the RA-24 with use of an adapter plate. Full rack units are pre-drilled for Jonathan slides 110 QD20-1, 22-1, 24-1.

OPTIONS: (add designator as a suffix to the model number).

"–T" LOW TC OPTION: A special reference provides 0.005% per °C temperature coefficient in voltage mode, 0.01% per °C in current mode.

"–E" OFFSET VOLTAGE NULLING CONTROL: To zero the fixed part of E_{io}, the voltage amplifier's voltage offset.

OVERVOLTAGE PROTECTOR: (built-in) An integral overvoltage crowbar is set by means of a recessed multiturn panel control. Range is from 3V d-c to the maximum voltage rating plus 10%.

Triggering Time: 5-10 microseconds with an adjustable delay to minimize the false alarm rate.

Threshold: May be set to within 5% or 0.25 volts (whichever is greater) of the power supply's output voltage.

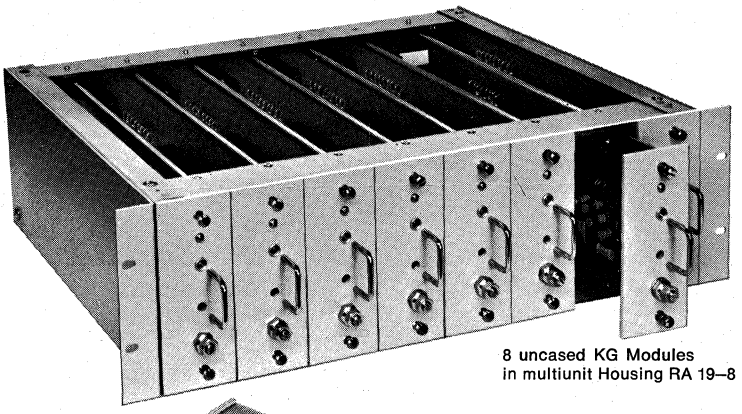
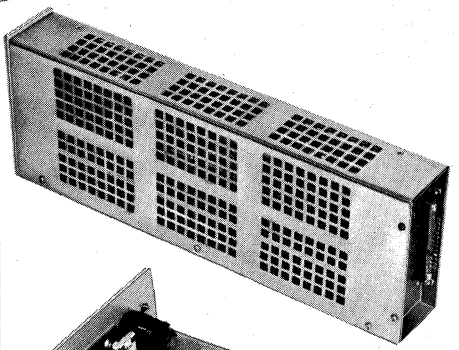
All terms used in the specifications are defined in the Kepco Glossary. Refer to Kepco's Catalog or Handbook.

KEPCO KG ISOLATED POWER SUPPLIES

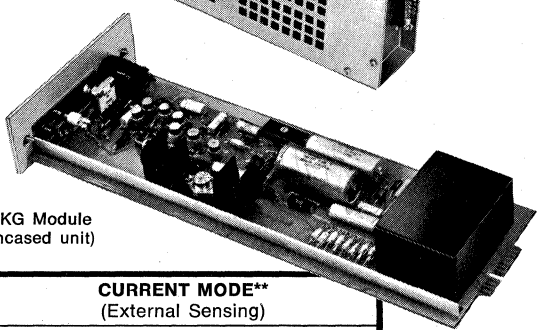


8 uncased KG Modules in multiunit Housing RA 19–8

The KG isolated module is designed for driving balanced electronic circuits and bridges - often used with electromechanical transducers. The KG module offers minimal common mode line-coupled current, achieved by stringent isolation of the power transformer and line-related components, and nonmetallic, low-capacitance mounting. The modules are designed for plug-in mounting 8-abreast in a 19-inch rack or in an individual plug-in case.



KG Module in single unit Case



KG Module (uncased unit)

MODEL	DC OUTPUT RANGE VOLTS	AMPS	OUTPUT IMPEDANCE Ohms + Microhenries d-c to 100Hz	100 Hz to 1kHz	1kHz to 100kHz+μH	MAX. INPUT AMPS at 125 V a-c	PRICE ◆	SHIP WGT. (lbs.)
KG 25–0.2	0–25	0–0.2	0.006	0.01	0.1+1	0.2	$175.00	4
KG 100–0.05	0–100	0–0.05	0.1	0.01	0.1+1	0.2	175.00	4

KG Modules have been especially isolated for minimum common mode signal and least ground coupling to the power line.

◆ Uncased, order plug-in enclosure CA-2 separately. Option "–R": add $10.00, Option "–E" add $10.00.

REGULATION LOAD	<0.005% or 0.5 mV*	<0.01% at rated sample**
STABILITY (8 HR.)	<0.005% or 1 mV*	<0.01% at rated sample**
TEMP. COEFFICIENT	<0.005% per °C	<0.01% per °C at rated sample**
RIPPLE, rms.	<0.1 mV	<0.01% of I_O max.

**whichever is greater*
***Rated sample is 1Vd-c across external current sampling resistor, with external current control.*

INPUT: 105-125V a-c, 50-65 Hz, single phase.
TEMPERATURE, AMBIENT OPERATING: –20°C to +50°C.
TEMPERATURE, STORAGE: –40°C to +85°C.
COOLING: Convection.
ISOLATION: Volts: 500 volts to ground, maximum.
Ohms: 10 K megohms to ground, minimum.
Capacitance: 200 picofarads to ground, max.
Leakage: 50 nA to ground, maximum.
Input to output: 1 picofarad, maximum.
CONTROL RESOLUTION: 0.05%, 10-turn voltage control, screwdriver adjustment, with lock.
PROGRAMMING: 1 mA control current, by resistance at 1000 ohms per volt.
VOLTAGE RECOVERY (for step load current): <50 microseconds for recovery to within 0.005% or 2 mV of setting.
CURRENT LIMITING: Recessed panel adjustment from 5% to 110% of rated current.
OVERSHOOT (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.
SERIES/PARALLEL: Current limiting design permits self-determined parallel load-sharing. Series operation to rated isolation.
TERMINALS: All connections are made through printed circuit connector in housing, a-c input, d-c output, sensing and control. A blank terminal is provided which can be wired for operational control using voltage or current signals.
FINISH: Light gray, Color 26440 per Fed Std. 595.
DIMENSIONS: See Page 2005 for listings.
MOUNTING: The uncased KG module must be plugged into either a single unit case, CA-2 or the 8-unit rack adapter, RA 19-8. Both housings contain integral plug-in connectors. *See hardware section.*
OPTIONS: (add designator as a suffix to the model number).
"–R" ADJUSTMENT OF CONTROL CURRENT: A ±10% trimmer is installed to allow precision programming calibration.
"–E" OFFSET VOLTAGE NULLING CONTROL: To zero the voltage amplifier's voltage offset.

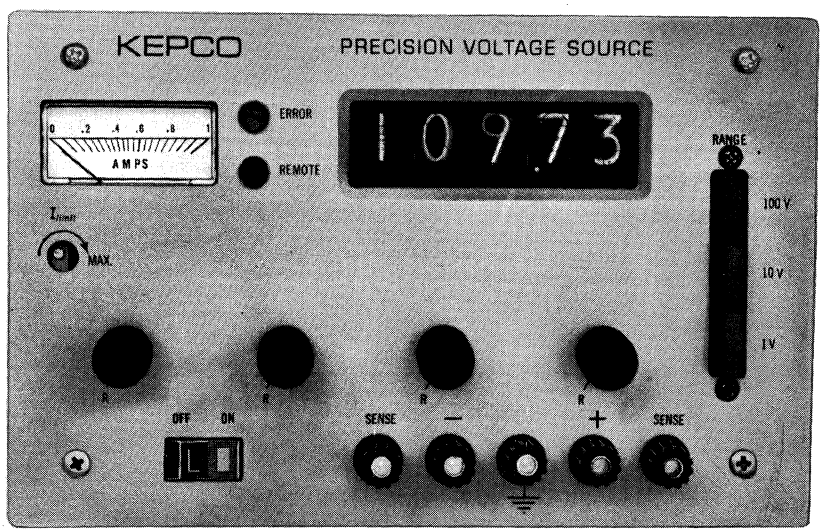
KEPCO PVS
PRECISION VOLTAGE SOURCE
POWER SUPPLIES

- *4 digit output selection*
- *3 decimal range selection*
- *BCD programming (switch closures)*
- *digital display*
- *current limiting*



Model PVS 100–1M — Price: $875.00 — Ship Wgt.: 28 lbs.
Model PVS 100–1MG — Price: $815.00 — Ship Wgt.: 28 lbs.

The PVS Precision Voltage Source features an extremely low drift linear amplifier driving a self-cooled NPN power transistor stage. Voltage control is by means of digitally selected (1–2–4–8 BCD) precision —low TC, high stability feedback resistors with a 3-decade oven-controlled reference. Output is displayed on a 4½ digit readout with a built-in error-detecting system to prevent false indication. Output current is metered and the limit is adjustable. A remote digital programming connector is fitted to the voltage control (BCD switch closures) and to the display (decimal switch closures). Model with suffix "G" omits the remote digital control feature. The 0.02% overall accuracy qualifies the Precision Voltage Source as an instrument calibrator.

OUTPUT:	0.0000–100.00 volts
CURRENT:	0–1 ampere
REGULATION, LINE:	<0.0005%
REGULATION, LOAD:	<0.001% or 0.1 mV*
STABILITY, (8 HR):	<0.005% or 1 mV*
TEMP. COEFFICIENT:	<0.005% per °C
READOUT ACCURACY:	0.02% of full scale
RESOLUTION:	100 microvolts
RIPPLE:	<100μV rms
OUTPUT IMPEDANCE:	d-c –1kHz : $10^{-3}\Omega$ 1kHz–100kHz : $10^{-2}\Omega + 1\mu h$

**whichever is greater*

INPUT: 105-125V a-c or 210-250V a-c (selected) 50-440 Hz, 1Ø.

TEMPERATURE, AMBIENT OPERATING: –20°C to +55°C

TEMPERATURE, STORAGE: –40°C to +85°C

COOLING: Convection.

ISOLATION VOLTAGE: 500 volts to chassis.

CONTROLS: Four (4) 10-position rotary switches select voltage in conjunction with three push button decimal range selectors. A recessed current limit control is accessible through the front panel.

OVERRANGE: 10% overrange on each range; e.g., 1.099V, 10.999V and 109.99 volts (derate current to 0.6 amperes at 109.99 volts).

PROGRAMMING: External switch closures will program the output in a 1-2-4-8 BCD code. A separate programming connector is provided for the digital display. This connector is omitted in the model with suffix "G".

CURRENT LIMITING: Recessed multiturn trimmer adjusts the current limiting from 10% to 105% Io max.

VOLTAGE RECOVERY (for step load current): <50 μseconds for recovery to within 0.005% or 2 mV of setting.

REMOTE ERROR SENSING: Compensates up to 0.5V drop per output lead. Error sensing terminals located on the front panel.

OVERSHOOT (Turn-on/off): None above 25% voltage setting; negligible below 25% when preloaded to 10% minimum.

METERS: Voltage is indicated on a four-digit numerical display with a fifth-digit overrange. Current on a 2-inch, 2% recessed taut-band ammeter.

TERMINALS: Binding posts on the front panel, plus/minus, ground and error sensing. Connections at the rear for output, error sensing and programming functions.

DIMENSIONS: See Page 2005 for listings.

FINISH: *Panel:* Light gray, Color 26440 per Fed. Std. 595.
Case: Charcoal gray texture.

MOUNTING: Fits RA-24 rack adapter. *See hardware section.*

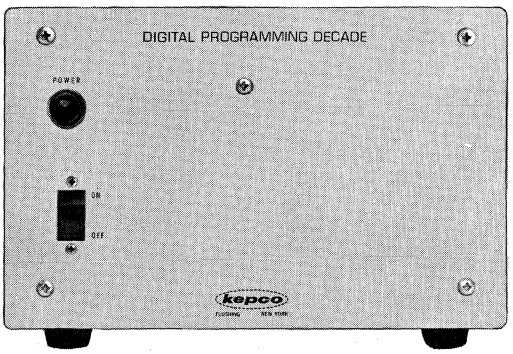
KEPCO DIGITAL PROGRAMMING SYSTEM

DIGITAL PROGRAMMING DECADE



MODEL	DESCRIPTION		COMPANION REGISTER	CABLE TO DPR
DPD—1	4 digit	0—1000.0V	DPR—4	Cable A
DPD—2	4 digit	0—100.00V	DPR—4	Cable B
DPD—3	5 digit	0—1000.00V	DPR—5	Cable A
DPD—4	3 digit	0—1000V	DPR—3	Cable A
DPD—5	3 digit	0—100.0V	DPR—3	Cable B
DPD—6	3 digit	0—10.00V	DPR—3	Cable B
DPD—7	3 digit	Current	DPR—3	Cable B

FUNCTION:
To control the output level (voltage or current) of a d-c Power Supply by means of digitally encoded commands.

OUTPUT RANGE: Each DPD will program 10% overrange and when using the voltage control board has three selectable decimal levels. The largest is shown in the chart; e.g., Model DPD—1, a 4 digit overranging instrument will program: 0—10.999 volts, 0—109.99 volts and 0—1099.9 volts. The DPD—7, a three-digit instrument for the control of current has two selectable decimal levels. A current code board, compatible with the *current rating* of the power supply being controlled, is needed with the DPD—7. Specify the *current code board* when ordering by appending a suffix number to the model equal to the *ampere* rating of the supply being controlled. Specify Model DPD—7—22A for an instrument to control a 22 ampere power supply. The *current code board* in Model DPD—7 causes the programmed current to correspond to the numerical display of the companion DPR—3 Register.

DESCRIPTION: The DPD's use transistor-driven reed relays to actuate resistors in a 1—2—4—8 BCD code. The input is parallel (RTL) logic levels or switch closures; the output a four-wire resistance and control current command capable of programming any Kepco Operationally Programmable Power Supplies. The DPD's may be driven by the suitable companion DPR which provides serial-parallel conversion, data storage and display.

TIMING: Commands to the DPD are sequenced: hold—execute —program, requiring a 10 millisecond sequence time. This sequencing is provided by the DPR when used together.

INPUT: logic "0" is 0 to 0.3V d-c
logic "1" is 1 to 3V d-c
input impedance: 3K ohms

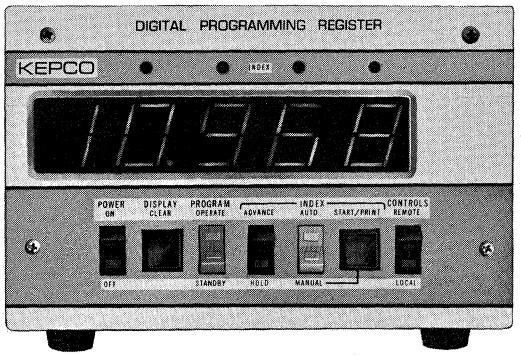
POWER REQUIREMENTS:
115V ±10V a-c or 230V ±20V a-c, 50-440 Hz single phase

SIZE: Half-rack: 5¼" H x 8-11/32" W x 13⅜" D
Rack adapter (Model RA-24) is available)

CABLES: Connect DPK—1 to any DPR via a cable "A"

TYPE	10' length	3' length	CONNECTS DPR—3—4—5 TO
A	A—10	A—3	DPK—1, DPD—1—3—4
B	B—10	B—3	DPD—2—5—6—7

DIGITAL PROGRAMMING REGISTER



MODEL	NUMBER OF DISPLAY REGISTERS
DPR—3	3 + Overrange
DPR—4	4 + Overrange
DPR—5	5 + Overrange

FUNCTION:
The DPR accepts serial BCD or decimal coded programming signals, stores them and provides a parallel output signal to the DPD decade.

DESCRIPTION:
DPR processes incoming serial data into storage/display registers including a segmented numeric readout. The data is presented in parallel, continuous form to a DPD Programmer. The DPR also processes index and decimal point commands from a keyboard or machine input.

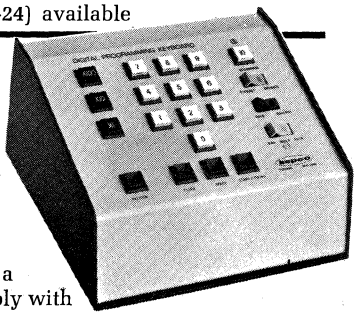
INPUT: Decimal — 10 lines
BCD — 5 lines including data pulse
Range selection (decimal point) — 3 lines;
Function command — 5 lines
Logic levels: "0" is 0 to 0.3V d-c; "1" is 1 to 3V d-c.

OUTPUTS: To DPD: parallel data.
To Printer (optional): parallel logic levels.
Print signal: 150 ohms output impedance.
Print complete signal: 1000 ohms input impedance.

POWER REQUIREMENTS:
115V ±10V ac or 230 ±20V ac, 50-440 Hz single phase.

SIZE: Half-rack 5¼" H x 8-11/32" W x 17⅜" D
Rack Adapter (RA-24) available

Model DPK-1 DIGITAL PROGRAMMING KEYBOARD



FUNCTION:
To control the output of a regulated d-c Power Supply with an adding machine keyboard, through a DPR logic and DPD analog converter. DPK-1 is a manual input — in serial form — for the DPR registers.

DESCRIPTION:
The DPK-1 uses SPDT keys to generate decimal code and register control signals, which are shaped and processed for delivery to the DPR storage register. Model DPK-1 will program registers DPR-3, DPR-4 and DPR-5

COMMANDS:
10 digit decimal signals, 3 ranges, Space, Clear, Start/Print, Index, Hold/Advance, Standby/Operate, Preview, Polarity.

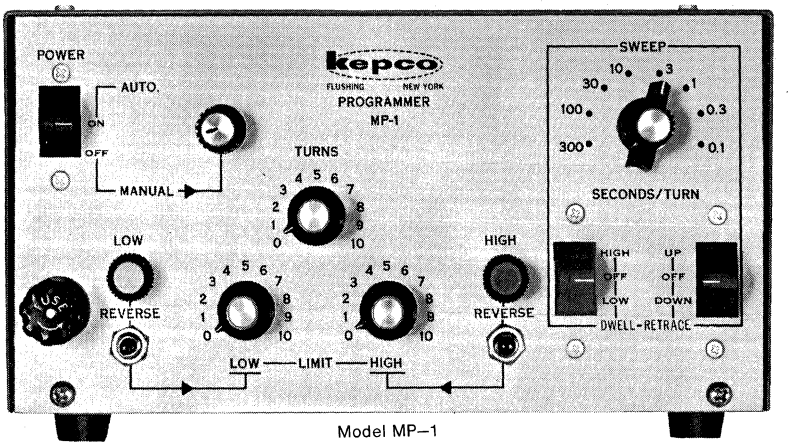
POWER: Supplied from DPR.
Rack adapter (Model RA 19-1) available.

KEPCO

MOTORIZED PROGRAMMERS

MECHANICAL FUNCTION GENERATOR

Models MP-1 and MP-10 are mechanical drives for a 10-turn servo-mount potentiometer installed within. A synochronous motor drives the shaft through an 8-speed gear-box with adjustable limits.



Model MP–1

MODELS	SECONDS PER REVOLUTION (MAXIMUM: 10 REVOLUTIONS, 3600°)								PRICE	SHIP WGT.
MP–1	0.1	0.3	1.0	3.0	10.0	30.0	100.0	300.0	$595.00	11
MP–10	1.0	3.0	10.0	30.0	100.0	300.0	1000.0	3000.0	595.00	11

TIMING ACCURACY: ±5% referenced to 60 Hz line frequency.

LIMITS, (Mechanically Adjustable):

Low Limit: Range from 0-9⅔ turns.

High Limit: Range from ⅓ to 10-turns.

Minimum Sweep Range: ⅓ turn (120°)

OVERIDE: Manual override buttons reverse the sweep at any desired point—or manually stop the programmer.

DIRECTION SIGNALS: Pilot lights signal the direction of sweep up and down. With dwell and retrace off, sweep cycles symmetrically between limits.

DWELL: 20 Milliseconds, plus a delay equal to 2% of the single rotation sweep time.

DWELL SWITCH: Stops the sweep at either the high or low limit (selectable).

RETRACE: Selector causes the sweep to retrace up or down at maximum speed—no matter what the speed selected.

AVAILABLE POTENTIOMETERS: Any ⅛" shaft, ⅜" servo-mount potentiometer. *Standard values:* 10, 25, 50, 100 and 500 ohms; 1, 2, 5, 10, 30, 50, 75, 90, 100 and 125 kilohms. Other resistance values on special order.

TERMINALS: Rear mounted barrier strip contains speed changing connections: high and low limit contacts, dwell and retrace and the output of the linear potentiometer.

DIMENSIONS: 4¼"H x 9$\frac{5}{32}$"W x 9⅝"D.

FINISH: *Panel:* Light gray, Color 26440, per Fed. Std. 595.
Case: Charcoal gray texture.

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware section.*

DIGITAL PROGRAMMING SYSTEM

MODEL	DESCRIPTION	PRICE	SHIP WGT. (LBS.)
DPK–1	Keyboard	$230.00	7
DPR–3	3-Digit Register	$ 980.00	24

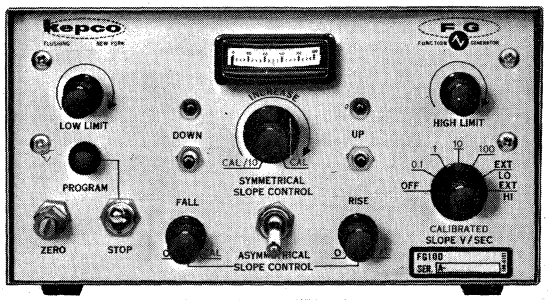
KEPCO

PROGRAMMER, FUNCTION GENERATOR
MODEL FG-100



Model FG-100 is a precision, slow speed, triangular waveform generator capable of generating any repetitive ramp function. Separately adjustable, high and low limits, are provided which periodically reverse the direction of the integration. The rising rate and falling rate are separately adjustable or can be controlled symmetrically with a single control.

OUTPUTS: All outputs available simultaneously.

#1 — 0-20V d-c, 0-20 ma.

#2 — 0-10 ma to program 100 ohm/volt power supply.

#3 — 0-1 ma to program 1000 ohm/volt power supply.

INPUT: 105-125V or 210-250V a-c, 50-440 Hz

TIMING: 4 ranges: 0.1V/sec., 1.0V/sec., 10V/sec., 100V/sec. Rising and falling slopes continuously adjustable between ranges either separately or symmetrically. For outputs #2 and #3, divide the above timing by 2000 and 20,000 respectively to obtain milliamperes per second.

LIMITS: Separately adjustable high limit and low limit permits operation between any two pre-set voltages or currents.

REVERSING SWITCHES: Programming direction is automatically reversed at the high and low limits. In addition, a pair of push buttons are provided which permit the direction to be reversed at any point in the operating span. A pair of directional lamps are provided to show the direction of the ramp.

METER: 2½" edgewise meter monitors output in volts (0-20V a-c) and in percent of maximum output, 0-100%.

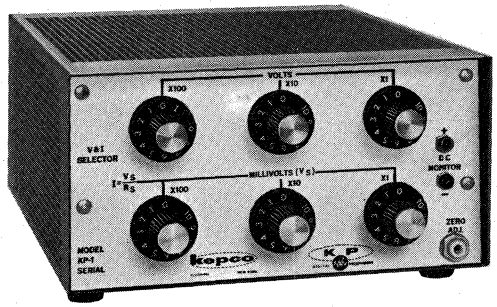
PROGRAMMING: Model FG-100 may be used by itself to generate a wide variety of very low speed triangular or sawtooth functions, or it can be used directly with any programmable d-c power supply. When connected to a programmable power supply, the Model FG-100 Function Generator programs the power supply throughout all or part of its rated voltage or current range as set by the power supply's controls and the function generator's limit settings. NOTE: function speed is converted to programming speed by multiplying the driving current rate (ma/sec.) by the resistance setting of the voltage control of the power supply being programmed. This gives the programming speed of the power supply's output in volts per second.

REMOTE CONTROLS: Timing and limit setting controls are brought to a multi-terminal barrier strip at the rear of the unit for remote operation. A sync output is also provided as is provision for remote directional signals.

DIMENSIONS: 4¼" H x 8$\frac{5}{32}$" W x 13" D (13⅜" D overall)

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware Section.*

PROGRAMMING PANELS



MODEL KP-1 for use with any Kepco programmable power supply using a 1mA control current.

SPECIFICATIONS: MODEL KP-1

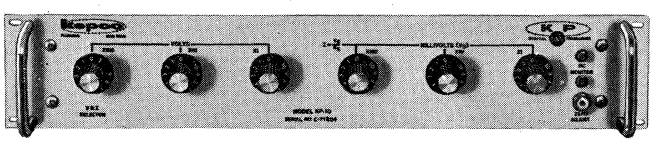
DECADES: 6-digit voltage programming. 3-digit current programming.

RANGE: 0-1,011.110 ohms in 1 ohm steps (0 to 1,011.110V in 1 millivolt steps at 1000Ω/V).

ACCURACY: Decades contain 0.1% resistor except units decade (millivolts) which contain 1% resistors.

DIMENSIONS: Half-rack, 4¼"H x 8$\frac{5}{32}$"W x 9⅝"D.

MOUNTING: Mount single unit in rack adapter RA-5, two abreast in rack adapter RA-4. *See Hardware Section.*



MODEL KP-10 for use with any Kepco programmable power supply using a 10 mA control current.

SPECIFICATIONS: MODEL KP-10

DECADES: 6-digit voltage programming. 3-digit current programming.

RANGE: 0-101,111.0 ohms in 0.1 ohm steps (0-1,011.110V in 1 millivolt steps at 100Ω/V.)

ACCURACY: All decades contain 0.1% resistors.

DIMENSIONS: 3½" high x 19" wide x 11" deep.

FINISH: Light gray, color 26440, per Fed. Std. 595

Both decade programmers contain provision for current programming using the first three digits. This assumes a 1 volt sensing drop (internal or external). If the recommended 10 volt sample is employed for HB and ABC high voltage hybrids, then a fourth digit can be used for higher resolution.

When substituted in place of a power supply's normal voltage control and calibrated, the KP-1/KP-10 digital decade programmer converts that supply to a highly accurate voltage or current source.

Both programmers contain zero trimming controls which, in conjunction with the power supplies own bridge current adjustment, allow precise calibration of the output at minimum and maximum output. The programming function of the Kepco bridge is inherently linear to an accuracy determined by the load/line regulation of the power supply. This means that the circuit accuracy is, for all intents and purposes, limited solely by the resistors used in the programmer.

KEPCO POWER SUPPLY DIMENSIONS

DIMENSIONS FOR EACH KEPCO POWER SUPPLY GROUP

The dimensions listed on this page are overall outline dimensions, except depth, which is given as the measurement behind panel, ie: clearance required. Dimensions do not include allowance for cables or connections. Outline drawings for each group of power supplies are available upon request.

ABC(Transistor) Group Page 1994

4¼"H x 8$\frac{5}{32}$"W x 9⅜"D for Models ABC 7.5-2M, ABC 15-1M, ABC 40-0.5M and ABC 100-0.2M; 4¼"H x 8$\frac{5}{32}$"W x 5⅝"D for Models ABC 2-1M, ABC 10-0.75M, ABC 18-0.5M and ABC 30-0.3M.

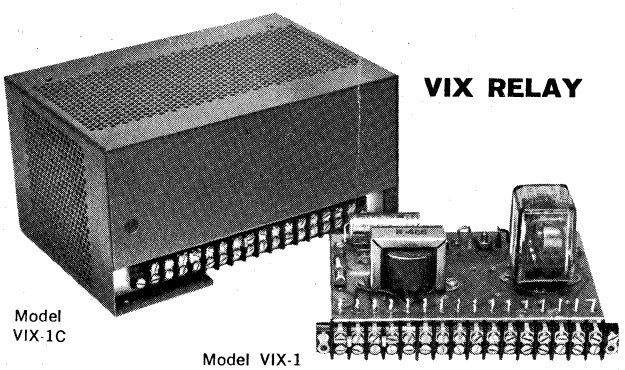
VIX

VIX RELAY



Model VIX-1C

Model VIX-1

Model VIX-1C translates the VIX REMOTE SIGNAL available on all CK and KS VIX-equipped power supplies into a heavy duty relay closure for external control or signal applications.

SPECIFICATIONS

INPUT: ±8V d-c at 1 ma (from VIX signal).

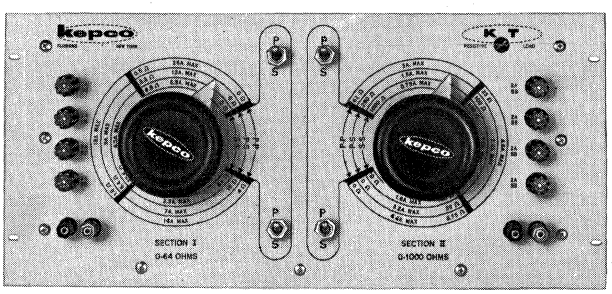
OUTPUT: Three pole, double throw relay contacts; each rated to carry 10 amperes at 115V a-c or 5 amperes at 230V a-c.

POWER REQUIREMENTS: 105-125V or 210-250V a-c

SIZE: 4¼" H x 8$\frac{5}{32}$" W x 5" D (5⅝" D overall) Standard half-rack configuration).

MOUNTING: In the half-rack enclosure VIX-1C can be mounted in either RA-4 or RA-5 rack adapters.
The enclosure is removable so that the circuit board, which is complete by itself, can be mounted within other equipment, or chassis. To designate model without enclosure, delete the suffix "C", e.g., Model VIX-1, for unenclosed circuit board for "built-in" mounting.

VARIABLE RESISTIVE LOAD



The Model KT 6212 is a multiganged, eight-section group of dual-wound power rheostats used in the testing of regulated power supplies.

Model KT 6212 consists of two independent gangs of four rheostats apiece, 0-64 ohms and 0-1000 ohms. The rheostats can be switched for parallel, series parallel and series operation. Each rheostat has heavy and light windings so that the maximum load current changes at approximately each third rotation point around the dial.

CONTROLS:
Switches select series and parallel combinations of the four ganged rheostats with the corresponding resistance and current rating designated by concentric bands.

Each band defines the resistance range for its particular connection with zero ohms (maximum current) in the clockwise position. The bands are divided into three sections that correspond to the position of the heavy and light windings, respectively. The maximum current in each section is shown on the corresponding portion of the band.

FUSING:
Each rheostat in the 0-64 ohm gang is fused at 7 amperes. Each rheostat of the 0-1000 ohm gang is fused for 2 amperes.

TERMINALS:
A pair of 5-way binding posts is provided at each gang for connection to the power source under test. These connections are duplicated at the rear.

EXTERNAL POWER REQUIREMENTS:
None. The Model KT 6212 is a passive device.

DIMENSIONS:
8¾"H x 19"W x 13⅝"D. The Model KT 6212 resistive load is designed for mounting in standard 19" equipment racks.

VP—PX	3—110V	3A	All PAX and PCX Models	2 19/32"	5 3/32"	3 1/16"	80.00	3
VP—KCA	3—160V	25A	All ABC Transistorized, CK and KS Models (except those listed below)	2⅜"	8⅛"	3 7/16" + Terminals	110.00	3
VP—KS—1	3—160V	30A	KS 36-30M, 60-20M & 120-10M	4"	10¾"	3⅛" + Terminals	125.00	6
VP—KS—2	3—30V	100A	KS 8-50M, 8-100M & 18-50M	4"	10¾"	3⅛" + Terminals	155.00	6

OPERATING LEVEL:
The trigger point may be set to within 5% or 0.25V (whichever is greater) of power supply setting.

TEMPERATURE COEFFICIENT:
0.1% or 0.1V (whichever is greater) per °C.

REMOTE ERROR SENSING:
Compensates up to 1 volt per output lead.

TRIGGERING TIME, (adjustable delay):
5 to 10 microseconds with an adjustable delay to minimize the false alarm rate.

Power Supplies may be ordered with the overvoltage protector factory-installed.
Installation charges 1-11: $25.00 ea.
12-23: $10.00 ea.
24 or more $3.00 ea.

KEPCO
OVER-VOLTAGE / OVER-CURRENT PROTECTORS

MODEL	DESCRIPTION	PRICE	SHIP. WGT. (LBS.)
VIP—1	Overvoltage/Overcurrent	$132.00	21
VIP—3	Over and Undervoltage/ Over and Undercurrent	237.00	21
VIP—4	200 ampere Overvoltage crowbar (5—50V)	310.00	21

The VIP consists of a sensing circuit capable of detecting a voltage 1% or 0.1 volts different than any preset voltage limit in the range 5—200*volts. Should such an over or under-voltage occur, a fast-acting silicon controlled rectifier (SCR) "crowbar" short circuits the power supply's output within 50 microseconds. Simultaneously a power interlock relay is tripped which removes the primary a-c power within approximately 50 milliseconds. The SCR discharges the power supply's output filter capacitor and the voltage is reduced to zero.

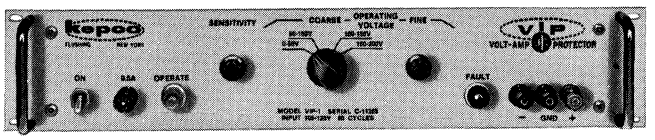
Operation in the internal reference mode allows the operator to pre-set any voltage as a limit above or below which crowbar/turn-off action is precipitated. In its tracking mode, the VIP is interconnected with the voltage control circuit of the power supply with which it is used and will sense a voltage differential between the output of the supply and the programmed voltage.

Terminals are provided for the addition of a sensing resistor to convert VIP into an over-current or under-current protector depending on model. The current sensing resistor is chosen to drop 1 volt at the operating current. The sensitivity control then adjusts the firing threshold from 0 to the operating current, maximum 30 amperes.

*Model VIP-4 voltage range is 5-50V.

All terms used in the specifications are defined in the Kepco Glossary.

Data subject to change without notice
PATENT NOTICE: Applicable Patent Nos. will be supplied on request.



SPECIFICATIONS:

VOLTAGE
SENSITIVITY: Minimum threshold 1% of operating voltage or 0.1 volts whichever is greater (adjustable).
RANGE: 0—50V*, 50—100V, 100—150V, 150—200V.
*Minimum voltage required for proper operation is 5V.

CURRENT
SENSITIVITY: 5% of operating current producing a 1 volt drop across external sensing resistor.
RANGE: 0-30 amperes. Model VIP 4 has a 0-200 ampere crowbar range.

POWER INTERLOCK RELAY
CONTACT RATING: 10 amperes at 115V a-c.
Operation of the VIP is in two stages. The output crowbar is immediately followed by an a-c power interruption to the crowbarred power supply. High power supplies (such as might require a VIP 4) may require either an auxiliary contactor to turn them off, or, in the case of the large KS and KO models, a connection may be made to the trip coil of the power supply's circuit breaker to accomplish the turn-off action.

DIMENSIONS
3½" high x 19" wide x 8" deep.
Standard EIA rack dimensions.

FINISH: Light gray, color 26440, per Fed. Std. 595

NOTE: When a VIP is to be used in its "Tracking Mode" be sure to specify (when ordering) whether it is to be used with a *plus* common or *minus* common power supply.

*For plug-in convenience in the RA 22—6, use (1) PC—2 per slot.

CHASSIS MOUNTING TYPES OPS-B, PAX, PCX MODELS CAN BE ENCASED WITH CASE CA—1, FITTED WITH PLUG PC—1 FOR QUICK-DISCONNECT AND RACK MOUNTED IF DESIRED.

CA—1	Chassis mounting case (single)	2 11/16"H x 4 1/8" W x 13 3/16"D	11.00	2
PC—1	Connector	— — —	6.00	1/2
RA 12—1	1 cased unit Rack Adapter	3 15/32"H x 19" W —	11.00	3
RA 13—4	4 cased unit Rack Adapter	3 15/32"H x 19" W —	11.00	3
RA 11—6	6 cased unit Rack Adapter	5 7/32" H x 19" W —	11.00	3

The CC, PCX-MAT and OPS-BTA plug-in systems permit a wide variety of options. The assemblies CC, PCX-MAT or OPS-BTA having a panel, are equipped with a slide plate which enables them to slip into either Models CA—3 (single unit), CA—4 (dual), CA—5 (triple) or the Model RA 22—6. The Models CA—3, 4 and 5 are complete cases with integral PC connector, line cord, and barrier strip(s) for access to the control functions. The Model RA 22—6 requires the use of from one to six of Model PC—2 connectors (depending on how many instruments are to be plugged in) which must be ordered separately and installed. The RA 22—6 is equipped with a line cord.

The Blank Panel Adapter (Model BPA—22) permits the mounting of regular PAX, PCX and OPS-B modules (uncased style) in any of the above cases or rack adapters. The panel is, of course, blank. Filler panels, Model RFP 22—1, —2 and —3 are available to fill in blank slots in any of the cases Model CA—3, 4, 5 and RA 22—6.

Adapters, Models RA 12—1, RA 13—4 and RA 11—6, will mount one, four or six *cased* PAX, PCX or OPS-B modules in a 19-inch panel without any of the panel control features or metering. Connector PC—1 may be used to connect to such modules or their barrier strips may be utilized for wiring.

RACK ADAPTERS

Adapt bench style, modular and half-rack Power Supplies to the standard 19" wide equipment rack or cabinet. Panels and Rack Adapters are finished light gray Color 26440 per Fed. Std. 595.

RACK ADAPTERS for ABC, CK, FG—100, KP—1, MP—1, MP—10 and VIX 1—C.

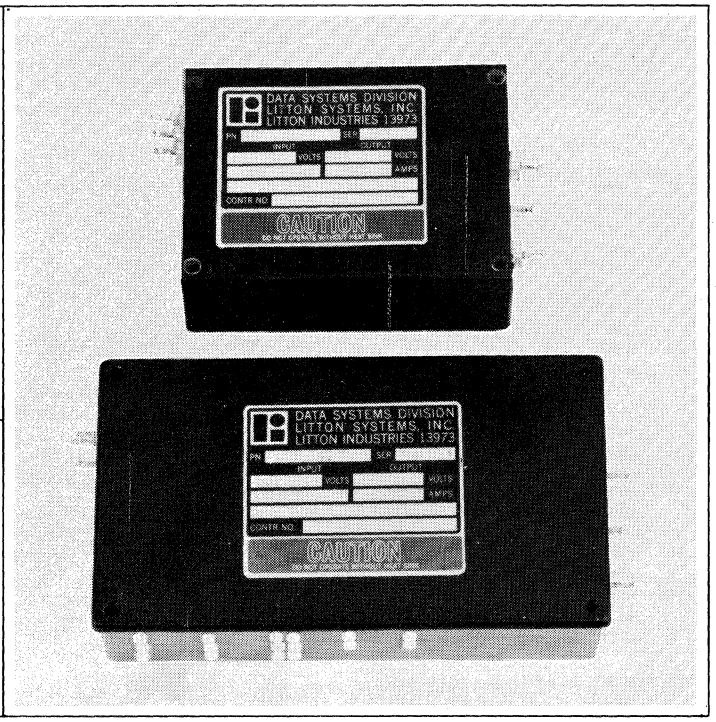
200/250 Series 400 Series Microminiature Power Supplies

For Airborne . . . Shipboard . . . Field . . . and Space Systems

SPECIAL PRODUCTS

DATA SYSTEMS DIVISION • LITTON INDUSTRIES

TECHNICAL DATA SHEET



FEATURES:

- Dual outputs (200 series)
- Small size 8.1 to 24 cubic inches (200/250 series) 13 to 108 cubic inches (400 series)
- MIL Spec conformance (MIL-E-5400, Class 2; MIL-I-6181D; MIL-P-81279; MIL-STD-704 CAT B)
- High Efficiency — up to 65% (200/250 series) up to 80% (400 series)
- High Voltage — 3 to 40 VDC with power rating to 300 watts
- Reliability ranging up to 162,000 hours MTBF (200/250 series); up to 66,000 hours MTBF (400 series)
- Automatic overcurrent and overvoltage protection (power supply off until overvoltage condition removed and input power recycled)
- High current — 6 to 30 amperes at power ratings up to 300 watts (400 series)
- Modular packaging for full maintainability
- Latest Litton-developed switching regulator techniques

APPLICATION:

Here are the third-generation Litton power supplies, direct descendants of the original micro-miniature modules developed in U. S. Navy- and Litton-sponsored programs. These solid-state, conduction-cooled power supplies were refined in cooperation with a wide range of government agencies. They represent a breakthrough in achieving high packaging density coupled with optimum performance and reliability, and automatic protection features. These units are capable of fulfilling up to 90% of military power supply needs for microelectronic systems in airborne, shipboard, field, and space environments.

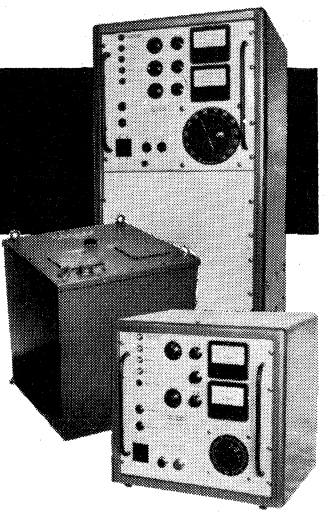
KILOVOLT CORPORATION

HIGH VOLTAGE POWER SUPPLIES

PULSE MODULATORS INSULATION TESTERS



HIGH VOLTAGE POWER SUPPLIES FOR INDUSTRY

Soundly engineered — ruggedly constructed — conservatively rated. Custom designed for operation of electrostatic deposition and separation systems, for dielectric testing, for industrial processing and experimental laboratory work. Kilovolt Corporation power supplies represent concentrated experience in the field of high voltage techniques.

- Reversible Polarity Output
- Continuously Variable Output Control
- Adjustable Overload Shut-off
- Adjustable Overvoltage Shut-off
- Provisions for External Interlock
- Safety Interlock on H V Cabinet Door
- Zero-start Interlock
- Dual Range Voltage and Current Meters
- Fail-safe Output Shorting Mechanism
- Functional Pilot Lamps
- Circuit Breaker Operation

- **3 3/16" x 3 3/4" x 6 1/2" with dual output models** (LCD-A)
- **4 29/32" x 4 29/32" x 5 1/4" with single and dual output models** (LCS-4 & LCD-4)
- **More current** per cubic inch.
- **Guaranteed for five years material and labor.**
- **Increased reliability** through use of Integrated Circuit which replaces 32 discrete components from conventional designs.
- **Convection cooled**—no external heat sinking required.
- **Regulation,** Line or Load.. .01% + 1mV.
- **Ripple and Noise**... 250 μV rms; 1mV p-to-p.
- **Wide Input Voltage and Frequency Range**...105-132 VAC, 57-63Hz.
- **Wide Temperature Range**... −20°C to +71°C.
- **Temp. Coeff.**.... .01% + 300μV/°C External Programing Resistor. .015% + 300μV/°C Internal Resistor.
- **Lightweight**—Only 1 lb. for 1¾" size; 2¼ lbs. for 3 5/16" size; 5 lbs. for 6½" size; 8½ lbs. for 5" size.
- **Mounting flexibility**—five mounting surfaces (LCS-1); four mounting surfaces (LCS-2 & LCD-2, LCS-4 & LCD-4). LCD-A can be mounted in any of three mutually perpendicular planes.
- **Overvoltage Protection**—available as accessory up to 70 VDC.
- **Multi-Current-Rated**
- **Complete Serviceability**.....all components replaceable.
- **Remote sensing.**
- **No overshoot** on turn-on, turn-off or power failure.
- **Remote Programing**.....1000 ohm/V nominal or Volt/Volt.
- **Series/Parallel operation** with similar single or dual units.
- **Completely Protected**—automatic current limiting.

Features of Dual Output Models

- **Independent Operation**
- **Independent Remote Sensing**
- **Independent Remote Programing**
- **Series Parallel Operation** (Master/Slave)
- **Each Supply Electrically Isolated** and Floating with Respect to Ground.

Additional Data

- **DC OUTPUT: Voltage Range:** For voltage ranges see tables.
- **AC INPUT:** 105-132 VAC; 57-63 Hz. For operation at other than 57-63 Hz, consult factory for ratings and specifications.
- **INPUT POWER:** LCS-1 ..... 10 watts
  LCS-2, LCD-2 .... 20 watts
  LCD-A ..... 55 watts
  LCS-4, LCD-4 ....125 watts
- **OVERLOAD PROTECTION: Thermal:** Thermostat; automatic reset when overtemperature condition is eliminated. (Not applicable to LCS-1 & LCD-A Models.) **Electrical: External Overload Protection:** Automatic electronic current limiting circuit limits the output current to a preset value, thereby providing protection for the load as well as the power supply.
- **CURRENT LIMIT:** 140% 40°C Rating Max. for LCS-1, LCS-2, LCD-2, LCD-A. 110% of 40°C Rating for LCS-4, LCD-4.
- **PHYSICAL DATA: Weight:** LCS-1 1 lb net; 1⅞ lbs ship; LCS-2, LCD-2 2¼ lbs net; 3⅛ lbs ship; LCD-A 5 lbs net; 6 lbs ship; LCS-4, LCD-4 8½ lbs net; 9½ lbs ship.

Specifications subject to change without notice.

Military COM-PAK MARK II™ IC Regulated Power Supplies

The only MIL supply available with a 5 year guarantee.

All models designed and tested to meet performance specifications of MIL-STD-810 B,-454,-461,-462,-463, MIL-E-5272-C, MIL-E-16400 F, MIL-E-4158 D and MIL-E-5400 K.

*See page 6 for details for Altitude, High Temperature, Low Temperature, Temperature Shock, Temperature Altitude, Humidity, Fungus, Salt Fog, Dust, Explosive Atmosphere, Acceleration, Vibration, Shock, EMI.

- **All-silicon DC Power Supply using integrated circuits to provide regulation system** except for input and output capacitors, rectifiers and series regulation transistors.
- **Increased reliability** through use of integrated circuit which replaces 32 discrete components from conventional designs.
- **3 5/32" x 3 9/32" x 3 5/16" with single or dual output models**
- **3 5/32" x 3 9/32" x 1 11/16" with single output models**
- **More current** per cubic inch.
- **Guaranteed for five years, material and labor,** when returned to factory for service.
- **Convection cooled**—no external heat sinking required.
- **Regulation,** Line or Load . . . 0.01% + 1mV.
- **Ripple and Noise** . . . 1 mVrms
- **Wide Input Voltage and Frequency Range**. . . .MIL-E models 102-124 VAC, 360-440 Hz as per MIL-STD-704A, Class B. MIL-S models 105-132 VAC, 57-63 Hz
- **Wide Storage Temp. Range**. . . . . −62°C to +85°C
- **Temp Coeff.** . . .01% + 300 μV/°C External Programing Resistor.
  .015% + 300 μV/°C Internal Resistor.
- **Lightweight** — Only 1 lb. for 1¾" size; 2¼ lbs. for 3" size.
- **Rugged die-cast aluminum construction.**
- **Mounting Flexibility** — five mounting surfaces (MIL-E-CS-1 & MIL-SCS-1); four mounting surfaces (MIL-E-CS-2 & CD-2; MIL-SCS-2 & CD-2).
- **Overvoltage Protection** — available as accessory up to 70 VDC.
- **Multi-Current-Rated** (MIL-S units only)
- **Remote sensing.**
- **No overshoot** on turn-on, turn-off or power failure.
- **Remote Programing**. . . . . 1000 ohm/V nominal or Volt/Volt.
- **Series/Parallel operation** with similar single or dual units.
- **Completely Protected** — automatic current limiting.

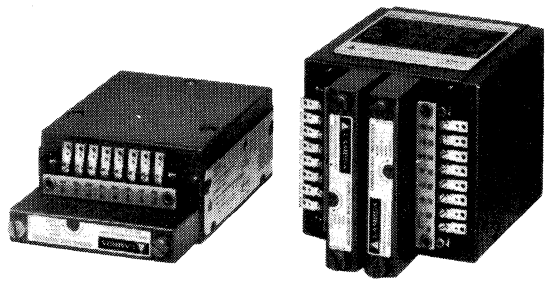
Features of Dual Output Models

- **Independent Operation**
- **Independent Remote Sensing**
- **Independent Remote Programing**
- **Series/Parallel Operation** (Master/Slave)
- **Each Supply Electrically Isolated** and Floating with Respect to Ground.

Additional Data

- **DC OUTPUT: Voltage Range:** For voltage ranges see tables.
- **AC INPUT:** MIL-E Models — 102V to 124V rms, 360 to 440 Hz as per MIL-STD-704A, Class B.
  MIL-S Models — 105V to 132V rms, 57 to 63 Hz.
- **INPUT POWER:** (with Input 124V, 400 Hz and Output fully loaded)
  MIL-E-CS-2, MIL-E-CD-2 13 watts
  MIL-E-CS-1 9 watts
  (with Input 132V, 60 Hz and Output loaded to 40°C rating)
  MIL-S-CS-2, MIL-S-CD-2 20 watts
  MIL-S-CS-1 10 watts
- **AMBIENT OPERATING TEMPERATURE:** −54°C to +71°C
- **OVERLOAD PROTECTION: Thermal:** Thermostat; automatic reset when overtemperature condition is eliminated. (Not applicable to MIL-E-CS-1 or MIL-S-CS-1 Models.) **Electrical: External Overload Protection:** Automatic electronic current limiting circuit limits the output current to a preset value, thereby providing protection for the load as well as the power supply.
- **CURRENT LIMIT:**
  MIL-E Models — 130% of Rated Current.
  MIL-S Models — 140% of Rated Current.
- **PHYSICAL DATA: Weight:** MIL-E-CS-2, MIL-E-CD-2, MIL-S-CS-2, MIL-S-CD-2, 2¼ lbs. net, 3⅛ lbs. ship. MIL-E-CS-1, MIL-S-CS-1, 1 lb. net, 1⅞ lbs. ship.
- **FINISH:** Gray, FED STD 595 No. 36231

Military COMPAK MARK II Power Supplies



NOTE: 1. All testing performed by an independent testing laboratory — New York Testing Laboratories, Inc., Westbury, New York.
2. Test reports are available for each qualification test.
* MIL-S- units are identical to MIL-E units except for AC input frequency.

MIL-E RATINGS: 400 Hz operation

MIL-E-CS1 SINGLE OUTPUT MODELS

LM Series Modular Power Supplies

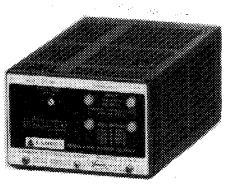
All silicon, programable, convection-cooled modules up to 150 volts, up to 33 amps.

7 VERSATILE MODULES WITH 5 YEAR GUARANTEE

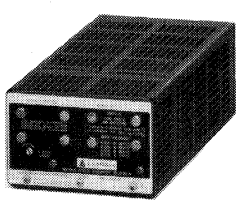
- **MEET MIL. ENVIRONMENT SPECS**
  Specify Lambda with assurance of meeting military requirements
  - RFI—MIL-I-16910
  - Vibration: MIL-T-4807A
  - Shock: MIL-E-4970A Proc. 1 & 2
  - Humidity: MIL-STD-810 Meth. 507
  - Temp. Shock: MIL-E-5272C (ASG) Proc. 1
  - Altitude: MIL-E-4970A (ASG) Proc. 1
  - Marking: MIL-STD-130
  - Quality: MIL-Q-9858
  - Fungus Proofing (optional): all models available with MIL-V-173 varnish for all fungi nutrient components.
- **CONVECTION-COOLED**
  No heat sinking or forced air required. Avoids heat sinking and reliability problems, and gives complete mounting freedom.
- **HIGHER RATINGS WITH FORCED AIR COOLING**
  Convection-cooled design offers greatest opportunity for increased ratings with forced air. Ventilated construction affords substantial increases in rating with small amounts of air flowing through the power supply. Consult Factory for details.
- **THERMALLY PROTECTED AND SHORT-CIRCUIT PROOF**
  Self-restoring current limiting and self-resetting thermostats protect supplies.
- **NO VOLTAGE SPIKES OR OVERSHOOT**
  on turn-on, turn-off, or power failure—for maximum load protection.
- **WIDE INPUT VOLTAGE AND FREQUENCY RANGE**
  Makes Lambda power supplies suitable for field gear and worst-case conditions so you need fewer special provisions. VAC, 105-132 55-65 Hz. Delete 40°C rating for operation at 47-55 Hz. For operation at 360-440 Hz consult factory for ratings. (205-265 VAC, optional at no extra charge).
- **OVERVOLTAGE PROTECTION**
  Available for all models up to 70 VDC, starting at $30. Positive safety for voltage-sensitive devices in your load circuitry—and in a compact, low-cost accessory.
- **HIGH PERFORMANCE OPTION**
  Better regulation, ripple, and temperature coefficient for extra performance and safety margin in your system. All models available with these specifications at $15.00 surcharge:

  LINE REGULATION: .01% + 1mV
  LOAD REGULATION: .02% + 2mV
  RIPPLE AND NOISE: 0.5mV rms; 1.5mVp-to-p with 60 Hz input
  TEMP. COEFF.: .01%/°C

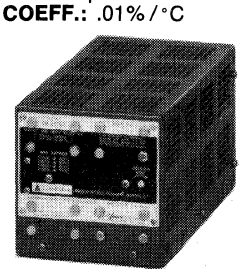
A MODULE
up to 120 volts
up to 2.0 amps



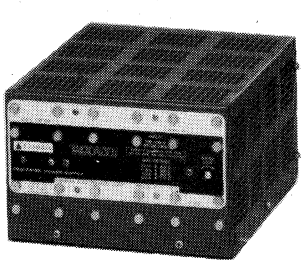
B MODULE
up to 150 volts
up to 3.8 amps



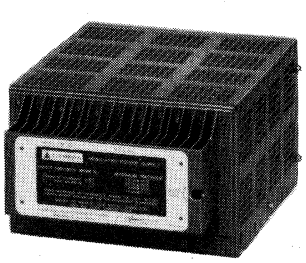
C MODULE
up to 150 volts
up to 5.3 amps



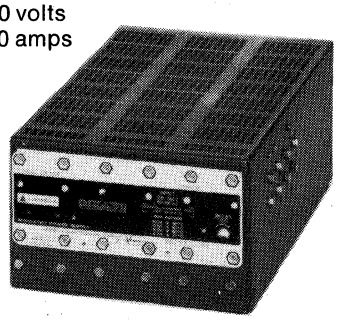
CC MODULE
up to 150 volts
up to 11.0 amps



D MODULE
up to 150 volts • up to 13.1 amps



E MODULE
up to 150 volts • up to 22.0 amps



EE MODULE
up to 150 volts • up to 33 amps

LAMBDA PAGE 6

LM series modular power supplies wide range models

Here's a quick way to check which LM zero and wide voltage range packages fit your needs

Be sure to see page 10 for Fixed Voltage Range LM Series models from 3 to 150 volts.

LM series power modules A-EE performance data

GUARANTEED FOR 5 YEARS

DC OUTPUT:

Voltage Range — For voltage ranges see pages 9 and 10.

Regulated Voltage.

Regulation (line) — 0.05% plus 4 mV for line variations from 105-132 VAC. 0.01% plus 1.0 mV for line variations from 105-132 VAC. (Y option)

(load) — 0.03% plus 3 mV load variations from 0 to full load. 0.02% plus 2 mV for load variations from 0 to full load. (Y option)

Remote Programing

Resistance ..... 200 ohms/volt, nominal

Voltage ..... Volt per volt

Ripple and Noise .. 1 mV RMS, 3 mV p to p with either pos. or neg. terminal grounded. 0.5 mV RMS, 1.5 mV p to p with 60 Hz input. (Y option)

Temperature coefficient ..... 0.03%/°C. 0.01%/°C (Y option)

AC INPUT: Line .... 105-132 VAC: 47-440 Hz. 40°C rating not applicable for 50 Hz. operation.

Power:

LM 251, 257, 259, 263, 265	20 watts(1)
LM 201, 203, 260, 205, 207, 267	30 watts(1)
LM 202, 204, 261, 206, 208, 268	60 watts(1)
LM 252, 258, 262, 264, 266	70 watts(1)
Package B Models	80 watts(1)
Package C Models	140 watts(1)
Package CC Models	220 watts(1)
Package D Models	300 watts(1)
Package E Models	450 watts(1)
Package EE Models	750 watts(1)

(1)With output loaded to 40°C rating, input 132 VAC and 55-65 Hz

AMBIENT OPERATING TEMPERATURE: Continuous duty from −20°C to +71°C ambient with corresponding load current ratings for all modes of positions.

STORAGE TEMPERATURE: −55°C to +85°C.

OVERLOAD PROTECTION:

Thermal ..... Thermostat; automatic reset when over-temp condition is eliminated.

Electrical:

External Overload

Protection ..... Fixed, automatic electronic current limiting circuit limits the output current upon external overloads, including short circuit, thereby providing protection for load as well as power supply.

INPUT & OUTPUT CONNECTIONS:

Heavy duty terminal block on rear of chassis.

CONTROLS:

DC output

control ..... Simple screwdriver voltage adjustment over entire voltage range.

Remote Sensing .. Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

PHYSICAL DATA:

Weight ..... A Package Models
5 lbs. net; .....6 lbs. ship.
B Package Models
6 lbs. net; .....7 lbs. ship.
C Package Models
9 lbs. net; .....10 lbs. ship.
CC Package Models
15 lbs. net; ....17 lbs. ship.
D Package Models
20 lbs. net; ....23 lbs. ship.
E Package Models
28 lbs. net; ....31 lbs. ship.
EE Package Models
37 lbs. net; ....47 lbs. ship.

Finish ..... A, B, C, CC, D, E and EE Packages—Grey, FED. STD. 595 No. 26081.

Mounting ..... Three surfaces, each with tapped mounting holes, can be utilized for mounting A, B, C, CC, and D Package Models.

High Performance Option

Add Suffix "-Y"—All models available with these specifications for $15.00 extra: Line regulation .01% + 1 mV; Load regulation .02% + 2 mV; Ripple and Noise—with 60 Hz input: ½ mV rms; 1½ mV p to p; Temp. Coeff. .01%/°C

AC Input Option

Add Suffix "-V"—All units are available with 205-265 VAC, 47-440 Hz at no extra charge. (40°C rating not applicable.)

Fungus Proofing Option

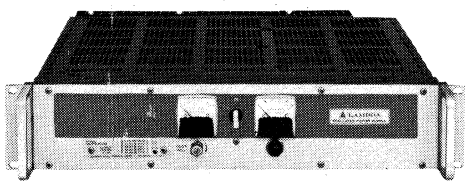
Add Suffix "-R"—All models can be obtained with MIL-V-173 varnish for all fungi nutrient components at $10.00 surcharge.

LAMBDA ELECTRONICS CORP.
A Veeco SUBSIDIARY
515 BROAD HOLLOW ROAD, MELVILLE, L.I., NEW YORK 11746 TEL. 516-694-4200,TWX: 510-224-6484 CABLE: VEECOVAC PLAINVIEW NY

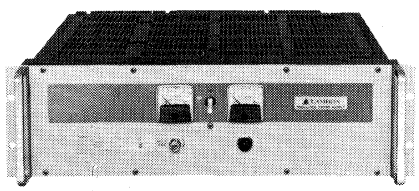
LM SERIES FULL RACK POWER SUPPLIES

Deliver Up To 150 Volts, Up To 150 Amps
In Compact Convection-Cooled Packages

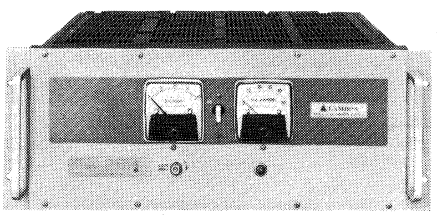
LM Series Full Rack Power Supplies are available with voltages up to 150 VDC, currents up to 150 amps. They are offered in three package sizes all of which fit into a standard 19″ rack. There are 46 fixed voltage range models and 3 wide range models, available metered or non-metered with optional built-in overvoltage protection. Meters and overvoltage protection are standard equipment on H packages and are available as options on F and G packages.



Package F
up to 150 volts/up to 48 amps

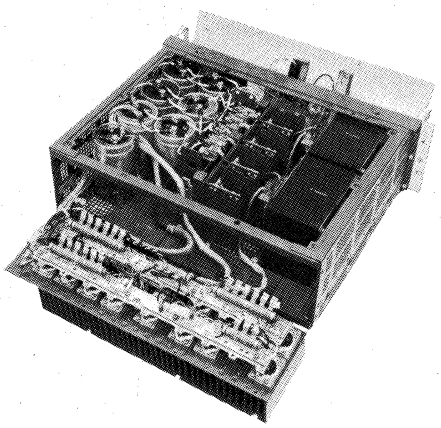


Package G
up to 150 volts/up to 95 amps



Package H
up to 12 volts/up to 150 amps

QUALITY COMPONENTS



Computer grade hermetically sealed 10-year life electrolytic capacitors

Drop-down front panel exposes meters, controls and front electrical connections for servicing

MIL-R-26 type wire wound resistors and MIL-R-22684 type film resistors mounted on circuit boards behind front panels

Line input fuse easily accessible from the front

Top completely removable

MIL-T-27 Grade 6 transformers

MIL-W-16878 wire

All-silicon hermetically sealed, internally mounted semiconductors

Hinged back exposes all rear connections for servicing

Convection-cooled heat-sink fins

G PACKAGE SHOWN
CONVECTION-COOLED

OTHER FEATURES

- **CONVECTION-COOLED DESIGN**
  offers greatest opportunity for increased ratings with forced air. Ventilated construction affords substantial increases in rating with small amounts of air flowing through the power supply. Consult Factory.

- **WIDE INPUT VOLTAGE AND FREQUENCY RANGE**
  Makes Lambda power supplies suitable for field gear and worst-case conditions so you need fewer special provisions. 105-132 VAC, 45-440 Hz with 10% derating for 50 Hz (205-265 optional at no extra charge).

- **OVERVOLTAGE PROTECTION**
  Built-in overvoltage protection is standard on all package H models and available as an option on all package F and G models up to 70 VDC. To order for F and G packages, add suffix "—OV" to model number and add $90. to price. Price of package H models includes overvoltage protection.

- **THERMALLY PROTECTED AND SHORT-CIRCUIT PROOF**
  Self-restoring current limiting and self-resetting thermostats protect supplies.

- **NO VOLTAGE SPIKES OR OVERSHOOT**
  on turn-on, turn-off, or power failure—for maximum load protection.

- **HIGH PERFORMANCE SPECIFICATIONS**
  Better regulation, ripple, and temperature coefficient for extra performance and safety margin in your system.
  The following specifications are standard for all package H models and are included in the price. All package F and G units are available with these specifications at a $15. surcharge.
  LINE REGULATION: .01% +1mV
  LOAD REGULATION: .02% +2mV
  RIPPLE AND NOISE: with 60 Hz input; 0.5mV rms; 1.5mV p-To-p
  TEMPERATURE COEFFICIENT: .01%/°C
  Add suffix "-Y" to package F and G model numbers.

NOTES:

[1] CURRENT RATING IS FROM ZERO TO I MAX.

CURRENT RATING APPLIES OVER ENTIRE OUTPUT VOLTAGE RANGE.

CURRENT RATING APPLIES FOR INPUT VOLTAGE 105-132 VAC 55-65 HZ.

FOR OPERATION AT 45-55 HZ DELETE 40°C RATING.

FOR OPERATION AT 360-440 HZ CONSULT FACTORY FOR RATINGS AND SPECIFICATIONS.

[2] PRICES OF F AND G PACKAGES ARE NON-METERED MODELS, EXCEPT FOR MODEL NUMBERS FOLLOWED BY SUFFIX "-M". FOR METERED MODELS ADD SUFFIX "-M" TO MODEL NUMBER AND $30.00 TO PRICE.

PACKAGE H MODELS ARE AVAILABLE ONLY WITH OVERVOLTAGE PROTECTION, HIGH-PERFORMANCE OPTION, AND METERS, ALL OF WHICH ARE INCLUDED IN THE PRICE.

PRICES F.O.B. FACTORY, MELVILLE, N. Y. ALL SPECIFICATIONS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

ACCESSORIES AND PERFORMANCE OPTIONS FOR LM SERIES POWER SUPPLIES

Meters — LM-F and LM-G packages are full rack power supplies available metered or non-metered. For metered models, add new suffix "-M" to the model number and add $30. to the non-metered price. Meters are standard equipment on all LH packages and are included in the price.

Overvoltage Protection — F and G packages are available with built-in crowbar type overvoltage protection up to 70 VDC. To order overvoltage protection for F and G packages, add suffix "-OV" to the model number and add $90. to the price. Overvoltage protection is standard equipment on package H models and is included in the price.

To order F, G and H packages with both overvoltage and meters specify by adding suffix "-OV-M" to model number.

Examples LM-G-3-OV-M LM-F-4-OV-M

Chassis Slides
F, G and H packages are available with mounted chassis slides. Add suffix "-CS" to model number, and add $60. to the price of F and G models, $100. to the price of H models.

High Performance Specifications
All models available with these specifications:
Line regulation: .01% +1mV
Load regulation: .02% +2mV
Ripple and Noise: 0.5mV rms; 1.5mV p-to-p with 60 Hz input
Temperature Coefficient: .01%/°C

These high performance specifications are standard for all package H models and are included in the price. To order as an option on F and G packages, add suffix "-Y" to the model number and add $15.00 to the price.

AC Input Option
All models are available with 205--265 VAC input voltage at no extra cost. Add suffix "-V" to model number. (40°C rating not applicable.)

Fungus Proofing Option
All models available with fungus proofing with MIL-V-173 varnish for all fungi nutrient components.
To order add suffix "-R" to model number and add $15. to the price of F, G and H package models.

LM SERIES FULL RACK POWER SUPPLIES — F, G, H
PERFORMANCE DATA

Voltage Range — For voltage ranges see pages 28,29

Regulated Voltage.

Regulation (line) — 0.05% plus 4mV for line variations from 105-132 VAC. 0.01% plus 1.0 mV for line variations from 105-132 VAC. (Y option) *

(load) — 0.03% plus 3 mV load variations from 0 to full load. 0.02% plus 2 mV for load variations from 0 to full load. (Y option) *

Remote Programing
- Resistance ..... 200 ohms/volt; nominal
- Voltage ..... Volt per volt

Ripple and Noise .. 1 mV RMS, 3 mV p to p with either pos. or neg. terminal grounded. 0.5 mV RMS, 1.5 mV p to p with 60 Hz input. (Y option)*

Temperature coefficient ..... 0.03%/°C. 0.01%/°C. (Y option) *

Line .. 105-132 VAC: 45-440 Hz with 10% derating for 50 Hz operation.

Power:
Package F Models.... 900 watts(1)
Package G Models....1300 watts(1)
Package H Models....2200 watts(1)
(1)With output loaded to 40°C rating, input 132 VAC and 55-65 Hz

Continuous duty from −20°C to +71°C ambient with corresponding load current ratings for all modes of operation, and all mounting positions.

−55°C to +85°C.

Thermal ..... Thermostat; automatic reset when over-temp condition is eliminated.

Electrical:
External Overload Protection ..... Fixed, automatic electronic current limiting circuit limits the output current upon external overloads, including short circuit, thereby providing protection for load as well as power supply.

Heavy duty terminal block on rear of chassis.

DC output control ..... Simple screwdriver voltage adjustment over entire voltage range.

Remote Sensing .. Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Voltmeter and ammeter on metered models of packages F, G and H.

Weight ..... F Package Models
54 lbs. net; ....64 lbs. ship.
G Package Models
72 lbs. net; ....84 lbs. ship.
H Package Models
110 lbs. net; ..145 lbs. ship.

Finish ..... F, G and H Package Front Panels—Brushed aluminum clear anodized panels with grey inlay (standard).

Add Suffix "-Y", All F and G models available with these specifications for $15.00 extra: Line regulation .01 + 1 mV; Load regulation .02% + 2 mV; Ripple and Noise—with 60 Hz input: ½ mV rms; 1½ mV p to p; Temp. Coeff. .01%°C. These specifications are standard on all H packages and are included in the price.

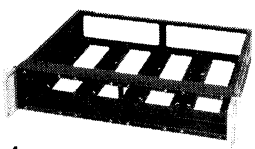
Add Suffix "-V"—All units are available with 205-265 VAC, 45-440 Hz at no extra charge. (40°C rating not applicable.)

Add Suffix "-R"—All models can be obtained with MIL-V-173 varnish for all fungi nutrient components at $15.00 surcharge.

Accessories for use with Lambda LM Series A, B, C, CC, D and E Packages.

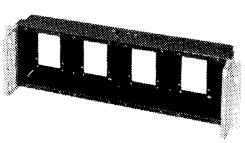
RACK ADAPTERS

LRA-5
3½" height by 2 7/16" depth. Price $35.00

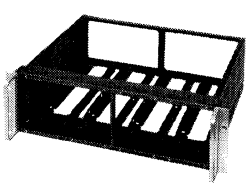


LRA-4
3½" height by 14" depth. (For use with chassis slides) Price $60.00

LRA-5 and LRA-4 mount the following combinations of LM models:
- up to 4 A package sizes
- 3 B or 3 C package sizes
- 2 A and 1 B or 1 C package sizes



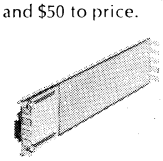
LRA-3
5¼" height by 2 7/16" depth. Price $35.00



LRA-6
5¼" height by 14" depth. (For use with chassis slides) Price $60.00

LRA-3 and LRA-6 mount the following combinations of LM models:
- up to 4 A, B or C package sizes
- 3CC package sizes (only in LRA-6)
- 2D or 2E package sizes
- 2A, B or C and 1CC or 1D or 1E package sizes
- 1 CC and 1 D or 1 E package sizes
- 1 D and 1 E package sizes

CHASSIS SLIDES FOR RACK ADAPTERS
Rack adapters LRA-4 and LRA-6 are available with chassis slides mounted (LAMBDA No. KHT-34-003)
Add suffix "-CS" to rack adapter model number and $50 to price.



OVERVOLTAGE PROTECTION ACCESSORY
ADJUSTABLE CROWBAR TYPE—$30

Mounting provisions provided . . . 2-terminal connection

Model	Adj. Volt. Range	Size: H x W x D	Price
LM-OV-1	3- 8 v	1¼" x 3⅜" x ⅝"	$30
LM-OV-2	6-20 v	1¼" x 3⅜" x ⅝"	$30
LM-OV-3	18-70 v	1¼" x 3⅜" x ⅝"	$30

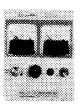
For use with A, B, C, CC, D and E Package LM power supplies with adjustable voltage ranges up to 70 VDC.

Packages F, G and H are available with overvoltage protection *built-in* ... see page 9.

¼ RACK METERED PANELS for use with rack adapters

(Include voltmeter, ammeter, screwdriver voltage adjust, switch, pilot light, fuse, fanning strip and cabling for connection to the module, and an auxiliary terminal board for customers' external connections)

Model MP-3 . . . 3½" height . . . for use with LM Packages A, B and C . . . Price $45.00



Model MP-5 . . . 5¼" height . . . for use with LM Packages A, B, C, CC, D and E . . . Price $45.00

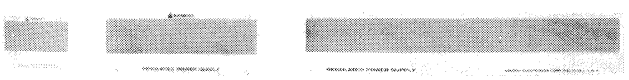
¼ RACK NON-METERED PANELS for use with rack adapters

(Include screwdriver voltage adjust, switch, pilot light, fuse, fanning strip and cabling for connection to the module, and an auxiliary terminal board for customers' external connections)

Model P-3 . . . 3½" height . . . for use with LM Packages A, B and C . . . Price $25.00

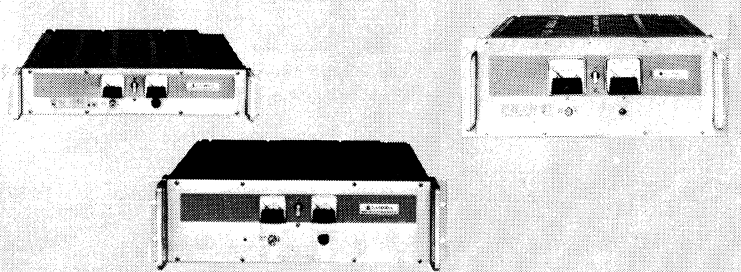
Model P-5 . . . 5¼" height . . . for use with LM Packages A, B, C, CC, D and E . . . Price $25.00

BLANK PANELS



Model LBP-60	3½" height, ¼ rack	Price $5.00	(For use with
Model LBP-50	3½" height, ½ rack	Price 10.00	rack adapters
Model LBP-30	3½" height, full rack	Price 10.00	LRA-4 and LRA-5)
Model LBP-10	5¼" height, ¼ rack	Price $5.00	(For use with
Model LBP-20	5¼" height, ½ rack	Price 10.00	rack adapters
Model LBP-40	5¼" height, full rack	Price 10.00	LRA-3 and LRA-6)

F, G and H PACKAGES



These are full rack power supplies available metered or non-metered. Overvoltage protection and mounted chassis slides are available as options.

Consult factory for additional accessories. Prices subject to change without notice.

LAMBDA ELECTRONICS CORP.
A Veeco SUBSIDIARY
515 BROAD HOLLOW ROAD, MELVILLE, L.I., NEW YORK 11746 TEL. 516-694-4200,TWX: 510-224-6484 CABLE: VEECOVAC PLAINVIEW NY

LC/LM SERIES COMPLETE POWER SUPPLY ASSEMBLY SYSTEMS OBSOLETE CUSTOM DESIGNED POWER SUPPLIES

- Lambda's dramatically new Power Supply Systems Concept eliminates the need for costly custom assembly designed multiple-output power supply systems. Select from the component power supplies described on pages 2-10 and assemble your system with these standard accessories:
- Overvoltage protectors
- Rack adapters
- Systems power control panels
- Systems metering panels
- Standard systems cables
- Chassis slides
- Assemble the system yourself or if you prefer, Lambda will assemble your power system for you.

YOU CAN OBTAIN:

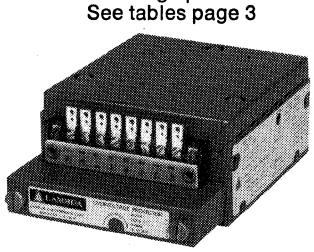
- Up to 8 separate outputs in a 1¾" high rack adapter.
- Up to 16 separate outputs in 3½" rack adapter.
- Up to 16 separate outputs in a 5¼" rack adapter.
- Use of standard mass-produced power supplies and accessories gives lower unit costs.
- Fast delivery. No waiting for custom design.
- Maximum flexibility for later design changes.
- Substantial discounts are available to Original Equipment Manufacturers under the Lambda Commercial Purchase Plan.
- Guaranteed 5 years whether you assemble or Lambda assembles.

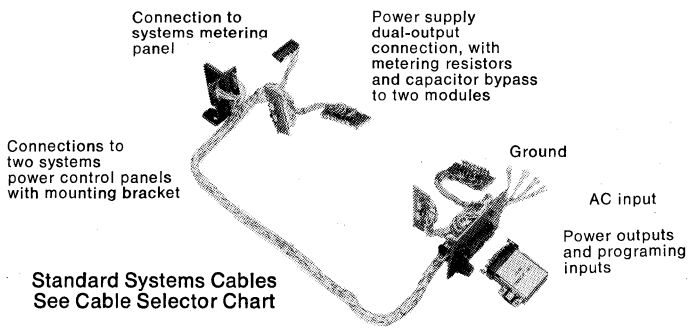
How to take advantage of LAMBDA's new "Select-don't-design" Power Supply Assembly Systems Concept.

1. List your power supply requirements.
2. Select the modules you need for proper voltages and currents . . . remember, you can series/parallel units.
3. Select the smallest rack adapter that will house your modules.
4. Select the necessary power control panels and metering panel.
5. Select the overvoltage protection units if required.
6. Select the cables you need.
7. Order the units or ask LAMBDA to assemble your system. Add 5% if LAMBDA assembles.

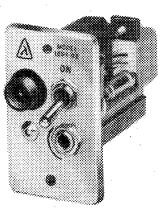
LC SERIES POWER SUPPLY ASSEMBLY SYSTEM WITH UP TO 8 OUTPUTS IN A 1¾" RACK

$3\frac{5}{32}$" x $3\frac{9}{32}$" x $1\frac{11}{16}$"
LC module with overvoltage protector
See tables page 3

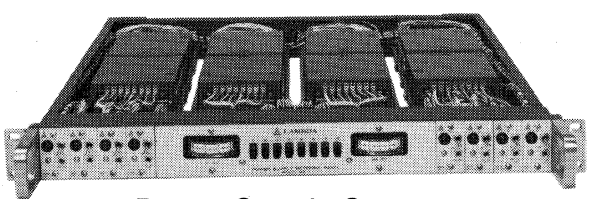




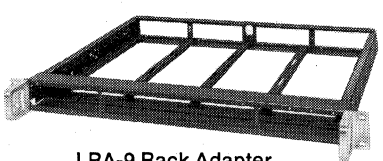
Standard Systems Cables
See Cable Selector Chart



SP-1 Systems
Power Control Panel,
Price: **$20**

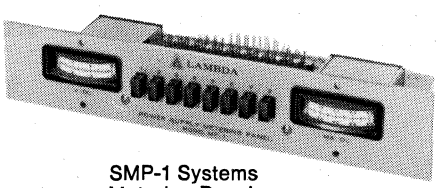


Power Supply System
1¾"x19"x14"

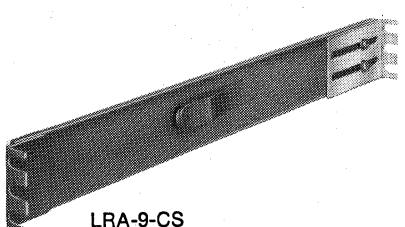


LRA-9 Rack Adapter,
Price: **$60**

5 Year Guarantee



SMP-1 Systems
Metering Panel,
Price: **$90**



LRA-9-CS
Chassis Slide,
Price: **$50** (pr.)

LAMBDA PAGE 14

Follow these simple steps to "Select-don't-Design" your own multiple-output power supply systems.

1. SELECT RACK ADAPTER

LRA-9 Rack Adapter—1¾" high x 14" deep .. Price: **$60**
To order chassis slide for use with a rack adapter, add suffix—CS to rack adapter model number (Example: LRA-9-CS). ..... Additional Price: **$50**

2. SELECT POWER SUPPLY MODULES

- Select any of the LCS-1 power supply modules listed on page 3.
- Utilize up to 8 units and obtain up to 8 different outputs.
- Connect these units in series or in parallel to get the voltages and currents you need.

3. SELECT OVERVOLTAGE PROTECTION (Optional)

- See table on page 3 for models and prices.

4. SELECT POWER CONTROL PANELS AND METERING PANEL

Systems Power Control Panels. For each power supply there should be a control panel which provides an ON-OFF switch, pilot light, and voltage output control. The control panel mounts on the front of the rack adapter—up to 8 panels may be used. Specify exact power supply module to be controlled by Systems Power Control Panel by adding model number of power supply module as suffix to model number of control panel (Example: SP-1-LCS-1-01).

SP-1 Systems Power Control Panel. For use with 1¾" Rack Adapter LRA-9 ..... Price: **$20**

Systems Metering Panels. Metering panels are available for use with rack adapters. The metering panel is optional.

Each Systems Metering Panel contains a voltmeter and an ammeter, each with three ranges, and a pushbutton selector switch. The selector switch allows monitoring of the voltage and current of any of up to 8 outputs. A barrier strip assembly is provided with each metering panel ordered. This barrier strip assembly mounts at the rear of the rack adapter for application of AC input power for the entire assembly.

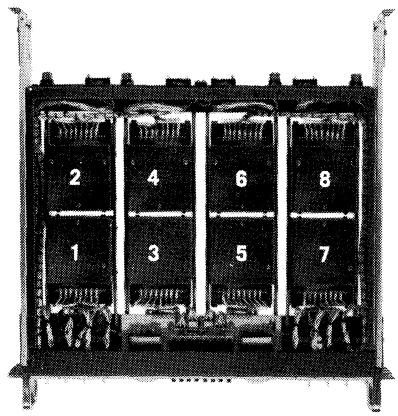
SMP-1 Systems Metering Panel. For use with 1¾" Rack Adapter LRA-9 ..... Price: **$90**

5. SELECT SYSTEMS OR AUXILIARY CABLES

Systems Cables. The standard systems cables provide interconnection between the power supplies, control panels and metering panel and provide all power supply outputs through a connector which mounts on the rear of the rack adapter. Each output connector is provided with a mate for customer use. Each cable has its own input line fuse.

Auxiliary Cables. When systems cables and metering panel are not used, auxiliary cables can be supplied for direct connection between any power module and a power control panel. In this instance the customer will supply his own input/output wiring.

POWER SUPPLY LOCATIONS • TOP VIEW



To Order Cables. When ordering cables it is necessary to refer to both the Cable Selector Chart and the power supply location diagram.

Step 1. Select the Systems Cables to connect the power supply modules which will be in the rack locations indicated in the table.

Step 2. If you decide not to use a metering panel, select the auxiliary cables you need from the Cable Selector Chart and the location diagram.

Cables for use with 1¾" Rack Adapter LRA-9

Systems Cables

SC-1 ..... Price: **$60**
SC-2 ..... Price: **$60**

Auxiliary Cables

SC-3 ..... Price: **$15**
SC-4 ..... Price: **$15**

6. SELECT BLANK PANELS

If you use fewer than 8 power supply modules in your design, or if you decide you want to control the power supply system remotely, you may order blank panels for the front of the LRA-9 Rack Adapter.

Blank Panel Model	Replaces	Prices
SB-1	1 SP panel	$ 2.50
SB-2	2 SP panels	5.00
SB-3	4 SP panels	10.00
SB-4	1 SMP panel	10.00
SB-5	All panels	10.00

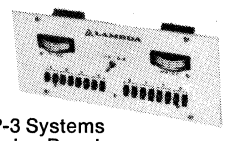
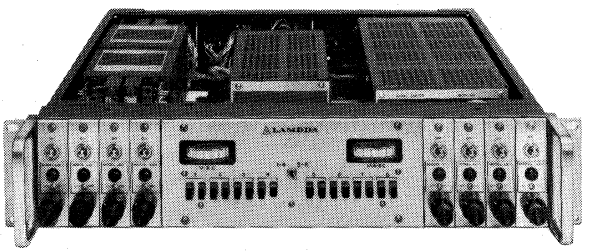
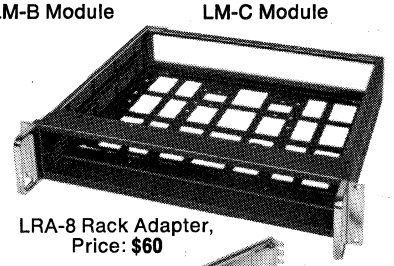
SP-3 Systems Power Control Panel, Price: **$20**



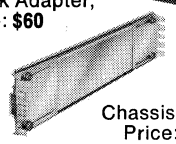
SMP-3 Systems Metering Panel, Price: **$100**



Power Supply System
3½" x 19" x 14"



LRA-8 Rack Adapter, Price: **$60**



Chassis Slide, Price: **$50**

Follow these simple steps to "Select-don't-Design" your own multiple-output power supply systems.

1. SELECT RACK ADAPTER

LRA-8 Rack Adapter—3½" high x 14" deep Price: **$60**
To order chassis slide for use with a rack adapter, add suffix -CS to rack adapter model number (Example: LRA-8-CS). Additional Price: **$50**

2. SELECT POWER SUPPLY MODULES

- Select any of the LCS-1, LCS-2 or LCD-2 power supply modules.
- Utilize up to 8 units per rack and obtain up to 16 different outputs by using 8 dual LC units.
- Utilize up to 4 LCD-A or 4 LM-A units per rack, to obtain a wider selection of current ratings.
- Utilize up to 3 LM-B units or 3 LM-C units to obtain more power, though fewer different outputs.
- Mix any of the above power supply modules to obtain the outputs needed. Suggestions are illustrated in the drawings on page 15.

Note: The lengths of the LCD-A, LM-A, LM-B or LM-C units are such that no other power supplies will fit with them in the front-to-back dimension of the LRA-8 rack.

3. SELECT OVERVOLTAGE PROTECTION (Optional)

See tables on pages 3 and 9 for models and prices.

4. SELECT POWER CONTROL PANELS AND METERING PANEL

Systems Power Control Panels. For each power supply there should be a control panel which provides an ON-OFF switch, pilot light, and voltage output control. The control panel mounts on the front of the rack adapter—up to 8 panels may be used. For dual output modules, a single control panel controls both outputs independently. Specify exact power supply module to be controlled by Systems Power Control Panel by adding model number of power supply module as suffix to model number of control panel (Example: SP-3-LCS-2-11).

SP-3 Systems Power Control Panel. For use with 3½" Rack Adapter LRA-8. Price: **$20**

Systems Metering Panels. Metering panels are available for use with rack adapters. The metering panel is optional.

Each Systems Metering Panel contains a voltmeter and an ammeter, each with three ranges, and a pushbutton selector switch. The selector switch allows monitoring of the voltage and current of any of up to 16 outputs. A barrier strip assembly is provided with each metering panel ordered. This barrier strip assembly mounts at the rear of the rack adapter for application of AC input power for the entire assembly.

SMP-3 Systems Metering Panel. For use with 3½" Rack Adapter LRA-8. Price: **$100**

5. SELECT SYSTEMS OR AUXILIARY CABLES

Systems Cables. The standard systems cables provide interconnection between the power supplies, control panels and metering panel as well as providing all power supply outputs through a connector which mounts on the rear of the rack adapter. Each output connector is provided with a mate for customer use. Each cable has its own input line fuse.

Auxiliary Cables. When systems cables and metering panel are not used, auxiliary cables can be supplied for direct connection between any power module and a power control panel. In this instance the customer will supply his own input/output wiring.

To Order Cables

When ordering cables it is necessary to refer to both the Cable Selector Chart and the power supply location diagram.

Step 1. Select the Systems cables to connect the power supply modules which will be in the rack locations indicated in the table.

Step 2. If you decide not to use a metering panel, select the auxiliary cables you need from the Cable Selector Chart and the location diagram.

Follow these simple steps to "Select-don't-Design" your own multiple-output power supply systems.

1. SELECT RACK ADAPTER

LRA-10 Rack Adapter—5½" high x 14" deep. Price: **$70**
To order chassis slide for use with a rack adapter, add suffix -CS to rack adapter model number (Example: LRA-10-CS). Additional Price: **$50.**

2. SELECT POWER SUPPLY MODULES

- Utilize up to 8 LCS-1, 8 LCS-2 or LCD-2 units per rack and obtain up to 16 different outputs.
- Utilize up to 4 LCD-A, 3 LC-4, 4 LM-A, 4 LM-B, 4 LM-C, 3 LM-CC or 2 LM-D power supply packages per rack.
- Utilize a wide combination of these units in any LRA-10 rack.
- Mix any of the above power supply modules to obtain the outputs needed. Suggestions are illustrated in the drawings on page 15.

Note: The lengths of the LCD-A, LM-A, LM-B, LM-C and LC-4 units are such that no other power supplies will fit in the front-to-back dimension of the LRA-10 rack.

3. SELECT OVERVOLTAGE PROTECTION (Optional)

See tables on pages 3 and 9 for models and prices.

4. SELECT POWER CONTROL PANELS AND METERING PANEL

Systems Power Control Panels. For each power supply there must be a control panel which provides an ON-OFF switch, pilot light, and voltage output control. The control panel mounts on the front of the rack adapter—up to 8 panels may be used. For dual output models, a single control panel controls both outputs simultaneously. Specify exact power supply module to be controlled by Systems Power Control Panel by adding model number of power supply module as suffix to model number of control panel (Example: SP-5-LM-D-4).

SP-5 Systems Power Control Panel. For use with 5¼" Rack Adapter LRA-10 Price: **$30**

Systems Metering Panels. Metering panels are available for use with rack adapters. The metering panel is optional.

Each Systems Metering Panel contains a voltmeter and an ammeter, each with three ranges, and a pushbutton selector switch. The selector switch allows monitoring of the voltage and current of any of up to 16 outputs. A barrier strip assembly is provided with each metering panel ordered. This barrier strip assembly mounts at the rear of the rack adapter for application of AC input power for the entire assembly.

SMP-5 Systems Metering Panel. For use with 5¼" Rack Adapter LRA-10 Price: **$100**

5. SELECT SYSTEMS OR AUXILIARY CABLES

Systems Cables. The standard systems cables provide interconnection between the power supplies, control panels and metering panel as well as providing all power supply outputs through a connector which mounts on the rear of the rack adapter. Each output connector is provided with a mate for customer use. Each cable has its own input line fuse.

Auxiliary Cables. When systems cabling and metering are not used, auxiliary cables can be supplied for direct connection between any power module and a power control panel. In this instance the customer will supply his own input/output wiring.

To Order Cables

When ordering cables it is necessary to refer to both the Cable Selector Chart and the power supply location diagram.

Step 1. Select the systems cables to connect the power supply modules which will be in the rack locations indicated in the table.

Step 2. If you decide not to use a metering panel, select the auxiliary cables you need from the Cable Selector Chart and the the location diagram.

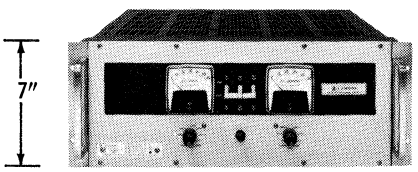
515 BROAD HOLLOW ROAD, MELVILLE, L.I., NEW YORK 11746 TEL. 516-694-4200,TWX: 510-224-6484 CABLE: VEECOVAC PLAINVIEW NY

LAMBDA POWER INSTRUMENTS

NEW LB SERIES HIGH-EFFICIENCY, HIGH-CURRENT POWER SUPPLIES



Built-in overvoltage protection is standard on all models up to 70 VDC

Electronic ripple reducer provides 6 mV ripple max.

- **Up to 125 volts; up to 300 amps.**
- **Convection cooled — no internal blowers.**

FEATURES

- **Up to 80% Efficiency**
- **Low Ripple** — 6 mV rms max.
- **All Silicon** design for maximum reliability
- **Convection Cooled** — no blowers, no external heat sinks
- **Overvoltage Protection** — standard on all models up to 70 VDC
- **Remotely programmable**
- **Remote sensing**
- **Transformer** — designed to MIL-T-27C Grade 6

LB SERIES, METERED, FULL-RACK — SIZE: 7" x 19" x 18¾"

Model	Voltage Range	MAX. CURRENT (Amps) AT AMBIENT OF[1] 40°C	50°C	60°C	71°C	Price[2]

- **Completely Protected** — Short circuit proof — Continuously adjustable automatic current limiting.
- **Constant I./Constant V.** by automatic crossover
- **Series/Parallel Operation**
- **AC Input:** 208 ±10% — VAC: 57-63 Hz, 3 phase 4 wire
- **Temperature Coefficient:** 0.03% +0.5 mV/°C
- **Guaranteed for 5 years:** The only 5-year guarantee that includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.
- **Multi-Current-Rated** for 40°C, 50°C, 60°C, 71°C

NOTES:

[1] Current rating applies over entire voltage range.

[2] Prices include meters. LB Series models are not available without meters. Prices for all models up to and including 60VDC include built-in overvoltage protection. Prices and specifications are subject to change without notice.

[3] Chassis Slides: Add suffix (-CS) to model number and add $100.00 to price.

LB SERIES UNIQUE SCR CIRCUITRY PROVIDES UP TO 80% EFFICIENCY IN A CONVECTION COOLED 7" PANEL HEIGHT PACKAGE

LB SERIES PERFORMANCE DATA

CONSTANT VOLTAGE:
DC OUTPUT
Regulated Voltage.
Regulation
(line): 0.05% +6 mV for line variations from 187 - 229 VAC or from 229 - 187 VAC.
(load): 0.1% +10 mV for load variations from 0 to full load.
Remote Programming
Resistance: 200 ohms/Volt.
Voltage: Volt per Volt.
Ripple and Noise: 6 mV RMS. max.
Temp. Coef.: .03% +.5 mV/°C.

CONSTANT CURRENT: (Current regulated line and load):
Automatic Crossover.
Voltage Range: As shown in tables.
Current Range: Zero to max. current as shown in tables.
Regulation (line and load combined): Less than 1% for Input Variations from 187 - 299 VAC or from 229 - 187 VAC and from 0 to 95% Eo load voltage change.
Ripple and Noise: Less than 0.1% RMS of load current either pos. or neg. terminal grounded.

AC INPUT: 208 ±10% VAC: 57 - 63 Hz, 3 phase ±10% max. phase unbalance, 4 wire. For operation at other than 57 - 63 Hz consult factory for ratings and specifications. (For 230 ±10% VAC operation, specify V option.)

EFFICIENCY: 70% for LB-701; 80% for LB-703.

AMBIENT OPERATING TEMPERATURE: Continuous duty from 0° to +71°C with load current rating shown in tables.

STORAGE TEMPERATURE: −55°C to +85°C.

LOAD TRANSIENT RESPONSE: 50 msec. to within 1% of Eo max. with load variations from 50% to 100% and 100% to 50% of load.

OVERLOAD PROTECTION
Thermal: Thermostat; requires resetting of circuit breaker to reenergize.
Electrical:
External Overload Protection: Adjustable, automatic electronic current limiting circuit limits the output current to the preset value, thereby providing protection for load as well as power supply. Current limiting settability too 110% of rated current.
Internal Failure Protection: Provided by primary circuit breaker.

INPUT CONNECTIONS: Terminal block on rear of chassis.

OUTPUT CONNECTIONS: Heavy duty studs on rear of chassis.

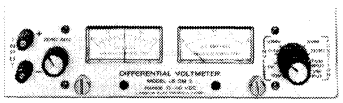
METERS: Independent Voltmeter and Ammeter with ±2% accuracy.

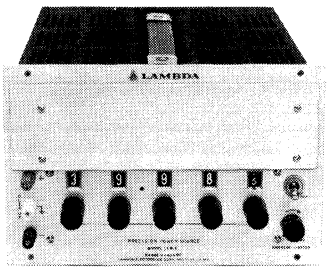
CONTROLS: (Consult Instruction Manual for specific instructions.)
DC output controls: Coarse and fine voltage adjust and coarse and fine current adjust on front panel.
Remote sensing: Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation up to 5 volts in each leg.
Power: Circuit breaker to protect against internal failure and to provide an on-off control on front panel. Pilot lamp on front panel energizes when circuit breaker is "on".

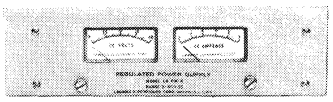
PHYSICAL DATA:
Weight: 185 lbs. net, 225 lbs. ship.
Panel Finish: Brushed aluminum clear anodized panels with grey inlay.
Chassis Finish: Grey, FED. STD. 595 No. 26081.
Size: 7" x 19" x 18¾".

LAMBDA PAGE 22

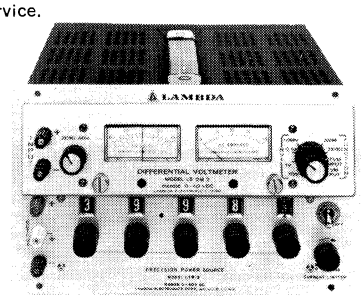
BASIC LS SERIES HIGH PRECISION POWER SOURCE



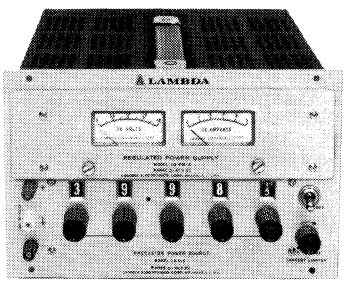




With this plug-in accessory it becomes a High Precision Power Differential Voltmeter that obsoletes any instrument now offered for this service.



With this plug-in accessory it becomes a Metered High Precision Power Supply that offers all these features:



LS Series High Precision Power Differential Voltmeter Data

Basic Non-Metered Model	Voltage Range	MAX. AMSP AT AMBIENT OF[1]				Price[2]	METERED ACCESSORY	
		30°C	40°C	50°C	60°C		Model	Price
LS-511	0-10VDC	2.8A	2.5A	2.1A	1.7A	$375	LS-DM1	$85
LS-512	0-20VDC	1.8A	1.6A	1.3A	1.1A	375	LS-DM2	85
LS-513	0-40VDC	1.0A	0.9A	0.75A	0.6A	375	LS-DM3	85
LS-515	0-120VDC	0.33A	0.29A	0.25A	0.21A	375	LS-DM5	85
LS-516	0-250VDC	0.1A	0.09A	0.08A	0.07A	380	LS-DM6	85

[1] Current rating applies over entire voltage range. Ratings based on 55-65 Hz operation. Derate current 10% for 50 Hz input.

[2] This price is for Precision Power Source only. Addition of Differential Voltmeter Accessory Plug-In (next two columns) is necessary for unit to function as High Precision Power Differential Voltmeter.

LS Series High Precision Power Supply Data

Basic Non-Metered Model	Voltage Range	MAX. AMSP AT AMBIENT OF[1]				Price[2]	METERED ACCESSORY	
		30°C	40°C	50°C	60°C		Model	Price
LS-511	0-10VDC	2.8A	2.5A	2.1A	1.7A	$375	LS-FM1	$55
LS-512	0-20VDC	1.8A	1.6A	1.3A	1.1A	375	LS-FM2	55

LS-516	0-250VDC	0.1A	0.09A	0.08A	0.07A	380	LS-FM6	55

[1] Current rating applies over entire voltage range. Ratings based on 55-65 Hz operating. Derate current 10% for 50 Hz input.

[2] This price is for non-metered Precision Power Source. Addition of Metered Accessory Plug-In (next two columns) is necessary to have Metered High Precision Power Supply.

OVERVOLTAGE PROTECTION

For Use With	Model	Adj. Volt. Range	Price
LS-511	LHOV-4	3-24 V	$35
LS-512	LHOV-4	3-24 V	$35
LS-513	LHOV-5	3-47 V	$35

- **Draw power as you measure voltage** — The first and only differential voltmeter to furnish high stability power output while being used as a voltmeter . . . no need for a separate power supply.
- **0.0005% plus 100 μV regulation** — Best of any high stability power supply in this price range.
- **Ripple** — 35 μV rms; 100 μV p-p.
- **0.01% +1mV accuracy**
- **Illuminated Digital Readout Millimatic (TM) gang dialing** — 5 digital voltage dials with automatic decade switching provides convenient precise adjustment (200 μV resolution over entire range).
- **2 meters** — Monitor both voltage and current simultaneously and continuously.
- **Guaranteed for 5 years** — The only 5-year guarantee that includes labor as well as parts. Guarantee applies to operation at full published specifications at end of 5 years.
- **Multi-Current-Rated** for 30°C, 40°C, 50°C, 60°C — Covers temperatures most often encountered in laboratory work.
- **5 Models** — With ranges of 0-10, 0-20, 0-40, 0-120, 0-250VDC — Wide selection of ranges to suit your specific needs.
- **Only 5¼" high** — Convenient half rack size for rack or bench use.
- **Stability** 0.001% +100 μV for 8 hours.
- **All-silicon design** for maximum reliability.
- **Convection-cooled** for convenience and reliability . . . no blowers or heat sinks.
- **Remote programming** by changes in voltage or resistance for convenience in systems, test equipment and automatic equipment applications.
- **Auto Series/Auto Parallel** with Master-Slave tracking
- **Constant I/Constant V** by automatic crossover.
- **Completely protected:** short-circuit proof; continuously adjustable automatic current limiting.
- **Overvoltage protection** available as low cost add-on accessory (see page 44).
- **Rubber Feet** provided for bench use.
- **Mount in Rack Adapters** — LRA-1 ($60.00) or LRA-2 ($35.00). Rack adapter LRA-1 only is available with chassis slides mounted. Add suffix "CS" to rack adapter model number and $50 to price.

- **Auto Series/Auto Parallel** with Master-Slave tracking.
- **Constant I/Constant V** by automatic cross-over.
- **Completely protected:** short-circuit proof; continuously adjustable automatic current limiting.
- **Overvoltage protection** available as low cost add-on accessory.

LR Series

DC OUTPUT:

Regulated Voltage

Regulation (line) ..... 0.0005% plus 100 μV for line variations from 105-132 VAC.
(load) ..... 0.0005% plus 100 μV for load variations from 0 to full load.
Remote Programming
Resistance ..... 1000 ohms/volt. nominal
Voltage ..... volt per volt.
Ripple and Noise ..... 35 μV RMS, 100 μV p to p with either pos. or neg. terminal grounded, with 60 Hz input.
Temp. coef.* ..... 0.001% plus 10 μV/°C

CONSTANT CURRENT: (Current regulated line or load):

Automatic Crossover:

Voltage Range ..... As shown in Tables.
Current Range ..... Continuously adjustable from 1% to 100% of 30° rating.
Regulation (line or load) Less than 2.0ma for input variations of 105-132 VAC and from 0 to rated VDC load voltage change.
Ripple and Noise ..... Less than 500 μa with either pos. or neg. terminal grounded.

OVERLOAD PROTECTION:

Thermal ..... Thermostat; automatic reset when over-temperature condition is removed.
Electrical: External
Overload Protection ..... Adjustable automatic electronic current limiting circuit limits the output current to the preset value, thereby providing protection for load as well as power supply. Current limiting settability to 105% of rated current.
Internal Failure
Protection ..... Provided by fuse.

* Remote programming mode only.

ACCURACY:* 0.01% plus 1mv at 25°C.

STABILITY:* 0.001% plus 100 μV over any 8-hour period after 30-minute warmup.

AMBIENT OPERATING TEMPERATURE: Continuous duty from 0° to +60°C with load current ratings shown in table.

STORAGE TEMPERATURE: −55°C to +85°C.

INPUT & OUTPUT CONNECTIONS: Covered DC output and AC input terminal blocks on rear of chassis.

CONTROLS: (Consult Instruction Manual for specific instructions.)

DC output control ..... Coarse and fine front panel concentric controls.
Current limiter ..... Coarse and fine front panel concentric controls.
Remote Sensing ..... Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation, rear panel.
Power ..... ON-OFF toggle switch, front panel.

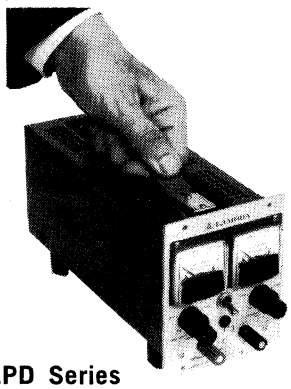
AC INPUT: 105-132 VAC, 47-440 Hz (derate dc output current 10% at 50 Hz). 205-265 VAC at no extra charge. ("-V" option).

PHYSICAL DATA:

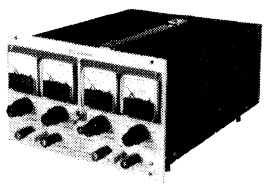
Size ..... LR-602-FM—606 FM
5 3/16"H x 4 3/16"W x 15½"D
LR-612-FM—616 FM
5 3/16"H x 8 3/8"W x 10⅝"D
Weight ..... LR-602-FM—606 FM
11 lbs. net; 14 lbs. ship.
LR-612-FM—16 FM
14 lbs. net; 17 lbs. ship.
Panel Finish ..... Brushed aluminum clear anodized panels with grey inlay (standard).

All specifications subject to change without notice.

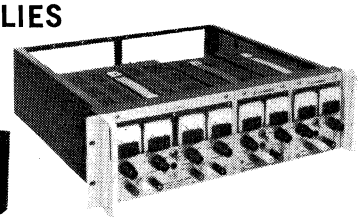
LP SERIES GENERAL PURPOSE/SINGLE OUTPUT
LPD SERIES GENERAL PURPOSE/DUAL OUTPUT POWER SUPPLIES



LP-414-FM



Two Single Output LP Models and one Dual Output LPD Models in a single rack.



Twice the voltage (up to 500 VDC) with outputs in series.
Twice the current (up to 3.4 amps) with outputs in parallel.

Features of LPD Series Dual Output Power Supply

- **5 Models with two independent DC outputs offer widest choice** — Up to ±250 VDC, up to 1.7 amps. Either output may be + or −, or both outputs may be + or −.
- **Series/Parallel operation** of both outputs yields two times the voltage or two times the current — up to 500 volts or up to 3.4 amps
- **Auto Series/Auto Parallel (master-slave)** permits tracking to a common reference
- **4 Meters** provide simultaneous monitoring of both voltage and current.
- **Most power** in a half-rack package
- **Most Amps per dollar**
- **Overvoltage Protection** as an accessory
- **Compatible** with LP, LH and LK Series rack adapters and other accessories
- **Multi-Current-Rated** — Only dual power supplies on market with this advanced design feature
- **Regulation** — .01% +1mV
- **Ripple** — 500 μV RMS (1.5 mV p-p)

Additional Features of LP and LPD Series

- **Guaranteed for 5 years.** Lambda is the only power supply manufacturer who provides a 5-year guarantee on materials and labor.
- **Regulation** (line or load) — .01% +1mV.
- **Ripple** — 500 μV RMS, 1.5mV p-p. Models LP-415 and LP-425-FM only: 1mV RMS, 3mV p-p.
- **Temperature Coefficient** — .015% +.5mV/°C.
- **A-C Input** — 105-132 VAC 47-440 Hz (ratings based on 57-63 Hz operation). For operation at 205-265 VAC, add suffix "-V" to model numbers. No change in price.
- **Multi-Current-Rated** at 30°C, 40°C, 50°C and 60°C.
- **Designed for bench and rack use.**
- **All silicon transistors.**
- **Series/parallel operation.**
- **Continuously variable.**
- **Remotely programmable.**
- **Constant voltage/constant current.**
- **Designed to meet RFI** per MIL STD 826A.
- **Remote sensing.**
- **Fungus Proofing Option** — Add suffix "R" to model number and add $15.00 to price.

LPD SERIES — Size 5 1/16" x 8 1/8" x 10 5/8"

Model	Voltage Range Per Output/ Outputs In Series - VDC	I MAX. AMPS AT AMBIENT OF[1] Per Output/Outputs in Parallel				Price (2)
		30°C	40°C	50°C	60°C	
*LPD-421-FM	0±20/0-40	1.7A/3.4A	1.5A/3.0A	1.3A/2.6A	0.9A/1.8A	$325
*LPD-422-FM	0±40/0-80	1.0A/2.0A	0.85A/1.7A	0.7A/1.4A	0.55A/1.1A	260
*LPD-423-FM	0±60/0-120	0.7A/1.4A	0.6A/1.2A	0.5A/1.0A	0.4A/0.8A	325
LPD-424-FM	0±120/0-240	0.38A/0.76A	0.32A/0.64A	0.26A/0.52A	0.20A/0.40A	325

LPD NOTES:
* Overvoltage Protection available as an accessory. Each output requires separate OV accessory — add $35.00 for each output.
[1] Current rating applies over entire voltage range. Ratings based on 57-63 Hz operation.
[2] Prices are for metered models. LPD Series models are not available without meters.

LP SERIES — Size 5 3/16" x 4 3/16" x 10"

Model	Voltage Range	CURRENT RANGE AT AMBIENT OF[1]				Price[2] U.S. and Canada
		30°C	40°C	50°C	60°C	
LP-410	0-10 VDC*	0-2A	0-1.8A	0-1.6A	0-1.4A	$129
LP-411	0-20 VDC*	0-1.2A	0-1.1A	0-1.0A	0-0.8A	119
LP-412	0-40 VDC*	0-0.70A	0-0.65A	0-0.60A	0-0.50A	114
LP-413	0-60 VDC*	0-0.45A	0-0.41A	0-0.37A	0-0.33A	129
LP-414	0-120 VDC	0-0.20A	0-0.18A	0-0.16A	0-0.12A	149
LP-415	0-250 VDC	0-80mA	0-72mA	0-65mA	0-60mA	164

LP NOTES:
* Overvoltage Protection available as an accessory — $35.00 each.
[1] Current rating applies over entire voltage range.
[2] Prices are for non-metered models. For metered models, add suffix (-FM) and Add $10.00 to price.

OVERVOLTAGE PROTECTION

For Use With	Model	Adj. Volt Range	Price*
LP-410; (0-10VDC)	LH-OV-4	3-24V	$35
LP-411; LPD-421-FM (0-20VDC)	LH-OV-4	3-24V	35
LP-412; LPD-422-FM (0-40VDC)	LH-OV-5	3-47V	35
LP-413; LPD-423-FM (0-60VDC)	LH-OV-6	3-70V	35

* Price is for a single overvoltage accessory. LPD Series models require one LHOV for each output.

LP AND LPD SERIES DATA

DC OUTPUT:
Regulated Voltage
Regulation (line or load) .....0.01% +1mV.
Current Range .....As shown in table.
Remote Programming
Resistance .....200 ohms/volt.
Voltage .....Volt per volt.
Ripple and noise .....500 μV RMS, 1.5mV p to p (either + or − terminal grounded). LP-415 and LP-425-FM models only — 1mV RMS, 3mV, p-p.
Temperature coefficient .....0.015% +0.5mV/°C.

CONSTANST CURRENT: **(Current regulated line and load)**
Automatic Crossover
Voltage Range .....As shown in table.
Current Range .....Min: 5mA or 1% whichever is greater. Max: as shown in table.
Regulation (line or load) .....Less than 0.2% or 5mA.

AC INPUT 105-132 VAC; 45-440 Hz.

OVERLOAD PROTECTION:
Thermal .....Thermostat, automatic reset.
Electrical: External Overload Protection Adjustable, automatic electronic current limiting, settable to 105% of rated current.
Internal Failure Protection .....Provided by fuse.

AMBIENT OPERATING TEMPERATURE Continuous duty from 0° to +60°C.

STORAGE TEMPERATURE −55°C to +85°C.

INPUT & OUTPUT CONNECTIONS: Covered terminal block on rear of chassis; five-way binding posts on front panel. On LPD models one set of five-way binding posts is provided for each output.

METERS: Voltmeter and ammeter. For LPD Models a voltmeter and ammeter is provided for each separate output.

LH-127A—128A	LH-OV-6	3-70VDC	35

NOTES: LK & LH Series

[1] Current rating applies over entire voltage range.

[2] Prices are for non-metered models (except for models LK-360-FM, LK-361-FM, and LK-362-FM which are metered models not available without meters). For metered models, add suffix (-FM) and add $30.00 to price.

[3] Overvoltage Protection up to 70 VDC is available as a bolt-on accessory for models with suffix (A). To order, see chart. For full-rack models, overvoltage protection up to 70 VDC is available as a built-in option. To order add suffix (-OV) and add $90.00 to price of models LK-350-352; add $120.00 for models LK-360-FM-362-FM.

[4] Chassis Slides for full rack models: Add suffix (-CS) to model number and add $60.00 to the price, except for models LK-360-FM-LK-362-FM, for which add $100.00

FEATURES AND DATA

- **All Silicon**
- **Convection Cooled — no blowers, no external heat sinks**
- **Overvoltage Protection** — Available for all models up to 70 VDC
- **Remotely Programmable**
- **Remote Sensing**
- **Temperature Coefficient** .015%/°C +.5mV/°C
- **Transformer** — designed to MIL-T-27 Grade 6
- **Completely Protected** — Short circuit proof — Continuously adjustable automatic current limiting
- **Constant I./Constant V.** by automatic crossover
- **Meet Mil. Environment Specs.**
  Vibration: MIL-T-4807A
  Shock: MIL-E-4970A Proc. 1 & 2
  Humidity: MIL-STD-810 Meth. 507
  Temp. Shock: MIL-E-5272C (ASG) Proc. 1
  Altitude: MIL-E-4970A (ASG) Proc. 1
  Marking: MIL-STD-130
  Quality: MIL-Q-9858
- **Series/Parallel Operation**
- **No Voltage Spikes or Overshoot** on "turn on", "turn off" or power failure
- **Wide Input Voltage and Frequency Range** —
  Models LK 360 FM, LK 361 FM, 362 FM — 188-238 VAC, 57-63 Hz
  Other LK models — 105-132 VAC, 57-63 Hz
  LH models — 105-135 VAC, 45-480 Hz
- **LH models meet RFI Spec.** — Mil-I-16910
- **AC Input Option** — For operation at 205-265 VAC, add suffix "-V" to model numbers. No change in price.
- **Fungus Proofing Option** — Add suffix "R" to model number and add $20.00 to price.

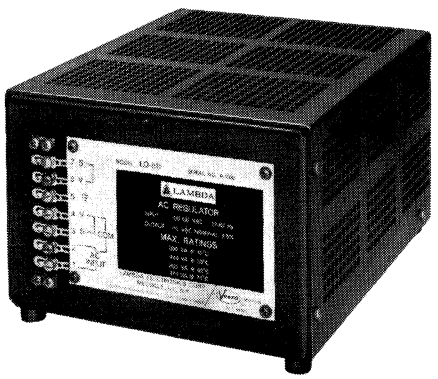
LAMBDA PAGE 26

LAMBDA

NEW solid state ac power conditioner

LD series

• less than 1% regulation, line or load • less than 3% distortion



Lambda LD Series AC Power Conditioner

FEATURES

- **Regulation**, Line or load: less than 1%
- **Response Time:** Less than 50 msec.
- **All Silicon Semiconductors**
- **Convection Cooled**—No external heat sinks
- **Sinusolidal Output**—Less than 3% distortion
- **High Efficiency**—Greater than 80%
- **Wide Power Factor Range:** +0.7 PF leading to 0 PF lagging
- **Remote Sensing**
- **Adjustable Output Voltage**
- **Multi-Current-Rated:** 40°, 50°, 60°, 71°
- **Wide Frequency Range:** 57-63 Hz
- **Wide Temperature Range:** 0 to 71°C
- **Automatic Current Limiting**: Protects load as well as power supply
- **Completely Repairable**—All components replaceable
- **Guaranteeed For 5 Years**—Material *and* labor
- **Mounting Flexibility**—Can be mounted on any of three mutually perpendicular planes, and in any position... mounting not influenced by heat sink or air flow considerations.

DESCRIPTION

Lambda, the world's largest unit producer of DC power supplies, now offers a new line of solid state AC Power Line Conditioners for use with electronic test equipment, electronic systems, lighting and heating equipment, motor starting controls, measurement instrumentation and other applications where AC line conditioning is required.

The new Lambda Power Conditioners, LD Series, feature a unique circuitry design that provides fast acting RMS regulation independent of power factor and input frequency. Efficiency is greater than 80%.

The LD Series has current limiting with time delay for starting lamps and small motors with minimum voltage dip. The automatic current limiting circuit limits the output current to within 140% of the 40°C current rating at short circuit, providing protection for the load as well as the power supply.

The new LD Series has a wide power factor range from 0.7 PF leading to 0 PF lagging, and is multi-current-rated to 71°C, with no external heat sinks.

The LD Series is all silicon and convection cooled and is designed to meet conducted portions of MIL-STD-461 for RFI/EMI.

Other features include automatic overload resetting, thermostat protection and remote sensing. The unit is fully repairable and is fully guaranteed for 5 years to rated specifications for *both* material and labor.

LD SERIES

Size: 4 15/16" x 7½" x 9⅜"

MODEL	MAXIMUM VA AT AMBIENT TEMPERATURE

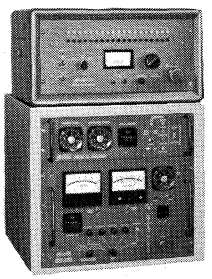
MACARR, INC.

Specialists in Reliable State-of-the-Art Static Power & Control Equipment

BATTERY SERVICE AND ANALYSIS EQUIPMENT

Complete line of units for testing, evaluation, and maintenance of all types of batteries (nickel cadmium, silver zinc, lead acid, silver cadmium, etc.), in all ratings.

Standard and Custom Units for Industrial and Military Applications.



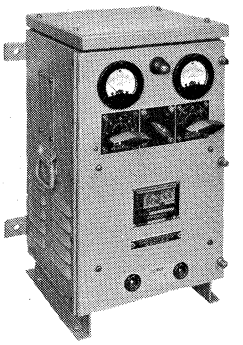
Model 50 Cell-Scanner Individual Cell Performance Tested Automatically. 19 Cells — Adjustable Failure Voltage 0.5 to 2.0 Volts. Model 50 A — 23 Cells.

ANDAC Battery Charger, Discharger, Analyzer. Model 12-30. 1-101 0-30 V, 0-30 A.

COMPLETE LINE OF BATTERY CHARGING EQUIPMENT

High performance chargers for use with aircraft batteries, all types of Alkaline batteries, fork lift truck batteries, central station and microwave station batteries, etc.

Standard and Custom/ Commercial & Military Units.

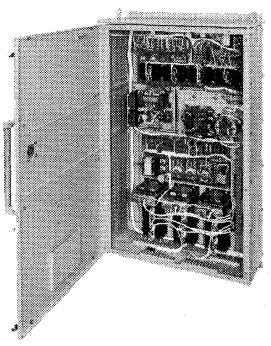


40 — 30 BCN Multi-Purpose Portable Charger 6, 8, 12, 24, 36 Volts up to 30 A Mil-B-24095

MOTOR GENERATOR CONTROL EQUIPMENT

Standard and Custom Units for Naval Shipboard and other applications. Ratings to 200 KW, DC & AC.

A.C. Variable Speed Drive Systems. Ratings from 10-200 HP. For centrifugal pumping applications of all fluids. Standard and Custom Designs.

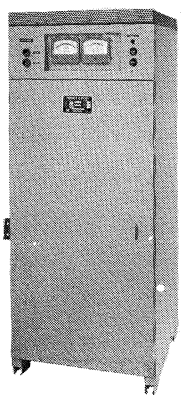


Control Panel 5 KW 60 to 400 Cycle. Precise Frequency Voltage Regulated Naval Shipboard Motor Generator System.

INDUSTRIAL POWER SUPPLIES FOR ELECTROPLATING AND OTHER APPLICATIONS

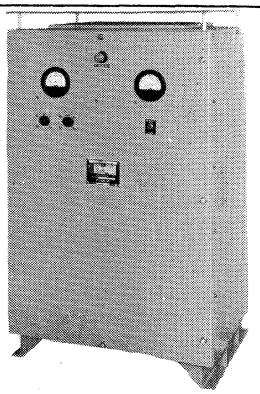
Unregulated and regulated units utilizing Solid State and Magnetic Power Control.

Standard and Custom Units to 500 Volts and 20,000 Amperes.



D.C. POWER SUPPLIES

Unregulated and regulated types. For ground power, industrial, computer, general purpose and special purpose applications. Complete line of Zenon lamp Supplies and igniters to 25 KW. Regulated units utilize magnetic, controlled rectifiers, transistors for power control. Standard and custom units for commercial and military applications. To 1000 Volts and 20,000 Amperes.



Precisely Regulated Power Supply for Naval Shipboard Helicopter Starting and Servicing. 28 V 450 A

Solid State Inverters, Converters and Frequency Changers. Complete uninterrupted power supplies from 1 to 15 KVA. Standard and Custom Units for Commercial and Military Applications.

Complete "In House" design and manufacturing facility. Quality Assurance under Mil-Q-9858 and Mil-I-45208. Call or write regarding your power problems.

MALLORY BATTERIES

DURACELL® Alkaline Batteries

Construction

Improved alkaline manganese construction — A new internal construction increases the surface area of the anode in relation to cell volume. Conductivity of Mallory Alkaline Manganese batteries is thus improved and impedance is lowered. The result — more hours of service at heavier loads and lower temperatures. The case and case seal also have been redesigned to give improved protection at both the top and bottom, producing additional compression points in the joints to provide physical stability even under severe vibration.

New flat configuration — Mallory Alkaline Manganese batteries, available in all standard sizes in the cylindrical configuration, are now also available in some special sizes in a flat configuration.

Designation and Characteristics

Cell Designation	Std. Size	Nom. Volts	Diam. In.	Ht./In.	Approx. Wt./Oz.
Mn-1300	D	1.5	1.31	2.37	5.03
Mn-1400	C	1.5	1.02	1.94	2.34
Mn-1500	AA	1.5	0.55	1.96	.82
Mn-2400	AAA	1.5	0.40	1.74	.40
Mn-9100	N	1.5	0.46	1.12	.34
Px-825	—	1.5	0.90	0.22	.25

Other Mallory High-Energy Battery Systems

Mallory manufactures many other basic battery systems • Among these are **low voltage systems** — either 0.9 or 0.5 volts nominal rated output • **Silver oxide types** — 1.50 volts for use in hearing aids •

Mallory Battery Engineering Service

The Mallory Battery Company has a staff of battery applications engineers available as a service to designers. This group has extensive experience with product design problems involving electrochemical power sources of all types. To take advantage of their services including battery design consulting service, drawings, specifications and prototype samples, please write to the Technical Sales Department, Mallory Battery Company, a division of P. R. Mallory & Co., Inc., South Broadway, Tarrytown, New York 10591. Or telephone 914 - 591-7000.

© P. R. MALLORY & CO., INC. 1969

Standard Mallory components are available from authorized Mallory distributors throughout the United States.

MALLORY BATTERIES

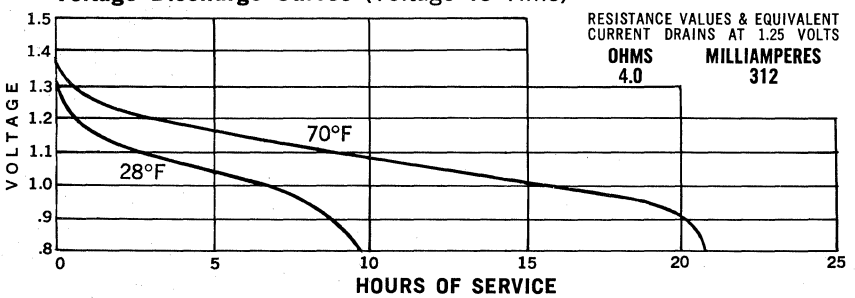
DURACELL® Reserve Alkaline Batteries

In this battery the electrolyte is stored separately from the active electrochemical components, resulting in extraordinarily long shelf life. The battery may be activated upon demand by twisting the top terminal cap which puts the battery into service by releasing the electrolyte into the cell. This alkaline managanese cell utilizes a new concept in anode design which exhibits high efficiency over a wide temperature range. Momentary high current pulses in the range of 12 to 15 amperes are possible. Activation time is approximately 2 seconds when the cell is not under load. When under a 4 ohm load, the activation time to a 1.35 volt level is less than 19 seconds at 70°F and less than 30 seconds at 30°F. Suggested applications are emergency lighting and communications equipment, military ordnance devices and in any use where long shelf life is of prime importance.

Specifications:

Nominal Voltage:	1.50
Rated Capacity:	6000 mah
Rated Capacity At:	0 to 500 ma
Diameter:	1.285 ±.005
Height:	2.367 ±.015
Volume:	4.1 cu. in.
Weight:	4.25 oz.

Voltage Discharge Curves (Voltage vs Time)



DURACELL® Rechargeable Alkaline Batteries

Mallory Duracell® Rechargeable Alkaline Batteries, properly used and charged, provide a practical rechargeable battery system at a fraction of the cost of other rechargeable systems. Electrically and dimensionally interchangeable with standard "D", "C" and "AA" zinc carbon and managanese alkaline primary batteries, they may be directly substituted for these battery types in many consumer and industrial equipments where low initial and operation costs are required, such as: portable battery operated television receivers, radios, phonographs, tape recorders, cameras, flashlights, lanterns, toys, cordless small appliances, etc. They should not be used as replacements in equipment, such as certain power tools, razors, toothbrushes, carving knives, etc., in which nickel cadmium batteries were originally used.

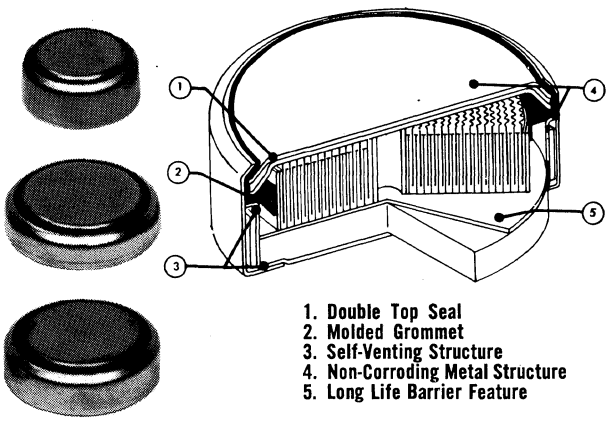
Mercury Cells — Medium to Low Temperature



1. Double Top Seal
2. Molded Grommet
3. Self-Venting Structure
4. Non-Corroding Metal Structure
5. Long Life Barrier Feature

Applications

This cell packages up to 45 watt hours per pound, with numerous applications in the field of air-sea-rescue transceivers, emergency beacons, etc.

The long shelf life allows storage of battery packages in bunkers of rescue boats, life rafts, survival kits, and depots and caches. The Sonobuoy development program will benefit greatly from this unit. The cell is electrically quiet, and is capable of being checked prior to target missions and subsequent use. Recommended uses are in navigational buoys, subsea countermeasures, oceanographic devices, etc., especially where service requirements are greater than 72 hours of duty. The cells can be turned off without interim internal capacity losses. The economies in operation which are effected are significant due to the high efficiency of these cells.

Marker lights, intermittent stroboscopic flash devices, fuses, telemetry devices, remotely operated unattended stations requiring small blocks of power for warning devices, relay trips, etc.

As a consequence of the extended temperature range, moon missiles and satellites which have radiation controlled temperatures in the area of 0°F. to 160°F. will provide greater data transmission time during flight. No pressure containers are required since cells will operate in complete vacuum. Ground testing prior to shots will indicate flight performance.

HT 100-1	169.00	HTA 100- .75	169.00

NOTE: The digits of the Model Number indicate the output voltage and current in amps. Example: HT 6-4 has an output voltage of 6 and current of 4 amps. HT 12-4 has an output of 12 volts at 4 amps.

■ About Mid-Eastern Industries

Mid-Eastern's engineering experience in the design and manufacture of standard and custom power supplies covers a span of 10 years. Over this period Mid-Eastern power supplies have proven their performance in computers, data processing, communications, nuclear research, machine tools; medical apparatus, ground support equipment, process controls and many other special applications.

Mid-Eastern engineers have to their credit the solution of many difficult engineering problems. Superior engineering has been applied to all Mid-Eastern power supplies with the result that every unit meets the high standards of reliability and quality of the most exacting customer. Ease of checkout, calibration, and maintenance is maintained in each model by the use of interchangeable plug-ins and modular design. Complete step-by-step trouble shooting and adjustment procedures, schematics, and comprehensive parts data are provided with all standard power supplies.

Along with technical competence, Mid-Eastern offers you the advantages of doing business with a customer-oriented organization. Not only do we want you to buy our equipment, but we want you to be secure in the knowledge that we stand behind it with an integrity and reliability that goes beyond the legal terms of our warranty. We have earned the confidence our customers have in us.

Prices include: meters, case, carry handle, and rubber feet. Options: overvoltage, 10-turn potentiometers, and special input voltage.

■ How to Order

The power supplies in this catalog are all standard production units and are delivered from stock (normally within 7 days). Call your local Mid-Eastern representative for complete information on price and delivery schedules. A list of representatives is included for your convenience.
In order to avoid delay, use the full model number when ordering your supply. Unless otherwise specified, orders are shipped via motor freight or UPS.

■ Warranty

Mid-Eastern power supplies are backed by an unconditional repair or replacement warranty for one year after date of sale.

■ Applications Assistance

If you are uncertain as to which ME power supply best meets your existing or anticipated need, please consult the factory or your nearest representative. Mid-Eastern power supply experts will welcome the opportunity to assist you and to recommend the best supply for your use.

■ Other Mid-Eastern Products

In addition to standard power supplies, Mid-Eastern manufactures custom-made power supplies and standard and custom diversity combiners. Detailed information on this other equipment is available upon request.

MS High Power System Component Power Supplies

■ Features

Most Complete Coverage
Up to 600 Volts
Up to 1200 Amperes
139 Standard Models

Low Cost
All Solid State
Extreme Reliability
10 Year Guarantee

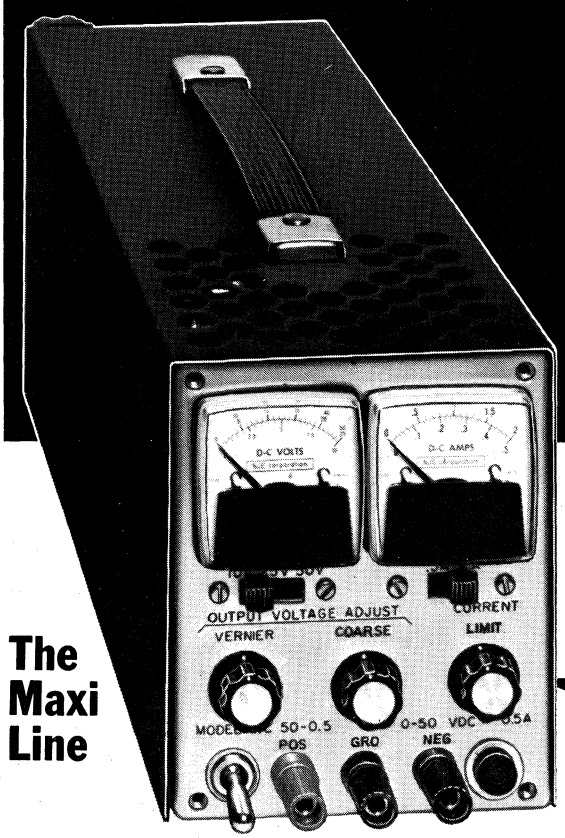
Options include: meters, overvoltage, 10-turn potentiometers, and special input voltages.

LAB POWER

New PVC Power Supply



The Maxi Line

Voltage	Current	
0-10V DC	2A	4A
0-20V DC	1A	2A
0-50V DC	0.5A	1.0A

with these features

- Voltage / Current Crossover
- Three (3) Range Voltmeter
- Three (3) Range Ammeter
- Plug-in Amplifiers with I. C.
- Precision Current Regulation
- Mil-T-27A Transformer
- Remote Voltage or Resistance Programming
- Master Slave Series / Parallel
- Available in Singles & Duals

NJE CORPORATION
Electronic Development & Manufacturing

TELEFAX: FFP • TWX: (710) 996-5967

380A

A subsidiary of ***CONDEC*** *Corporation*

The "MINI" power supply with the "MINI" price. $124

SINGLE OUTPUT, 1/4 RACK

3 Models with ranges up to 0-50V plus:

- Three-range voltmeter
- Dual-range ammeter
- Coarse/fine voltage adjust (3, 5, 7 mv resolution)
- Master slave series/parallel
- Adjustable current regulation
- Mil-T-27A grade transformers
- All-silicon construction
- Dual-tracking outputs

Model	Voltage	Current	Resolution	Weight	Size (Inches)	Price (4)
LVC10-2	0-10V	0-2A	3 mv	11 lbs.	4¾ (H) 4 (W) 12 (D)	$124.00
LVC20-1	0-20V	0-1A	5 mv

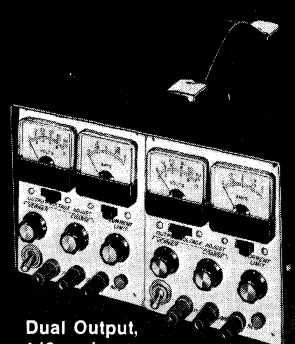
2LVC10-2	0-10V Dual (1)	0-2A Dual	3 mv	22 lbs.	4¾ (H) 8¼ (W) 12 (D)	$248.00
	0-20V (2)	0-2A				
	0-10V (3)	0-4A				
2LVC20-1	0-20V Dual (1)	0-1A Dual	5 mv	22 lbs.	4¾ (H) 8¼ (W) 12 (D)	$248.00
	0-40V (2)	0-1A				
	0-20V (3)	0-2A				
2LVC50-.5	0-50V Dual (1)	0-.5A Dual	7 mv	22 lbs.	4¾ (H) 8¼ (W) 12 (D)	$248.00
	0-100V (2)	0-.5A				
	0-50V (3)	0-1A				

(1) Dual outputs consist of (2) separate isolated power supplies.
(2) Series outputs by connecting units in series.
(3) Parallel outputs by connecting outputs and single master unit.
(4) Effective Sept. 1, 1968.



Dual Output, 1/2 rack, $248.

IMMEDIATE DELIVERY • 10 YEAR WARRANTY

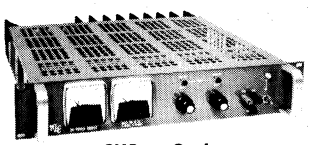
POWER SUPPLIES

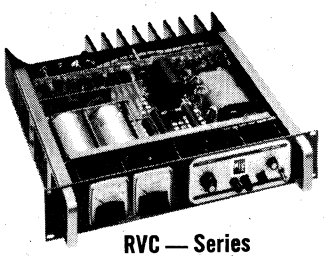
LVC — Series

- Three-Range Voltmeter
- Dual-Range Ammeter
- Coarse/Fine Voltage Adjust
- Master Slave Series/Parallel
- Adjustable Current Limiting
- Mil-T-27 Grade Transformers
- All-Silicon Construction
- Dual-Tracking Outputs



SVC — Series

- All Silicon Design
- Regulated Voltage and / or Current
- Mode Indicator Lamps
- 0-71°C Operating
- 0-20V, 0-40V, 0-60V, 0-125V units



RVC — Series

- Regulated Voltage and/or Current
- 0-36 Volt Supplies
- 0-50°C Operating
- 50 microsecond response

New NJE SC series power supplies

For years we've been selling reliable laboratory power supplies at popular prices. Now you can also get these modular power supplies at our popular prices.

SC series sub-rack power supplies

- 4 basic package sizes (SCA, SCB, SCC, SCE).
- 3 different mounting surfaces (each module).
- Convection cooled – no external heat sinking required.
- Fit into racks as small as 3½" high.
- Current limiting automatic short circuit protection.
- Remote voltage adjustment, remote sensing – both standard.
- Five-year unconditional guarantee.
- All-silicon semi-conductors.
- Over voltage option available.

Specifications
Input: 105-125V AC, 47-440 cps
Regulation (Line and Load Combined): ±0.05% or 2mv, whichever is greater.
Ripple: 1 mv rms
Response Time: 20 μsecs.
Temperature Coefficient: 0.015%/°C or 1.8mv/°C, whichever is greater.
Temperature: 75°C max

Remote voltage adjustment and remote sensing are standard. Overvoltage protection and metered panels available as options. Series start is standard on SCB, SCC and SCE and available as an option on SCA models.

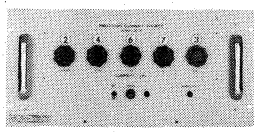
PRECISION POWER SOURCES

AC and DC constant current — constant voltage

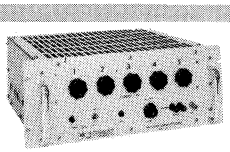


GENERAL PURPOSE DC CONSTANT CURRENT SOURCES — For Transistor, Zener, Rectifier PIV Tests. Magnetic Field Control.

Programmable constant current sources with stability as good as 0.05%. All solid state except the CS-120 which is hybrid. Major applications: C-1, compact electromagnet field supply; CS-111, transistor and zener testing; CS-120, rectifier PIV and high voltage transistor measurements. The CS-111 and CS-120 may be modulated.

Other applications include testing of relays, solenoids, magnetic, resistive and other current sensitive components.

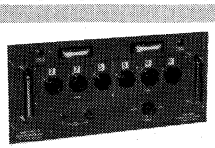
Model No.	Current Range mA	Voltage Range V	Readout Digits	Regulation %
C -1	0 - 2000	0 - 100	Pot.	0.1
CS - 111	0 - 500	0 - 250	6	0.01
CS - 120	0 - 10	0 - 2000	5	0.07



PRECISION DC CONSTANT CURRENT SOURCES — For Gyro Torquing, Semiconductor Tests, Calibration.

Programmable constant current sources in the 0.005% stability class. Digital current readout with 1 μA resolution, superior performance at low currents with zero current adjustment. Modulation capability with scale factor of 1 V/10% of current setting. Internal reference and sensitive control circuitry housed in temperature-regulated enclosure. Low temperature coefficient wirewound current sensing resistors. 0.02% absolute accuracy. 20 ppm current regulation from short-circuit to maximum output voltage. All solid state.

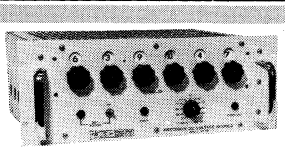
Model No.	Current Range mA	Voltage Range V	No. of Decades
CS - 11	0 - 100	0 - 100	5
CS - 12	0 - 1000	0 - 12.5	6



DC HIGH CURRENT-HIGH VOLTAGE SOURCES — For Capacitor Forming.

Solid state units are employed in the forming and testing of tantalum and other electrolytic capacitors, for plasma measurements, and as magnetic and power bridge supplies. Automatic switchover from constant current to constant voltage at predetermined values.

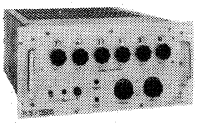
Model No.	Current Range A	Voltage Range V	Regulation %
CVS - 150 (300 - 6)	0 - 6	0 - 300	0.1
CVS - 150 (1000 - 4)	0 - 4	0 - 1000	0.1



DC CONSTANT VOLTAGE SOURCES — For General Calibration.

Constant voltage sources with modulation capability and digital, in-line readout. Used for general calibration purposes, the units are completely solid state, have excellent regulation and reliability. Internal reference and sensitive control circuitry housed in temperature regulated oven.

Model No.	Voltage Range V	Current mA	Regulation %	Accuracy %
VS - 35	0 - 111.1	0 - 100	0.0025	0.01
VS - 36	0 - 21.1	0 - 1000	0.0025	0.01

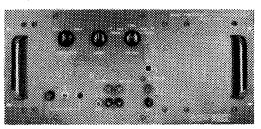


ULTRA STABLE DC CONSTANT CURRENT SOURCES — For Gyro Torquer Supply, IC Testing.

Constant current sources in 5 ppm stability class. Digital readout with 1 ppm resolution. Superior low current operation and line isolation. Modulation above and below zero output or about dc level. Regulation 0.0005%. Accuracy 0.01%.

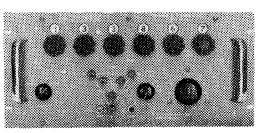
Unique performance made possible by selecting and aging critical components, proportional oven control, elaborate shielding and patented circuitry. Widely used for sophisticated testing of inertial quality gyros, IC's, reference zeners, and other precision current sensitive devices.

Model No.	Current Range mA	Voltage Range V	No. of Decades
CS - 151	0 - 10	0 ± 10	6
CS - 152	0 - 150	0 ± 25	6
CS - 153	0 - 150	0 ± 100	6



PRECISION MICRO-SYN AC SUPPLIES Highly regulated series of single-phase 25 VA sources in 0.1% stability class. Output at either of two preset frequencies in 0.4 to 10 kHz range. Tight phase-lock to external reference frequency signal. Automatic switchover to internal oscillators in the event of reference failure. Four-terminal sensing assures constant voltage at remote load terminals. Short-circuit protection with automatic recovery. Multiple output voltage modes with fixed and variable levels.

Model No.	Frequencies* Hz	Full-scale Levels* V rms
VS - 78	800 & 9600	10 & 50
VS - 93	800 & 3200	10 & 50
VS - 94	800 & 9600	28 & 60
VS - 95	800 & 3200	28 & 60



PRECISION AC POWER SOURCES - CONSTANT VOLTAGE — For Gyro Wheel or Synchro Supply.

Well regulated units supply 2 or 3 phase power of 25 VA per phase. Output at any specified frequency in 0.4 to 10 kHz range. Stability of output from 0.1% to 0.005% depending on unit selected. Four terminal sensing for constant voltage at remote load. Short circuit protection with automatic recovery. Multiple output voltage modes with fixed and variable levels.

Model No.	Frequencies* Hz	Full-scale Levels* V rms
VS - 66	1200	50
VS - 92	800	50
VS - 76	400 & 800	30

AC CONSTANT CURRENT SOURCES — For Fuel Cell Impedance Measurements and Other Current Sensitive Devices.

Supply ac constant current at 60, 400, and 1000 Hz. Regulation and stability 0.1%. Model CS-180 supplies 100 mA at 0 - 5 V rms.

*Other frequencies, voltages, power available on special order.

PEERLESS ELECTRICAL PRODUCTS

CUSTOM POWER SUPPLIES

Designed to Your Requirements

Peerless power supplies are available with DC or AC inputs. AC inputs are normally 60 or 400 cps; DC outputs extend to 10 ma or higher. Regulation values normally range from 5% to 10% from no load to full load; peak-to-peak ripple voltages may be less than 1% of output voltage within this range. When required, closer tolerances can be supplied.

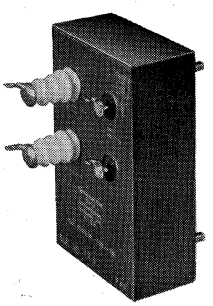
Peerless power supplies can be packaged to meet any operating requirements from commercial to Mil. Spec. And, their dimensions and configurations may also vary to meet specific volume requirements. For complex applications, Peerless has designed and manufactured power supplies that provide two or more outputs, operate in ambients up to 125°C and withstand shocks up to 50 G's. Whether your requirements are conventional or exotic, Peerless can solve the design problems and manufacture in quantity to your exact specifications.

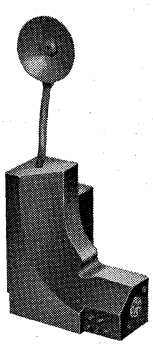
Typical examples of Peerless solutions to unique power supply requirements are shown on this page.

EXAMPLE 14

HIGH VOLTAGE POWER SUPPLY, EPOXY FILLED TO CONFORM TO MIL SPECIFICATIONS

- **Input:** 115 v, 400 cps
- **Output:** 5,000 v DC @ 1 ma
- **Regulation:** 600 v max., 0 load to full load
- **Ripple:** 500 v max., peak-to-peak
- **Packaging:** Conforms to the requirements of MIL-T-27A, Grade 4, Class R, Life X
- **Dimensions (max.):** 3¼" H x 2⅛" W x 4" D
- **Weight:** 1.25 lbs.

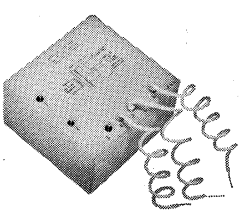




EXAMPLE 15

SPECIAL SHAPED POWER SUPPLY FOR USE WITH CATHODE RAY TUBES

- **Input:** 6 v, unregulated
- **Outup:** 6,500 v DC @ 200 ua
- **Regulation:** 400 v, 0 load to full load
- **Ripple:** 30 v, peak-to-peak
- **Packaging:** Conforms to the requirements of MIL-T-27A, Grade 5, Class R, Life X
- **Dimensions:** 4¼" H x 3⅝" W x 2²⁵⁄₃₂" D
- **Weight:** 1.25 lbs.



EXAMPLE 17

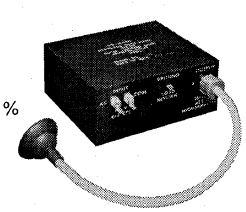
SEALED, REGULATED POWER SUPPLY

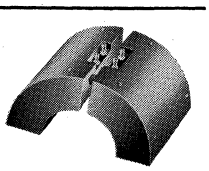
- **Input:** 115 v ± 5%, 380 cps-420 cps
- **Output 1:** 2,600 v DC @ 0.5 ma to 1.5 ma
- **Regulation:** (a) At 109 v input, 1.5 ma output @ 2,600 v min. (with output 2 connected to its load)
  (b) At 121 v input, 0.5 ma output @ 2,680 v max. (with output 2 unloaded)
- **Output 2:** 6.3 v RMS, C.T. @ 600 ma
- **Ambient Temperature:** −55°C to +85°C
- **Dimensions:** 2" H x 4" W x 3¾" D

EXAMPLE 20

SEALED, REGULATED POWER SUPPLY (MIL-E-16, 400, CLASS 3)

- **Input:** 108-132 v, 380-420 cps
- **Output:** 10,000 v ± 5% DC at load current of 100 microamperes
- **Regulation:** Output voltage constant within 2% from no load to full load
  Output voltage constant within ± 1% over range of specified input voltages
- **Ripple:** 0.2% peak-to-peak
- **Dimensions:** 2" H x 4½" W x 5" L excluding terminals and mounting studs





EXAMPLE 21

SEALED, REGULATED POWER SUPPLY

- **Input:** 115 v ± 5%, 380 cps-420 cps
- **Output 1:** 2,600 v DC @ 0.5 ma to 1.5 ma
- **Regulation:** (a) At 109 v input, 1.5 ma output @ 2,600 v min. (with output 2 connected to its load)
  (b) At 121 v input, 0.5 ma output @ 2,680 v max. (with output 2 unloaded)
- **Output 2:** 6.3 v RMS, C.T. @ 600 ma
- **Ambient Temperature:** −55°C to + 85°C
- **Dimensions:** 2½" H, semi-circular (two quarter sections) —inner radius 1⅜"; outer radius 2⅞"

BASIC GUIDE TO CUSTOM POWER SUPPLY ESTIMATES

This form contains the information required for prompt estimates on design and construction of custom power supplies. We would be pleased to send you these forms for your convenience in establishing your power supply requirements.

1 ( ) If military, show applicable specification_____and for MIL-T-27 Grade_____, Class_____, Life_____, Family_____, and other_____

2 ( ) If commercial, show: fully potted_____, or encased_____.

3 ( ) Ambient temp. _____° C. min, _____° C. max. Temp. rise _____° C. max.

4 ( ) Duty cycle_____If intermittent, indicate time on_____, and time off_____.

5 ( ) Mounting, terminal end ( ), opposite end ( ), inserts ( ), studs ( ), flanges ( ).

6 ( ) Terminals, stand-off ( ), feed-through ( ), lugs ( ), flex leads ( ), other ( ): describe _____

7 ( ) Size limits,_____X_____X_____H
8 ( ) Weight limit_____
9 ( ) Mounting centers_____

To be completed when component will be used in existing equipment, or when space limitations are critical.

10 ( ) Converter (D.C. Source to D.C. Load)

11 ( ) Inverter (D.C. Source to D.C. Load)

12 ( ) Power Supply (A.C. Source to D.C. Load)

A. Input Volts_____Nominal
Volts_____Max.
Volts_____Min.
@_____C.P.S. ± _____C.P.S. or D.C._____, _____ohms source impedance.

B. Additional pertinent supply data_____

OUTPUT

C. Output Data:
Full load volts_____D.C. _____RMS
Nominal Tolerance_____±
Volts or _____±%
Full load current_____u.a.
_____m.a. _____a.
Load current variation:
Max. allowable ripple_____P to P or _____%
Local power factor:
Output frequency c.p.s.
_____square wave
_____size wave
Output frequency tolerance:
±_____c.p.s., or ±_____%

Max. allowable harmonics:
_____%

Permissible output voltage regulation:
a. With input voltage variation ±_____volts
b. With load variation:
±_____%
c. With temperature variation:
_____° C to _____° C

Permissible output frequency tolerance with above variations:
±_____c.p.s.

Output impedance, ohms

D. Other requirements - general:
Efficiency _____% min.
Ambient temperature range _____° C to _____° C
Possible transient voltages in source _____% of nominal voltage. Duration _____u sec.
Flowable "hash" feedback into source ±_____m.v.
Short circuit protection required yes___ no___
Reverse polarity protection required yes___ no___
Cooling:
a. Natural draft_____
b. Forced draft (air blast)_____
c. Heat sink_____
Honning:
Operated at ground potential_____ or floating_____

E. Schematic of applications. Give as much information as possible relating to source of supply, loading, etc.
Separate sheet attached, yes___ no___

TYPICAL SPECIFICATIONS FOR POWER SUPPLIES PEERLESS HAS DESIGNED AND MANUFACTURED IN QUANTITY

Example Number	Input	Output(s)	Regulation	Ripple Volts (Peak to peak)	Size: Height, Depth, Width
33	115 v AC 400 cps	6,000 v DC @ 100 ua and 600 v tap	3%	3%	2 9/16" x 5" x 1 1/4"

ELECTRICAL PRODUCTS

A Division of LTV Ling Altec, Inc.

1515 SOUTH MANCHESTER AVENUE, ANAHEIM, CALIFORNIA

Peschel PP High-Voltage DC Power Packs and Power Supplies

MODELS PP & CPP

Basic DC power packs with or without controls and meters. Available in 1 KV to 500 KV output with current ratings from 1 ma up. Designed for incorporation into other equipment, for lab or industrial use. Applications include: capacitor charging, HV testing, electrostatic processes, including paint spraying, powering tubes and infrared devices. Regulation to ±0.01% available on request.

TWO TYPES OF CONTROLS:

Type A — Line cord, switch, fuse, pilot light, and continuously adjustable output control (0-100 dial on powerstat used for percentage of output indication).

Type C — Line cord, switch, fuse, pilot light, continuously adjustable output by means of powerstat, 2% accuracy voltage and current meters directly at output.

(Additional optional features to fit your requirements available.)

FEATURES

Low Cost — available with or without controls.

Small size, light weight.

Solid state, rugged reliability.

Long life — selenium or silicon rectifiers with high overload characteristics.

Positive polarity — negative on request; reversible polarity on many models.

GENERAL SPECIFICATIONS

Input 117v AC, 60-Hertz, 1-phase below 3KW; all others 208/230 V.

Output Continuously adjustable with powerstat-type control.

Regulation Approx. 25% N.L. to F.L. Available to 0.01%.

Ripple Approx. 2-3%. Available to 0.01%.

MIL QUALITY POWER CONVERSION EQUIPMENT

airborne and spaceborne specifications

P.M.I. specializes in the design and production of full military and N.A.S.A. quality Airborne & Spaceborne power conversion systems. P.M.I. builds to the following typical requirements:

MIL-E-4158	Design criteria for ground electronic equipment
MIL-E-5400	Design criteria for airborne electronic equipment
MIL-E-16400	Design criteria for shipborne electronic equipment
ANA Bulletin 400	Selection of parts and processes
MIL-STD-242	Selection of parts and processes
MIL-STD-701	Preferred Semiconductors
MIL-S-19500	Selection of Semiconductors
MIL-STD-461, 462	RFI and EMC requirements
MIL-STD-704	Aircraft Electric Power
MIL-STD-810	Environmental requirements
MIL-E-5272	Environmental requirements

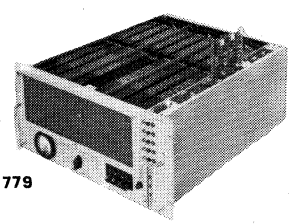
low temperature coefficient converters

STANDARD TEMPERATURE COEFFICIENT: 5PPM/°C

TYPICAL PERFORMANCE:

Output Rating: 20 volts @ 1 Amp DC.
Output Change: Less than 100 millivolts total for ambient change from −50°C to +100°C.

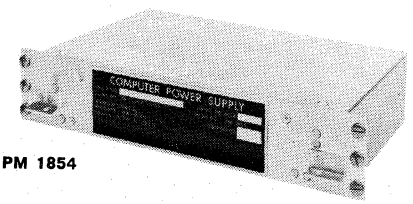
ac to dc power supplies



PM 1779

TYPICAL SPECIFICATIONS:
Input: 1 or 3 phase, 60Hz or 400Hz.
Outputs: From 4V to 1000V, power levels to 5KW. Single or Multiple outputs.
Regulation: Line: To ±.01% for ±10% line.
Load: To ±.01% for NL to FL.
Ripple: To .01% of full voltage.
Temperature Coef.: Standard ±.005/°C (see above).
Response: To 10 μsec.
Ambient Temperature: −55°C to +100°C.
Mechanical: State of the art size and weight.
Safety Features: Overvoltage and overcurrent.

dc to dc converters



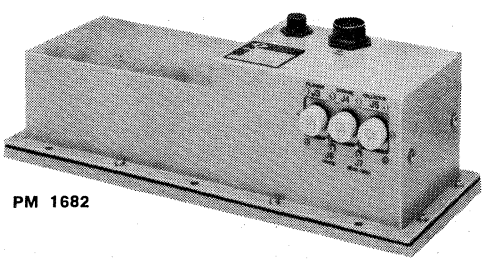
PM 1854

REPRESENTATIVE COMPUTER POWER SUPPLY

Regulated Power: 116 watts.
Size: 64 cubic inches.
Weight: 3 pounds.

TYPICAL SPECIFICATIONS:
Input: 18 VDC to 40 VDC. (Other ranges available). Spikes and ripple per MIL-STD-704.
Outputs: From 4V to 1000V, power levels to 5KW. Single or Multiple outputs.
Regulation: Line: to ±.01%.
Load: to ±.01% for NL to FL.
Ripple: To .05% of full output voltage.
Temperature Coef.: Standard ±.005%/°C (see left).
Response: To 10 μsec.
Ambient Temperature: −55°C to +100°C.
Mechanical: State of the art size and weight.
Safety Features: Overvoltage, overcurrent, and reverse input voltage.

high voltage power supplies



PM 1682

REPRESENTATIVE TWT POWER CONVERTER

Power: 1200 watts.
D.C. Voltages: 4000V Helix, 2700V Collector.

TYPICAL APPLICATIONS:

Traveling-wave tubes, Backward-wave Oscillators, Cathode-ray tubes, and Photo-multiplier devices.

TYPICAL SPECIFICATIONS:
Input: AC or DC ±10%.
Outputs: Multiple, isolated high voltages for helix, collector, dynodes, or aquadag. To 15,000V and 5KW.
Performance: See specs above.
Time Delay: To allow filament warmup previous to high voltage application.
High Voltage Ramp: To allow multiple high voltages to rise and decay together.
Helix Overload: Removes collector and helix potentials to avoid helix intercept damage.

Oval cell also available (Fig. C) in 4000mAH, W-2.080 T-1.260 and H-1.656 Wt. 0.37 oz.
All battery configurations available with pressure contact buttons or solder lug terminals.

All cylindrical and oval battery types feature a pressure safety device for security and reliability making them especially suited for cordless consumer and electronic products.

CUSTOM BATTERY PACKS

Cylindrical cells are incased in a rigid, high impact case. Case materials are highly dielectric to provide maximum cell insulation at minimum cost. The case is vented to each cell to provide cooling and long life. Packs are available to your specifications in any voltage.

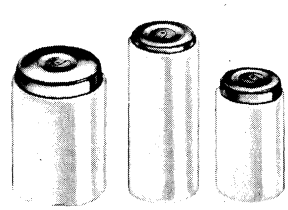
*H denotes high rate discharge capability.

Button cell batteries are constructed of sealed nickle cadmium button cells (see fig. B) to meet almost any application requirement. The compact size of button cells permits easy stacking to form multiple cell batteries of optimum power/volume ratio and space utilization. Completely sealed button cells are ideally suited for portable radios, flashlights, photoflash, alarms, and any low-drain, high capacity application.

TYPICAL BUTTON CELL BATTERIES



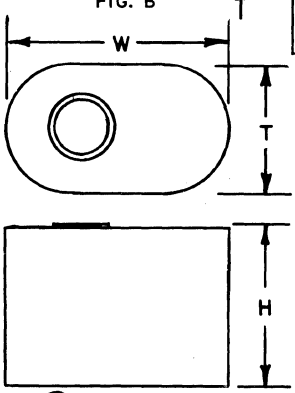


FIG. C

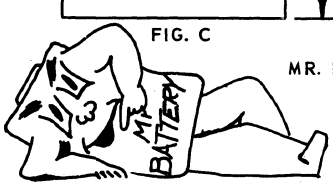
POWER INCORPORATED ALSO MARKETS:

- Emergency lighting units.
- Flashlight and lantern rechargeable batteries.
- Custom and prototype design battery packs built to your specifications.
- Battery chargers for all types of batteries.
- Batteries - **NICKLE CADMIUM - SILVER CADMIUM - SILVER ZINC - MERCURY - SEALED LEAD-ACID.**

INVESTIGATE direct current emergency power sources available in any regulated voltage or current, featuring automatic SCR solid state switchover to a self-contained battery. We have the answer to reliable economical D.C. power with automatic emergency back-up.



MR. BATTERY SAYS:

"We have over 10,000 cell and battery sizes in stock. If you don't see exactly what you are looking for here, let us know, chances are we'll be able to take care of your application immediately. We'd be happy to answer any questions. If we can't help you, no one can."

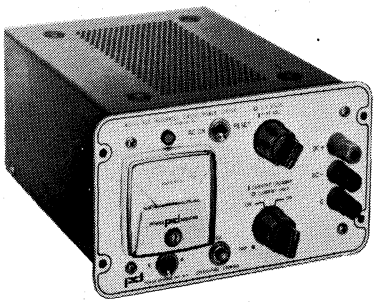
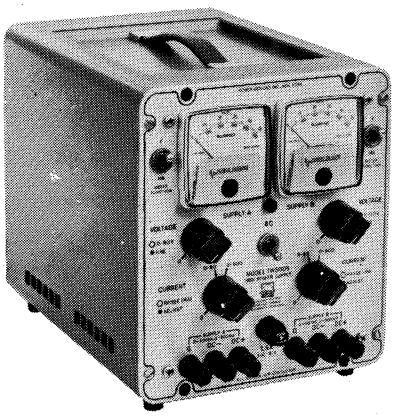
LABORATORY DC POWER SOURCES



Model 630
CASE A
8⅜" w. x 4¾" h. x 11-9/16" d.

Model 5015T
CASE B
5¾" w. x 8⅝" h. x 10⅞" d.



Model TW-5005
CASE C
7¾" w. x 8⅝" h. x 13½" d.

- All units have remote sensing; remote programming.
- Front and rear output terminals.
- Continuously adjustable voltage and current limiting controls.
- Model 5015T, 1010T, 1210S and 3650S feature a current limit indicating monitor.
- Modular package construction suitable for rack mounting. Single or dual mounting in 19" panel.
- Processed under Power Designs' "Predictable-Reliability" program for a 5-year MTBF. The program features: avalanche-controlled silicon rectifiers, stress-tested transistors, pre-aged zener references with extrapolated stability criteria based on 1/f noise changes, computer-grade capacitors, tin-oxide-film resistors, and components operated at 50% of manufacturers' published ratings. Units pre-aged under full-load conditions for a minimum of 50 hours.

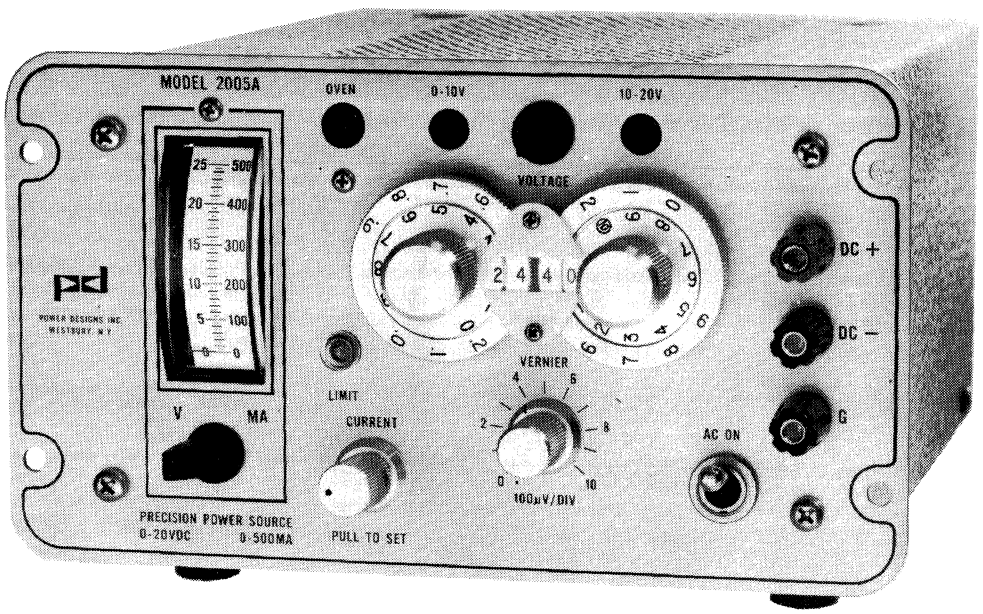
PRECISION POWER SOURCES



- All silicon semiconductor regulator system with new, low noise diff-amp input transistor and specially processed zener voltage reference.
- Advanced solid state circuitry.
- Exceptional stability through design simplicity.
- Critical components maintained at constant ambient in temperature controlled oven.
- Self-restoring electronic overload and short circuit protection with continuously adjustable current limiting control.
- Pull-to-set current limit control with flashing current limit indicator light.
- Performance specifications based on anticipated ratings at end of five years of service.
- Built-in protection agains turn-on or turn-off transients.
- 100 hour minimum pre-aging of power supply prior to test and calibration.
- Individual calibration data furnished with each unit.

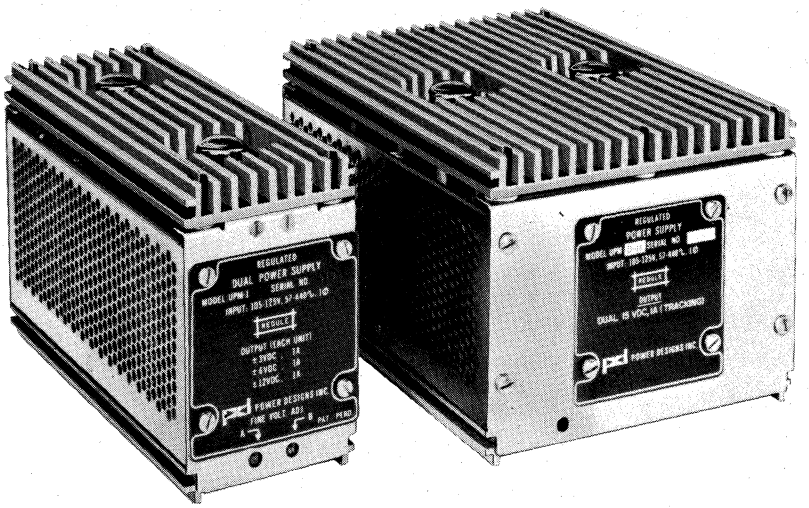
REDULE®
UNIVERSAL POWER SUPPLIES



- Single or dual outputs with choice of several output voltage levels in one package.
- Multi-turn incremental voltage adjustment potentiometer.
- Parallel or series operation with any terminal at ground potential.
- Remote sensing.
- Remote programming.
- Self-restoring fold-back overload and short protection.
- Thermal overload cutout.
- 100% inspected "reliability controlled" silicon semiconductors.
- 50 hour power supply pre-aging prior to test.
- 50 μs recovery time.
- 105-125V, 57-440 Hz input.
- Mounts in any plane, to any surface.
- No external heat sink required.
- Connector keying system prevents mating errors.
- Complete maintainability, reliability and workmanship to most AEC & NASA standards.

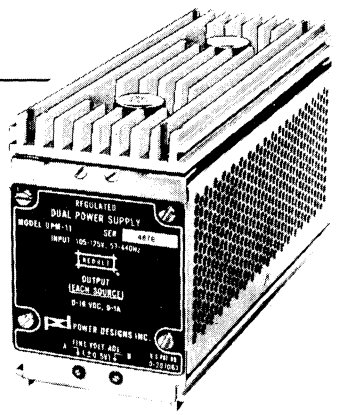
OPERATIONAL AMPLIFIER POWER SOURCES



Model UPM-11: Dual source, each programmable in 1-volt steps from 0 to 16 volts at 1.0 ampere. 25-turn trimmers permit intermediate settings with 10 millivolts resolution.
2¾" x 4½" x 7½" **$199.00**

Model UPM-22: Dual source, each programmable in 1-volt steps from 16-30 volts at ½ ampere and 30-60 volts at ¼ ampere. 25-turn trimmers permit intermediate settings with 25 millivolts resolution.
2¾" x 4½" x 7½" **$199.00**

Model UPMD-15: Dual 15 volt source, at 2 amperes. 25-turn trimmers permit ±0.75V adjustment of each source with a resolution of 10 millivolts.
5½" x 4½" x 7½" **$265.00**

Model UPMD-15V: Same as UPMD-15 with overvoltage crowbar protection.
5½" x 4½" x 7½" **$290.00**

Model UPMD-X9: Dual 100 volt source, at 0.25 amperes. 25-turn trimmers permit ±2V adjustment with a resolution of 50 millivolts.
5½" x 4½" x 7½" **$260.00**

Model UPMD-11: Dual precision tracking source, ±15 volts at 1.0 ampere. 25-turn trimmers permit ±50 millivolts adjustment on master source and 10 millivolts on the tracking source. Regulation is better than 150 microvolts for load or line; ripple less than 150 microvolts peak-to-peak. Stability better than 10 millivolts per week.
5½" x 4½" x 7½" **$275.00**

Model FPM-101: Specifically designed for operation of amplifiers with ±15VDC output at 1A. Tracking accuracy of 0.01%/°C.
2¾" x 4½" x 7½". **$164.00**

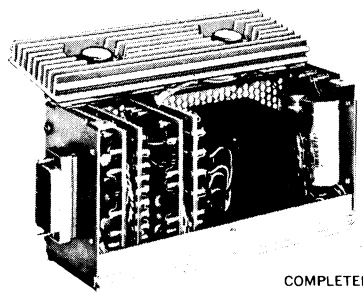
CURRENT CAPACITY UP TO TWO AMPERES



COMPLETELY REPAIRABLE

- Redule® universal modular power supplies mount in any plane to any surface or to standard card bins, without heat sinking.
- Regulation is .01% + 1 millivolt (.01% + 2 MV on Model UPMD-15).
- Ripple less than 1 millivolt peak-to-peak.
- Recovery time less than 50 μs. Units operate from 105-125 V, 57-440 Hz source.

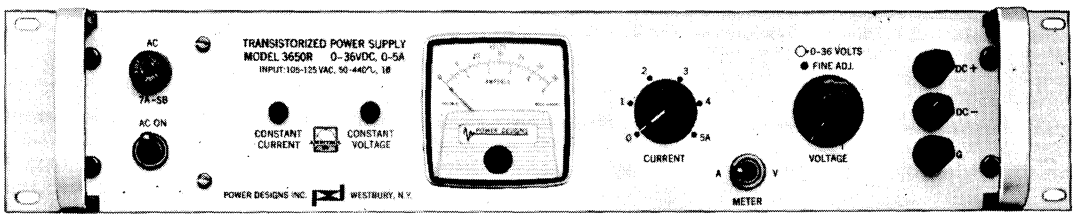
SCR CONTROLLED POWER SOURCES



CONSTANT VOLTAGE/CONSTANT CURRENT

Remote Voltage & Current Programming: Remote Sensing

- All silicon solid state circuitry.
- Constant voltage/current with operating mode indicating lights.
- Compound regulator system with SCR pre-regulator and high speed output regulator.
- Available with line filters to meet MIL-I-26600.
- Provisions for remote indication of operating mode.
- Front and rear access terminals on 3650R and 36100R families.
- High reliability shaped pulse SCR trigger circuitry.
- Fast recovery rectifiers minimize transients at input and output lines.

PMC UNIVERSAL POWER SUPPLIES

precision wide voltage range modules

The UniPower Series of power supplies described on these pages are the result of a unique design concept developed by POWER/MATE CORP. The end result of this design effort is to make available, for the first time, the advantages of a single, all-purpose, wide range supply with the compact size of a narrow range slot supply.

We have provided you with a power supply that can meet the needs of virtually all of your equipment—now, a stock of one or two models takes the place of the dozens previously required. Spare parts inventory is simplified and design time is substantially reduced.

Other outstanding advantages of the UniPower Series are the availability of either internal or external control, internal or external sensing, complete overload and short circuit protection, and the convenience of three mounting surfaces allowing the modules to be fit into virtually any available space.

The high degree of reliability and ruggedness of these all-silicon, solid state circuits has been incorporated into two compact bench supplies and a dual-output op-amp supply that are also described on later pages.

ALL POWER/MATE CORP. UniPower Modules are covered by a full five year warranty. In addition, they have all been tested by an independent laboratory and meet MIL-E-5272C, MIL-E-16400, MIL-E-5422 and MIL-E-4970 environmental requirements. They also meet MIL-I-6181D RFI requirements and the Mean-Time-Between-Failure in excess of 100,000 hours of MIL Handbook 217.

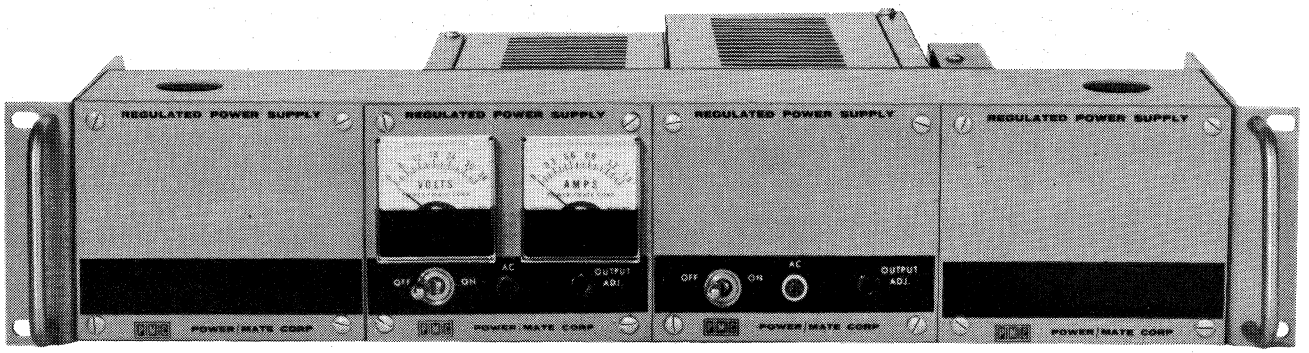
POWER/MATE CORP. 163 CLAY ST., HACKENSACK, N. J. 07601 PMC

PMC BUILDING BLOCK MODULES

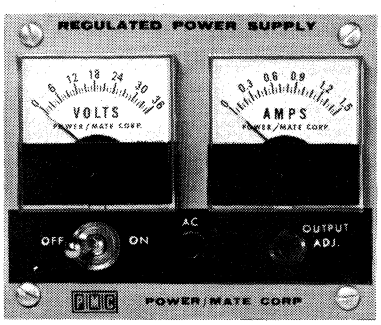
POWER/MATE CORP. has designed the UniPower Series supplies for maximum versatility. Part of this versatility lies in the fact that all of the UniPower units can be used as rack mounted laboratory supplies. By using POWER/MATE CORP.'s economical, in-stock building block components you can incorporate up to four UniPower modules in series, parallel or series/parallel output in a standard 19" rack that is only 3½" high. While these building block units are ideal for use with the UniPower Series, many of the thousands of other POWER/MATE CORP. supplies in single or dual output may be used.

All of the Building Blocks are finished in durable, baked gray enamel, with predrilled and tapped holes, ready for easy assembly. All of the units, like the power supplies used in them, are carried in stock for same day shipment. **How To Order** — Determine the number of the various Building Block units you require and order them by Model number. In ordering metered control panels, be sure to indicate meter ratings by adding first the volt meter rating and then the ammeter rating after the panel Model Number i.e., CPM35-35-1.5 indicates a quarter rack metered panel with a 0-35 voltmeter and a 0-1.5 ammeter.

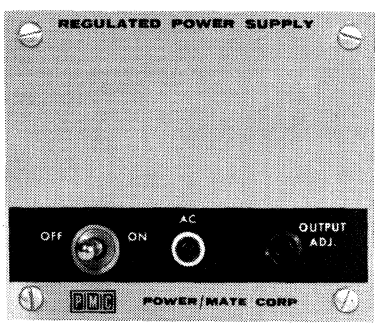


Model AR35 — 19" x 3½" Rack Adapter. All panels screw to pre-punched holes. Mounts up to four Uni-76's, -88's, or Unitwin 164's or 3 Uni-30C's or -30D's or any combination of these supplies. Price **$40.00**

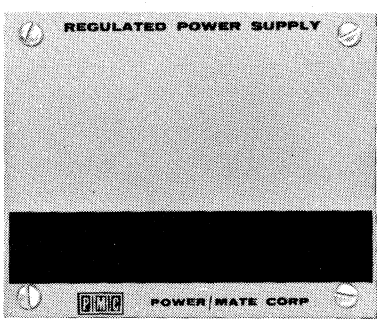
5¼" Rack Accessories for higher current models contact factory for catalog.



Model CPM35 — Quarter Rack Metered Control Panel with ammeter and voltmeter, on-off switch and indicator and screwdriver voltage adjust. On the rear of the panel are input cable, AC fuse and output solder terminals. Meters available are: Voltmeters — 0-10, 0-35, 0-150. Ammeters — 0-0.5, 0-1.5, 0-6. Price **$45.00**

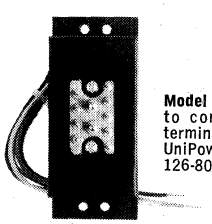


Model CP35 — Control Panel without meters but including the other items listed under CPM35. Price **$20.00**

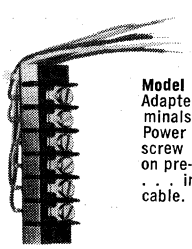


Blank panels for completing rack or mounting special controls are:

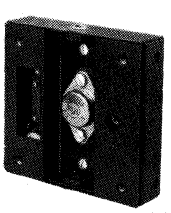
Model P35-4 — ¼ rack size Price **$4.00**
Model P35-2 — ½ rack size Price **$5.00**
Model P35-1 — full panel size Price **$7.50**



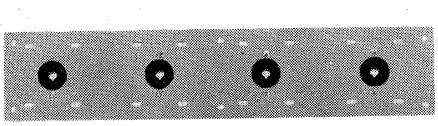
Model PT-1 — Plug Adapter to convert output solder terminals of the UNI 76-88 UniPower units to Amphenol 126-804 plug. Price **$5.50**



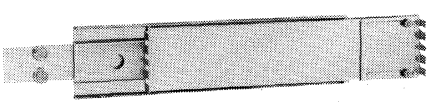
Model BT-1 — Terminal Strip Adapter converts output terminals of UNI-76-88 Uni-Power modules to barrier screw type. Mounts directly on pre-punched holes in case . . . includes hardware and cable. Price **$4.00**



Model OVP-1 — Over-voltage Protection is provided by this self-contained, crowbar-type solid state unit. It is independent of the power supply or the type of failure. It has dual trip voltage ranges (3-24 volts and 24-45 volts) continuously adjustable. Response time is between 3-6 micro-seconds. Dimensions 3⅜" x 2¾₆" x ⅞". Price **$30.**



Model AM35 — Module Adapter permits the use of up to four POWER/MATE style R, RH, or N case supplies on one AR35 Rack Adapter Price **$8.00**

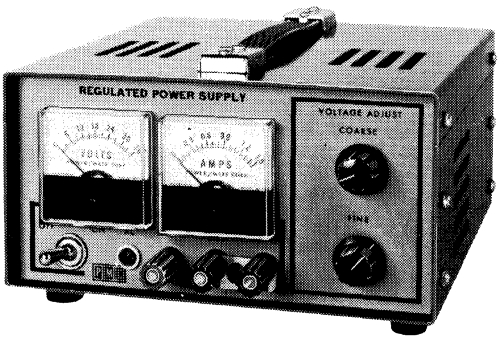


Model CS35 — Rack Slides with quick disconnect feature ball-bearing action. Price **$35.00** per pair

PMC BENCH PACKS

BP-89 $89.00

3⅜"H x 5⅜"W x 7¼"D



BP-118 $118.00

3⅜"H x 6⅞"W x 7¼"D

Here are the PMC Bench Pacs — really versatile, high-performance, low-cost Universal Bench Supplies. Once you read the specs on these economical huskies you agree that they're the perfect variable voltage bench supply for you. They pack all the features of the UniPower modules with the convenience and ease of use of a high priced lab supply. The BP-89 has a large dual range, switched meter for reading voltage and current output. Both Bench Pacs feature front panel coarse and fine controls, five-way binding posts and on-off switch and indicator. Rack mounting kits available. Contact factory for catalog.

ELECTRICAL SPECIFICATIONS

INPUT — 105-125V, 47-420 CPS.

OUTPUT VOLTAGE — 0-34 volts, set by external coarse and fine controls.

OUTPUT CURRENT — BP-89 –0.5 amps — BP-118 –1.5 amps.

REGULATION — Better than ±0.01% or 1 MV for line and load.

RIPPLE — Less than 250 microvolts.

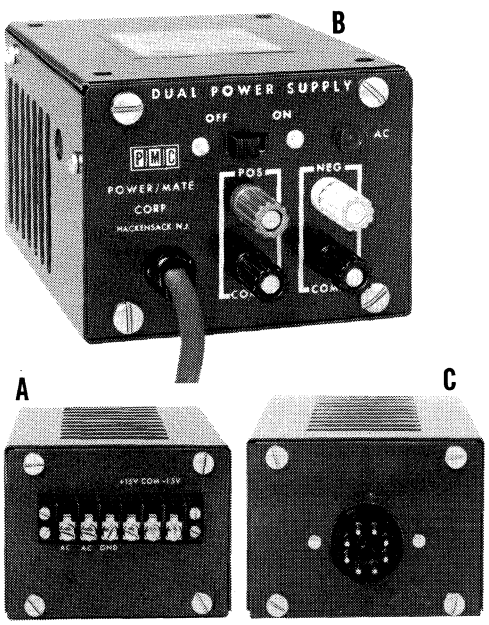
RESPONSE TIME — Less than 20 microseconds.

OVERLOAD & SHORT-CIRCUIT PROTECTION — Solid state short circuit and overload protected. Instantaneous recovery, and automatic reset. Unit cannot be damaged by prolonged short-circuits or overloads.

OUTPUT IMPEDANCE — BP-89 0.0068; **BP-118** 0.0023, ohms or less from DC to 1kc. Above 1kc, the output impedance rises by a factor of ten for each decade increase in frequency.

POLARITY— May be either positive, negative or floating up to 300 volts.

PMC POWERTWIN-99 TRACKING OP-AMP SUPPLY $99.00



The Powertwin-99 is a precisely regulated, dual-output power supply designed specifically for use with Op-Amps and other I.C. devices requiring dual power supplies. Each section of the Powertwin-99 is adjustable from 12 to 18 volts and the compact package has been constructed to meet the environment of MIL-E-5272. Look at the outstanding features of this unit.

ELECTRICAL SPECIFICATIONS

INPUT — 105-125 V AC 50-400 cps single phase.

OUTPUT VOLTAGE — 12.0-18.0 V DC, 0.400 amps (each output).

REGULATION — ±0.05%.

RIPPLE — 1.0 MV rms (max.)

TEMPERATURE COEFFICIENT — Better than 0.01%/°C.

OVERLOAD PROTECTION — Unit will withstand direct short circuit across either output to common or across + to — output terminals for an indefinite period without damage to the supply.

OUTPUT CURRENT vs TEMPERATURE — Each output is rated for 0.400 amperes at 50°C ambient and is derated linearly to 0.300 amps at 71°C.

WEIGHT — Net 3¾ pounds, Shipping 4¾ pounds.

MILITARY SPECIFICATIONS

Designed to meet the environmental requirements of MIL-E-5272 and RFI requirements of MIL-I-6181.

Mean-Time-Between Failures — In excess of 100,000 hours per MIL HDBK 217.

MIL-T-27 TRANSFORMERS

ACCESSORIES

The POWERTWIN-99 may be readily converted to a bench type dual output power supply for lab use simply by removing the front panel barrier strip (a) assembly on the standard model and replacing it with the lab adapter front panel (b). The supply may also be converted back to the standard module type at any time. No soldering is required. The Lab Adapter kit comes complete with panel shown and four rubber mounting feet. Model number LD-1. Price $14.50.

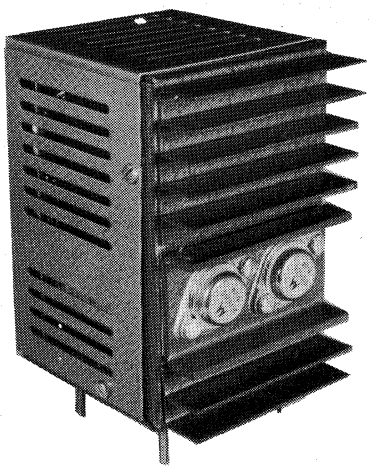
An octal plug (c) output also may be installed in place of the barrier strip. This is easily accomplished without soldering. Model number OP-1. Price $4.00.

POWER/MATE CORP. 163 CLAY ST., HACKENSACK, N. J. 07601

PMC DUAL OUTPUT POWER MODULES

FOR LOGIC CIRCUITS AND EQUIPMENT

DRA SERIES—0.05% REGULATION / DRB SERIES—0.5% REGULATION



The DRA and DRB Series of Dual Output Power Supply Modules provides users of logic circuits and equipment a convenient dual output supply, all in one compact package. This group of supplies provide a choice of thousands of dual voltage and current combinations.

FEATURES

- ✲ **All Silicon Semiconductors throughout**
- ✲ **All components rated for continuous duty at —20 to +71°C**
- ✲ **Short Circuit Proof — may be shorted indefinitely without damage**
- ✲ **Automatic overload & short circuit recovery**

SPECIFICATIONS

INPUT: 105-125V, 47-420 CPS

OUTPUT: See Specific Model

REGULATION: ±0.05% vs line & load for DRA Series; ±0.5% vs line & load for DRB Series

RIPPLE: Less than 0.002%, or 1MV RMS whichever is greater for DRA Series; less than 0.01%, or 5MV RMS whichever is greater, for DRB Series

OPERATING AMBIENT TEMPERATURE: —20 to +71°C

COOLING: None required at specified ambient temp.

POLARITY: May be either positive, negative or floating (up to 300V) each supply independent

OVERLOAD PROTECTION: Solid state short circuit and overload protected. Instantaneous recovery and automatic reset. **Other features same as RA-RB Series.**

HOW TO ORDER

Note the Case Size Factor in the column for each of the two power supplies desired. Add these two numbers together. If the sum is 20 or less, then the supplies selected can be supplied as standard units in the DRA or DRB Series.

The model number for the dual supply consists of the prefix DRA (for 0.05% models) or DRB (for 0.5% models), followed by the voltage and current rating of each supply. Specify the higher voltage unit first. For example, a dual 16V, 0.375A, and a 10V, 0.750A supply in the DRA series is described by the following model number: DRA 16-0.375/10-0.750.

If the sum of the two Case Size Factors exceeds 20, consult the factory or our local representative in your area. We can probably supply it but in a different case size.

The cost of the dual module is the sum of the costs of the individual supplies selected. For example, the price of a dual module model DRA16-0.375/10-0.750 is the sum of $85 and $95, or $180.

DRA SERIES (0.05% REGULATION) — DRB SERIES (0.5% REGULATION)

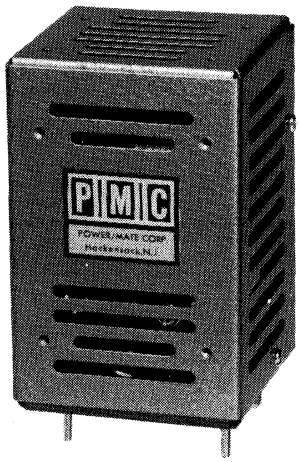
PMC LOW COST REGULATED SUPPLIES

high performance, solid-state plug-in



FEATURES

Input — 105-125V AC, 47-420 CPS
Output — See specific model listed
Regulation — See chart below
Ripple — Less than 4MV RMS for RC Series; Less than 8MV RMS for RD Series
Operating Ambient Temperature — —20 to +71°C
Output Adjustment — Adjusted by means of internal pot
Cooling — None required within specified ambients
Polarity — May be either positive, negative or floating up to 300 volts
Overload Protection — Short circuit protected, automatic reset

If you're looking for a reliable but low cost power supply that gives good regulation and that can be chassis or rack mounted with an octal plug—you can stop. POWER/MATE CORP. has just what you're looking for. The RC/RD series of power supplies feature all silicon solid state circuitry, a MIL-T-27 Transformer, 88°C Capacitors, overload and short circuit protection and 100,000 hours MTBF. In addition to that, only POWER/MATE CORP. can offer you

All **RC** Series Models only **$65.00** ***SAME DAY SHIPMENT!**** All **RD** Series Models only **$55.00**

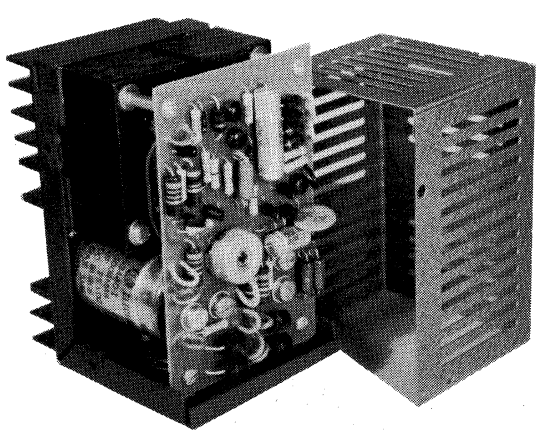
PMC REGULATED POWER MODULES

ALL SILICON—0 TO 400 VOLTS
OUTPUT CURRENTS TO 25 AMPERES
RA SERIES—0.05% REGULATION
RB SERIES—0.5% REGULATION



*on RC Models

FEATURES

- **All Silicon Semiconductors throughout**
- **All components rated for continuous duty at —20 to +71°C**
- **Short Circuit Proof — may be shorted indefinitely without damage**
- **Automatic overload & short circuit recovery**
- **No external heat sink or cooling required up to +71°C**
- **All components accessible and replaceable for maintenance**
- **Top quality components and construction**
- **Competitively priced**
- **Compact mechanical package**
- **Meets MIL-E-5272 specifications**

SPECIFICATIONS

Input — 105-125V AC. 47-420 CPS
Output — See Specific Model Listed
Regulation — ±0.05% or 2 mv (whichever is greater) vs line & load for RA Series; ±0.5% vs line & load for RB Series
Ripple — Less than 0.002%, or 1 mv RMS (whichever is greater) for RA Series; 0.01% or 5 mv RMS for RB Series
Operating Ambient Temperature — —20 to +71°C
Output Adjustment — Either internal or external as desired
Cooling — None required at specified ambients
Polarity — May be either positive, negative, or floating (up to 300 volts)
Overload Protection — Solid state short circuit and overload protected, instantaneous recovery and automatic reset

INPUT VOLTAGE: 115 VAC ±10%; 57 to 440 Hz (derate current 10% for operations from 57 to 47 Hz; derate current 20% for operation from 126.5 VAC to 132 VAC; operation at 132 VAC below 57 Hz not advised)

OUTPUT VOLTAGE: preset at factory to ±0.25% ±10mV not adjustable; Option D is ±3% adjustment, single potentiometer (see chart); fully adjustable units (see chart) use two potentiometers; coarse and fine

TRANSIENT RESPONSE: 15 μsec typical for one-half load to full load change

OVERLOAD/SHORT CIRCUIT PROTECTION: units fully protected

STABILITY: typical ±0.025% (for 8 hours after warmup)

OVERVOLTAGE: protection available as Option C (see chart)

TEMPERATURE OPERATING: 0°C to +71°C at full load

STORAGE: −55°C to +85°C

COEFFICIENT: 0.0075%/°C typical

SHIELDING: transformer shield between primary and secondary connected to ground; case is grounded

OUTPUT ISOLATION RESISTANCE: 500 megohm min. at 500 VDC

HC SERIES POWER-MODS

These high current military models were designed to meet power requirements of air transportable huts, vans, ground support equipment, and shipboard operations. They are built to comply fully with **MIL-E-16400, MIL-T-21200,** and **MIL-E-4158.** Semiconductors used meet **MIL-S-19500;** other components meet **ANA-400.** The complete unit meets the environmental requirements of **MIL-E-5272** and **MIL-STD-810.**

POWERTEC
HC
MILITARIZED HIGH CURRENT

SPECIFICATIONS

INPUT VOLTAGE: standard input is 208 VAC ±10%, 3Ø, 47 to 63 Hz. Alternate input is 230 VAC ±10%, 3Ø, 47 to 63 Hz

OUTPUT: 27 VDC to 28 VDC adjustable at 50, 100, or 200 amperes depending on Model

REGULATION: 1% line and 1% load

RIPPLE: 1% RMS

PROTECTION: •) over current protection: 125% (front panel indicator lamp)
•) thermal protection (front panel indicator lamp)

TRANSIENT RESPONSE: less than 75 msec. for recovery to within 2% of output voltage following a load change from full load to half load or half load to full load

METERING: •) voltage: expanded VDC scale ruggedized 24 VDC to 32 VDC
•) current: ruggedized, rates to match output current

RFI FILTERING: to meet MIL-I-6181D

PARALLEL OPERATION: designed for parallel operation without alterations in circuitry.

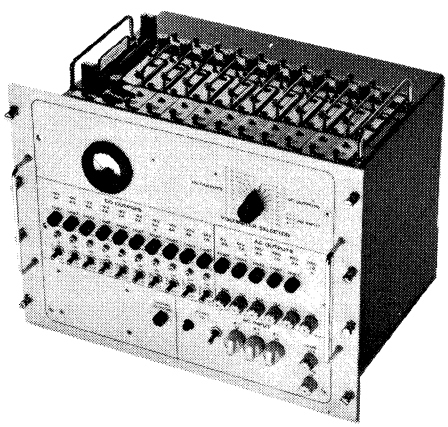
COOLING: internal fan: MIL type with filter

DIMENSIONS: 19″ wide, rack type panel

Output Current	Height	Deep	Weight
200A	14″	22″	275 lbs.
100A	14″	18″	195 lbs.
50A	10½″	18″	125 lbs.

CUSTOM POWER SUPPLIES

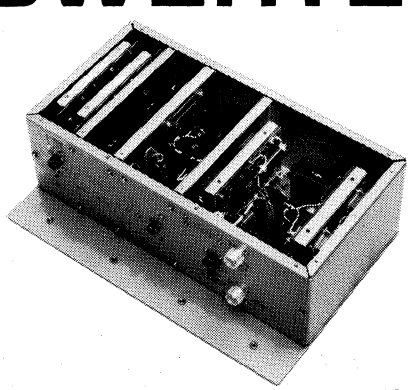
POWERTEC



MODEL 8D164 FULLY MILITARIZED, COMPUTER-CONTROLLED POWER SUPPLY

Model 8D164 is a CUSTOM design used in an air transportable shelter in the Air Force 407L Program. Semiconductors are per **MIL-S-19500,** other components in accordance with **ANA-400.** Full documentation has been produced in compliance with Air Force **375L** series data configuration controls: drawings per **MIL-D-1000, category E, Class 2;** technical manual per **MIL-T-9941;** maintainability analysis per **MIL-HDBK-472;** reliability calculations per **MIL-HDBK-217A.** Features include ten precision regulated DC supplies, 5 AC outputs. Each DC supply is a completely removable and repairable module with adjustable current compensation, and each has a computer programmed high speed output. Complete protection package includes OVP, reverse voltage protection, current limit, overtemperature and fault indicators.

POWERTEC



MODEL 8D212 HIGH RELIABILITY POWER UNIT

Model 8D212 is a CUSTOM power unit for Lawrence Radiation Laboratory used in Project Plowshare. Powertec designed and developed this hi-rel power supply to meet stringent requirements. It is part of an arming circuit and telemetry power source and must operate for indefinite time periods after being buried in an inaccessible underground cannister. A common input conductor supplies a multiplexed power signal to the unit. The unit demodulator separates this signal into DC and AC primary power and converts them to multiple precision outputs. All outputs are regulated and fully protected. Complete documentation including failure mode analysis per **MIL-HDBK-217A** was supplied.

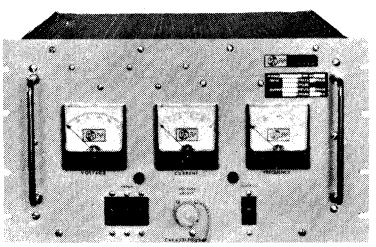
POWER CONVERTERS & SWITCHING REGULATORS

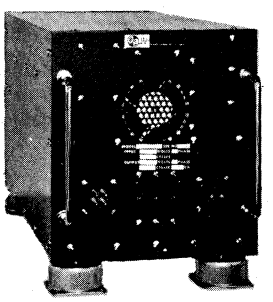
COMPACT — LIGHTWEIGHT — SOLID STATE POWER CONVERTERS FOR AC-AC, AC-DC OR DC-AC AT OUTPUT LEVELS UP TO 20 KVA AND SWITCHING REGULATORS TO 20 AMPS AT 28 VDC



MODEL 125-0400-002

2.5 KVA Power/Converter

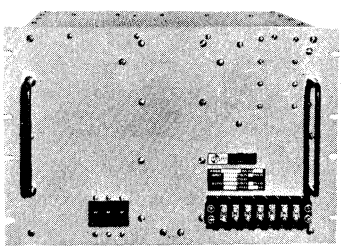
- Input: 120/208 VAC; 60 cps; 3 ϕ; 4 wire wye
- Output: 115 VAC, ± 1%; 400 cps, ± .25%; 1 ϕ; 2.5 KVA
- Short Circuit: Complete protection, manual reset
- Overload: 200% for 4 seconds
- Efficiency: approx. 85%
- Size: 10½" H x 19" W x 17" D
- Weight: 145 lbs.
- Operating Temp: −20°C to +50°C



MODEL 135-0060-001

3.5 KVA Power/Converter

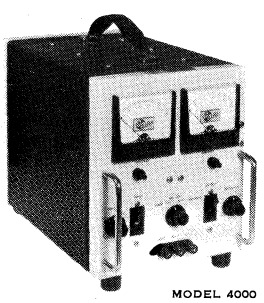
- Input: 120/208 VAC; 360-1000 cps; 3 ϕ; 4 wire wye
- Output: 115 VAC, ± 1%; 60 cps, ± .25%; 1 ϕ; 3.5 KVA
- Short Circuit and Overload: Complete protection, continuous automatic recycling
- Altitude: 15,000 ft. max.
- Efficiency: 88%
- Size: 10"H x 9"W x 21"D
- Weight: 110 lbs. max.
- Operating Temp: −40°C to +75°C



MODEL 145-0060-001

4.5 KVA Power Converter

- Input: 120/208 VAC; 400 cps; 3 ϕ; 4 wire wye
- Output: 115 VAC, ± 1%; 60 cps, ± .25%; 1 ϕ; 4.5 KVA
- Short Circuit and Overload: Complete protection, continuous automatic recycling
- Altitude: 40,000 ft. max., non-pressurized
- Efficiency: approx. 90%
- Size: 12¼"H x 19"W x 18 1/16"D
- Weight: 195 lbs.
- Operating Temp: −50°C to +55°C



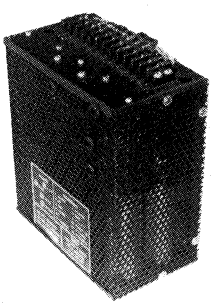
MODEL 4000

1000 VA Power/Converter

- Input: 120 VAC; 50-450 cps; 1 ϕ
- Output: 100-130 VAC, ± 1%; 360-440 cps, ± .25%; 1 ϕ; 1000 VA
- Short Circuit and Overload: Complete protection, manual reset
- Efficiency: approx. 85%
- Size: 10"H x 8½"W x 13"D
- Weight: 50 lbs.
- Operating Temp: −20°C to +50°C

10-20AMP DC Switching Regulators

- Input: 115 or 230 VAC, 47 to 440 Hz
- Output: 0 to 28 V
- Regulation: 1% combined line, load & temp.
- Load Response: 50 microseconds
- Output Ripple: .1% of output voltage peak
- Operating Temp: −40 to 71°C no derating
- Short Circuit: Complete protection



Custom Units

- Multiple outputs
- Small size/high power ratios
- Lightweight airborne applications
- Efficiencies to 90%
- Solid state reliability
- Meets MIL-1-26600 & MIL-1-6181
- Low cost

POWER SYSTEMS INC. 4023 Del Rey Avenue • Venice, California 90291

COMPARE . . .

Unequaled for low-cost, accurate, dependable performance under widely varying load and environmental conditions, Plug-In Instruments' power supplies are ideally suited for all commercial, ground support and industrial applications where precise dc power is required for electronic equipment and instrument systems.

DESIGN FEATURES

- Adjustable Voltages: 1 to 28 vdc
- Current Ranges: 0 — 75 to 0 — 800 madc
- Excellent Regulation as Noted
- 0.1 ohm Output Impedance
- 105 to 125 vac 50 to 400 cps Power Required
- Transistorized — Repairable
- Electronic Overload Protection on Series "D" and "E"

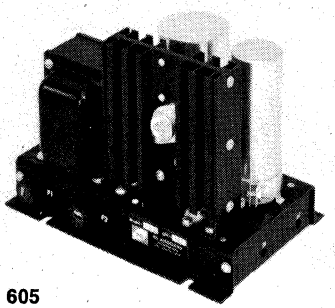
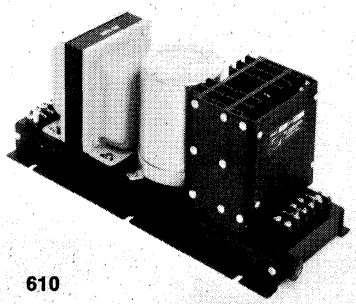
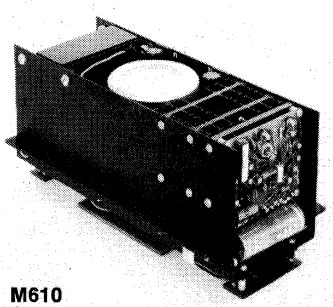
System Power Supplies for Digital I.C. Systems: 600 Series



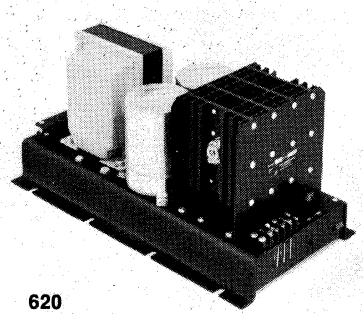
605



610



M610



620

FEATURES

Excellent Transient Response
Low Line and Load Regulation
Adjustable Voltage
Current Limit Short Circuit Protection
High Speed Crow Bar Overvoltage Protection
Convection Cooled
LOW PRICE!! From $125

SPECIFICATIONS

DC output
4.5 to 5.5 volts adj (3.6 volt models available)
5 amps Model 605
10 amps Model 610, 20 amps Model 620

Input
105 to 125 VAC, 45 to 440 Hz

Regulation
±0.1% for ±10% change in input voltage less than 0.25% for zero to full load change

Ripple and Noise
less than 1 mvpp

Transient response
125 mv for 30 μsec for change of half-load to full-load current or vice versa. 250 mv for 30 μsec for change of no-load to full-load current or vice versa

Power supply protection
current limited at 120% of rated load: short circuit proof

Load protection
Optional fast response crow bar, will not exceed adjustable trip point voltage for transients with rise times slower than 0.2 volt/μsec

Will not exceed static trip point volts for more than 200 nanoseconds for step function over-voltage

Cooling
By convection, no forced air required

Operating Temperature
−25 to +55°C, to +70°C at 80% current

Remote Sensing
Sensing terminals provided to enable specific regulation directly at load

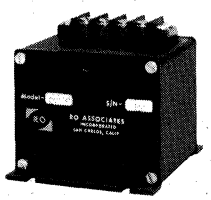
Stability
Output voltage changes less than 0.05% over a 24 hour period after warm up

Temperature coefficient
Output voltage changes less than 0.05%/°C over −25 to +55°C ambient

Output impedance
See regulation and transient response specifications

Controls
Built in potentiometer adjusts output voltage ±10% with resolution of 15 mv

Built in potentiometer adjusts crow bar static trip point with resolution of 15 mv

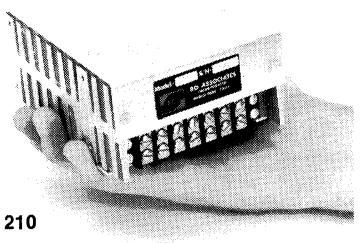


Model OV100
Overvoltage Protector

Self-contained package
Use with all type power supplies
Adjustable trip point . . . 4–10v, 10–25v
Fast response time . . . 200 nsec.
High current capability . . . 10A continuous
Size 2.7″ x 2.8″ x 2.8″
Low Price: $39.50

Model	Voltage	Current	Price	Crowbar Option	Size
605	5 or 3.6V	5A	**$125**	$18	5″ x 7.6″ x 5.8″
M605	5 or 3.6V	5A	**150**	18	4.8″ x 4.9″ x 6.5″
610	5 or 3.6V	10A	**139**	18	13.2″ x 5″ x 5.8″
M610	5 or 3.6V	10A	**175**	18	10.5″ x 4.8″ x 4.9″
620	5 or 3.6V	20A	**189**	18	15″ x 7.5″ x 8″

Miniature Power Converters for Digital I.C. and Analog Circuits: 200 Series



210

Remote Sensing
On model 210 only

MTBF
Over 100,000 hours calculated in accordance with MIL-HDBK-217A

Size
5 1/16" x 4" x 2 1/4", 45 cubic inches

Weight
2 pounds

Mounting
Mounting available on 3 sides by 4, #6–32 tapped inserts

FEATURES

55 watts in 45 cubic inches
5 1/16" x 4" x 2 1/4", weighs 2 lb.
Multiple outputs
70% efficiency
Fully protected
20 KHz operation, no audible noise
RFI filtered

COMMON SPECIFICATIONS

Input
105 to 130 VAC, 50 to 1000 Hz *or* 160 VDC ±10%

Protection
All outputs current limited, continuous overload and short circuit proof. 5 volt outputs have self recovering overvoltage protection set at 6.8 to 7 volts, no overvoltage protection on other outputs.

Temperature Stability
Better than 0.01%/°C

Cooling
Maximum mounting base temperature for full output is 85°C. For no (air or conductive) cooling, max. ambient temperature of 30°C for full output. Derate linearly to 60% power at 60°C ambient and no cooling.

Operating Temperature
−20°C to +85°C

Model	DC Out Volts DC	Amps DC	Regulation		Ripple & Noise	Price 1–49
			Load*	Line ±10%		
210	3.5 to 5.5 adj.	10 A	0.1%	±0.1%	25 mv P-P	**$225.00**
211	(A) 4.5 to 5.5 adj.	5 A	0.1%	±0.1%	20 mv P-P	**$265.00**

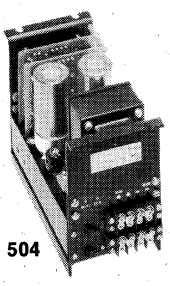
Ultra Stable, 0.02% Regulated System Power Supplies for Digital and Analog Systems

FEATURES

Excellent Regulation
Completely Protected
Low Ripple
Remote Sensing
Programmable
Adjustable Voltage



504

SPECIFICATIONS

Input
105–125 VAC. 45 to 440 Hz

Regulation
±0.01%, for ±10% input change
0.02%, zero to full load

Protection
Current limit, short circuit proof

Temperature
−20 to +70°C operating

Stability
Less than 0.02% per day or per degree C

Ripple
Less than 1 mv P-P

Application	Model	Volts	Amps	Price
dual analog system	504	3 to 32 V	1 A each channel	**$230.00**

SOLA ELECTRIC SLB

DIVISION OF SOLA BASIC INDUSTRIES

SOLATRON® ±½% LINE VOLTAGE REGULATORS

What It Is

The Solatron® LVR is the first regulator to combine in one unit the qualities of **fast response, "tight" voltage regulation, no moving parts, adjustable output, remote sensing, compactness, and high KVA capacity.**

The Solatron is a solid-state device with no moving parts, requiring no adjustment, maintenance, or attention. It combines the ruggedness typical of transformers with the light weight of electronic control circuitry, resulting in a regulator of remarkable compactness. It has great versatility in mounting, and installation.

Solatron® regulators are available as standard units in KVA ranges from ½ to 500 KVA, and yet they furnish a degree of regulation associated in the past with small VA capacity constant-voltage transformers and power supplies.

Units are available for single or three-phase applications, for either delta or wye connection depending on the service available or the load requirements of your equipment.

And What It Does

Regulation: ±0.5% for line changes. ±1% maximum for any combination of line, load, temperature and frequency changes within limits listed below.

Variation limits: line ±10%, or + 10%/—20%. Frequency 57-63 cycles, 47-53 cycles, or 380-420 cycles depending on model chosen (see catalog listings). Load zero to full load. Temperature 15° to 40°C.

Response: correction begins in first ½ cycle and is typically 100% complete in less than 10 cycles of the AC frequency.

Harmonic content: no harmful wave-form distortion.

Adjustable output: output voltage is adjustable ±10% of nominal output voltage.

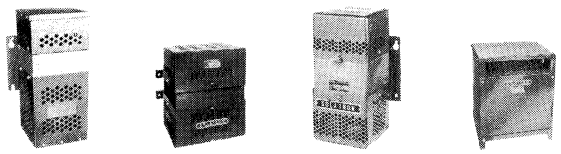
No maintenance: contains no relays, switches, contacts, solenoids, tap, bearings, or other moving parts. No drive motors, servos, or hand cranks. Requires no maintenance: operates completely unattended.

Current capability: withstands high inrush load currents and momentary overloads.

Motor loads: will handle inrush starting current without serious voltage collapse; provides adequate starting torque; no necessity to oversize KVA rating.

Mounting flexibility: may be mounted on wall, floor, or in equipment being regulated. Large terminal compartment, stud or screw-type terminals, knockouts for ease of wiring and installing.

Remote sensing: sensing leads easily connected to load for remote location of Solatron® LVR or for line drop compensation where desired.



SINGLE-PHASE (60 Hz ±3 Hz)

FOOTNOTES

1. At unity power factor and nominal output voltage. Although the KW efficiency is greater than 90%, the VA efficiency under worst-condition operation can be 60% for +10/—20% input voltage range units.
2. The output voltage regulation is ±0.5% for line voltage changes or ±1% for any combination of line voltage, frequency, load or temperature changes within the limits specified.
3. The output voltage adjustability is accomplished by an internal multi-turn potentiometer. Regulation in accordance with note (2) will be maintained at any output voltage setting within the specified adjustable range.
4. The input voltage range (either ±10% or +10/—20%) is based on the output voltage setting. The output voltage is adjustable ±10% of the rated nominal output by means of an internal multi-turn potentiometer. Therefore, the input voltage range shifts lineally with the setting of this control.
5. Maximum additive RMS harmonic content at nominal frequency.
6. 3% maximum additive RMS harmonic content may be obtained by using an auxiliary harmonic filter. See selection chart A.
7. 3% maximum additive RMS harmonic content may be obtained by using three auxiliary harmonic filters (one each line-to-neutral). See selection chart B.
8. 3% maximum additive RMS harmonic content may be obtained by using three auxiliary harmonic filters (one each line-to-line). See selection chart C.
9. Special sensing circuit filters must be ordered when feeding a rectified load. These are furnished at no additional charge.
10. F.O.B. Goldsboro, North Carolina. All other units are F.O.B. Elk Grove Village, Illinois.
11. The lowest line-to-line load should not be less than 70% of the highest line-to-line load, and the highest line-to-line load equal to, or less than, ⅓rd of the three-phase delta nameplate KVA rating. Additionally, the lowest line current should not be less than 90% of the highest line current.

scrdc-III

THE THIRD DIMENSION IN POWER SUPPLIES

Silicon Controlled Rectifier Regulated D.C. Power Supply . . . Sola Electric

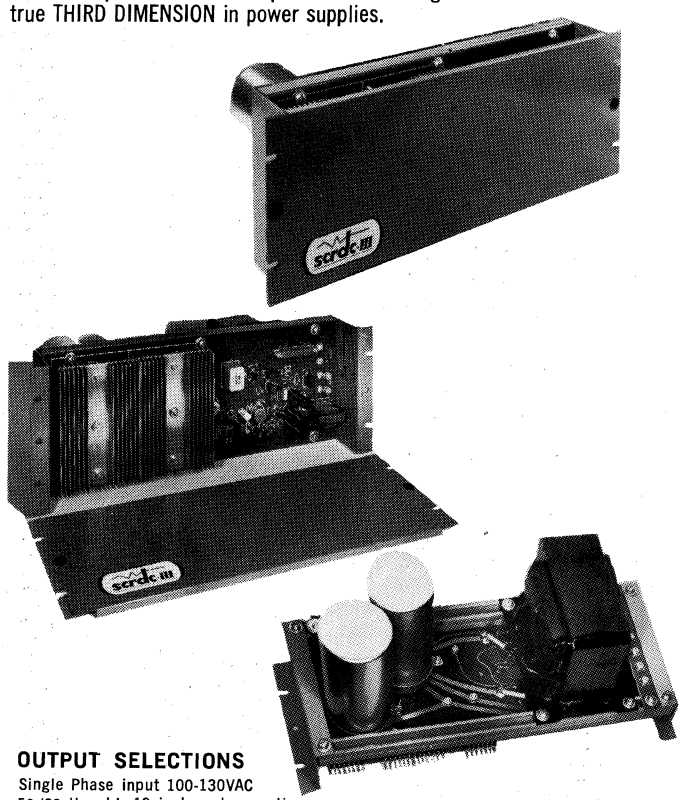
Until now, the user or specifier of regulated power supplies has had two basic choices:

(1) The CVDC or constant Voltage transformer bulk supply — a simple device gaining all of its regulation from the CV transformer. Under a given set of conditions the CVDC provides a total regulation envelope of about ± 10 percent. The CVDC type supply is typically quite economical. (2) A closely regulated transistorized supply . . . usually a series regulated unit providing an overall regulation envelope of ± .1 percent. The cost of this unit is about two to four times the cost of the CVDC.

In between these two cost and regulation extremes, there has always been a need for a supply that performs better than the CVDC but that does not have to be quite as "good" or expensive as the transistorized series regulator.

The SCRDC-III fills this long time void. Now there is a power supply delivering overall regulation of ± 3 percent costing little more than a CVDC type supply. Generally speaking, the SCRDC-III line is priced about 20 percent higher than the cost of a CVDC.

The SCRDC-III is especially designed for use with logic circuitry and as a bulk power source for point-of-use IC regulators. Here is the true THIRD DIMENSION in power supplies.



SCRDC-III FEATURES . .

Long Life . . . SOLA SCRDC-III supplies are conservatively designed with quality controlled components, testing, and inspection to insure no maintenance operation and long life.

Multiple Operation to Increase Current . . . To achieve higher output current ratings than are available as stock designs, paralleling two or three stock units is recommended. Two modes of parallel operation are possible, master/slave or paralleled outputs. Contact your Sola application engineer for details.

Series Connectable . . . To achieve higher output voltage than rated, two or three supplies may be connected in series.

Three-phase Operation . . . Balancing heavy loads on three-phase input lines can be achieved by connecting the inputs of three stock units of the same catalog number to the three-phase line and connecting the outputs in parallel as indicated above in "multiple operation."

SCRDC-III PERFORMANCE CHARACTERISTICS

Static Line Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within ± 0.1% of nominal or 50 mv., whichever is greater for an input voltage range of 100-130 volts, 50/60 Hz.

Static Load Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within ± 0.5% of nominal or less for static output load changes within the range of zero to full load.

Ripple/Pard . . . The SOLA SCRDC-III will maintain the output voltage within ±2% of the nominal or less for both periodic and random deviations. The RMS ripple does not exceed 1% of the nominal, or 300 millivolts, whichever is greater.

Dynamic Line Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within ±1.0% of nominal or less for step line voltage changes of ±10% within the static range given above.

Dynamic Load Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within ±2.0% of the nominal or less, for step load changes of up to 25% of the full load rating within the load range of 25 to 100% of full load.

Frequency . . . The SOLA SCRDC-III will meet the above regulation criteria over an input frequency range of 47 to 63 Hz without customer tap changing or jumpering.

Response . . . The SOLA SCRDC-III supply will recover from dynamic changes within the specified range given above to levels within the specified static band in less than 250 milliseconds.

Efficiency . . . The efficiencies of the SOLA-SCRDC-III supplies at full load will vary directly as the output voltage and load. Figure I and II below plot efficiencies as a function of load and output voltage level respectively.

Operating Temperature . . . The SOLA SCRDC-III power supply is designed to operate with convection cooling over a range of input ambients to the supply of 0°C to 40°C. The output voltage will vary less than .05%/°C over the operating range. Derate 2.5%/°C up to 50°C.

Isolation . . . Isolation between the primary and secondary of the input transformer provides electrical separation between the AC source and the DC load.

SOLA® CVDC power supplies, available off-the-shelf.

Sola offers a wide range of CVDC type power supplies which are available from stock of your local electronic parts distributor or the factory. These standard designs are available in any quantity and are the result of Sola custom engineering efforts.

Inherently highly reliable, the CVDC supplies are ruggedly built and use simple circuitry. Fast and dependable regulation, current limiting, and high efficiency are provided by the heart of the supply: the famous Sola Constant Voltage Transformer.

CHARACTERISTICS

- Fast, dependable line-voltage regulation: within ±1% for fluctuations of ±15%; voltage will return to regulation envelope in approximately 50 milliseconds.
- Load regulation: from 1/2% to 8%, one half to full load.
- Automatic current limiting: short circuit protection; withstands load faults; high overloads cannot damage power supply or equipment components.
- High efficiency: upwards of 75%; low input-power requirements.
- Simplified operation: no adjustments or maintenance; continuous duty.
- Convection cooling.
- Ripple: 1% rms maximum.
- Ambient operating temperature: 50° C maximum.

Constant-voltage Sola transformer provides ±1% regulation for line voltage variations as great as ±15%, serves as the heart of CVDC power supplies for voltage-sensitive equipment.

SPELLMAN
HIGH VOLTAGE POWER SUPPLIES

for industry, science instrumentation, education, aerospace, defense, displays

RACK MOUNTED

- All Solid State, Silicon Semiconductors
- Short Circuit and Overload Protected
- High Performance—0.01% Regulation
- Low Price
- Unique Circuitry
- Safety Insured
- Kilovoltmeter and Milliammeter
- Full Range Control With Multiturn Potentiometer

Spellman High Voltage Power Supplies are the result of more than twenty years of development and refinement. Employing unique RF-Oscillator circuitry with an exclusive low stored energy feature, Spellman HV power supplies ensure low corona, low leakage, and long trouble free life.

RACK MODELS Size and Weight

19″ relay rack panels with standard notching. Behind-panel depth is 16½″. Any rack model can be furnished installed in a bench-mounting cabinet. Portable units available for most rack mounted ratings.

Output Voltage	Rack Panel Height	Weight	Shipping Weight
5KV thru 30KV	5¼″	28 lbs.	40 lbs.
40KV	8¾″	30 lbs.	42 lbs.
60KV	12¼″	35 lbs.	48 lbs.
100KV	17½″	40 lbs.	55 lbs.

Focus Tap Option on 30KV and 40KV units indicated by PF.

Polarity indicated by P, N, or PN.

SPECIFICATIONS

	RHR SERIES	UHR SERIES
REGULATION		
No load to full load	0.01% or 100mV	±2% of max. rated voltage
Line from Min.-Max.	±0.01% or ±100mV	±2% of max. rated voltage
RIPPLE	0.02% RMS or 200mV	0.1% RMS of max. rated voltage
TEMP. COEFF.	0.01% between 0°C and 60°C	0.2% between 0°C and 60°C
INPUT	105-125V, 50-60Hz, Single phase	

RHR units adjustable from 0 to rated voltage by means of a ten turn precision potentiometer with better than 0.02% resolution.

All rack models have both voltage and current meters.

RF-OSCILLATOR ADVANTAGES

The unique advantages of the RF-OSCILLATOR HIGH-VOLTAGE SUPPLY have been developed and refined by the Spellman Organization for over 20 years.

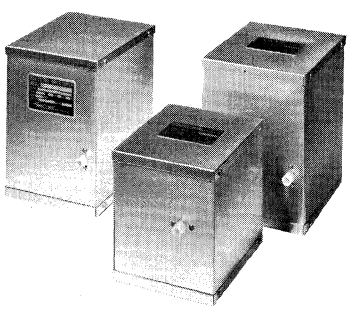
ECONOMY. There is no other way of generating filtered high-voltage DC, unregulated or regulated, that can even begin to compete with the RF oscillator method, between 5 and 100KV, up to 200 Watts.

SAFETY. Since the RF oscillator is operating at a relatively high frequency, very small capacitors are used to achieve low ripple. The RF supply requires only about one-thousandth as much stored energy (CV^2) in its output filter as does any 60 Hertz supply. Consequently, this supply ensures the highest possible degree of personnel protection.

NON-DESTRUCTIVE TESTING. As explained above, the stored energy in the RF filter is so low that these supplies are ideal for cable testing, corona testing, and other processes in which arcs and breakdowns are inevitable, but must not be allowed to damage the components in which they occur.

MODULAR STYLE

HIGH VOLTAGE POWER SUPPLIES



Modules are built into heavy-gage aluminum housings. Seven standard sizes are available.

OPTIONAL ITEMS

Floating outputs, positive/negative dual outputs and special taps available on order. Other modules at higher voltages available on request. Modules with adjustable output available for both DC and AC input.

			FRHM—REGULATED FIXED OUTPUT				UHM—UNREGULATED INPUT—CONTROLLABLE

3% for half to full load
.02%/°C from 0 to 60°C

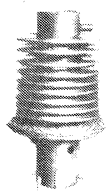
Ripple: .5% or better as required

How to specify Spellman MRM (Miniature Regulated Modules) units.

MRM 1.5 P 150 D

- MRM — Miniature Regulated Module
- 1.5 — Kilovolts
- P — P or N
- 150 — Milliwatts
- D — DC Input

MODEL TRF10
High Voltage
STEP-UP COIL



for transistor drive circuits

OUTPUT TO 10 KV DC @ 1 ma.

Coil driven by single self-oscillating transistor • Input voltage up to 28 V DC approx. 1 amp. • Coil height—4¼″ • Diameter—3″ • Approx. operating frequency 120 KC
Higher voltages available when used with proper rectifier/multiplication circuit.
Complete with technical data and schematic diagram for construction of self-oscillating RF circuit at approximately 120kHz. Other coils available for vacuum-tube circuits.
Model TRF10 . . . $24. Net

ELECTROSTATIC FLOCKING SYSTEMS

Through our specialized work in high voltage technology we have established a reputation as a leading source for electrostatic flocking systems. We now produce a variety of electrostatic flocking systems for manual and production line use. Spellman Model PB-3 for flat surface flocking and Spellman Model PB-4 for three dimensional flocking are available off the shelf.

CUSTOM AND SPECIAL PURPOSE DESIGNS

Over the years, we have developed and built many thousands of custom power supplies, in hundreds of non-standard mechanical configurations, and hundreds of non-standard ratings. We are prepared to quote promptly and accurately, and deliver on short schedules as well, on most custom requirements.

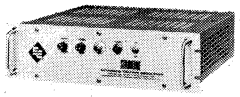
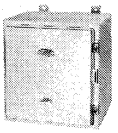
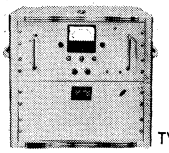
STABILINE® automatic VOLTAGE REGULATORS



TYPE IES9101



TYPE EMT10228



TYPE EMT4115B

Deliver a constant output voltage regardless of variations in input voltage or changes in line current. Types available from 0.25 to 275 kva. Submit specifications for ratings desired but not given in the charts. Input voltage ranges shown are at nominal output voltage; input range shifts with output voltage setting.

EMT SERIES – Electro Mechanical Transistorized types with virtually zero waveform distortion, 47-63 hertz frequency range, very low internal impedance, negligible phase shift and efficiency approximately 99%. Rated accuracy ±.75% for all line voltage or load current variations within unit stated range. Insensitive to load magnitude and power factor; no effect on system power factor.

EMS SERIES – Electro Mechanical Transistorized types for heavier load requirements. Same operating characteristics as EMT Series. Units with letter I before first digit in type number have individual control for each line-to-neutral voltage.

EMK SERIES – Electro Mechanical Transistorized types providing faster correction times than other electromechanical models.

IES SERIES – Instantaneous Electronic Solid-State types having extremely fast correction, no moving parts. Will maintain output voltage within a 100 millivolt rms band for any combination of rated input voltage and/or load from 1.0 to 0 power factor lagging. Efficiency to 95%. All units have provision for remote sensing and have plug-in solid-state circuit boards.

MILITARIZED – Meet requirements of applicable military specifications. Type EMTH41007MH is 3½ x 6 x 4½"; type EM4108MCR fits standard 19" relay rack. Accuracy ±1.0%.

STABILINE®
Full Range REGULATOR CONTROLLERS

TYPE FR500MP

Designed for use with any motor-driven POWERSTAT Variable Transformer. Provide *full range:*

REGULATED AC VOLTAGE – Output voltage will remain within a 2-volt band when used with 120 volt unit and a 4-volt band when used with 240 volt types.

REGULATED AC CURRENT — Current can be regulated accurate within ±1% of maximum current setting with user supplied current transformer and Superior Electric transformer type T6049.

REGULATED DC VOLTAGE – Type FR500DC with a user-supplied d-c power supply will provide regulated d-c voltage.

▲At 400 Hertz.
†Also available as rack model (suffix R when ordering).
◀For 60 Hertz operation only.
*Can also be operated on an input range of 95 to 135 volts with a rating of 57 amperes, 6.6 kva and a correction rate of 0.075 seconds per volt.
§Also available as rack (suffix R when ordering) or wall mounted (suffix W when ordering) models.
‡Unit can be converted for 208 volt operation by simple tap changes. Input and output voltage ranges change proportionally.
**At nominal output. Shifts with output voltage setting but not proportionally.
††Also available in open construction (suffix U) and with screened and enclosed (suffix UT) construction.
‡‡At nominal output. Shifts proportionally with output voltage setting.

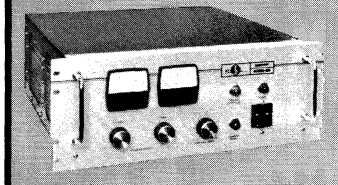
DCR Series
Full Range, Silicon Controlled Rectifiers (meets MIL-I-26600 and MIL-I-6181D)



Notes:

1. Furnished in self-contained cabinet; also fits standard 19″ rack without alterations or additions. Single or dual rack panels for half rack size units are available at $15.00 each panel. Applies to QRC & DCR only. Single and dual 19″ adapters permit rack mounting a single QRD, or two units side by side. $15. (also QRS)
   SINGLE MOUNTING for 3½″ high units RP12
   SINGLE MOUNTING for 5¼″ high units RP13
   DUAL MOUNT FOR 3½″ high units RP14
   DUAL MOUNT for 5¼″ high units RP15
2. Ripple and transient specifications apply at 60Hz and will vary by a factor of $(60/f)^2$ where "f" is the input frequency.
3. QRD Series also operates in High Speed Mode. Programming Time: 25 μs from zero to Emax; 10 μs from Emax to zero (measured at the 10% and 90% points).
4. Optional auxiliary chassis permits operation from 342-418, 390-440 or 414-506 Vac input..
5. Drift — for 8 hours
   QHS 20-1 — 10 ppm + 100μV
   QHS 40-.5 — 10 ppm + 100μV
   QHS 100-.2 — 10 ppm + 100μV
   Drift — for 1 week
   QHS 20-1 — 25 ppm + 200μV
   QHS 40-.5 — 25 ppm + 200μV
   QHS 100-.2 — 25 ppm + 200μV

Full Range, Silicon Controlled Rectifiers

Notes:

6. DCR40-250A, DCR150-70A, DCR300-35A and DCR600-18A input voltages: 187-229Vac, 207-253Vac, or 414-506 Vac, at 57-63Hz (0-100% Eo max)
   390-440Vac at 47-63Hz (0-100% Eo max)
   342-418Vac at 47-63Hz (0-90% Eo max)
   DCR20-1000A and DCR40-500A input voltages:
   342-418Vac at 47-63Hz (0-75% Eo max)
   390-440Vac at 47-63Hz (0-92% Eo max)
   414-506Vac at 57-63Hz (0-100% Eo max)

0.025% (after warmup)

105-125/200-240/210-250

■ Temperature Range: —20°C to +71°C. ■ Series Operation: Up to 200 volts maximum. ■ Parallel Operation: QRE models . . . 4 units maximum; QSB models . . . 20 units maximum. ■ RFI: Meets MIL-1-6181D and MIL-1-16910C. ■ Overload/short circuit protection. ■ Remote sensing. ■ Overvoltage protection: Standard on QRE models and QSB12-30, optional accessory for QSB models (see chart above).

**PARD*—"The 'Periodic and Random Deviation' of the output DC voltage, current or power from its average value, with all external operational and environmental parameters maintained constant."

NOTE: All prices above are U.S.A. list.

Notes:

11. Line regulation available — Option #C1 regulates DC output to ±1.5% — Option #C2 regulates the output to ±0.2% (For ±10% line change).

12. Ripple attenuator available—Option #L2 reduces the output ripple to 0.01% rms.

13. 1000 Series Controller supplied for rack mounting. 2000 Series Controller is supplied in a cabinet (removable for rack mounting). 5000 Series is furnished as standard rack mounted unit with optional $40.00 cabinet side enclosures.

14. Line regulation available (option #C2) regulates output to ±0.2%. (For ±10% line changes).

15. Ripple attenuators available—option #L1 reduces the output ripple to 0.1% rms—option #L2 reduces the output ripple to 0.01% rms.

16. Ripple attenuator available (option #L1) reduces the output ripple to 0.1% rms.

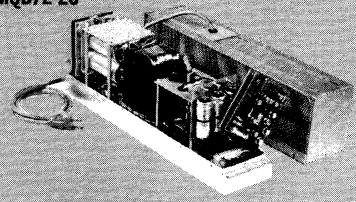
Special purpose power supplies

XLS Series Xenon Lamp Supplies

	XLS-150	XLS-35	XLS-450
Starting Voltage	20 kV	20 kV	30 kV
Operating Voltage	20 Vdc ±3V	12 Vdc ±2V	20 Vdc ±3V
Operating Current	7-8 Adc	3.5 Adc	22-28 Adc

Single-shot starting impulse (less than 0.5 joules) assures long lamp life. Current ripple 1.0% rms max.

AEC Nuclear Instrument Module Power Supply MQB72-2C



A precisely regulated, multiple output supply designed in accordance with AEC Specification TID-20893 Rev. 2, Type 1, Class A. This supply is approved for use in standard nuclear instrumentation systems. Features are high reliability, 60°C ambient rating and complete overload protection.

Output	#1	#2	#3	#4
Voltage	+12 Vdc	−12 Vdc	+24 Vdc	−24 Vdc
Current	2.0A*	2.0A*	1.0A*	1.0A*

*72W maximum output capability.

Custom design

Sorensen's standard product technology provides the basis for the company's custom design capability. This diversified product group ranges from component-type constant voltage transformers to large high voltage equipment. Combining engineering capability and production experience with the industry's largest and most complete plant facility enables Sorensen to make custom product recommendations without any of the prejudice often present in negotiating with a narrow-line company with limited custom experience.

To most effectively implement the custom design program, the company has organized a separate applications engineering, design engineering, and manufacturing task force to handle custom work. This group functions almost as a subsidiary of the company, guaranteeing that each custom application will receive the undiluted, uninterrupted attention of a group of specialists concerned only with the optimum solution to each specific problem. The company's engineering staff includes personnel with experience in the design and development of virtually all types of controlled power equipment.

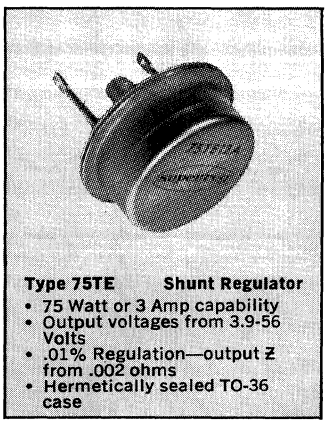
NEW IDEAS IN POWER SOURCES

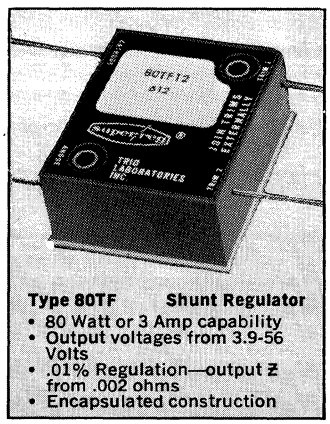
triolab

superreg® PRECISION POWER REGULATORS
BUILD A POWER SUPPLY IN MINUTES USING ANY DC SOURCE

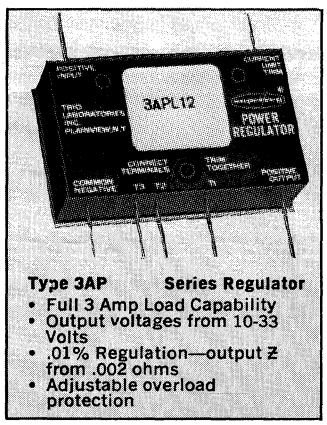
- LOW OUTPUT IMPEDANCE: .01% REGULATION
- 125°C OPERATION
- SHORT CIRCUIT PROTECTION
- TEMPERATURE COMPENSATED: .01%/°C
- ADJUSTABLE OUTPUT: ±10%
- 104 MODELS AVAILABLE



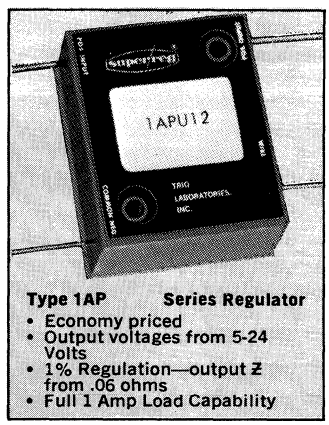
Type 75TE Shunt Regulator
- 75 Watt or 3 Amp capability
- Output voltages from 3.9-56 Volts
- .01% Regulation—output Ƶ from .002 ohms
- Hermetically sealed TO-36 case



Type 80TF Shunt Regulator
- 80 Watt or 3 Amp capability
- Output voltages from 3.9-56 Volts
- .01% Regulation—output Ƶ from .002 ohms
- Encapsulated construction



Type 3AP Series Regulator
- Full 3 Amp Load Capability
- Output voltages from 10-33 Volts
- .01% Regulation—output Ƶ from .002 ohms
- Adjustable overload protection



Type 1AP Series Regulator
- Economy priced
- Output voltages from 5-24 Volts
- 1% Regulation—output Ƶ from .06 ohms
- Full 1 Amp Load Capability

Super/reg miniature regulators, uniquely designed for maximum heat transfer and power handling capability, contain all the electronic circuits necessary for the most sophisticated system needs. Simply connect rough DC from any source – a semi-filtered, half-wave rectified transformer output or even a battery – and you have instant, **precision DC power where you need it:** at the load itself.

Available in shunt and series versions, these ultra-compact configurations provide maximum layout flexibility over a wide range of voltage levels. The point-of-load installation eliminates distribution-line losses and cross-talk. And the off-the-shelf stock levels enable you to build your own custom power supply – literally in minutes!

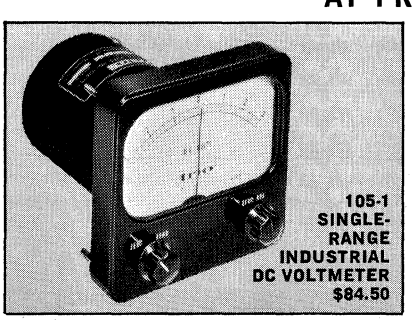
WE'RE ALSO NARROW-MINDED POWER SUPPLY DESIGNERS

We concentrate exclusively on a very narrow yet vital portion of the power supply spectrum – multi-output MIL-design supplies.

We focus on squeezing out those few percentage points more than 75% efficiency, or pushing the power density just a little bit better than 4 delivered watts per cubic inch.

When the supply you need must be smaller, more reliable, more efficient and provide that seemingly impossible combination of parameters, please call on our narrow-minded designers.

STANDARD AND CUSTOM BUILD-IN ELECTRONIC VOLTMETERS AT PRODUCTION PRICE AND DELIVERY!



105-1 SINGLE-RANGE INDUSTRIAL DC VOLTMETER $84.50

103-1 RUGGEDIZED MULTI-RANGE AC VTVM $272.00

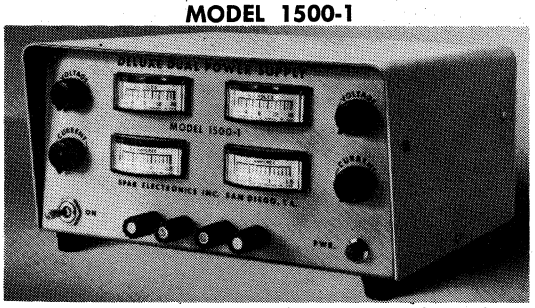
302-1 PHASE-SENSITIVE SINGLE-RANGE AC VOLTMETER $275.00

We originated the build-in concept. Today, 17 years later, our 2300 standard variations still represent over 90% of all build-in electronic voltmeters presently in use. No matter how complex **your** needs for AC, DC or phase-sensitive voltage measurements, we'll provide a **custom** build-in voltmeter at **production** price and delivery – from our extensive inventory of solid-state circuit modules.

TRIO LABORATORIES, INC. • 80 DUPONT ST., PLAINVIEW, L. I., N. Y. 11803 • TEL: 516-681-0400 • TWX: 510-221-1861

REGULATED D.C. POWER SUPPLIES HIGH PERFORMANCE/LOW COST

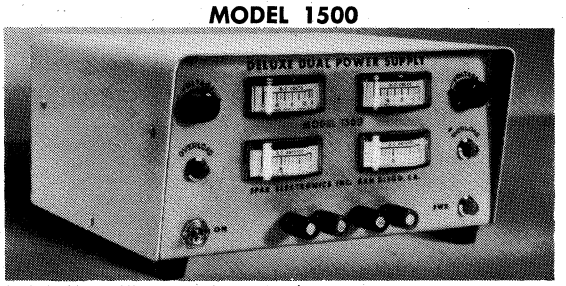
MODEL 1500-1



ADJUSTABLE VOLTAGE — 0 - 16 Volts or 0 - 32 Volts Dual
ADJUSTABLE CURRENT — 0.05 - 1.5 Amps (both sides)

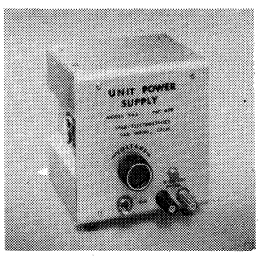
$145.00 F.O.B.

MODEL 1500

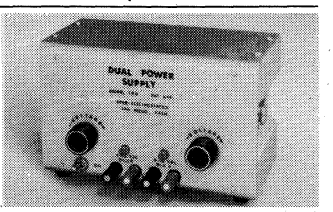


HIGH CURRENT — 1.5 Amps Dual
ADJUSTABLE VOLTAGE — .75 - 16 Volts or 1.5 - 32 Volts Dual
FLASHING OVERLOAD INDICATOR — Both Sides

$115.00 F.O.B.



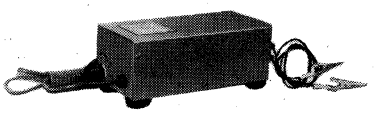
- SOLID STATE DESIGN
- LOW RIPPLE AND NOISE
- LOW WARMUP DRIFT
- LOW OUTPUT IMPEDANCE
- EXCELLENT REGULATION
- SHORT CIRCUIT AND OVERLOAD PROTECTION
- FLASHING OVERLOAD INDICATOR
- WIDE TEMPERATURE OPERATING RANGE
- **ONE YEAR WARRANTY**



MODEL 100 SINGLE

ADJUSTABLE
±16V DC at 1.0 Amp

$45.00 F.O.B.



REGULATED AT LOW COST

MODEL
117C-0-12-1.5R
ADJUSTABLE
0 to 13V DC at 1.5 Amp

$22.00 F.O.B.

MODEL 500 DUAL

ADJUSTABLE — ±16V D.C. at 0.5 Amp
ADJUSTABLE — ±16V D.C. at 0.5 Amp

$69.00 F.O.B.

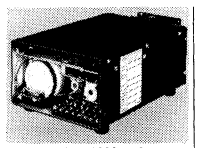
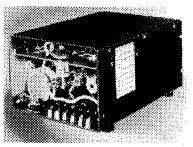
HI-PAK POWER SUPPLIES



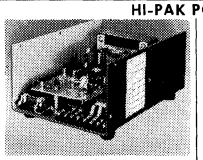
HM-51000-B-C

Price	$163.00 (1/4),$97.80 (100up)
DC Output	3 to 6 Volt at 10 Amp.
Ripple-Out	500μV(RMS)
AC Input	105/125 Vac-50/60 HZ
Reg. NL/FL	.025V
Reg. VS Line	.005V
Size (WXHXL)	5-7/8 x 3-3/4 x 9-3/4
Features	Over Voltage/Fan/71°C



HM-53000-B-C

Price	$212.00 (1/4),$127.20 (100 Up)
DC Output	3 to 6 Volt at 30 Amp.
Ripple-Out	2 MV(RMS)
AC Input	105/125 Vac-50/60 HZ
Reg. NL/FL	.06V
Reg. VS Line	.005V
Size (WXHXL)	6-7/8 x 4-7/8 x 10-3/4
Features	Over Voltage/Fan/71°C

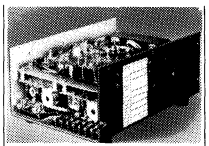


H-12400

Price	$68.00 (1/4),$40.00 (100up)
DC Output	12±1VDC at 4 Amp
Ripple-Out	30 MV(RMS)
AC Input	105/125 or 210/250 VAC-50/1000 HZ
Reg. NL/FL	±2%
Reg. VS Line	±1%
Size (WXHXL)	5-7/8 x 3-3/4 x 8"
Features	Short/Thermal Protection

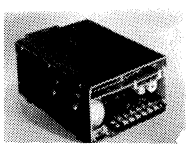
H-12700

Price	$98.00 (1/4), $60.00 (100up)
DC Output	12±1 VDC at 7 Amp
Ripple-Out	5 MV(RMS)
AC Input	105/125 or 210/250 Vac 50/1000 HZ
Reg. NL/FL	±2.5%
Reg. VS Line	±1%
Size (WXHXL)	6-7/8 x 4-7/8 x 9
Features	Short/Thermal Protection



HMD-15150

Price	$127.00(1/4),$76.20(100up)
DC Output	8 to 16 VDC (Dual) at 1.5 Amp
Ripple-Out	500 μV (RMS)
AC Input	105/125 or 210/250 VAC 50/1000 HZ
Reg. NL/FL	±0.05%
Reg. VS Line	±0.05%
Size (WXHXL)	5-7/8 x 3-3/4 x 8
Features	Dual Outputs/Temp. 01%/C°



HM-24700-C

Price	$170.00 (1/4), $102.00 (100up)
DC Output	20 to 25 VDC at 7 Amp
Ripple-Out	500 μV (RMS)
AC Input	105/125 VAC-50/60 HZ
Reg. NL/FL	±0.05%
Reg. VS Line	±0.03%
Size (WXHXL)	6-7/8 x 4-7/8 x 10-3/4
Features	Fan/71°C

Here they are . . . the advanced-design

Power Supply Modules

Technipower is the industry's most nearly *complete* source for the widest range of modular power supplies.

Prove it yourself. (1) Define your specific needs (2) Consult the table to your right. See how many model series in the Technipower line there are which satisfy your needs in general terms. (3) If you have our catalog 691, consult it on the indicated page, and you'll probably find the precise item you want. (If you *don't* have our catalog, call Jack Pumroy, our sales manager, at 203-438-0333, and he'll give you prompt satisfaction.)

If you're not already familiar with Technipower's leading position within the industry, the following description is definitive:

Technipower

Today, the name "Technipower" and "modular power supply" are synonymous. This is no accident. Nearly a decade ago, a group of seasoned power supply people formed Technipower to provide the equipment designer with an economical alternate — the "Power Module" — to the use of costly custom-built or laboratory power supplies. Offering a wide variety of models and packaging, combined with fast delivery, "Power Module" became an industry word.

In this catalog you will find an expression of the Technipower objective: to provide the largest single-source variety of power supplies for OEM use — literally thousands of models to meet just about any application.

Throughout the years, Technipower has stood not only for that objective, but also for the latest in technical advancement. Many advancements in the power supply art have been contributed by Technipower. A few of the more significant are:

First silicon semiconductor catalog product line;

First cataloged power supplies designed to operate above 100°C;

First manufacturer to offer all-silicon semiconductors, exclusively;

First transistorized AC-DC power supply switching regulator;

First commercially offered, AC-DC power supply employing transformation and rectification at high frequency.

Technipower is not resting on its achievements. Backed by the financial and managerial strength of BENRUS, Technipower is moving rapidly and in this catalog presents three important forward steps:

Overvoltage Protection Modules (a technically accurate description) featuring protection not only against transients but also against power supply failure, the major cause of damage to IC's;

DESCRIPTION	TYPE GENERALLY DESCRIBED	MODEL SERIES
OVER 400 MODELS — UNREGULATED.	MODULAR AC-DC SUPPLIES	NP-80
LOWEST COST, SMALLEST SIZE. REPLACES PC-80 SERIES.		NEW PL-80
REPLACES M-65 SERIES. SIZE FOR SIZE, 25% MORE CURRENT.		MC-65
WIDEST VARIETY LINE OF CLOSELY REGULATED MODULES.		P-80
DUAL OUTPUT MODULES.		DP & TDP-80
DESIGNED AND QUALIFIED FOR EXTREME MILITARY APPLICATIONS — GROUND SUPPORT AND AIRBORNE.		PM-95
		F & FD-115
POWER MODULE OF THE FUTURE — LOW COST, SMALLEST SIZE WATT.		NEW HF-80 & HFC-80
50A & 100A "IC" POWER MODULES.		HFT-80
HIGH CURRENT MODULES FOR "BRUTE FORCE" APPLICATIONS.		SCR-80
PROGRAMMABLE POWER MODULES.		RA-80
MINIATURE POINT-OF-LOAD REGULATORS.	MODULAR DC-DC SUPPLIES	CM-95
DC CONVERTER OF THE FUTURE — HIGH EFFICIENCY AT LOW COST.		NEW CD-95 & CDC-95
SINE WAVE, LOW DISTORTION TYPE.	MODULAR INVERTERS	AC & ACD-80
GENERAL PURPOSE SUPPLY FOR TEST APPLICATIONS AND LAB.	LAB AC-DC SUPPLIES	LA-80
ACCESSORY MODULES FOR OVER-VOLTAGE PROTECTION.	OVERVOLTAGE PROTECTORS	NEW OV

The smallest commercially offered Series Regulator power module — the PL-80 Series, featuring new low pricing and offering the latest in silicon transistor power modules;

Major price breakthroughs on the PM-95 military power supplies, the NP-80 unregulated power supplies, etc.

Available from Technipower

TECHNIPOWER
POWER SUPPLIES

Technipower, Inc. Benrus Center, Ridgefield, Connecticut 06877 A BENRUS SUBSIDIARY

TODD LABORATORY POWER SUPPLIES

FEATURES

- .01% Regulation
- .5 mV rms ripple
- All silicon—no heat sink required
- 71 degree C operating temperature
- Short circuit and overload protection
- Electronic current foldback with automatic recovery
- Over Voltage protection option
- Designed to meet MIL environmental specifications
- Repairable
- No turn-on or turn-off spikes or overshoot

*Meters on front panel—add $30.00.

NOTES: 1. Ratings are for 47 to 65 Hz input. Contact factory for 400 Hz operation.
2. Overvoltage protection available incorporated within the unit—add $90.00.

SPECIFICATIONS—SINGLE OUTPUT

INPUT: 105-132 Volts ac 47-420 Hz.

OUTPUT: Floating, isolated from ground, 300 Vdc max.

REGULATION: LINE: .01% or 1 mV whichever is greater, for rated input line voltage changes.
LOAD: .01% or 1mV whichever is greater, for no-load to full load change at any output within specification.

RIPPLE: Less than .5mV rms, 5 mV Peak to Peak (to 10 MHz) (50-60 Hz).

STABILITY: .02% or 10 mV, whichever is greater, for 8 hrs., after 30 min. warmup. Measured at constant input line, load and amb. temp.

TEMPERATURE COEFFICIENT: (.02% + 100 uV)/Deg. C.

TEMPERATURE RANGE: OPERATING: —20 to +71 Deg. C. (see power rating chart).
NON-OPERATING: —55 to +85 Deg. C.

RECOVERY TIME: 50 microseconds to within 50 mV of regulation spec for no-load to full-load change.

REMOTE PROGRAMMING: RESISTANCE: 1000 ohms/volt.
VOLTAGE: 1 volt/volt.

REMOTE SENSING: The amplifier is capable of compensating for a 1 volt load lead loss and still maintain regulation at the load. An additional 1 volt is available at the output if local sensing is used.

OVERLOAD PROTECTION: Fixed, automatic electronic current foldback limits output current for overload and short circuit conditions. Automatic recovery upon removal of fault condition.

THERMAL PROTECTION: Self-resetting thermostat turns supply off for excessive ambient.

OVERVOLTAGE PROTECTION (OPTIONAL): Adjustable overvoltage protection, mounts externally.

MODE OF OPERATION: Constant voltage with automatic current foldback.

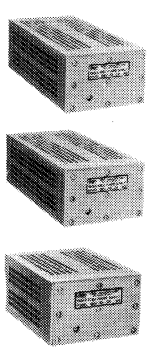
CONTROLS: Recessed screwdriver adjust over output range.

CONNECTIONS: Barrier strip.

MIL SPECS, DESIGNED TO MEET THE FOLLOWING:

RFI	MIL-I-16910
Vibration	MIL-T-4807A
Shock	MIL-E-4970A Proc. 1 & 2
Humidity	MIL-STD-810 Method 507
Temp. Shock	MIL-E-5272C(ASG) Proc. 1
Altitude	MIL-E-4970A Proc 1
Marking	MIL-STD-130 (Component Board)
Quality	MIL-Q-9858
Transformers	MIL-T-27B Grade 6, Class S
Wire	MIL-W-16878
Fungus Nutrients:	None used

DUAL OUTPUT



Model	Nom. Volt.	MAX I AT AMBIENT 50°C	60°C	71°C	Unit Price

SPECIFICATIONS—DUAL OUTPUT-TRACKING SUPPLIES

Negative output tracks positive output to within ±30 mV.

INPUT: 105-132 Vac, 47-420 Hz.

OUTPUT: Common return floating off ground to max of 300 Vdc.

REGULATION: LINE: 0.1% for rated input line voltage changes.
LOAD: 0.1% no load to full load.

RIPPLE: Less than 0.5 mV rms.

STABILITY: 0.2% for 8 hrs. after warm-up measured with all other parameters constant.

TEMPERATURE COEFFICIENT: .02%/°C

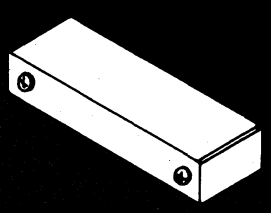
TEMPERATURE: OPERATING: —20° to 71°C
NON-OPERATING: —55° to 85°C

RECOVERY TIME: Less than 50 μsec to 20 mV.

SHORT CIRCUIT PROTECTION: Auto reset current foldback.

REMOTE SENSING: Maintains regulation at load.

OVERVOLTAGE PROTECTION—ADJUSTABLE—CROW BAR



For use with Laboratory or Module Power Supplies. Mounts on rear of unit and is adjusted over ranges listed. Will fire an SCR and present a short circuit across the output, driving the voltage to nominal "0".

Model	Adj. Range	Unit Price	Max I
FOV-A1	3-15 Vdc	30.	10A
FOV-A2	3-50 Vdc	30.	10A
FOV-B1	3-15 Vdc	75.	30A
FOV-B2	3-50 Vdc	75.	30A

Rack Mount Power Supplies have overvoltage protection circuits incorporated within the unit when this option is specified.

SPECIFICATIONS

INPUT: 105-132 Volts ac, 47 to 65 Hz.

OUTPUT: Floating, Isolated from ground up to 300 Vdc max.

CONSTANT VOLTAGE MODE

REGULATION: LINE: 0.01% or 1 mV whichever is greater for rated line voltage changes within specifications.

LOAD: 0.01% or 1 mV no load to full load at any output within specifications.

RIPPLE: Less than 0.5 mV rms, less than 2 mV Peak to Peak (to 10 MHz).

STABILITY: 0.02% or 10 mV for 8 hours after warm up. Measured at constant line, load and ambient temperature.

TEMPERATURE COEFFICIENT: (0.02% + 100 uV)/°C.

OPERATING TEMPERATURE RANGE: 0° to 50°C.

RESPONSE TIME: 50 μsec.

SHORT CIRCUIT & OVERLOAD PROTECTION: Front panel control adjusts current limit from approx. 1% to maximum.

REMOTE PROGRAMMING: Available on all units at approximately 100 ohms/volt, or by voltage ratio of volt/volt. (Open programming leads will cause voltage to rise above rating).

GENERAL SPECIFICATIONS

PROTECTION: AC power line fused for input protection.

CONTROLS: Coarse and fine voltage, and current control located on front panel.

METERS: QAD and HAD Models: A single meter for each output with slide switch to read current, and full range voltage. (2% F.S.) QBW and HBW Models: Voltmeter and ammeter mounted on front panel (2% F.S.).

REMOTE SENSING: The amplifier is capable of compensating for a 1 volt load lead loss and still maintain regulation at the load. An additional 1 volt is available at the output if local sensing is used.

FAST PROGRAMMING: Voltage can be programmed either up or down at rate of 10 mV/microsecond.

CONSTANT CURRENT MODE

CURRENT RANGE: Adjustable by front panel control from 1% to maximum rating.

VOLTAGE COMPLIANCE: 0 to maximum rating.

REGULATION: LINE: 0.4% of I max. for 105 to 132 Vac line change at any output within rating.

LOAD: 0.1% of I max. over rated compliance range.

RIPPLE: .1% rms .2% Peak to Peak to 10 MHz.

STABILITY: .1% of rated current for 8 hours, after warm up, measured with all parameters held constant except time.

TEMPERATURE COEFFICIENT: .1% I max/°C.

REMOTE PROGRAMMING: (Available on QBW and HBW Series) 1000 ohms equal to maximum current.

TODD 5-YEAR POWER SUPPLY WARRANTY—PARTS AND LABOR

Todd Products warrants all equipment it manufactures to be free from defects in material and workmanship, and that it will meet its performance specifications for a period of 5 years after original shipment to the purchaser or to the user if originally sold as an OEM item. Our obligation under this warranty is limited to repairing or replacing any instrument which shall be returned to us, or any authorized field service depot, with transportation charges prepaid, prove after our examination to be defective.

We reserve the right to include design changes, and modifications at any time without notice, and without incurring any obligation to make such changes to instruments previously sold, and to discontinue instruments without notice.

This warranty is in lieu of all other obligations or liabilities expressed or implied, and specifically excludes all liability for consequential damages or costs.

All prices are FOB, Hicksville, N.Y. Prices and specifications are subject to change without prior notice.

TODD PRODUCTS CORP.

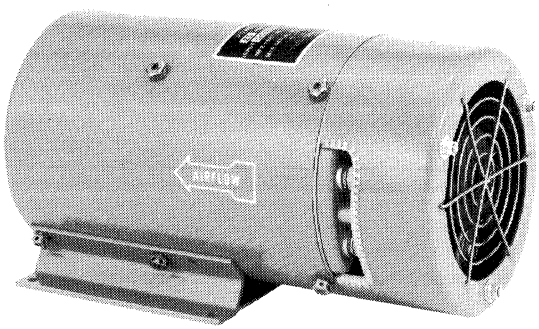
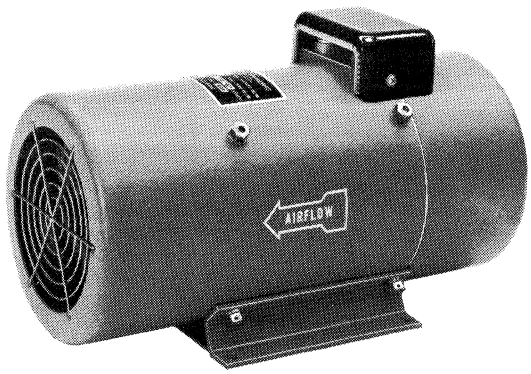
TUNG-SOL POWER SUPPLIES

Standard units that meet a lot of special requirements

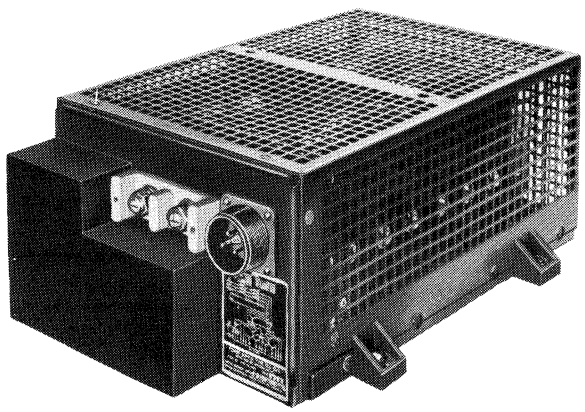


Miniaturized power supply available in four models that provide 28VDC at 25, 50, 100 or 200 amps. All operate from 120/208 v, 47-65 Hz, 3-phase, 4-wire AC inputs.

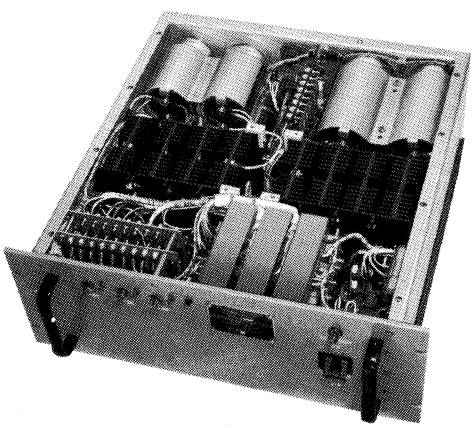


Ground power supply providing 28 VDC at 100, 200, 300, or 400 amps from input power of 400 cps, 200V. RFI per MIL-E-55301 and Environmental per MIL-E-5272.

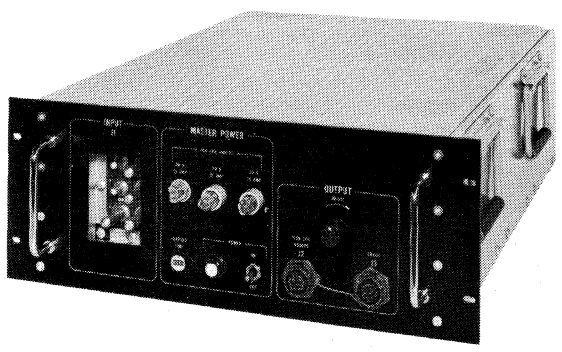
Transmitter-receiver power supply. Eleven different outputs, remotely controllable. Meets MIL-E-16400.



Convection cooled, high voltage regulated airborne power supply. Output: 200A at 28 VDC. Regulation: 8% at 200V.



Highly regulated, multiple output: −24 VDC @ 10 A; −10 VDC @ 10 A and +10 VDC @ 6A. Meets MIL-E-16400.



Three phase line regulator and power supply. Multiple AC-DC regulated outputs at 13.5 and 25A. Meets MIL-T-21200C.

Tung-Sol has engineered an extensive line of production power supplies that meet requirements not covered by the usual off-the-shelf types. In-house capability in circuitry, solid state devices, vital components and packaging, is coupled with thorough field experience. As a result, Tung-Sol is producing custom-performance units at prices competitive to less precise types. Why not make your own comparison. Describe your requirements. Our recommendations may result in a better device, a lower price, or both.

TOPAZ INC.

ELECTRONICS MAGNETICS

3802 HOUSTON ST., SAN DIEGO, CALIFORNIA • 92110 (714) 297-4815

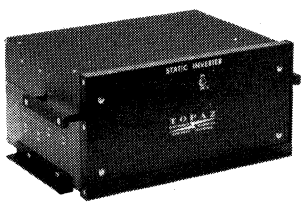
SOLID STATE POWER CONVERSION EQUIPMENT

HIGH-PERFORMANCE INVERTERS, CONVERTERS & FREQUENCY CHANGERS

Available from Stock !!

Topaz static inverters, frequency changers, DC-DC converters and uninterruptible power systems are in use throughout the world. Applications are found wherever quality AC power is needed from DC or "rough" variable sources. Patented designs, which combine in-house transformer and electronic capabilities, contribute to the high quality and reliability of Topaz products. The use of solid-state components, convection cooling, versatile protection circuits, rugged construction and power transistors rather than SCRs (for minimum RFI) in most standard products, assures maximum efficiency and freedom from component failure.

GW SERIES



DC-to-AC INVERTERS SINE WAVE OUTPUT

General Specifications

Regulation — Frequency: ±.05% for all models shown (±1% also available, all models). Output Voltage: ±5% for all sinewave models with any combined change in line and load.
Harmonic Distortion—Less than 3% at full load.
Efficiency—70% nominal
Protection Against—Reversed input polarity; Overloaded or shorted output; Input over-and under-voltage; Automatic current limiting above rated VA.
External Sync—Output frequency can be synchronized with sinewave or pulses—all models.
Construction—All-transistorized for low RFI; Rack or portable (add suffix "D") models available.
Environmental—Temperature-Operating: —20°C to +50°C; Storage: —40°C to 80°C; Shock and Vibration: Suitable for all mobile uses.

60 Hz SINE WAVE OUTPUT

12 or 24 VDC (Dual-Input) MODELS (11-15 or 22-30 VDC inputs)

ELECTRONICS MAGNETICS

3802 HOUSTON ST., SAN DIEGO, CALIFORNIA • 92110 (714) 297-4815

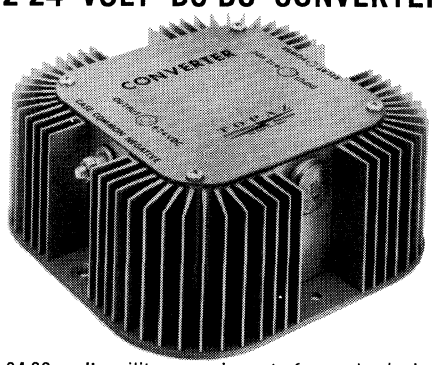
SOLID STATE POWER CONVERSION EQUIPMENT

CUSTOM-DESIGNED INVERTERS, CONVERTERS AND NOISE-SUPPRESSION EQUIPMENT

Topaz maintains an engineering department of power conversion specialists who are eager to design to your special requirements. Shown below are typical examples of products created to solve customers' problems.

NEW! NEW!

12-24 VOLT DC-DC CONVERTERS



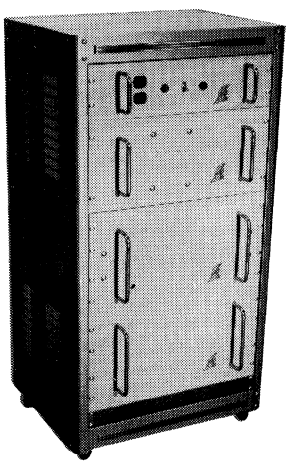
Operates 24-28 volt military equipment from standard commercial vehicles.

Input: 12-15 VDC
Output: 24-28 VDC
Output Power: 360 VA continuous increased starting current for incandescent lamp loads.

Topaz Brochure 69-1 describes standard 250, 500, 1000 and 2000 watt DC-DC converters which provide DC output voltages from 1 volt to 200 KV from 12, 24, 28, 32, 48, 125 or 250 VDC inputs.

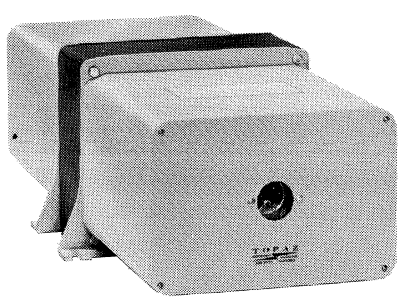
UNINTERRUPTIBLE POWER SYSTEMS

Power systems which do not turn off—even for a fraction of a cycle—when the power line fails are custom-designed by Topaz to specific customer requirements. They consist of an AC-to-DC power supply and battery charger, batteries, and a Topaz DC-to-AC inverter. Batteries in the systems undergo steady trickle charging and periodic equalizing. Topaz will be pleased to custom design your "NO-BREAK" System or provide a minor modification of an existing design to meet your requirements. Request Brochure 69-2.



NEW! NEW!

ULTRA-ISOLATION TRANSFORMERS AND POWER LINE FILTERS



A broad line of noise-suppression equipment—including power filters and line conditioners—is offered by Topaz. Units provide clean, noise-free power for sensitive equipment . . . isolate noisy devices from noise-sensitive equipment . . . and provide effective electrostatic shielding. The equipment incorporates the most advanced techniques of filter design and a unique double-box electrostatic shield. Ratings of 125 VA to 20 KVA are available. Request Brochure 69-3.

HF SERIES

LIGHTWEIGHT "THIRD GENERATION"

1ϕ and 3ϕ DC-to-AC INVERTERS and FREQUENCY CHANGERS

FROM 2 TO 15 KVA
WITH IMPROVED PERFORMANCE

For applications where weight is critical and multiple output frequencies are important, Topaz announces a new series of extremely lightweight inverters. High-frequency carriers are employed to handle the power, thereby drastically reducing the size of the system. For example, a standard 50 Hz 3.2 KVA inverter weighs 380 lbs.; a 3.5 KVA "Third-Generation" inverter with switch-selectable 50, 60 or 400 Hz output weighs only 95 lbs. DETAILS ON REQUEST.

Transfer	Line Regula. Factor	(V_{out}/V_{in})	$V_{in}^{\pm} = \pm 18V$ to ±22 Vdc, $V_{out}^{\pm} =$ ±15 Vdc $R_L = 150\Omega$	—	30	150	mV/V
	Ripple Attenuation	$\partial V_{out}/\partial V_{in}$	$e_{in} = 1$ vp-p f = 20Hz—1KHz	—	29	—	db

NOTES:
(1) Both outputs adjusted simultaneously by a single external resistor, typ. 500Ω for $V_{out}^{\pm} = \pm 15$ Vdc.
(2) Short circuit output permissable
(3) Input voltage must be greater than output voltage by 2 volts minimum
(4) Compatible with dual converter for operation from 28 volts DC.

TYPICAL CHARACTERISTICS

Specification	Condition	Typical	Units
Output Voltage	Nominal	±15	Vdc
Output Voltage Adjust	(1)	±14 to ±16	Vdc
Output Current	Full Load	±100	mA
Line Regulation	V_{in} = ±18 to ±22 Vdc	1.0	%
Load Regulation	I_{out} = 0 to 100 mA	0.2	%
Temp. Regulation	−25°C to +85°C	0.006	%/°C
Efficiency	Nom. V_{in} & V_{out} Full Load	75	%
Protection	Continuous short circuit or overload	Yes	—
Weight	Fully Encap.	1.8	oz.
Volume	—	1.125	in³

OPERATING RATINGS	Nominal	Absolute Maximum	Units
Input Voltage Range (3)	±16 — ±28	—	Vdc
Input Voltage, Continuous (4)	±19	±28	Vdc
Load	150 to ∞	Zero (2)	Ohms
Operating Temp. Range, Amb. (TA)	—	−25 to +85	°C
Storage Temp. Range	—	−55 to +125	°C

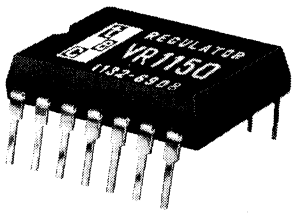
Additional Technical Data Available Upon Request.

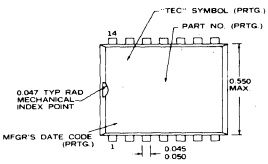
thick film hybrid circuits

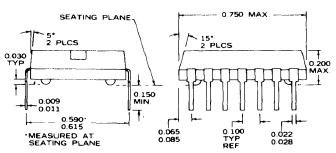
hybrid voltage regulators — VR series

MODEL NO.	OUTPUT
VR1050-1120	+ 5.0 to +12 Volts/250mA
VR1150-1360	+15.0 to +36 Volts/250mA
VR2150-2360	−15.0 to −36 Volts/250mA

The new high performance Hybrid Voltage Regulators in the popular Dual-in-line package feature **minimum external componetry.**







CASE MATL. — EPOXY
LEAD MATL. — GOLD PLATED COPPER

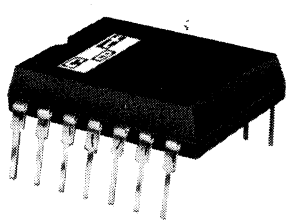
All dimensions in inches

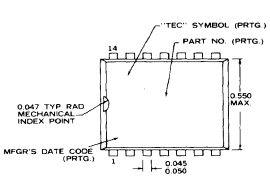
Features:

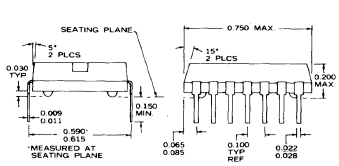
- Input Voltage: (V_{out} +2) to 40 Volts
- .0025% Load Regulation (N.L.-F.L.)
- .001%/volt line regulation
- ±.02%/°C Output Temp. Coefficient
- 75 db ripple attenuation to 10 KHz
- Short circuit proof — Foldback Current Limiting
- External High Current
- Pass Transistor Provisions
- Output Adjustable Externally
- Internally Compensated
- Low Profile 2XDIP Package
- Fixed output voltages

Ideal for "Point of Load" regulators for TTL, DTL, etc. (+5 volts), Opamps (±15 volts) and DC/DC converter preregulators (28 Vdc to +20 Vdc), etc.

See your TEC Field Representative for more information.







CASE MATL. — EPOXY
LEAD MATL. — GOLD PLATED COPPER

custom capability

TEC's capability in Microelectronic circuits is based on the "New Packing Concept" using ceramic as the basic substrate material, onto which a network of conductors, resistors and capacitors are formed. Upon this passive network, silicon active transistor and integrated circuit "chips" are bonded and interconnected to form a high performance functional circuit module. Advantages of this advanced circuit packaging approach are the reduction in size, increased reliability, and decreased cost, for circuit applications where performance and complete "integration" are of prime importance. TEC's facility is complemented with experts in circuit and topology design, tooling, encapsulation, process engineering, assembly, production and quality control.

THICK FILM HYBRID CIRCUITS

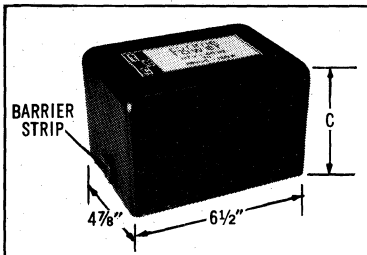
- Compatible with monolithic I/C's-DIP package
- High power capability — 30 watts/in²
- Wide range of resistance values — 10 ohms to megohms
- Wide range of capacitance values — to 0.1 mfd
- Wide selection of NPN/PNP and FET devices
- Parasitic capacitance and inductance negligible
- Low "set-up" and unit costs in moderate quantities

Rapid response is given to your microelectronic circuit requirements within the above definition. Your circuit prototypes are rapidly optimized by our experienced semiconductor and hybrid integrated circuit staff, with quality production units supplied from our modern hybrid circuit production facilty in Boulder, Colorado.

Watch for new **Hybrid Circuit Products** from TEC during 1969 in major electronics publications.

other standard products

30, 60, & 120 watt AC-DC prime power packs PP series



Feature:
- Low Cost
- Ideal for "Point of Load" Regulators
- Convenient Threaded Plate Mounting
- —25 to +70°C Operation
- Attractive Modular Package

ELECTRICAL SPECIFICATIONS
T_A = 25°C, V_{in} = 117 Vac, Load = Full, V_{out} = Nominal, (unless otherwise noted) Freq. = 60 Hz

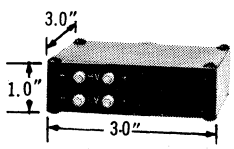
CASE MATL. — ALUMINUM
FINISH — BLACK ANODIZED (PER MIL-A-8625)

high voltage photomultiplier supplies 9536 series



CASE MATL. — ALUMINUM
FINISH — BLACK ANODIZED (PER MIL-A-8625)

ELECTRICAL CHARACTERISTICS
T_A = 25°C, V_{in} = 28 Vdc,
Load = Full, V_{out} = Nominal (unless otherwise noted)

MODEL 9536	OUTPUT			REGULATION (Vdc)
	VOLTAGE (KVdc) Nom.	CURRENT (μA) Max.	RIPPLE (2) (Vp-p) Typ.	LINE (V_{in} = 25 to 31 Vdc) Typ.
09	.90	150	0.45	0.45
11	1.1	150	0.50	0.55
13	1.3	150	0.55	0.65
16	1.6	150	0.60	0.80
20	2.0	125	0.65	1.00
25	2.5	100	0.70	1.25
30	3.0	80	0.75	1.50
35	3.5	70	0.80	1.75

NOTES:
(1) To designate case configuration, prefix model no. with "A" or "B." "A" Case shown, "B" dimensions .875"x1.5"x5.5".
(2) Add suffix "P" for filter in positive leg or "N" for negative.
(3) Temperature coefficient is continuously adjustable from (+) To (—.) It can be adjusted to a specific customer requirement by the customer or by TEC at a nominal charge. Temp. coefficient is factory set at nominal output and full load. Remove top cover to adjust temperature coefficient.

TYPICAL CHARACTERISTICS

Specification	Condition	Typical	Units

TEC has been manufacturing highly reliable miniature DC to DC converters and associated solid state products since 1959 for industrial, commercial, aerospace and military applications. TEC's standard models utilize high quality components and materials. MTBF data has been calculated per MIL-HDBK-217, (90,000 hours, typical) for the 9583, 9567, 9589, 9584 Series.

These units are designed to meet the environmental requirements of MIL-E-5400 as specified by MIL-T-5422, and as qualified in the following paragraphs:

1. Temperature
   Storage (—55° to +150°C), operating case temperature (—55°C to +100°C).
2. Altitude
   Standard catalog models are designed to operate from sea level to 100,000 feet but high voltage units require additional protection for corona.
3. Humidity
   For a nominal charge TEC can encapsulate standard models to meet this requirement.
4. Salt Spray
   Supply cases are anodized aluminum per MIL-A-8625 (anodic film, type II, class II, black), and will allow the units to meet this requirement.
5. Vibration
   Units are manufactured utilizing printed circuitboard construction and vacuum potted with potting compound and have met these requirements.
6. Sand and Dust
   Desert areas — case construction and potting will allow units to meet this requirement.
7. Acceleration and Shock
   Comments in paragraph 5 apply. Units have met these requirements.
8. Explosive Atmosphere
   Cases are designed to prevent flame and explosion propagation.
9. Fungus
   Parts and materials are non-nutrient for fungus.
10. MIL-I-6181D
    For a nominal charge TEC can modify these units to meet this requirement. Additional space may be required on some models.
11. MIL-STD-704A
    Standard catalog models are designed for an input voltage of 25 to 31 VDC. They are reverse polarity protected to 50V and for input transient of 50V for one second. TEC can modify these units with additional protection to meet the total requirements of this specification.

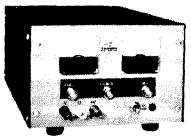
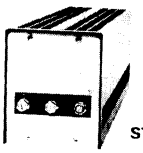
SYSTEM SLOT RANGE POWER SUPPLIES

LIBERATOR SUB RACK SERIES LQ/LH



LHS METERED OPTION



LQS STANDARD UNIT

LVS

FEATURES

- All silicon design—precision performance
- Low noise for IC and systems applications
- Compact size—Modular and Metered models
- Wide slot voltage range—Adjustable Current Limiting
- Convection cooling—no temperature derating to 60°C
- Remote sensing
- Remote voltage programming
- Extremely low output impedance
- 0.03% Stability (0.01% Optional)
- Overvoltage protection option
- Integral meter and control options
- Quarter Rack and Half Rack Sizes

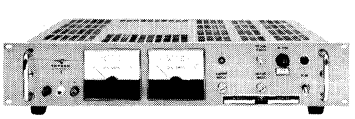
LIBERATOR RACK SERIES L3R/L5R



FEATURES

- All silicon design—precision performance
- 0.005% Regulation 1 mv RMS Ripple
- Low noise for IC and systems applications
- 3 mv P-P Noise
- Wide slot voltage ranges—currents to 70A
- 0.01% Stability
- Automatic load share paralleling
- Adjustable Current Foldback Limiting
- Remote sensing and programming
- Low Output Impedance
- +60°C Without Derating

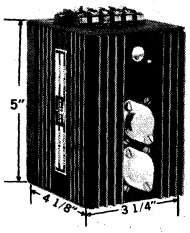
Other Features: +60°C operation; 3½" and 5¼" panel heights; 47-65Hz input frequency.

MODULAR POWER SUPPLIES

DUAL OUTPUT SILICON MODULES

- ALL SILICON DESIGN
- +71° C OPERATION WITHOUT DERATING
- 0.1% REGULATION/0.5 MV RIPPLE
- DUAL OUTPUTS (TRACKING)
- INDEPENDENT OF EXTERNAL HEAT SINKS



PSD Series 1

Other Features: Remote Sensing; Recessed Screwdriver Voltage Adjust; 47-420 cps input frequency; Current Limiting short circuit protection.

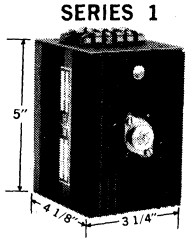
OUTPUTS				PRICE		
Model	*Volts	Amps	Nominal Impedance DC-1KC	1-9	10-49	50-up
PSD12-300	±12	0-0.3	0.05Ω	$127	$119	$115
PSD15-300	±15	0-0.3	0.05Ω	127	119	115

*±0.5 volt adjustment of output #1 from nominal output

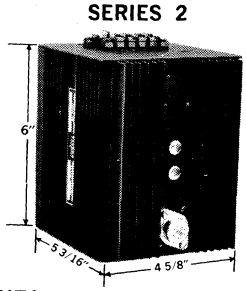
HM — Standard units designed for vertical mounting. For horizontal mounting (HM) add $5.00 for mounting adapters.

- All Silicon Design
- 0.01% Regulation
- +71°C Operation Without Derating
- Independent of External Heat Sinks
- 0.5 mv RMS Ripple (2 mv for units over 100 volts)

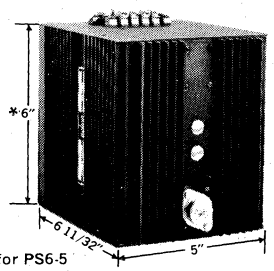
SERIES 1



SERIES 2



SERIES 4



*6½" for PS6-5

Other Features: Remote Programming over output voltage range; Recessed Screwdriver Voltage adjust; Remote Sensing; Series 1 only — 57-400 cps input frequency, Foldback current protection (except D option units which have Automatic Current Limiting); Series 2 and 4 — Automatic current Limiting.

Octal Sockets (OS) — Special orders only	75	25	15	5

OPTIONS AVAILABLE

Overvoltage Protection — OV
Provides a maximum output voltage clamp for internal and external OV protection.

High Stability — X
0.01% stability with a T.C. of (0.01% + 200 μv)/°C.

Special Voltages — F
Special voltage available for suffix F units. The available current output will be that of the next high voltage standard unit.

Series Start Option — D
Available for Series 1 Modules only. Not required for PS3, PS6, Series 2,4, and wide range units.

Solder Lug Terminals — SL (Special factory order only)

Octal Socket (plug-in) — OS (Special factory order only)

Horizontal Mounting — HM

For Higher Power Modular Ratings—See Liberator Sub Rack Series

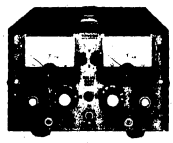
LABORATORY POWER SUPPLIES

SILICON DUAL LAB SERIES DL

Model	Volts	Amps	Price w/Meters
DL40-1	Dual 0-20	0-1	$249
These outputs available from standard unit.	0-20	0-2	
	Dual 0-40	0-0.5	
	0-40	0-1	
	0-80	0-0.5	



- Dual Outputs, Independently Adjustable
- Dual Ranges on Each Output
- 0.01% Regulation/250 μv RMS Ripple
- 0.05% Stability
- Calibrated Current Limiting

Other Features: +50°C operation without derating; 5¼" panel height; Switchable, dual range, ammeter/voltmeter for each supply; Selectable current limit ranges; Remote Voltage Programming; Remote Sensing; 100-125/200-250 VAC input; 47-420 Hz input frequency; Automatic Adjustable Current Limiting; Coarse and Vernier Voltage Adjust.

ECONOMY LAB SERIES EAL

- True Economy Lab Supply
- 0.01% Regulation
- 0.5 MV Ripple

Model	Volts	Amps	Price Metered
EAL10-1	0-10	0-1.0	$99
EAL20-500	0-20	0-0.5	99
EAL32-300	0-32	0-0.3	99
EAL50-250	0-50	0-0.25	99

Other Features: Small size, 3½" x 4⅛" x 6½"; Switchable front panel volt/ammeter; Concentric voltage adjust; AC power switch and pilot light; Three-wire line cord and fuse on rear panel; 57-65 Hz input.

TRYLAB® SERIES T

- 0.05% Regulation
- 0.5 mv RMS Ripple
- 0.05% Stability

Model	Volts	Amps	Price Metered
T50-2	0-50	0-2	$249

Other Features: +50°C operation without derating; Switchable ammeter voltmeter; Remote Sensing; 50-400 cps input frequency; Automatic Electronic Switching, Model T50-2; Constant Voltage; Constant Current, Vernier Voltage Adjust.

INTERMEDIATE REGULATION POWER SUPPLIES

FREQUENCY CONVERTERS AND STATIC INVERTERS FOR MILITARY AND INDUSTRIAL SYSTEMS APPLICATIONS

VARIABLE SPEED DRIVES FOR CONTROL OF AC MOTORS

SPECIAL PURPOSE STATIC POWER EQUIPMENT

Since its establishment in 1960, Unitron has specialized in the design and development of solid-state static power conversion equipment. Pioneering in power applications, Unitron has continued to help define the state of the art and now supplies power conversion equipment for military, commercial and industrial users. Unitron's leadership has been accomplished by a philosophy which stresses the use of the best in design and manufacturing techniques and quality components to produce equipment of high reliability and superior performance within practical economic limits.

Many units developed by Unitron to meet specific requirements have a wide range of practical applications and have become a part of Unitron's standard line. In addition, Unitron designs, develops and manufactures specialized custom power equipment. Unitron engineers will be glad to discuss your specific static power conversion problem with you, and show you how Unitron can help you achieve the best solution.

UNINTERRUPTABLE POWER SYSTEMS
Static Inverter / Battery / Battery Charger

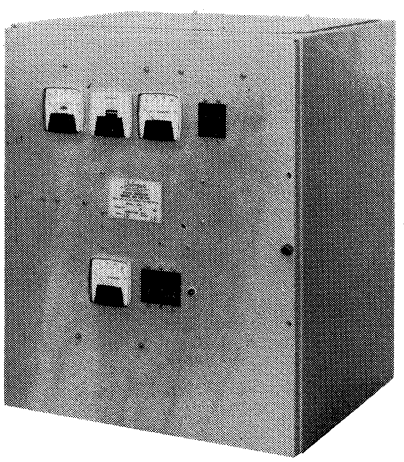
1, 3, and 5 KVA single phase units ▪ Versatile, low-cost standby power system ▪ For continuous line supply or continuous inverter supply operation ▪ Manual, relay or static switching ▪ Optional line synchronization ▪ Fully metered ▪ Overload protected ▪ Excellent voltage and frequency regulation ▪ Low maintenance

APPLICATIONS: To provide continuous power for data processing and critical process controls, or to allow the orderly shutdown of a process, in the event of line power failure.

Static Inverter	USI-100	USI-101	USI-102
Input	105-140 VDC	105-140 VDC	105-140 VDC
Output	1 KVA	3 KVA	5 KVA
Voltage Regulation*	118 RMS ± 4%	118 RMS ± 4%	118 RMS ± 4%
Frequency Regulation*	60 Hz ±1%	60 Hz ±1%	60 Hz ±1%
Harmonic Distortion*	5% max.	5% max.	6% max.
Power Factor	0.80 lagging to 1.0		
Operating Temperature	–20°C to +40°C (–4°F to +104°F)		

***Under all conditions of line, load and temperature**

Please consult factory for higher power ratings.



MODEL USI-102
5KVA

Battery Chargers: Model UBC-100, 18 amp; UBC-101, 50 amp, and UBC-102, 90 amp.

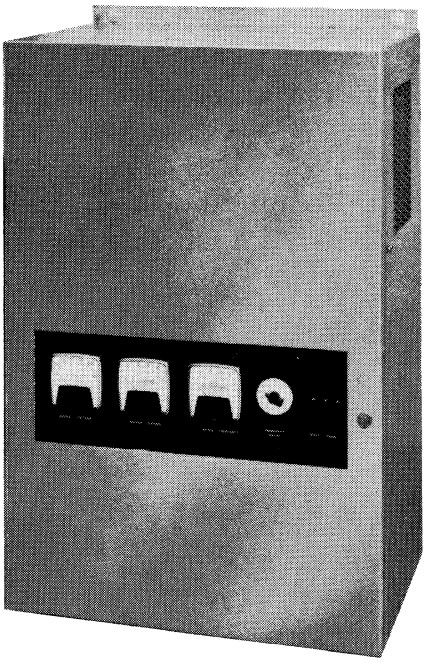
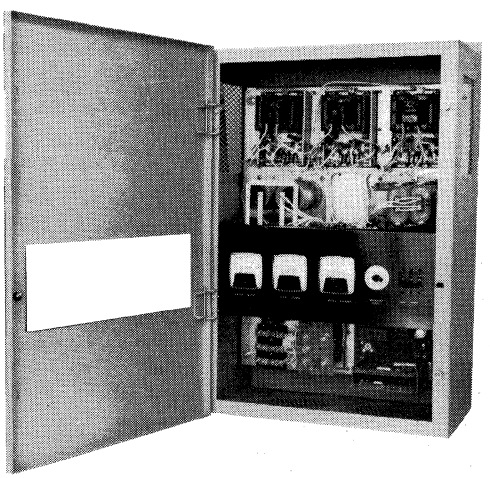
VARIABLE SPEED DRIVES FOR CONTROL OF AC MOTORS

■ Soft start capability ■ Full range speed control ■ Self compensating for load variations ■ Maintains full torque into load ■ Open- or closed-loop operation ■ Easily installed on existing motors ■ No structural modifications required ■ Metered for simple check-out



APPLICATIONS: Rotary, reciprocating and centrifugal pumps and compressors; large circular saws and fans; cranes and hoists; winding, polishing, grinding, milling and textile machinery; motor generator sets; and all applications where speed control, torque control, or soft starts are required.

Simple, low-cost controller provides variable frequency supply with constant volt-seconds to AC motors; maintains full torque into load. Precision control makes AC motors practical for changing or high inertial loads. Soft start and overload limiting capabilities reduce inrush current to 1.5 full load motor current, eliminate need for external starters. May be located in any convenient location; no structural modifications required. Modular construction facilitates ease of check-out and low mean time to repair. Available in special housings for hazardous, corrosive, and other hostile environments. ***Standard units 10-100 HP; consult factory for higher HP ratings.***



GENERAL SPECIFICATIONS

HORSEPOWER: 10 through 100 HP with full range of intermediate values.

INPUT VOLTAGE: 3 ϕ, 220 or 440 VAC, $\pm$15%.

INPUT FREQUENCY: 50 or 60 Hz, $\pm$1.5%

OUTPUT VOLTAGE (AT FULL SPEED): 3 ϕ, 220 or 440 VAC (nominal)

OUTPUT FREQUENCY: 2 to 60 Hz (higher maximum frequencies available on special order).

OUTPUT FREQUENCY STABILITY: $\pm$1%

CONVERSION EFFICIENCY (AT FULL LOAD): 95%

OPERATING TEMPERATURE RANGE: –30°C to +55°C

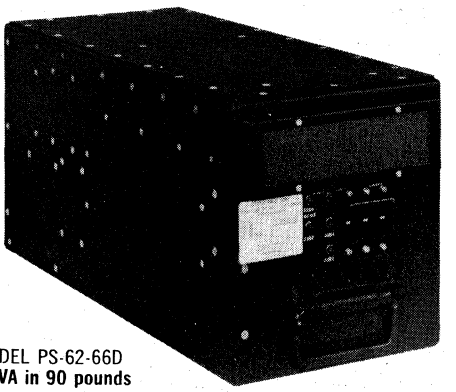
FREQUENCY CONVERTERS

400 Hz to 60 Hz SINE WAVE OUTPUT

Meets Applicable MIL Specifications for Airborne and Ground Support Equipment



MODEL PS-62-66D
3.5KVA in 90 pounds

FEATURES

■ High efficiency ■ RFI protection ■ Short circuit and overload protection ■ Long, maintenance-free operation ■ Self-contained cooling ■ Light weight ■ Low distortion

APPLICATIONS

These converters provide a dependable source of 60 Hz sine wave power for airborne and air-transportable test equipment. They are also used with 60 Hz ground equipment wherever primary power available is 400 Hz. Applications include use with oscilloscopes, metering equipment, recorders, cryptographic machines, and teletypes.

MODEL	POWER	INPUT		OUTPUT		SIZE (Dim. in Inches)
PS-65-225-7	400 VA	115/200 VAC	400 Hz	115 VAC ± 5 %	60 Hz ± 1.0%	7.8 x 5.2 x 21.3
PS-64-162	750 VA	115/200 VAC	400 Hz	115 VAC ± 5 %	60 Hz ± 1.0%	7.5 x 12 x 20.5
PS-61-41B	1500 VA	115/200 VAC	400 Hz	115 VAC ± 10 %	60 Hz ± 1.0%	19 x 10.5 x 14.25
PS-62-66D	3500 VA	115/200 VAC	400 Hz	115 VAC ± 2.5%	60 Hz ± 1.0%	10 x 9 x 21.6
PS-61-33D	8000 VA	115/200 VAC	400 Hz	115 VAC ± 2.5%	60 Hz ± 1.0%	12.2 x 20 x 23.5

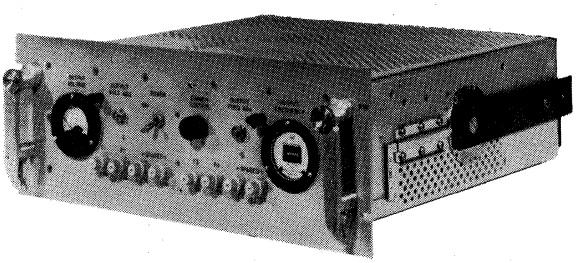
All units available with other input voltages, and frequencies of 360-1000 Hz.

All units available with output frequency to 0.01%.

FREQUENCY CONVERTERS

60 Hz to 400 Hz SINE WAVE OUTPUT

Meets Applicable MIL Specifications for Shipboard and Ground Support Equipment



MODEL PS-65-243-1

FEATURES

■ High efficiency ■ Small size ■ Light weight ■ Low distortion ■ Virtually no audible noise ■ Long, maintenance-free operation ■ Short circuit and overload protection ■ RFI protection

APPLICATIONS

Extremely stable and quiet-operating, these converters are excellent for flight simulators, and wherever 400 Hz power is required to operate airborne-type equipment. Other applications include ground support systems, design and test labs, and shipboard installations.

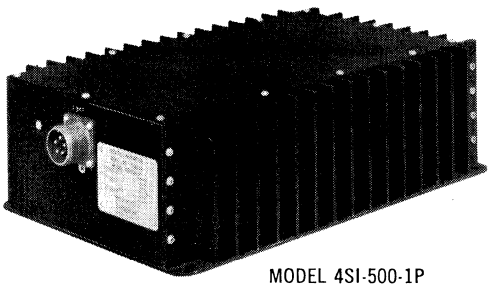
STATIC INVERTERS

28 VDC to 400 Hz SINE WAVE OUTPUT

Meets Applicable MIL Specifications for Airborne and Ground Support Equipment



MODEL 4SI-500-1P

FEATURES

■ Overload and short-circuit protected ■ High efficiency ■ Light weight ■ Voltage-regulated ■ Low distortion ■ Stable output frequency ■ Long, maintenance-free operation ■ Virtually no audible noise ■ RFI protection

APPLICATIONS

These inverters are ideal for providing AC power from DC sources to one or more items of airborne equipment, and also are excellent sources of power for 400 Hz ground support equipment. Typical applications include use with weather radar, Doppler navigation systems, artificial horizons, omni's, autopilots, ADF, DME, transceivers, transponders, and engine analyzers.

MODEL	POWER	INPUT	OUTPUT		SIZE (Dim. in Inches)
PS-67-321	75 VA	24 to 32 VDC	26 VAC ± 5%	400 Hz ± 5%	11.5 x 7 x 5
4SI-125-1P	125 VA	24 to 32 VDC	115 VAC ± 2%	400 Hz ± 1%	9.7 x 6 x 3.4

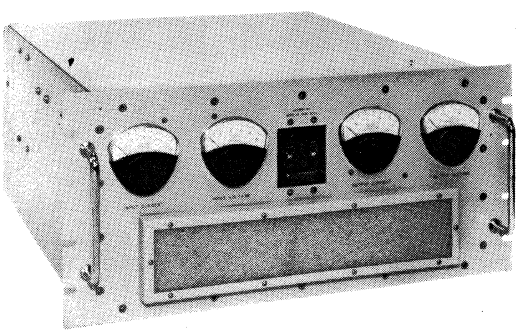
STATIC INVERTERS

28 VDC to 60 Hz SINE WAVE OUTPUT

Meets Applicable MIL Specifications for Airborne and Ground Support



MODEL PS-67-324-1

FEATURES

■ High efficiency ■ Light weight ■ Small size ■ Low distortion ■ Virtually no audible noise ■ Long, maintenance-free operation ■ Short circuit and overload protection ■ RFI protection

APPLICATIONS

For aircraft instrumentation systems with 28 VDC electrical systems, and for flying laboratories, these instruments provide an excellent source of 60 Hz power. Applications for these inverters include power for oscilloscopes, meters, cryptographic machines, teletypes, and recorders.

MODEL	POWER	INPUT	OUTPUT		SIZE (Dim. in Inches)
PS-65-178-B	250 VA	24 to 32 VDC	115 VAC ± 2%	60 Hz ± 1.0%	7.9 x 10.4 x 14
PS-65-236	500 VA	24 to 32 VDC	115 VAC ± 2%	60 Hz ± 1.0%	7.9 x 10.4 x 17.3
PS-63-81A	1000 VA	24 to 32 VDC	115 VAC ± 2%	60 Hz ± 0.1%	19 x 8.75 x 20.2
PS-67-324-1	2000 VA	24 to 32 VDC	115 VAC ± 5%	60 Hz ± 1.0%	19 x 8.75 x 20
PS-64-154	3600 VA	24 to 32 VDC	115 VAC ± 5%	60 Hz ± 1.0%	13 x 22.8 x 24.4

All units available with output frequency of 0.01%.

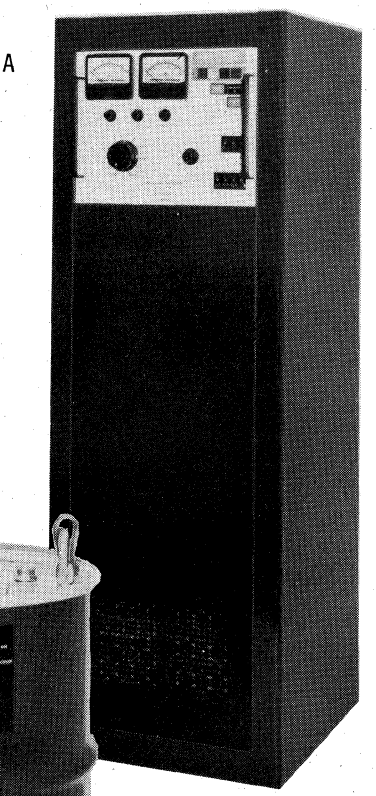
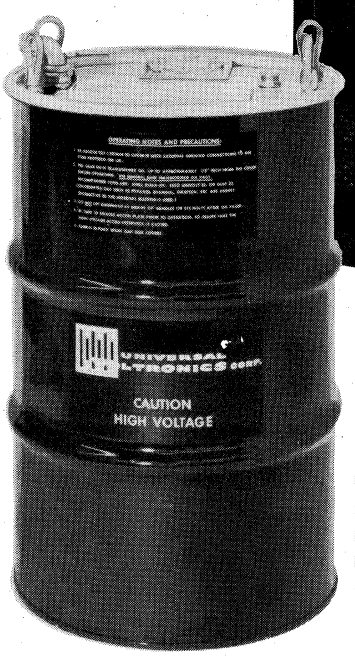
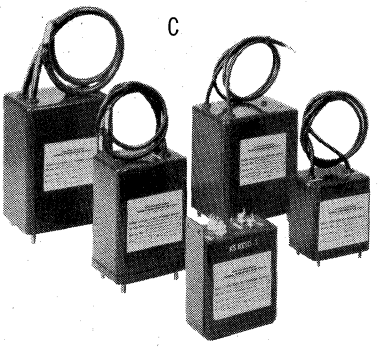
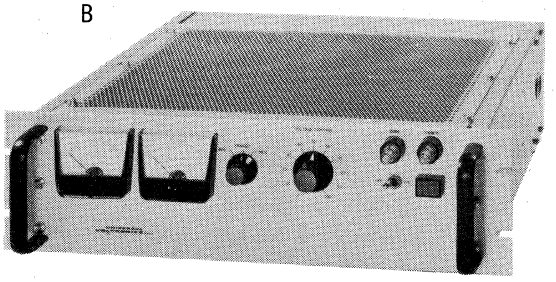
high VOLTAGE DC POWER SUPPLIES









ADJUSTABLE OUTPUT POWER SUPPLIES

Series "BA" adjustable power supplies and series "BP" power packs are available at voltage ratings from 1 KVDC through 2000 KVDC at output power ratings from 1 watt to 250 kilowatts continuous. The adjustable series includes applications oriented control features and package design as shown in photos A and B. The power pack series (photos C and D) has many applications in OEM systems and for general laboratory use.

Every UVC power supply includes conservatively rated high voltage components designed and manufactured under the strict control of the specialized UVC technical staff to insure continuous duty, long term, trouble free operation. A one year factory backed and field supported warranty policy accompanies each shipment.

LOOK AT THESE FEATURES

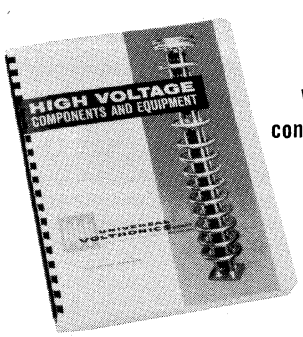
1. **Ripple** Each power supply offers a standard ripple specification of 5% maximum or better. Optional filters and attenuators are available for every UVC supply to reduce ripple to as low as .01% rms.
2. **Polarity** Each power supply offers the flexibility of reversible output polarity performance.
3. **Protection** Overvoltage and overcurrent protection features are available as both adjustable range and fixed value circuits. All access areas and doors are interlocked for personnel protection and all energy storage components and circuits are discharge protected for personnel protection.
4. **Package** Rack mounted, floor and bench operable as well as portable design are among the packages available for UVC standard high voltage power supplies.

PRECISELY REGULATED EQUIPMENT

Precisely regulated performance over wide adjustment range, low ripple, fast response and high stability enable the series "BRE" power supplies to be used in exacting work for x-ray spectroscopy, electron microscopes, TWTs, ion bombardment experiments, particle separators.

These precisely regulated power supplies are available in voltage ratings from 1 KV through 500 KVDC at continuous duty output power up to 40 KW. Our regulation circuitry techniques realize performance specifications which are virtually independent of input line variations or no load-full load changes. Ripple in most cases is 0.01% rms and the output polarity is available as both fixed and reversible. Two voltage adjustment schemes are offered, namely digital dialable control for the most exacting applications and continuous coarse and vernier controls. In the digital dialable scheme, we allow for adjustment in increments of 10 KV, 1 KV, 100 volts, 10 volts, 1 volt and 0-1 volt vernier. This system provides the assurance that the actual output is always within 1% of the dial readings. As indicated, you may select a coarse and vernier voltage adjustment scheme and realize economic savings without sacrificing basic regulated performance. Regulation accuracy of $\pm 0.25\%$; $\pm 0.1\%$; $\pm 0.05\%$ and $\pm 0.01\%$ for line or load changes are available on most series "BRE" power supplies.

A new line of solid state, precisely regulated power packs for photo multiplier and CRT applications have also been recently introduced. These supplies are available at voltage ratings up to 20 KVDC.



Write or phone for Catalog UVC-669 containing complete specifications for the extensive line of UVC high voltage power supplies.

Mt. Kisco, N.Y. 10549
914-241-1300

If you think Varo Static Power just makes custom-designed industrial power supplies, you're wrong.

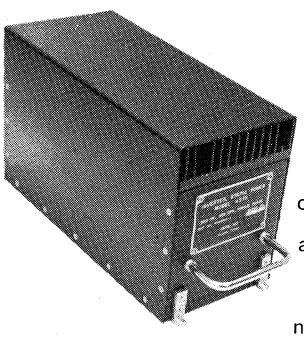
We also make custom-designed power supplies and inverter/converters for military applications.

In fact, that's how Varo got its start. With some pretty unorthodox ideas about military airborne static inverters.

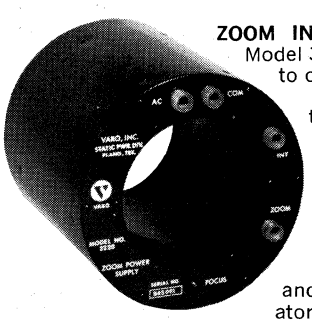
We developed the very first one, and we've been at it ever since. Our production facility includes things like a tape-controlled mill, automatic insertion machines for PCB loading, and environmental test lab for altitude, temperature, and vibration.

MIL-SPECS with which we're accustomed to working include: MIL-STD-704, MIL-I-6181, MIL-STD-810, MIL-E-5400, MIL-T-5422, MIL-STD-100, MIL-D-1000, MIL-STD-826, MIL-STD-756, MIL-HDBK-217, MIL-D-70327, MIL-I-26600, MIL-STD-454, MIL-Q-9858A, and MIL-I-45208A.

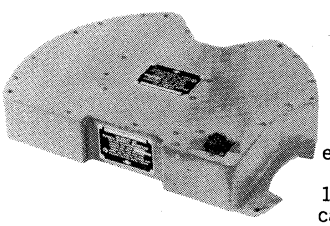
Here are the kinds of custom-designed military power supplies we make.



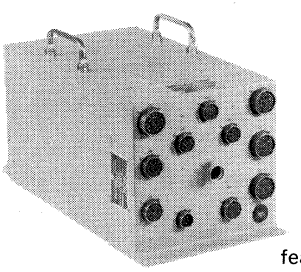
AIRBORNE INVERTER, SINGLE PHASE. Model 4375 is ideal for airborne applications because of light weight, high performance, and compactness. Through the use of silicon components, improved efficiency and reliability are achieved throughout the circuit. Output voltage regulation is achieved through the use of closed loop feedback techniques. The unit has short-circuit protection as well as input voltage reversal protection. It is a 250VA, 400 cycle, single phase, fully qualified inverter.



ZOOM INTENSIFIER POWER SUPPLY. Model 3220 power supply is designed to operate a 40/80 mm grounded cathode zoom intensifier system. Modularized construction inherently provides an MTTR of less than 15 minutes. Five basic modules consisting of: (1) a power conditioner and input regulator, (2) a focus generator, (3) a zoom generator, (4) an anode generator, and (5) an anode 2-3 drive generator, are the principle elements of the system. Specifications of this power supply include: Input, 18-31VDC, 15 watts max; Transients, 80V, 100 Msec. max. or 200V, 10msec. max; Stability, ±1% drift max/month; Operating Temperature, −55°C to +52°C; Dimensions, O.D. 5.97", I.D. 3.75", Length 6.0".



MISSILE SYSTEM CONVERTER/INVERTER. Model 4380 Converter/Inverter is designed to supply power for missile system electronics under extreme environmental conditions. Its MTBF exceeds 1500 hours under the worse case operating conditions. A demonstrated MTTR of less than 0.8 hours has been attained through the use of modularized construction. The units operates from a MIL-STD-704 DC source. Specifications of the unit are as follows: Input, 24-32VDC; DC Output, 150VDC; Current, 1.33 Amps max; Regulation, ±10%; Ripple, 1.5V P-P max; AC Output, 115 VAC RMS (325VAC P-P), single phase, 400 cycle; Efficiency, 70% minimum; Protection, Short Circuit, input under over voltage and reverse polarity; Operating Temperature, −54°C to +90°C; Operating Altitude 60,000 feet.



AIRBORNE COMPUTER POWER SUPPLY. Model 3209 solid-state multi-output Airborne Converter is designed to provide power for a fire-control computer and associated equipment. It features on and off sequencing to protect the computer memory. Inputs and outputs are isolated from each other. Outputs feature individual overvoltage and overcurrent short-circuit protection. Specifications of the unit include: Input, 115VAC, 3 phase, 400 cycle; Efficiency greater than 65%; Operating Temperature, −54°C + 71°C; MTBF in excess of 2000 hours; Size, 15.62" x 9.12" x 8.62".

For more information contact: Military Sales Manager.

VARO

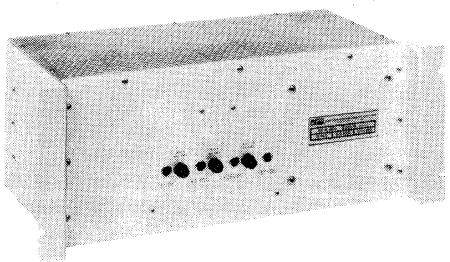
STATIC POWER DIVISION 1600 DALLAS NORTH PARKWAY. PLANO, TEXAS 75074 (214) AD 1-5111 TWX 910-860-5640

If you think Varo static power just makes custom-designed power supplies and inverter/converters for military purposes, you're wrong.

We also make custom-designed industrial power supplies.

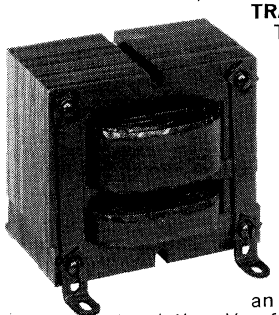
Because we make custom-designed industrial power supplies, a lot of people think we probably have an extensive line of off-the-shelf equipment. But we don't. We don't have off-the-shelf anything. Everything is custom-designed or adapted to meet exact specs. Does this kind of professionalism pay off? It must. We've had to double our facilities about every eighteen months since we started.

Here are the kinds of custom-designed industrial power supplies we make.



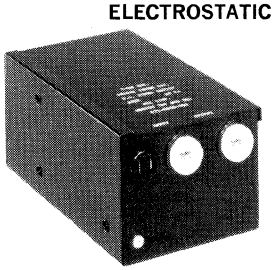
MODEL 3202 COMPUTER PRINTER POWER SUPPLY
We custom design regulated computer power supplies. They're available with multiple output, on-off sequencing, remote sensing, and they can meet UL requirements.

VAROFORMER,™ A 1969 MODEL FERRORESONANT TRANSFORMER FOR COMPUTERS.



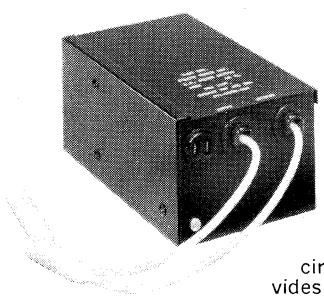
The Varoformer is a computer-designed ferroresonant transformer. It requires less core material, less copper, and less resonant capacitance, and yet maintains the same regulator performance of conventional units. We are able to build the Varoformer to specs by abandoning the equal core area hypothesis. The Varoformer makes operation in the right half plane possible. As an example, we have built a 4% regulating Varoformer with the following characteristics: Line Variation, ±15%; Frequency Variation, ±1%; Load Range, 25% to 100%; Regulation, ±4% which is maintained with combined line load and frequency variation; Temperature Rise, 30°C to 65°C depending on power rating. All this with a typical 30% size reduction over the conventional design.

ELECTROSTATIC AIR CLEANER POWER SUPPLY.



These units employ a ferroresonant transformer to provide the required regulation. Reliable High Voltage Silicon Diodes provide full-wave rectification with capacitance filtering for a low ripple output. Maximum short-circuit current is limited to 5ma to meet UL requirements. This power supply was designed with the following characteristics: Input Variation, ±15%; Outputs, 15KV Max; Secondary Load Current, 2.8 ma Max; Ripple, 5%; Regulation ±5%.

ELECTROSTATIC COPIER-POWER SUPPLY.



Available in three versions, these power supplies all incorporate a ferroresonant transformer for regulation and short-circuit protection, as well as reliable High Voltage Silicon Diodes. The least expensive unit utilizes half-wave rectification to produce pulsating DC. Next, there is the version utilizing a unique circuit configuration which provides pulsating DC with a high DC average. Finally, the more expensive version utilizes full-wave rectification and produces filtered DC with low ripple content. Characteristics of these power supplies are: Input Variation, ±15%; Output 15KV Max; Secondary Voltage Range, Up to 15KV Peak; Secondary Load Current, Up to 2.8 Mils; Regulation, 8%; Ripple, 10%.

For more information contact: Industrial Sales Manager.

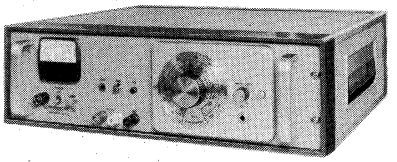
REGULATED, WIDE BAND AC to AC POWER SUPPLIES

"S" SERIES POWER SUPPLIES THE STANDARD "S" SERIES FEATURES:

- All silicon solid state components
- Single phase and multi-phase outputs
- Advanced, state-of-the-art designs
- Accepts over 50 different plug-in oscillators
- Rack mounted units and bench models
- 18 Models from 130 VA to 6000 VA.



All aluminum parts are finished in gold iridite or black anodize. Steel parts are cadmium plated and finished with gold iridite. Front panels are standard Vector light blue gray semi-gloss enamel. Other paint available on special order. Furnish color chip and federal specification number.

ELECTRICAL SPECIFICATIONS (APPLY TO SINGLE & 3 PHASE MODELS)

INPUT DATA

VOLTAGE: 105 to 125 V AC, single phase for all units 600 VA and below (nominal 115 volts). If 210 to 250 V input voltage desired, add suffix "2" to model number. All models from 750 VA to 6000 VA are normally supplied with 208/230 V AC 3 phase input. 440/460 AC 3 phase input also available, add suffix "3" to model number.

FREQUENCY: 47 to 65 Hz. 47 to 480 Hz available on special order.

INPUT CONNECTION: All units have barrier strips at the rear.

OUTPUT DATA

BASIC FREQUENCY RANGE: All single phase output models 45 Hz to 10 KHz.

DISTORTION: 2% or less including plug-in oscillator.

VOLTAGE: Variable from 0 to 130 volts.

POWER OUTPUT: Full rated VA from 110 to 130 volts.

POWER FACTOR: Full rated VA from unity to 0.7 lead or lag. Greater power factor with some derating.

LINE REGULATION: ±0.25% over input voltage range, at full rated VA.

LOAD REGULATION: ±0.25% from no load to full load.

RECOVERY: 100 microseconds.

OVERLOAD: Automatic overload protection with manual reset and overload indicator.

HUM AND NOISE: —60 DB below full output.

OUTPUT CONNECTIONS: Five way binding posts on front panel and barrier strips at rear.

OUTPUT CONFIGURATION: Single phase models have two wire floating output (one side may be grounded) insulated for 500 volts RMS.

ADDITIONAL SPECIFICATIONS FOR 3 PHASE UNITS

All electrical specifications shown above apply to 3 phase units plus the following:

PHASE UNBALANCE: 100% phase unbalance will not affect any electrical specification.

OUTPUT CONFIGURATION: Four wire, neutral floating. Units will accept △ or Y loads. The neutral, or any one leg may be grounded.

OUTPUT VOLTAGE: 0-130 volts, line to neutral.
0-225 volts, line to line Y.
0-130 volts, line to line △.

METERING: Units of 900 VA and over are supplied with 3 output volt meters. Units below 900 VA are supplied with one meter and a switch to read line to neutral, line to Y, and line to △.

VECTOR engineering inc.

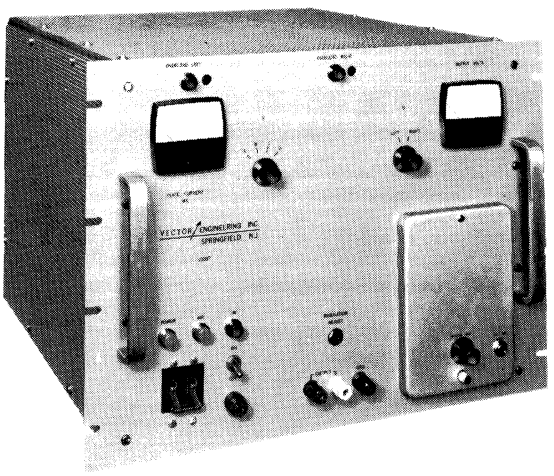
"T" SERIES AMPLIFIERS



The "T" series of regulated A.C. power sources is an extension of the "S" series in the higher power range with outputs up to 20,000 VA. The standard "T" series feature all silicon solid state components except for the output stage where rugged, forced air vacuum tubes are used. These units can also be used as high power audio amplifiers. The supplies are compact, ruggedly constructed, and contain all of the electrical and mechanical features of the "S" series except as follows: Distortion: 2% max., Line regulation: ±0.5%, Load regulation: ±0.5%.

SINGLE PHASE OUTPUT

MODEL	POWER OUTPUT VA	DIMENSIONS (Inches) H	W	D
2000-T	2000	14	19	20
3000-T	3000	45	25	25
5000-T	5000	45	25	25
7500-T	7500	45	36	26
10000-T	10,000	56	42	34
15000-T	15,000	56	42	34
20000-T	20,000	56	42	34

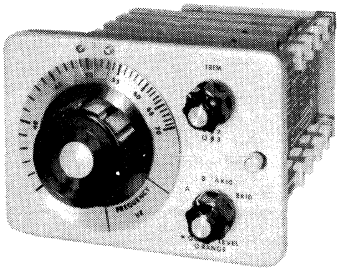
THREE PHASE OUTPUT

MODEL	POWER OUTPUT VA	DIMENSIONS (Inches) H	W	D
Y-5000-T	5000	45	25	25
Y-7500-T	7,500	58	30	30
Y-10000-T	10,000	58	30	30
Y-15000-T	15,000	78	34	34
Y-20000-T	20,000	78	34	34

NOTE:

Two phase and four phase units are available on short delivery. All "T" units are in semi-military angle and skin enclosures. The bottom is fitted with skids for fork lift truck. Casters and/or removable lifting eyes are available on request.

PLUG-IN OSCILLATORS FOR "S" AND "T" SERIES



These oscillators feature all silicon solid state components and precision variable frequency determining elements and are available in **single phase, two phase,** and **three phase.** All single phase oscillators are provided with an external signal input.

Frequency stability: Oscillators may be ordered with frequency stability ranges from ±0.5% thru ±0.001% as shown in the table below.

FREQUENCY RANGE	FREQUENCY STABILITY ±0.5%	±0.25%	±0.1%	±0.01%	±0.001%
ANY FIXED FREQUENCY BETWEEN 45 and 10 KHz	X	X	X	X	X
VARIABLE					
45 to 75 Hz	X	X	X		
320 to 480 Hz	X	X	X		
320 to 2000 Hz	X	X	X		
45 to 6000 Hz	X	X			
45 to 10000 Hz	X	X

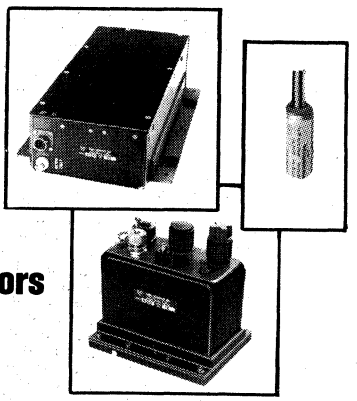
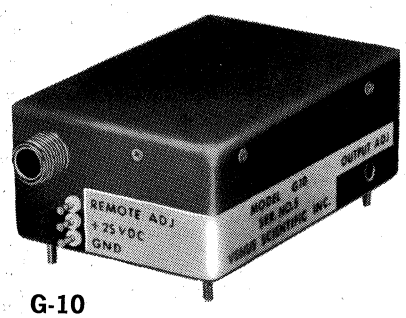
MINIATURE HIGH VOLTAGE CAPABILITIES



- variable DC to DC converters
- photomultiplier power supplies
- precision cathode ray tube power supplies
- multiple-output high voltage power supplies
- image intensifier tube gated power supplies
- nanosecond-switching kilovolt pulse generators
- high voltage multipliers
- high voltage oscillators
- remote controlled intensifier tube "zoom" power supplies
- kilovolt test sets for gated image intensifier tubes
- fast switching power supplies for two-color cathode ray tubes

CATHODE RAY TUBE POWER SUPPLIES



G-10
PRICE $490

- output adjustable from 1000 to 10,500 VDC @ 500 μa
- ripple 0.15% peak-to-peak at full load
- line/load regulation ±0.1%
- efficiency >50% at full load
- MTBF 42,100 hours at 71°C
- weighs only 1¼ lb.
- volume 15 cu. in.
- operates from —55 to +71°C without derating
- 50,000 ft. altitude
- MIL-E-5400
- input voltage 24 to 32 VDC
- short circuit and reverse-polarity protected
- temperature coefficient 0.025%/°C from —55°C to +71°C

H-20
PRICE $680

- output adjustable from 10 KV to 20 KV
- ripple 0.05% P/P at full load
- line/load regulation ±0.05%
- efficiency >50% at full load
- volume 30 cu. in.
- operates from —55 to +71°C without derating
- shielded, encapsulated
- short circuit and reverse-polarity protected
- temperature coefficient 0.005%/°C from —55°C to +71°C
- input 28 VDC ±10%
- available with negative output at same price—Model H20N

K30
ACTUAL SIZE

PHOTOMULTIPLIER POWER SUPPLIES

- small — 1" dia. x 2¼" long
- shielded, encapsulated
- operates from −55 to +71°C
- qualified per MIL-STD-810
- MTBF >100,000 hr at 71°C
- output proportional to input
- fast response
- output floating; input floating
- short circuit protected
- reverse-polarity protected

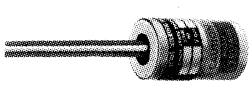
photomultipliers — flying spot scanners — image dissectors — ionization chambers
scan converters — CRT bias circuits — scintillation tubes — geiger tubes

Model	Input	Output Range	Ripple (p-p)	Efficiency at Full Load	Price (1-9)
K15	3V to 15V	300V to 1500V @ 1.0 ma	0.1%	>50%	$149
K30	3V to 15V	600V to 3000V @ 0.5 ma	0.5%	>50%	$158
Q30*	2V to 12V	600V to 3000V @ 0.2 ma	0.25%	>60%	$168

**Designed for battery applications—Idling current only 8 ma.*

For operation in vacuum environments, these units will be supplied in a 3" long can having a high vacuum seal. In specifying a vacuum unit, add the suffix "Z" to the model number (i.e. K30Z) and an additional $30 to the unit price.

32R4



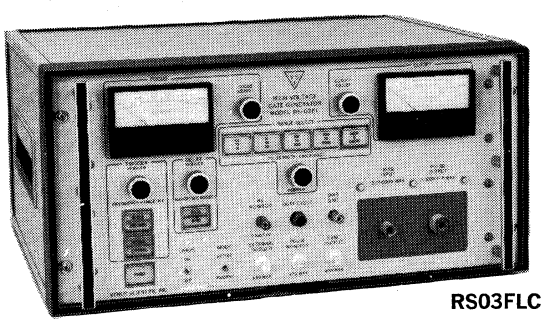
0-6.75

HIGH VOLTAGE OSCILLATORS

- fixed or proportional output
- short circuit protected
- reverse-polarity protected
- miniature packages
- flat packs for insert mounting
- designed for image intensifier applications

Model	Input	Output (p-p)	Nominal Frequency	Type	Price
32R4	18 to 32 Vdc	1200 Vac to 3500 Vac	10 KHz	Adjustable, line regulated	$265
0-6.75	6.75 Vdc	2800 Vac	3 KHz	Output proportional to input	$98

32R4 Dimensions: 3" x 1¾" x ⅞"



RS03FLC

HIGH VOLTAGE GATE GENERATOR IMAGE INTENSIFIER TEST SET

- PRF to 10 KHz
- Output gate can be floated to ±25 KV
- Completely solid state
- 55 ns rise and fall times
- Max. Pulse Amplitude . . . 3000 v P/P
- Pulse Width Adj. from 0.5 μsec. to 100 msec.
- Pulse Delay Adj. from 0.3 μsec. to 50 μsec.

APPLICATIONS:
■ QC inspection/test ■ laboratory simulation ■ high speed shutter for image intensifier tube ■ automatic exposure control for intensifier tube or photomultiplier ■ LIDAR range gate ■ direct viewing image intensifiers ■ vidicon coupled image intensifiers

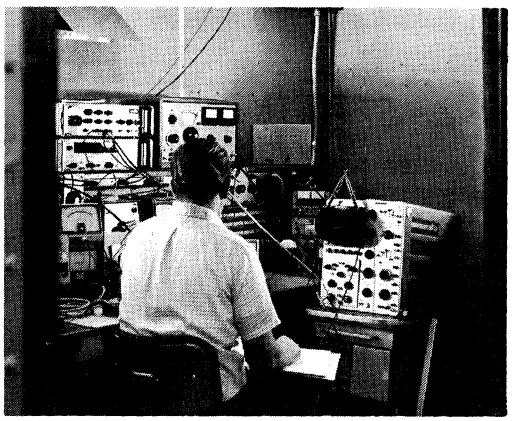
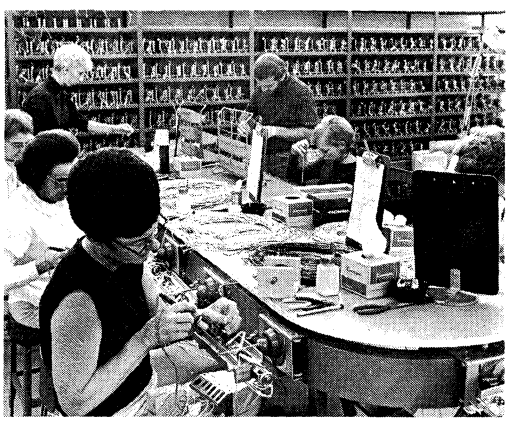
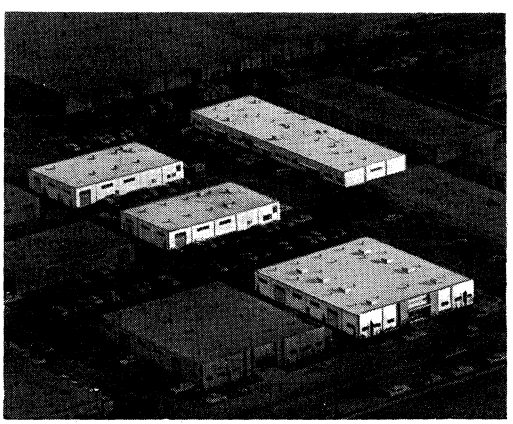
WANLASS Custom Power Supplies



Custom Engineering and Development.



Mechanical Assembly.



Wanlass plant facilities in Santa Ana, California.

Wanlass can achieve design economy while improving the performance of your electrical equipment. To find out how, write for a free copy of our brochure "The Capacity For Achievement".

Custom OEM power conditioning assemblies in ratings from microwatts to megawatts with the revolutionary advantages of

Wanlass Transient Free Parametric Power!

Wanlass manufactures power supplies, voltage regulators, inverters, converters, frequency converters and filters in custom and standard configurations to meet any power conditioning need. Cost and performance advantages to OEM's are substantial due to state-of-the-art design and construction capabilities combined with proprietary technologies recently developed at Wanlass. Foremost among these developments is PARAFORMER™, the most significant invention in power magnetics in the 20th century.

WANLASS PARAX™ TECHNOLOGY — By rhythmically varying the inductance of a magnetic circuit, the Wanlass PARAFORMER™ achieves transient free energy transfer without relying on mutual inductance. It also regulates voltage, exhibits minimum waveform distortion, provides electrical isolation, transforms voltage and prevents line voltage irregularities from being transmitted to the load and load voltage irregularities from being reflected back to the line. Successfully applied with custom specifications to voltage regulators, line filters, AC and DC power supplies, inverters, DC converters and frequency converters, the PARAFORMER™ principle also functions in off-the-shelf products under the trade name PARAX™.

WANLASS CLIP-AC™ TECHNOLOGY — This proprietary technology utilizes circuitry that symmetrically clips unregulated input-voltage peaks to produce a constant output waveform, which can then be transformed into a variety of regulated output voltages through the use of an appropriate transformer. Any desired AC voltage regulation precision can be achieved with true RMS, average or peak voltage held to a constant, in ratings up to 1KVA. Due to generally superior performance, CLIP-AC™ is the logical successor to the ferroresonant transformer for most AC regulation requirements. It is also smaller, lighter, less expensive.

WANLASS VARAX™ TECHNOLOGY — VARAX™ utilizes another all-new magnetic voltage regulating concept discovered by Wanlass. It is an electrically variable inductor which can be controlled over a wide inductance range by the application of small DC control currents. When compared with conventional saturable reactors, VARAX™ devices offer smaller size, lighter weight, greater reliability, less waveform distortion, lower cost, inherent decoupling of AC power from entering the DC control circuitry. Spike-free regulation to ±0.5% and efficiency to 95% are typical for units with ratings from 500VA output from 100-130 VAC single-phase, 47-63 Hz input.

SOLID STATE POWER SUPPLIES
A capacity to produce 100,000. power supplies per year

MULTI-OUTPUT VOLTAGE REGULATORS
0.1% line regulation at unit costs as low as $12.00!

HEAVY POWER SUPPLIES
AC voltage regulators or power supplies rated to 10KVA.

PARAMETRIC SWITCHING SUPPLIES
40KC high frequency switching with no load transients.

CIRCUIT ASSEMBLIES
Assembly costs as low as 3¢ per component.

COMPLETE SYSTEMS
A single source of integrated power conditioning and control.

WANLASS

DC Power Supplies and AC Line Conditioners

Economy models available off the shelf

Wanlass Industrial Products Division applies the exclusive PARAX™, VARAX™ and CLIP-AC™ technologies to a broad line of OEM economy-type AC and DC power conditioners in standard configurations for off-the-shelf distribution by more than 50 key distributors throughout the nation.

Eliminate line transients, noise and even arrest lightning with the Wanlass Paraformer™! (And get 0.25% AC line regulation as part of the deal!)

THE WANLASS PARAFORMER is the revolutionary power transfer component that effects parametric transfer of power without solid-state or mechanical elements. Standard units rated from 60 to 5000 VA in stock.

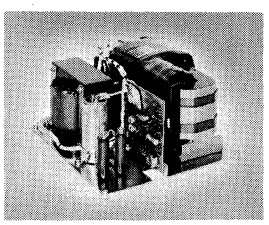
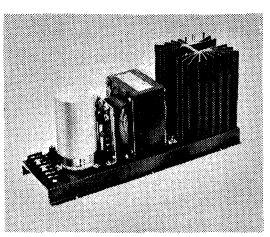
ECONOMY OEM DC POWER SUPPLIES. Series regulated units currently in large volume production and available in 30-60-120 watt models with output voltages ranging from 3.6 to 60 volts. Economy is the keynote with unit prices beginning at $46-$58-$86 and decreasing to as low as $27 each in large quantities. Features include ±1% regulation, 0.1% ripple, 47-63 Hz operation, automatic short circuit protection, and wide range adjustability of output voltage.

← 30-60-120 Watt OEM DC Power Supplies



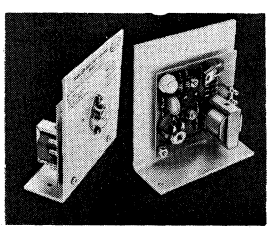
VARIABLE INDUCTOR AC POWER REGULATORS. A highly reliable, frequency insensitive series identified as the VARAX™. Ideal for remote or unattended sites, high starting loads, all lagging power-factor loads, it features 47-63 Hz operation at 105-130V, ±1% line and load regulation and over 90% efficiency with full load. Price for 1.5 KVA unit is only $127.50 in 50-99 quantities.

← TYPICAL 1500 VA VARAX™
Model No. VVR-1501



INTEGRATED CIRCUIT DC POWER SUPPLIES. A specially designed series for OEM and systems application to IC and MOS circuits. Standard IC 60-120-200 watt models available with output voltages from 3.6 to 60 volts and priced at $125, $170 and $225 respectively. High performance HPIC series also available with ±0.05% regulation (standard ±0.25%), 2 millivolt ripple (standard, 5 millivolts) and complete isolation. HPIC prices are $150, $195 and $250. Also request data on the Wanlass new "PIC" parametrically preregulated DC power supply line with positive protection from line transients and switching spikes!

← TYPICAL 5V @ 25A IC-MOS Power Supply
Model 200-25IC-5



CLIP-AC™ AC POWER REGULATORS. CVR, CVRS and C-3000 Models using the Wanlass CLIP-AC™ principle to decrease audible noise, size, weight and cost while improving performance. Feature ±1% line and load regulation, 47-420Hz operation and high surge-power capability. 120 watt units are priced as low as $14. C-3000 line is a true RMS clipping regulator with auto-transformer output priced at $39 for a 60 VA unit. New CVRS line provides 110V regulated true RMS AC output with no power transformer. Request bulletin CVRS-369!

← TYPICAL 120 VA CLIP-AC™ Voltage Regulator
Model CVR-120

For complete information on our low-cost power supplies and line conditioners, contact Wanlass or the distributor nearest you.

WANLASS Precision Instruments

Wanlass Instruments manufactures a complete line of instruments in rack-panel or bench configurations for multi-purpose power supply requirements and for AC power conditioning, dynamic line filtering, and voltage regulation. These instruments utilize the proprietary technologies of PARAX™ and VARAX™ power conditioning (regulation and filtering) to provide laboratories and test facilities with transient-free AC line conditioning.

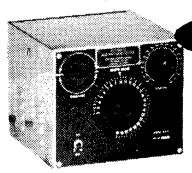
RUSH

PRODUCTION PROVED

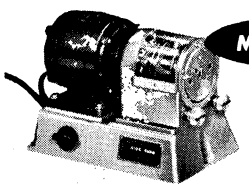
WIRE STRIPPERS, TWISTERS & CUTTERS

And FREE Engineering, Design and Testing Laboratory Services



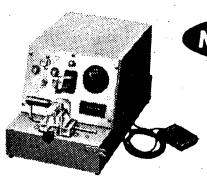
Model AB-4 — AND RUSH MODEL AB4-SC WIRE AND TUBING CUTTER

Automatically measures, cuts and counts while in operation. Designed primarily for manufacturer who cuts and strips wire and tubing by hand. Delivers constant supply of length controlled pieces ready for stripping. Spool fed, it is ideal for short run production. Perfect companion to RUSH's Model K-15.



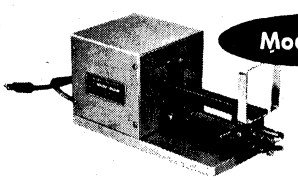
Model C-100 — RUSH CENTRIFUGAL BLADE WIRE STRIPPER

Tames the "Toughies" of modern insulations. Adjusts easily to length and depth of cut while running! Designed primarily for removal of Teflon. It is equally effective for Nylon, P.V.C., Neoprene, rubber, braided cotton and other modern insulations. Week after week of running without slightest adjustments—and with no rejects.



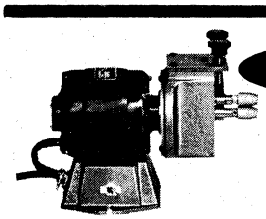
Model MSS-105 — RUSH BLUE ARC STRIPPER

Designed specially for coaxial and shielded cable. It severs shielding at predetermined point and fuses strands together to prevent fraying. Ground-wire can be fused to shielding in same operation. It can be equipped to handle a range of types and sizes of shielded cable.



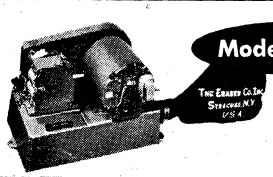
Model A5C — RUSH THERMAL WIRE STRIPPER

Designed primarily for bench-type uniform stripping of most types of Thermo-plastic insulations. Has multi-level temperatures control; finger lever controls stripping element contact pressure. Positive mechanical stop gives adjustable control of uniform stripping length. Strips from AWG 1 to AWG 43 without adjustment.



Model R-1 — RUSH CLOSE-UP WIRE STRIPPER

Designed specially for accurate close-up work on wires AWG #36 or finer. Built-in precision minimizes damage to wires. Has RUSH's Easy-Entrance Wheels. For close tolerance stripping of fine wire at assembly operation, inquire about portable Model "HR-1" with three-foot flexible shaft.



Model DV-1A — RUSH WIRE STRIPPER

Fast, neat, compact, accurate and highly efficient. Strips most types of film-insulated wires. Collects dangerous dust and keeps work areas neat and clean. Protects workers' health. For stripping at work area (large transformer coils, etc.) ask for the hand held, heavy duty, Portable Stripper PD-1.

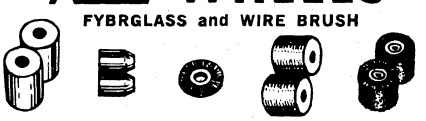
RUSH CUSTOM DESIGNED INDUSTRIAL EQUIPMENT

Designed and Built Specially for Your Particular Operation

The RUSH Engineering and Testing Laboratories of the Eraser Company are at your disposal entirely free of cost or obligation to you. RUSH will test your particular samples of wires or tubing and recommend a RUSH stripper for you. If the situation warrants, we will design and build a machine entirely suited to your particular needs at a price that will please and satisfy you. Avail yourself of this service as many other manufacturers have done and you will be pleased and pleasantly surprised with our policy of full cooperation with you in solving any problem you now have. Send for free catalog of complete line of products and services.

RUSH WHEELS

FYBRGLASS and WIRE BRUSH



Standard and Custom Made Stripping Wheels

Whatever the specification and stripping job—RUSH makes the WHEEL—from soft self-flaring FybRglass Wheel for delicate wire work to extra firm Wire-Brush Wheel for tough jobs. The wire wheel sections are also available in nylon, brass and horsehair. The variety of Stripping Wheels include the famous Wobble Wheels with their oscillating motion for longer work-life . . . and the Easy-Entrance Wheels for quick and simple engaging of wire for stripping. Both of these popular RUSH Wheels are available in the specific hardness and durable quality required for your particular job.

SEALING EQUIPMENT
IC and INFRARED SEALERS

LABORATORY AND PILOT FLAT PACK SEALER

FP-VP-1M

A perimeter type, hermetic sealer for IC, Thick and Thin Film Packages. Sophisticated solid state circuitry permits complete control over the sealing atmosphere, location of heat, time at temperature and rate of heat-up and anneal rates. All the sealing stages are adjustable, flexible as to sequence and preprogrammed when desired; though any stage can be suspended or by-passed for experimental purposes.

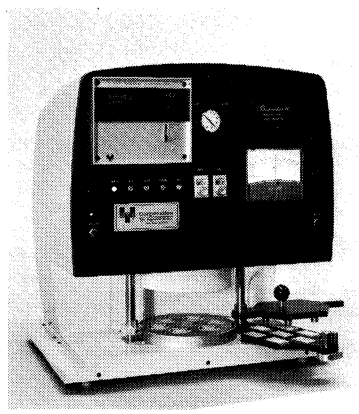
Packages can range from ¼" x ⅛" to 1¾" x 1¾" and may be of glass, "Kovar"* or ceramic.

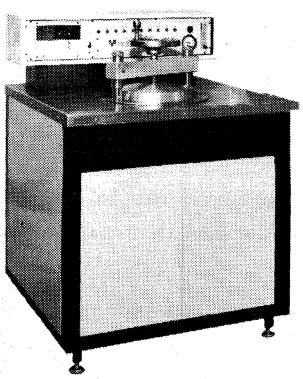
PRODUCTION FLAT PACK SEALER

FP-VP-17 (seven head model illustrated)

Laboratory precision at production rates is main advantage of this perimeter type, multi-head hermetic sealer for IC, Thick and Thin Film Packages. Similar to the FP-VP-1M described above, this sealer can be provided with one to ten independently monitored sealing heads.

Preprogrammed to the proper sealing profile for the particular package, the sealer automatically purges, evacuates, backfills with inert gas, perimeter heats (heatsinks protect the device) anneals the package automatically and recycles precisely. Depending on the number of sealing heads, packages up to 1¾" x 1¾" can be sealed.





GLASS-TO-METAL PROGRAMMABLE, SEALER

DAP-700

For glass-to-metal, soldering and brazing operations at precisely controlled temperatures up to 1,000°C with complete control over the sealing atmosphere for vacuum, positive pressure and inert gas, this solid state controlled sealer can be completely preprogrammed for all parameters of the sealing cycle. Custom tooled for semi-automatic loading, the sealer can seal most standard types of semiconductor packages and component parts.

PACKAGE SEALING APPLICATION CENTERS

As a major supplier of glass and metal parts, "Flat Paks" and many other "Hi Integrity" packages as well as sealing equipment, GTI is uniquely equipped to help the engineer develop reliable sealing procedures and maximum production yields. Application centers are located in Costa Mesa, Calif., Providence, R. I., and Miesbach, West Germany. Any GTI Sales Engineer can arrange for analysis and recommendations on your package situation.

*"Kovar" is a registered trademark of Westinghouse Electric Corporation.

SODECO Impulse Counters for

TOTALIZING

In modern instrumentation, production controls, and data handling systems, a rapid, accurate means of totalizing is often required. Low cost, easily read totalizing impulse counters are preferred as the means of recording this information. Sodeco totalizers, due to their reliability and small size are widely specified for counting instruments, control systems and centralized control stations.

PREDETERMINING

These small 4 or 5 digit counters provide for visual in-line count and control function in a single compact unit. It is readily preset to any number from 1 to 9999 (9) and after the preselected number of counts have been registerd a SPDT contact reverses permitting a control function. Applications calling for automatic recycling or batch counting prefer Sodeco predetermining counters.

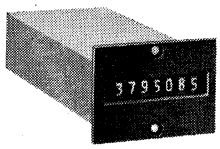
PRINTING

Whenever a permanent record of units or events is desired, the Sodeco printing counter for serial and parallel entry counting, will serve to maintain this record, with a minimum space requirement. As count is by electromagnetic action, the counter may be remotely located from the point of count generation.

TRANSMITTING

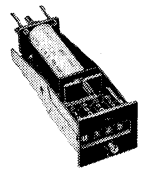
Reliable operation of any electromagnetic counter requires that the counter coil be energized by a pulse within specifications. Sodeco transmitters provide a controlled pulse, and protect against false count, or coil burnout.

TOTALIZING

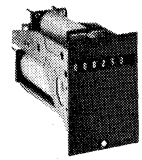


No reset 3 to 8 digits, manual toggle reset 3-6; counting speed — 10, 25 or 50 impulses/second. (8 digit non-reset 10 ips only) DC operation. Model illustrated TCe7e. **Send for Bulletin 201.**

Electric reset by single impulse; 4, 5 or 6 digits; 10, 25 or 50 impulses second; DC operation. Model illustrated TCeF6E. **Send for Bulletin 201.**

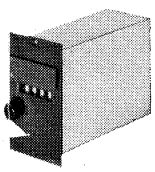


Pushbutton resets figures to zero; 4, 5 or 6 digits; AC (10 i/sec max) or DC (10 or 25 i/sec). Model illustrated TCeBZ5E — 1.654″ x 2.047″ x 1.811.″ **Send for Bulletin 212.**

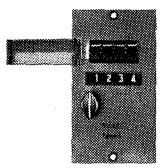


NON-RESET ECONOMY COUNTER—4 digit; DC 12, 24, 48, 110; 10 i/sec; life expectation minimum 50 million impulses. Model illustrated TCe5. 1.10″ x .81″ x 4.49″. **Send for Bulletin 223.**

PREDETERMINING



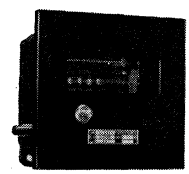
This series of 4 and 5 digit DC operated counters count from a preset number toward zero. They are preset to any number from 1 to 9999 (9) and after the preselected number of counts have been registered a SPDT contact reverses permitting a control function. Model illustrated TCeF4PE. 1.722″ x 3.228″ x 4.016″. **Send for Bulletin 402.**



This predetermining counter is basically equivalent to the TCeF4PE type, however the supply is taken directly from 110 or 220 V AC. The count and reset coils are provided with a spark suppressor. Model illustrated 2TCeF4PE — 2.01″ x 4.02″ x 4.42″. **Send for Bulletin 402.**

Actuates switch at preset counts; 5 digits; manual or electric reset; panel or surface mount; 10 i/sec; AC or DC. Model illustrated TiZ5P1E — 5.669″ x 5.669″ x 2.795″. **Send for Bulletin 501.**

ADD-SUBTRACT



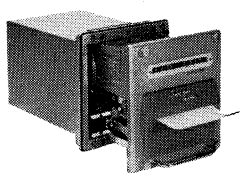
A rugged differential counter with 2 drive systems and a control contact. Indication is on one register with 1 system adding and 1 system subtracting. A SPDT contact is actuated when the register is in the zero position. AC or DC operation. Model illustrated TiZ4RcEh. **Send for Bulletin 501.**

PRINTING COUNTERS

2 Models

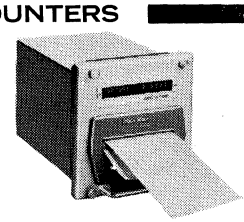
Visual readout and print; 6 digit serial entry totalizer; 10 impulses per second; AC or DC operation. Model illustrated PL103 — 2.84″ x 5.67″ x 7.72″. **Send for Bulletin 371 and Technical Manual 1112.**

Visual readout and print; 5 decades for serial and/or parallel entry counting; 10 or 20 impulses per second; DC operation. Not illustrated model PN107 — 2.84″ x 5.76″ x 7.16″. **Send for Bulletin 371 and Technical Manual 1112.**

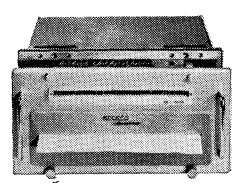


This printing counter provides not only a 6 digit serial entry totalizer but also a synchronous motor (110 V AC) driven time and date register of month, day, hour and minute. 10 impulses per second for serial entry totalizer. If parallel entry 20 impulses per second — 5.67″ x 5.67″ x 7.72″. DC or AC operation. **Send for Bulletin 371 and Technical Manual 1113.**

Also available for printing on card or tape and card.



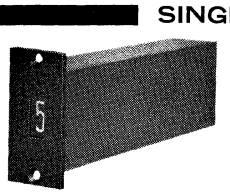
This unit consists of 10 decades for parallel entry counting. Any combination of decades may be wired for serial entry and in order to cover a wide range of applications alpha drums for code identification and special ratio drums for time and date registration have been made available. 10 or 20 impulses per second. DC operation. Model illustrated PN207 — 5.67″ x 5.67″ x 7.16.″ **Send for Bulletin 371 and Technical Manual 1113.**



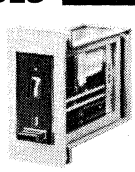
A multi-element unit providing a maximum 20 decade capacity, printing on tape or card. Any 5 decade element can be removed and in its place a 6 digit serial entry totalizer or a synchronous motor driven time and date register. This high capacity printer can be equipped with any combination of elements suitable for definite applications. DC operation. Model illustrated PL4005. 11.34″ x 5.67″ x 7.16″. **Bulletin 371 and Technical Manual 1111.1.**

Also available for printing on card.

SINGLE DECADES



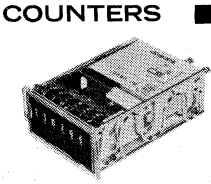
This series of easy to read Sodeco impulse counters is fitted with a single numbered drum. Supplied with or without auxiliary contacts. Multi-digit counting chains can be accomplished as well as being used as predetermining registers, programmers or a single digit register. DC operation. Model illustrated ES2153 — 0.87″ x 1.73″ x 4.43″. **Send for Bulletin 101.**



This new Sodeco ES4 Electric readout counter makes available in one compact unit a single digit, high speed impulse counter equipped with a 10 position readout switch, a transfer contact, a zero reset contact and a predetermining switch. Less than 2″ high, 1″ wide, & 3″ deep. Counting speed 25 ips. Standard voltage 24 V DC with 12 and 48 V DC on special order. **Send for Bulletin 1249.**

NEW TOTALIZING COUNTERS

COMPACT TOTALIZER — New, compact, low wattage, long life counter, 6 digit (8 without reset); counting speeds 25 or 60 c/sec; non-reset, manual or electric reset; 24 V DC standard. 1.89″ x 0.94″ x 2.83″. Surface or flush mounting. **Send for Bulletin 1248.**



The new Sodeco Model RG..E impulse counter with front-plate and spring loaded mounting is a compact, low wattage, long life counter that is ideal for multiple counter installations. Available with manual, electric, or no reset. Available in 5, 6 or 8 digits and counting speeds of 10, 25 or 60 ips. 24 V DC is standard, 12, 36, 48, 60, 110 and 220 V DC also available. **Send for Bulletin 1252.**

Write for detailed specifications and application information.

NOTE: Part numbers are for illustrated types. Also available in variations indicated.

Broad variety of types and wide range of operating voltages permits selection of the precise counter for the application.

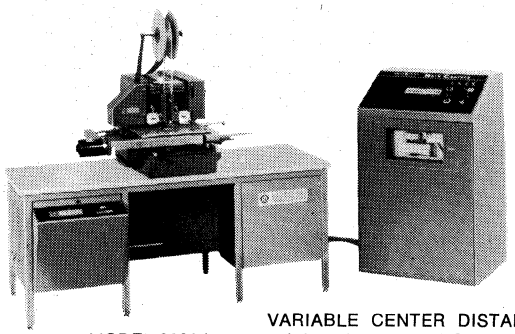
Universal ENGINEERED ELECTRONIC

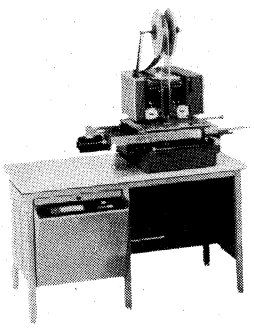
PRINTED CIRCUIT BOARD INSERTION MACHINES

PANTOGRAPH OPERATED . . . NUMERICALLY CONTROLLED . . . COMPUTERIZED TOTAL SYSTEMS

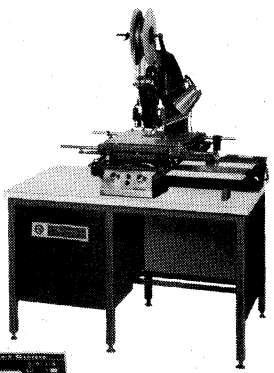
AXIAL LEAD COMPONENTS



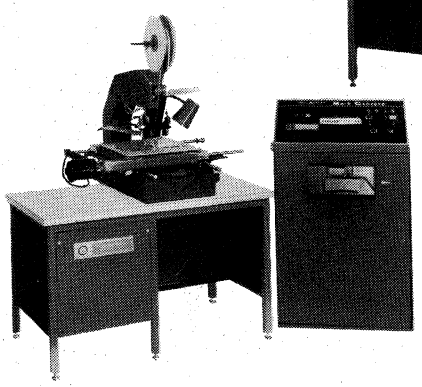
VARIABLE CENTER DISTANCE MODEL 6262 inserts axial lead parts into PC boards on as many as 999 different center distances between pads from 0.300″ to 1.260″ with a single board handling. Programmable for wire diameters from 0.015″ to 0.32″ and 0.020″ to 0.037″.



DUAL CENTER DISTANCE MODEL 6271 N/C (also available with pantograph) for insertion at two adjustable center distances. Programmable 8-position depth stop. More economical to purchase than a fixed head machine plus second head for alternate center distance — with all downtime for changeover eliminated.



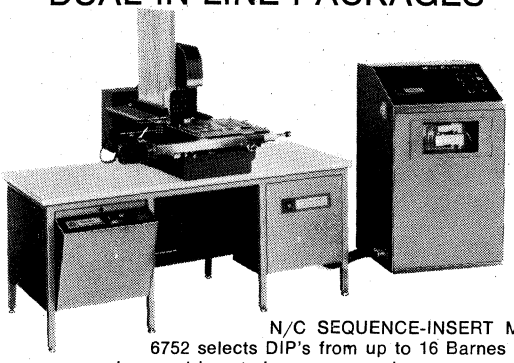
PANTOGRAPH — FIXED CENTER DISTANCE inserts reel packaged axial lead components at rates in excess of 2,000 an hour; rates as high as 5,600 have been attained.



N/C FIXED CENTER DISTANCE MODEL 6253 (also available with dual heads) inserts sequenced axial lead components at rates in excess of 4,500 an hour.

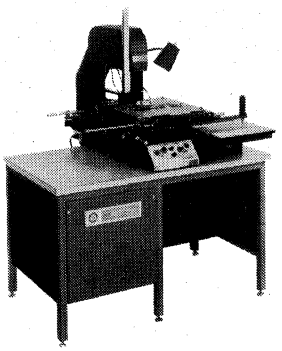
OTHER INSERTION MACHINES include jumper wire . . . square "wire wrap pin" . . . wire "stitcher" . . . PC board terminals . . . drill press. Additional adaptations of Universal's basic pantograph and N/C positioning systems can be produced to meet special requirements where close tolerance parts location is needed.

DUAL IN-LINE PACKAGES

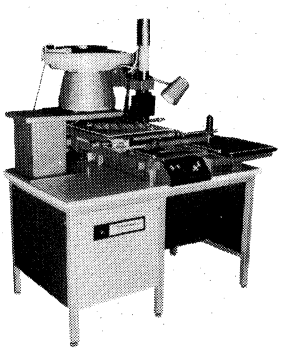


N/C SEQUENCE-INSERT MODEL 6752 selects DIP's from up to 16 Barnes carrier magazines and inserts in programmed sequences at rates as high as 2,500 an hour.

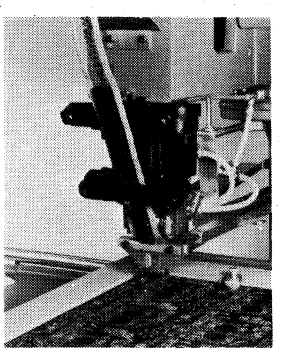
PANTOGRAPH — INSERT MODEL 6413 inserts DIP's from Barnes carrier magazines at rates up to 1,800 an hour. Models also available to sequence and insert 4, 8, or 16 different DIP's from Barnes magazines or stick input.



TRANSISTORS



LEAD TAPED transistors can be inserted as "axial lead" components at rates of approx. 4,000 an hr. from this N/C Model 6352. Also available with pantograph operation.



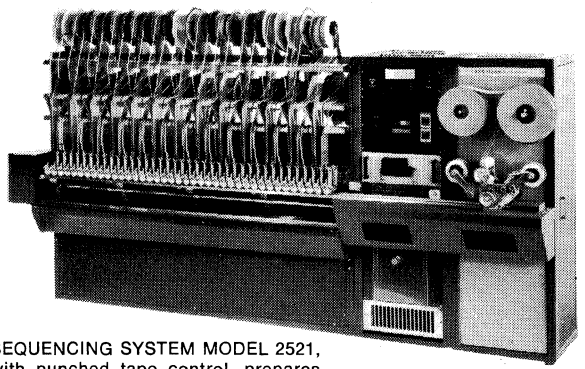
BOWL FED transistors are inserted as "axial lead" components at rates as high as 3600 from this Model 6351. Other models available to insert transistors "conventional" position.

CONTRACT MANUFACTURING . . . SHORT RUN STAMPING. Universal also offers extensive modern facilities for contract manufacturing, ranging from prototypes to production scale runs, using latest facilities for electronic assembling and short run stamping.

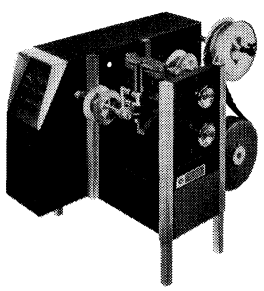
ELECTRO-MECHANICAL PRODUCTION EQUIPMENT

COMPONENT PACKAGING MACHINES

AXIAL LEAD COMPONENTS

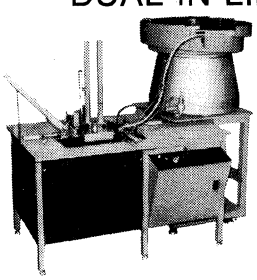


SEQUENCING SYSTEM MODEL 2521, with punched tape control, prepares reels of axial lead components in sequence for automatic PC board insertion. Up to 39 dispensing stations can be fed from lead taped units, magazines or cardboard packages.



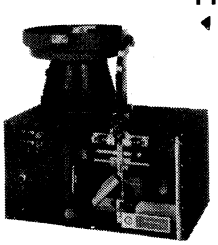
AXIAL LEAD TAPING MACHINE MODEL 2315 lead tapes and reel packages components. Available with bowl feed, lead straightening & trimming, testing and orienting accessories. Operates at rates as high as 15,000 an hour.

DUAL IN-LINE MODULES

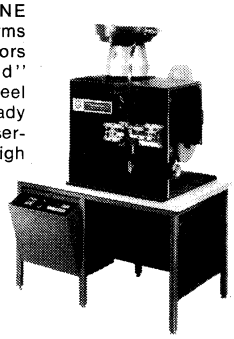


BARNES CARRIER LOADER MODEL 4411 inserts bowl fed DIP's into carriers at rates up to 4,000 an hour.

TRANSISTORS

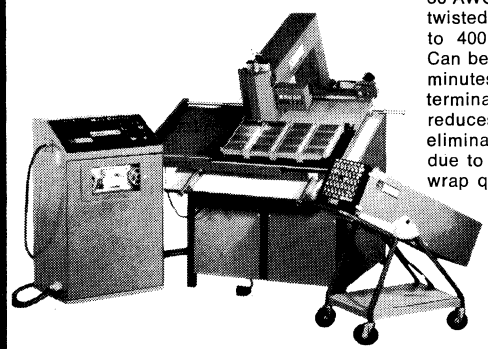


◀ "PREPPER" – LEAD TAPING MACHINE MODEL 3315 forms bowl fed transistors into "axial lead" components and reel packages them ready for PC board insertion at rates as high as 7,000 an hour.

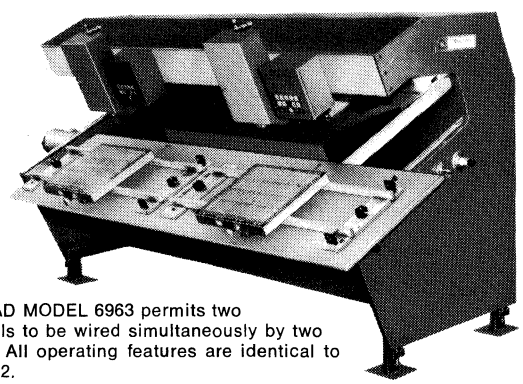


PREPPER MODEL 3421 prepares TO-18 and other transistors for mechanical insertion into PC boards at rates up to 5,000 an hour. ▶

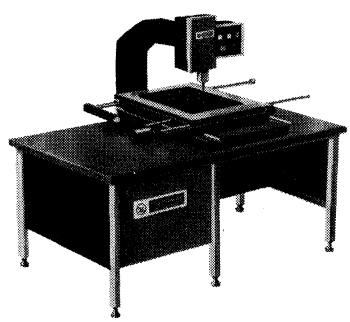
SEMI-AUTOMATIC WIRE TERMINATION SYSTEMS



SINGLE HEAD MODEL 6952 terminates 24 and 30 AWG wires, including twisted pairs, at rates up to 400 wires an hour. Can be changed over in minutes for clip on wire termination. Drastically reduces rework time by eliminating wiring errors due to misplacement or wrap quality.



DUAL HEAD MODEL 6963 permits two back panels to be wired simultaneously by two operators. All operating features are identical to Model 6952.



SINGLE HEAD MODEL 6951 is designed for smaller back panels with a wiring area not larger than 16″ by 18″. Operating features are similar to Model 6952.

COMPONENT PROCESS SYSTEMS & CUSTOM PRODUCTION EQUIPMENT

Process line sub-assemblies and complete systems can be supplied for automated operations including diode, capacitor and resistor assembly, testing, orienting, sorting, body coating, marking, curing, and reel packaging. For full information send for Bulletin 2000.

TAPE & REPRODUCE HEADS

Geotech supplies tape, and builds flux-responsive reproduce heads with associated electronics for specific applications/requirements. Geotech's unique flux-responsive real-time playback heads reproduce analog signals with a dynamic range equal to that obtained in higher-speed instrumentation recorders.

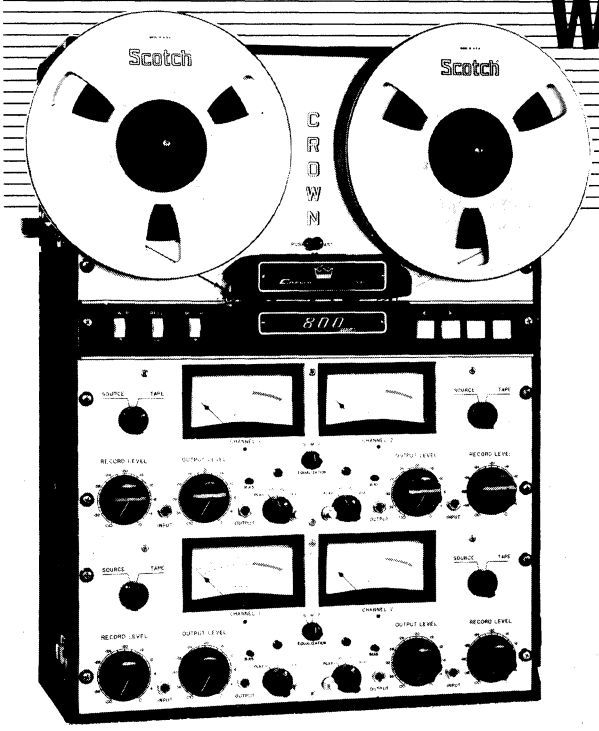
Recorders are instrumentation-grade units suitable for field or laboratory use. Reproduce channel may be used to read out data from magnetic tape as it is being recorded without interrupting recording process, which allows continuous monitoring of entire data system. Reproduce channel is switchable to any record channel. Recorders are IRIG compatible. Recording speeds and center frequencies allow analysis on any IRIG standard unit.

For additional information, write c/o Dept. 14; GEOTECH — A Teledyne Company; 3401 Shiloh Road; Garland, Texas 75040

GEOTECH
A TELEDYNE COMPANY

Crown

WIDEBAND POWER AMPS
PRECISION TAPE DECKS



All models handle ¼-inch tape and reels 5"-10½", all 19" rack mount

Standard speeds 15-15/16 ips with 1 to 4 channels

Patented electro-magnetic brakes never need adjustment

Lifetime lubrication of all bearing surfaces

True straight-line threading with easy-edit design

Individual erase, record and play heads for 1, 2, or 4 tracks

Five years proven solid state circuitry — etched circuit modules

Extremely low noise electronics; modular transport construction

Strict quality control with individual proof-of-performance records—entirely American made

Over 40 standard models $545-$3700; custom modifications for OEM use

Also available: slow speed data loggers (down to 0.33 ips), duplicator systems, and complete series of players

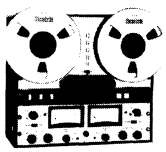
TWO BASIC TRANSPORT STYLES:

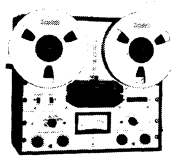
700 Rugged, high-quality simple unit with only 9 moving parts; automatic stop in "play" mode

800 700 construction plus computer logic control—never breaks tape; IC logic levels for remote control and function readout; ideal for systems integration; 10 moving parts; photocell tape sensor, edit switch, cue lever; automatic replay accessory.

FOUR STYLES OF ELECTRONICS:

Varying features and degrees of flexibility to match user requirements.





TYPICAL PERFORMANCE CHARACTERISTICS

DC300 — Lab Standard DC Amplifier
Outstanding for exceptional signal purity and stability coupled with unusually high power capabilities; output ± 50 volts DC, 35 volts RMS AC; DC drift under 3 mv up to 55° C.

D100 — High Power Audio Amplifier
Excellent general-purpose power amp with outstanding response, distortion and stability.

D40 — Ultra-Compact Audio Amplifier
Small, high-quality amplifier with unusually wide power band-width.

All Crown power amplifiers are completely stable two-channel units with internal protection for all loads. Rugged instrument-grade construction guaranteed three years for parts and labor. Custom modifications available for quantity OEM purchases.

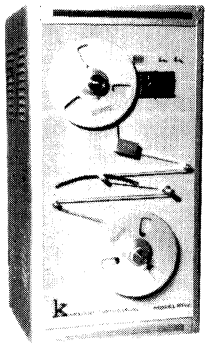
electronics and accessories



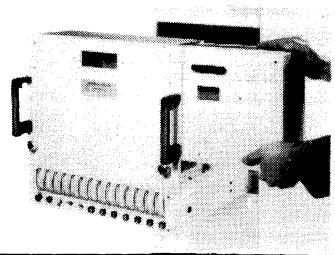
TAPE WINDER *MODEL KTW*

Transfers 0.25", 0.5" or 1.0" tape at constant tension from a standard 10.5" or 14" reel to a customer's special-purpose hub. Constant and high tension is particularly important for tape packs used in a vibration or shock environment where layer-to-layer tape slippage can cause a recorder malfunction. Tape packs also have less than 0.5 mils layer-to-layer edge variation. This assures optimum tape guidance, minimum flutter and dynamic skew.

Winder is designed to accommodate almost any take-up hub or reel. Constant tension wind is provided by a tension arm and servo system — 16 oz. for 1.0" tape, 8 oz. for 0.5" tape and 4 oz. for 0.25" tape. Winding speed is ≈50 ips. Winder incorporates tape footage counter and automatic control for stopping when pre-set length has been wound. Guides for all tape widths (0.25", 0.5" & 1.0") are supplied as standard. Cabinet dimensions: 33.5" H x 22" W x 17" D. Power: 115V ±10%, 60 Hz, 1 Ph at 1.5A. Weight ≈145 lbs.

GROUND PLAYBACK STATION *MODEL GSH*

In some applications it is desirable to use a Kinelogic recorder in the same manner as a tape magazine or cartridge (i.e., the recorder is removed from test vehicle and without removing cover or tape, is inserted in a Playback Station to reproduce recorded data. This technique is particularly appropriate where untrained personnel must be employed to handle the equipment. It is also advantageous in dusty or humid environments since the equipment does not have to be opened for playback.



ELECTRONICS FOR AIR/SEA/GROUND APPLICATIONS

Power requirement: 28 ±4 Vdc. Will withstand transients up to 45V for 250 ms. Packaging: Full encapsulation. Test points: Provided on the front panel. Connector: Cannon DA 15P. Environmental capability (limits on specified performance) — Temperature: −20°C to +85°C. Humidity: Designed to meet MIL-E-5272. Linear accelerations: 100g. Vibration: 25g to 2000 Hz. Shock: 150g, 5 ms, R/11 ms D.

Amplifier Type	Size in inches H	W	D	Weight in Oz.
Record	2.00	0.75	2.187	3
Playback	2.00	0.75	4.25	6

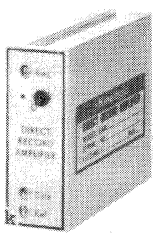
RECORD

BIAS OSCILLATOR *MODEL EAB*

Output: 750 KHz ± 3% — Amplitude: 2 volt rms sinewave — Amplitude Stability: ±0.5 db for specified environment — Even Order Harmonic Distortion: Less than 0.5% rms — Load Capability: adequate to drive 1 to 14 Kinelogic Direct Record Amplifiers Model EAR — Power Consumption ≈ 1.2 watts

PRECISION REFERENCE OSCILLATOR *MODEL EAF*

Output Freq: 200, 100, 50, 25, 17, 12.5, 6.25, 3.125 KHz and 60 Hz are available. Two outputs are provided — one for supplying a reference multiplex type signal to Direct Record Amplifiers — the second for driving a record head and providing saturation recording on a separate tape track. Freq. Accuracy: ±0.01% Multiplex Output — Harmonic Distortion: Less than 0.3% total rms, Ampl. Stability: ±0.5 db for specified environment, Output Amplitude: 2 volts rms, Load Capability: 14 Direct Record Amplifiers — Power Consumption ≈ 1.5 watts



DIGITAL RECORD AMPLIFIER *MODEL EDR*

NRZ (mark) or NRZ (level) type inputs selectable by switch provide full tape saturation. Standard input logic level: Logical "0" is 0 volts, Logical "1" is +6 volts — Input Clock Mark: change in voltage level (+6 to 0 or 0 to +6 volts) — Other logic levels available. Input Z (data or clock): "1" input — Input signal must supply max. 10 ma. "0" input — Input signal must sink min. of 1.27 ma. Max. data rate: 30 Kbps. Power consumption ≈2.25 watts.

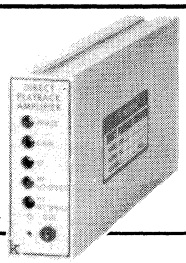
FM RECORD AMPLIFIER *MODEL EFR*

Input sensitivity: 0.5 to 4 Volts peak for ±40% dev. — Input Z: 100K ohms, unbalanced. Center freq: Most IRIG Freq. available — DC linearity: ±0.25% from best straight line — Worst case combination of Temperature Power Input Variation, and 8 Hour Drift results in a freq. dev. less than 3% of the full bandwidth — Power Consumption: ≈2W

DIRECT RECORD AMPLIFIER *MODEL EAR*

Data Input Sensitivity: 0.1 to 1.5 volts rms — Input Z: 100 k ohms, unbalanced — Freq. Response ±1 db (constant current): 100 Hz to 128 KHz — Total Harmonic Distortion: Less than 0.3% — Output Amplitude Stability: ±0.5 db — Precision Reference Signal and Bias Inputs are also provided. Amplifier designed to use 750 KHz bias. Power Consumption: ≈ 1.2 watts

PLAYBACK



DIGITAL PLAYBACK AMPLIFIER *MODEL EDP*

Amplifier employs peak detection which reduces pulse jitter during play to a minimum. Triggering in the reconstruct amplifier section is essentially independent of input signal amplitude. Output is NRZ (mark). Logical "0" is no change in voltage level: or vice versa. Max. bit rate: 30 Kbps. Output Z < 100 ohms. Amplifiers will handle 6 tape speeds with front panel switch (manual). Power consumption ≈1 watt.

FM PLAYBACK AMPLIFIER *MODEL EFP*

Available for any std. IRIG Center Frequency — Amplifiers having a Frequency Response which complies with either Low Band or Intermediate Band IRIG Specifications are available — Linearity: ±0.25 of best straight line for full bandwidth output — Total rms Harmonic Distortion: Less than 0.5% — Output Z < 100 ohms — Output Level: 0 to ±1.4 volts peak. Power Consumption ≈ 1 watt

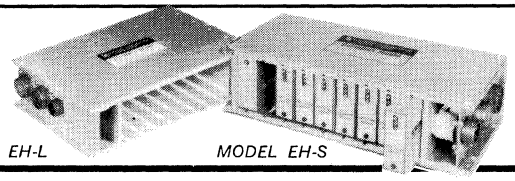
DIRECT PLAYBACK AMPLIFIER *MODEL EAP*

Amplifiers having Output Characteristics complying with either the Low Band or Intermediate Band IRIG Specification are available. Normal Output Level: 1 volt rms — Output Z: less than 100 ohms — Total RMS Harmonic Distortion: less than 0.5% — Both Amplitude and Phase Equalization for 1 or 2 tape speeds are available. Power Consumption ≈ 1 watt

ELECTRONICS HOUSINGS

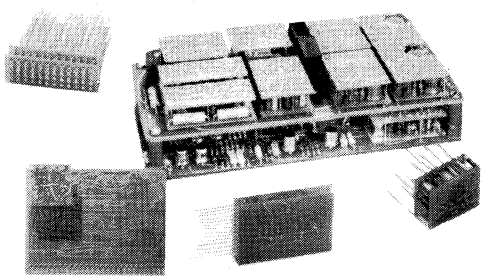
EH-S 9.312" x 2.437" x 4.125"

EH-L 9.312" x 2.437" x 6.125"



MODEL EH-L *MODEL EH-S*

Housing wired to accept any combination of 9 Kinelogic Amplifiers — Model EH-S for record modules, Model EH-L for playback amplifiers. Available with thermostatically controlled heaters to extend operation of Kinelogic Electronics from −20°C to −54°C.



SPACE ELECTRONICS

Kinelogic data and control electronics for space use are tailored for each individual application. The electronics are adaptions of a special group of circuits, designed and developed by Kinelogic to minimize size, weight, and power consumption, and also to meet the highest reliability standards. Cordwood and other condensed packaging techniques are employed for fabrication of hybrid modules (combination of IC and discrete components) which in turn are mounted on multi-layer "mother" boards. This approach minimizes interconnecting wiring. Fabrication is to NASA standards with assembly and soldering accomplished by NASA certified personnel in a "clean" environment.

Available circuits include digital, (NRZ and Biphase) direct, and FM record and playback amplifiers plus head track switching logic, inverters, control logic, power supplies, etc. Typical characteristics of a single channel of data electronics are shown in the Table.

	Digital		Direct		FM	
Characteristics	Rec.	P/B	Rec.	P/B	Rec.	P/B
Size (cubic inches)*	0.7	1.5	1.3	1.3	1.0	2.0
Weight (oz)*	0.3	0.8	0.8	1.3	0.5	2.0
Power Consumption (Milliwatts)	100	180	100	50	100	160

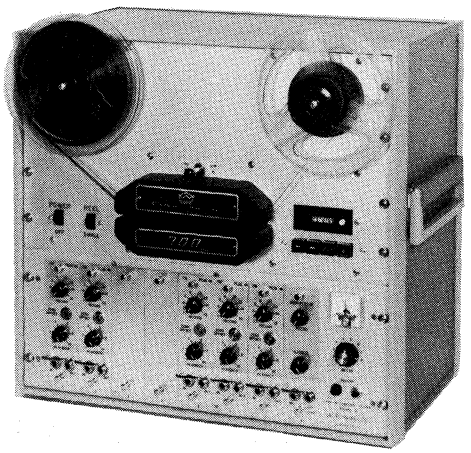
*The size and weight of the interconnecting "mother" board must be added to the above numbers in order to estimate system values.

Kinelogic

Kinelogic Corporation / 873 South Fair Oaks Avenue / Pasadena, California 91105 / (213) 449-8707 / TWX 910-588-3287 / a Dictaphone Company

Low Cost Tape Recording Systems

MODEL A
8 CHANNEL ANALOG RECORDER



This instrument meets the long standing need for a versatile, low-cost, multi channel tape recorder. We have integrated a high-quality Crown tape deck with our FM and direct electronics to produce a machine of remarkable performance and value. The plug-in electronics allows up to eight channels in any combination. Eight tracks are recorded across standard ¼ inch tape.

FM plug-ins are available for all 4 tape speeds. The bandwidth at 7½ in/sec is DC-1000 c/s. All FM plug-ins have wide ±72% deviation for low noise. Data input required is 1.5V p-p. Linearity is within ±1%. All four plug-ins are compatible to allow time base compression/expansion.

The audio plug-in operates at all four speeds with equalization by an internal switch.The input for a ceramic microphone output is one watt. A meter monitors recording level and FM carrier setting.

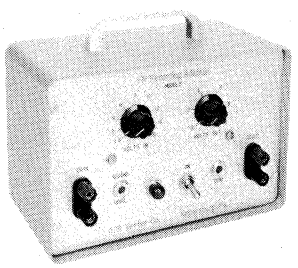
The Crown transport used in the Model A operates at 15/16, 1⅞, 3¾ and 7½ ips. It accepts 5, 7, and 10½ inch reels. It is an exceptional three meter design featuring fully electro-magnetic operation (PATENTED). There are no clutches, brakes, or similar friction elements with their inherent complexities.

MODEL A RECORDING SYSTEM, complete, less plug-ins **$1725.00**

AUDIO PLUG-IN, per channel **85.00**

FM-715 PLUG-IN (7½ in/sec), per channel **160.00**

ALL OTHER FM PLUG-INS, per channel **120.00**



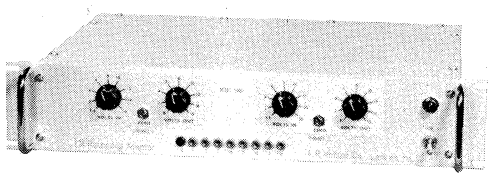
MODEL 2
$165.00

Record and Playback DC Signals on any Tape Recorder with one of our FM Recording Adaptors.

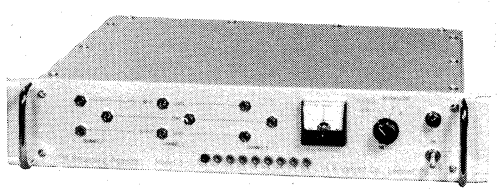
Essentially a VCO, Discriminator, and Power Supply, the Model 2 allows recording and playback of signals in the DC-100 c/s band. 1.5 V p-p is required to fully modulate the VCO over its 400 to 4000 c/s range. The unusually wide deviation minimizes flutter effects; only 0.6% p-p (mid-band) noise is observed with a typical $100.00 recorder. Nonlinearity is less than ±1%. The VCO and Discriminator operate concurrently, thus allowing monitoring during the recording process. Data output corresponding to full modulation is 10 V p-p behind 4000 ohms. This instrument is also useful for telemetering data over telephone, radio, or other audio links.

The Model 2D is a dual version of the Model 2 for use with stereo recorders. All specifications are identical to the Model 2 above. The unit mounts in 3½" of rack space and has all connectors on the back. Test points on the panel allow convenient monitoring of system performance. Both Models 2 and 2D are available in DC-300 and DC-1000 c/s bandwidth versions at the same price. Units are also available for time-base expansion and compression. Write or call for details.

MODEL 2D **$300.00**



MODEL 3 **$650.00**



This is a Multiplexed FM Recording Adaptor. It records three channels of data on a single tape track; six channels of data can be recorded using two Model 3's and a stereo recorder. The Model 3 records with three VCO's which operate in three separate audio bands. On playback, these three carriers are separated by bandpass filters which are followed by precision limiters and three discriminators for recovering the original data. The deviation in each channel is ±40%; information bandwidths are DC-30 c/s, DC-100 c/s and DC-300 c/s for the three channels. The recorder must reproduce frequencies from 300-7500 c/s. Other specifications are: input for full deviation, 1.5 V p-p; Data output, 10 V p-p behind 4000 ohms; Noise and crosstalk, less than 1% p-p; Linearity, within ±1%; carrier frequencies, 540, 1700, and 5400 c/s.

GENERAL INFORMATION

ADLAKE Mercury Displacement Relays are all designed and built to meet the most exacting demands of industry. They have won their high place in the electrical field by doing the tough and tricky jobs that ordinary equipment could at best do in an uncertain manner. They have proved their ability to stand up under the most adverse conditions of temperature, dust and moisture, in all types of applications. All the care required for the manufacture of high-grade instruments is used in the manufacture of the switches. All switch parts are specially cleaned, and contamination is avoided by use of tweezers, gloves, etc., when making assemblies.

Adlake SINCE 1857

MERCURY DISPLACEMENT RELAYS

LABORATORY APPROVALS

Many Adams & Westlake relays carry the Underwriters' Laboratories label. All do not carry this label, mainly because the line is so broad and varied in content. However, our policy is to obtain the Laboratories' recognition of the more popular items of time delay and quick acting load relays.

A form of approval of extreme importance to various companies in the control industry is that of Factory Mutual Laboratories acceptance. The Laboratories approve the use of Adams & Westlake time delay relays in combustion control circuits. Their approval covers our entire line of standard A.C. operated timing relays regardless of contact arrangement or length of time delay. This information is contained in their detailed report No. 12130 of September 9, 1952.

The Canadian Standards Association has listed under SWITCHES — Automatic — Magnetic Type, Adams & Westlake mercury displacement relays, 1, 2 or 3 pole; contacts normally open or normally closed, quick make-and-break only. This information is listed in their file No. 18583 of April 14, 1961.

ADVANTAGES • FEATURES

CONSTRUCTION

The hermetically sealed contact envelope is constructed of non-magnetic stainless steel.

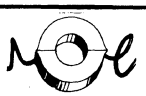
SEALS

Positive leakproof sealing of electrodes is assured by the use of properly selected metals and glass components having properly matched thermal expansion characteristics.

CERAMICS

At points of electrical contact where arcing may occur, ceramics with great temperature-resistance are used to reduce any destructive effect caused by the arc. Other ceramics of constant and controlled density are used to insure dependable time delay characteristics. The exclusive ADLAKE fusing method secures ceramics in place, insuring high dielectric properties and reliable, trouble-free performance.

COILS

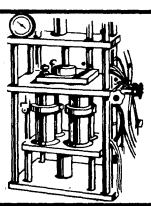


Standard commercial ADLAKE Relays are now made with molded coils in epoxy resin. These coils, which give better heat radiation and absolute moisture proofing, are another ADLAKE first. They have been tested by millions of operations at maximum capacity, making it possible to guarantee ADLAKE Relays against coil failure.

CONTACTS

ADLAKE Relays use mercury-to-mercury contacts. This liquid contact completely eliminates failures caused by low contact pressure, contact burning, pitting and sticking — and the inherent high surface tension of mercury imparts an ideal snap action to the contacts. The mercury-to-mercury contact provides a new and clean contacting surface for each operation.

EVACUATING, PRESSURE FILLING AND GAS FILL



Research has definitely established that even infinitely small traces of impurities and occluded gases, or organic materials, reduce the life period and the reliability of any mercury switch. Therefore, ADLAKE engineers have established control methods of evacuating and pressure filling which completely eliminate any possibility of such contamination. ADLAKE Mercury Relays are filled with a purified dry gas which performs many functions: It provides a stable, non-oxidizing atmosphere, quenches the arc, dissipates the heat generated at contact points, and retards mercury vaporization and ionization.

SELECTION FACTORS

In order to get the right relay for your job — the relay that will give you the best performance — it is essential that certain information, concerning the conditions under which the relay must perform, be carefully considered. We therefore recommend that answers to the following questions be forwarded to us with your inquiry or order.

1. APPLICATION
- a. What kind of job is relay to do?
- b. Is application special in any way?
- c. Will mounting be stationary, on shipboard, or on railroads? On Diesel locomotives or passenger cars?

2. TYPE OF LOAD
- a. What is the voltage in the load circuit?
- b. What is the amperage in the load circuit?
- c. Is it A.C. or D.C.? If A.C., what is the frequency?
- d. What is the nature of the load?
  - Heater load?
  - Lamp load?
  - Motor load?
  - Current inrush and running current?
  - Other types of inductive load?

3. CONTACT ARRANGEMENT
- a. Do you require a relay which has a normally open or normally closed contact?

4. DUTY
- a. How often is relay to be operated?
- b. How long is relay to be energized in each operation?

5. TIME DELAY CHARACTERISTICS
- a. What operating time do you want to achieve, maximum and minimum seconds?
- b. Is timing to be on closing or opening of the contacts?

6. COIL RATING
- a. What is your maximum and minimum coil operating voltage or current?
- b. Is coil to be operated from an A.C. or a D.C. circuit? If A.C., what frequency?

7. MOUNTING SPACE
- a. Are there any limitations on space for applying relay?

WARRANTY POLICY

ADLAKE Relays are warranted against defective workmanship and materials for one year. Replacement will be made at any time within that year, providing the relay has not been subject to improper use.

MERCURY DISPLACEMENT RELAYS

GENERAL INFORMATION

Underwriters' Laboratories Listed Relays

TIME DELAY RELAYS

U.L. File #E23321

Industrial Control Equipment — Auxiliary Devices.

Adlake #1040 and #1101 Type Time Delay Relays, with Pigtail Leads.

Normally Open Contacts — Single Pole Single Throw.

Slow Operate (Make) From 0.5 Seconds To and Including 10 Seconds, By One (1) Second Increments, i.e., 0.5 Sec., 1 Sec., 2 Sec., etc. These Relays All With Quick Release (Break) Feature.

Slow Release (Break) From 0.5 Seconds To and Including 10 Seconds, By One (1) Second Increments, As Above, These Relays All With Quick Operate (Make) Feature.

COIL VOLTAGES:
115, 230 or 440 Volts, 50/60 Cycles

U.L. RATING:
3 Amps. Normal — 30 Amps. Inrush
115 Volts, 50/60 Cycles Standard Pilot Duty
230 Volts, 50/60 Cycles Heavy Pilot Duty
10 Amps. — 115 Volts AC
5 Amps. — 230 Volts AC

U.L. File #E27809

Switches, Magnetically Operated.

Adlake #1040 and #1101 Type Time Delay Relays, with Pigtail Leads.

Normally Open Contacts — Single Pole Single Throw.

Slow Operate (Make) From 15 Seconds To and Including 60 Seconds By Five (5) Second Increments, i.e., 15 Sec., 20 Sec., 25 Sec., etc.

These Relays All With Quick Release (Break) Feature.

COIL VOLTAGES:
115, 230 or 440 Volts, 50/60 Cycles

U.L. RATING:
7.5 Amps. — 115 Volts AC
2.5 Amps. — 230 Volts AC

LOAD RELAYS

U.L. File #27809

Switches, Magnetically Operated.

Adlake #1140 Type Load Relay, with Pigtail Leads.

Normally Open or Closed contacts — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
24 or 48 Volts DC
18-24, 115 or 230 Volts, 50/60 Hz.

U.L. RATING:
30 Amps. — 115 Volts AC
20 Amps. — 230 Volts AC

U.L. File #E27809

Switches, Magnetically Operated.

Adlake #1140-45-TL Type Relay, with Pigtail Leads.

Normally Open Contact — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
18-24, 115 or 230 Volts, 50/60 Hz.

U.L. RATING:
30 Amps. — Tungsten Only — 115 Volts AC

U.L. File #E25303

Sign Flashers

Adlake #1140-55 Type Load Relays, with Pigtail Leads.

Normally Open Contact — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
115 or 230 Volts, 50/60 Hz.

U.L. RATING:
25 Amps., Inductive, 115 Volts AC
30 Amps., Tungsten Only, 115 Volts AC

Duty cycle 25 operations per minute maximum

U.L. File #E27809

Switches, Magnetically Operated.

Adlake #1155, #1155-A & #1155-T Type Relays, Molded Head with Compression Terminals.

Normally Open or Closed Contacts — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
12, 24, 48, 115 or 230 Volts DC
12, 24, 48, 115 or 230 Volts, 50/60 Hz.

U.L. RATING:
1155 Type — 35 Amps. — 115 Volts AC
20 Amps. — 230 Volts AC
1155-A Type — 16 Amps. — 277 Volts AC
1155-T Type — 35 Amps. — Tungsten Only — 115 Volts AC

U.L. File #27927

Industrial Control Equipment — Magnetic Motor Controllers.

Adlake #1123-100 & #1133-100 Type Relays, with Pigtail Leads.

Normally Open Contacts — Double Pole, Single Throw — Quick Acting — Triple Pole, Single Throw — Quick Acting.

COIL VOLTAGES:

1123 Type Double Pole	1133 Type Triple Pole
6 V.D.C.	24 V.D.C.
24 V.D.C.	115 Volts, 50/60 Hz.
48 V.D.C.	
115 Volts, 50/60 Hz.	

U.L. RATING: (Per Pole)
1.5 H.P. — 35 Amps. — 120 V.A.C.
1.5 H.P. — 20 Amps. — 240 V.A.C.

U.L. File #E27927

Motor Controllers, Magnetic.

Adlake #1040 and #1101 Type Load Relays, with Pigtail Leads.

Normally Open or Closed Contacts — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
115 or 230 Volts, 50/60 Cycles

U.L. RATING:
2 H.P. — 30 Amps. — 115 V.A.C. (Medium Duty)
2 H.P. — 20 Amps. — 230 V.A.C. (Medium Duty)
3 H.P. — 50 Amps. — 115 V.A.C. (Heavy Duty)
3 H.P. — 30 Amps. — 230 V.A.C. (Heavy Duty)

U.L. File #E27809

Switches, Magnetically Operated.

Adlake #1101-87 Type Relay, with Pigtail Leads.

Normally Open Contact — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
115 or 230 Volts, 50/60 Hz.

U.L. RATING:
75 Amps. — 115 V.A.C.
69.5 Amps. — (8000 Watts) Tungsten Only — 115 V.A.C.

U.L. File #E25303

Sign Flashers.

Adlake #1101-75 Type Load Relays, with Pigtail Leads.

Normally Open Contact — Single Pole, Single Throw — Quick Acting.

COIL VOLTAGES:
115 or 230 Volts, 50/60 Hz.

U.L. RATING:
50 Amps., Inductive, 115 Volts AC
50 Amps., Tungsten, 115 Volts AC Only

Duty Cycle 25 Operations Per Minute Maximum

U.L. File #27809

Switches, Magnetically Operated.

Adlake #2101 and #2101-T Type Relays, Molded Head with Compression Terminals.

Normally Open Contact — Single Pole, Single Throw — Quick Acting.

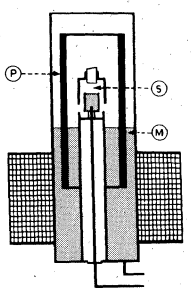
COIL VOLTAGES:
24, 115, 230, or 440 Volts DC
24, 115, 230, or 440 Volts, 50/60 Hz.

U.L. RATING:
2101 Type 100 Amps. — 115 Volts AC
2101-T Type 100 Amps. (12,000 Watts) Tungsten Only — 120 Volts AC

TIME DELAY OPERATION

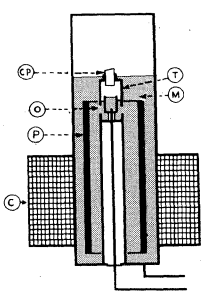
NORMALLY OPEN SLOW MAKE

The accompanying sketches are not mechanical drawings. They show how ADLAKE Relays work, not construction detail.



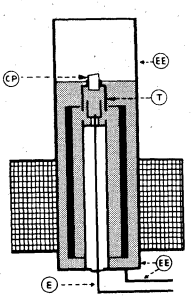
De-energized

Plunger P is floating in mercury M. Space indicated by S is filled with inert gas.



Energized

Coil C pulls plunger P down into mercury M. Mercury thus displaced enters thimble T through orifice O. Inert gas in thimble gradually escapes through ceramic plug CP, thus effecting time delay.



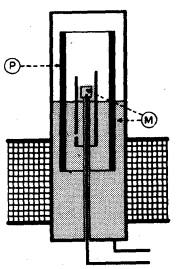
Energized

Mercury now fills thimble T, is completely leveled off and mercury-to-mercury contact established between electrodes E and EE. Degree of porosity of plug CP determines length of time delay.

TIME DELAY OPERATION

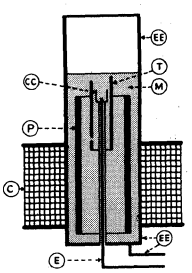
NORMALLY OPEN SLOW BREAK

The accompanying sketches are not mechanical drawings. They show how ADLAKE Relays work, not construction detail.



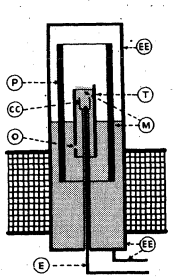
De-energized

Plunger P is floating in mercury M.



Energized

Coil C pulls plunger P down into mercury M. Mercury thus displaced completely fills thimble T and overflows lip of ceramic cup CC. This establishes mercury-to-mercury contact between electrodes E and EE.



De-energized

Plunger P returns to its floating position. Mercury inside thimble T flows through orifice O seeking its level with mercury outside thimble. When the mercury level inside thimble T falls below lip of ceramic cup CC, mercury-to-mercury contact between electrodes E and EE is broken. Diameter of orifice O determines length of opening time delay.

MERCURY DISPLACEMENT RELAYS

TIME DELAY RELAYS

The time delay characteristics of the ADLAKE Relay are fixed and non-adjustable. Normal line voltage fluctuations or ambient temperatures from —37.8° to 200°F. have no material effect on these characteristics.

The mercury-to-mercury contact which takes place within the hermetically sealed envelope assures positive action and freedom from failure.

ADLAKE Relays are available with fixed time delay in either make or break. Also available with time delays on both make and break. Time Delay Relays are available to meet your minimum operating time requirements in seconds up to a maximum delay of 20 minutes.

COILS:

A.C. Operated Relays

Available up to 440 Volts A.C. (25-50 & 60 Hz.)
Epoxy Molded (All Standard Voltages)
Leads — #18 ga. flexible — 1/32" wall p.v.c. insulation — 90°C rating — up to 10" long (10" and 12" std.)
Current coils available up to 50 Amps.

COIL DATA — TYPICAL

Timing Function	Resistance (ohms D.C. ± 10% @ 20°C)	Current (Amps.)	Watts	Coil Volts A.C. (50/60 Hz.)
Slow Make Quick Break	375	0.076	4.5	115
	1120	0.045	5.5	230
	5400	0.020	6.7	440
Quick Make Slow Break (20 Sec. Max.)	375	0.080	4.7	115
	1120	0.048	5.8	230
	5400	0.021	7.0	440
Quick Make Slow Break (Over 20 Sec.)	250	0.114	6.4	115
	1120	0.049	5.8	230
	5400	0.032	9.7	440

	3700	0.034	4.3	125

CONTACTS:

Single Pole, Single Throw.
Normally Open or Normally Closed.

Mercury-to-Mercury, hermetically sealed, all metal enclosed, welded construction.
Leads — #16 ga. flexible — 1/32" wall p.v.c. insulation — 90°C rating — 8" long.

CONTACT RESISTANCE — 0.028 ohms maximum.

CONTACT RATING

MERCURY DISPLACEMENT RELAYS

TIME DELAY RELAYS

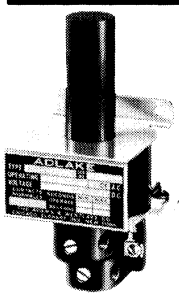
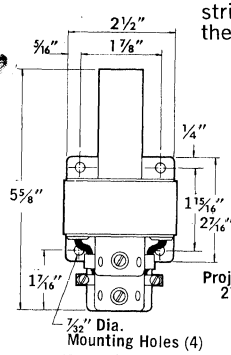
TYPES 1040 & 1101 (continued) — Molded Head & Panel Mounted

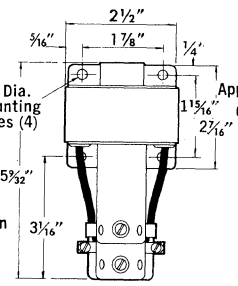
Besides being easier to install, Type 1040-M Molded Head Relays offer higher component density than panel-mounted types. Compression terminals are molded in place with self-extinguishing epoxy resin. Dummy screw terminals for coil connection are provided on the sides of the contact casting. To install: place the relay in your equipment; strip the wire and apply the leads to the proper terminals; and secure the compression terminals.



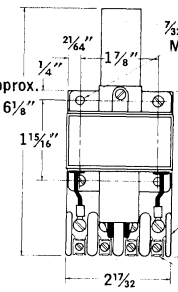
Molded Head Normally Open Type 1040-8M



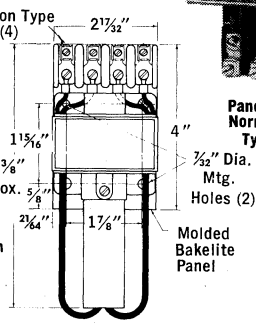
Normally Open Series 1040-8M



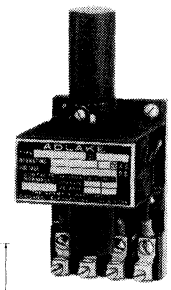
Normally Closed Series 1040-34M



Normally Open Series 1101-44

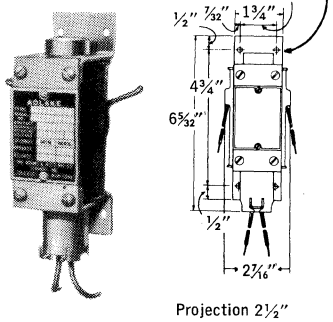


Normally Closed Series 1101-45

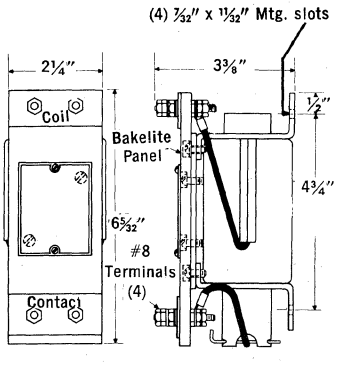


Panel Mounted Normally Open Type 1101-44

TYPE 1200



Series 1200-12 — Normally Open or Series 1200-54 — Normally Closed With Pigtail Leads



Series 1200-36F — Normally Open or Series 1200-60F-Normally Closed With Front Panel & Stud Terminals

Normally Open — Slow Operate (Make) — Quick Release (Break)

MERCURY DISPLACEMENT RELAYS

LOAD RELAYS-LIGHT DUTY(30-35 AMPS)

TYPES 1140, 1155, 1200, 1123 & 1133

COILS

Available up to 440 Volts A.C. (25-50 & 60 Hz.) and 230 Volts D.C.

Epoxy molded (All Standard Voltages).

Leads — #18 ga. flexible — 1/32" wall p.v.c. insulation — 90°C Rating — up to 10" long (10" and 12" standard).

Current coils available up to 50 Amps.

CONTACTS

Single Pole, Single Throw
Double Pole, Single Throw (Independent Circuits).
Triple Pole, Single Throw (Independent Circuits).
Normally Open or Normally Closed.
Mercury-to-Mercury, hermetically sealed, all metal enclosed, welded construction.
Leads — #12 ga. flexible — 1/32" wall p.v.c. insulation — 90°C Rating — (Normally Open 9" long and Normally Closed 8" long standard).

CONTACT RESISTANCE: 0.005 ohms maximum.

CONTACT RATINGS: Factory Recommended — Duty Cycle 44 Operations Per Minute Maximum

MERCURY DISPLACEMENT RELAYS

LOAD RELAYS — MEDIUM DUTY (30 AMPS)

TYPES 1040, 1101, 1141, 1200, 1123 & 1133

COILS

Available up to 440 Volts A.C. (25-50 & 60 Hz.) and 230 Volts D.C.

Epoxy Molded (All Standard Voltages).

Leads — #18 ga. flexible — 1/32" wall p.v.c. insulation — 90°C.
Rating — up to 10" long (10" and 12" standard).

Current coils available up to 50 Amps.

CONTACTS

Single Pole, Single Throw.
Double Pole, Single Throw (Independent Circuits).
Triple Pole, Single Throw (Independent Circuits).
Normally Open or Normally Closed.
Mercury-to-Mercury, hermetically sealed, all metal enclosed, welded construction.
Leads — #12 ga. flexible — 1/32" wall p.v.c. insulation — 90°C
Rating — 6" long (1141 Type - Standard). — 12" long (other Types-Standard).

CONTACT RESISTANCE: 0.003 ohms Maximum

MERCURY DISPLACEMENT RELAYS

LOAD RELAYS-(100 AMPS)

TYPE 2101 SINGLE POLE, NORMALLY OPEN

Remember when a 100 ampere load relay looked its size? Most still do.

This is the exception — Adlake's Type 2101 mercury displacement relay. This new molded head, screw terminal unit — rated 100 amperes at 115 volts—occupies less than 57 cubic inches. Yet all the reliability built into every Adlake relay is there.

The Type 2101 is now demonstrating its dependability in high current (15,000 amperes) applications of short duration, in capacitor-discharge and arc welding installations plus heating and lighting applications.

Adlake design and quality manufacture insure 2101's low contact resistance and its ability to withstand 100% overloads for periods up to 60 seconds. Added reliability through the use of epoxy molded coil is backed by Adlake's guarantee of freedom from coil failure.

COILS

Available up to 440 Volts A.C. (25-50 & 60 Hz.) and 230 Volts D.C.

Epoxy Molded — Random Wound (All Standard Voltages)

Leads — #18 ga. flexible — 1/32" wall p.v.c. insulation — 90°C. Minimum Rating. Terminated to screw terminals on sides of Molded Head Contact.

CONTACTS

Normally Open — Single Pole, Single Throw — Molded Head.

Mercury-to-Mercury, hermetically sealed, all metal enclosed welded construction.

Compression terminals molded in place with flame-proof epoxy resin.

Terminal Capacity — wire size 1/0 Stranded to 2/0 solid.

CONTACT RESISTANCE: 0.0005 ohms maximum.

CONTACT RATINGS:

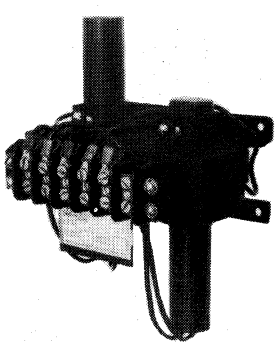
OTHER REPRESENTATIVE TYPES

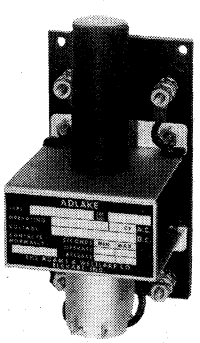
Various Configurations and Mounting Arrangements are available for Adlake Mercury Displacement Relays. Shown are but a few of the many possibilities.

Our engineering department is ready to assist in developing ideas to fit your needs.



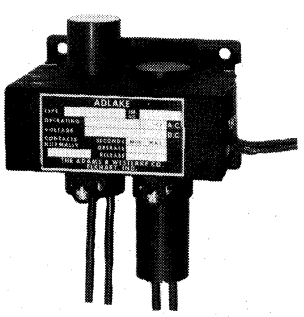
1101-51-FB

2-Separate relays with iron circuits welded. Combinations of load and timer contacts available.



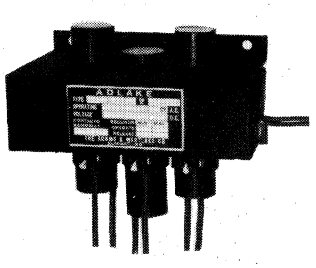
1040-85

Panel with stud terminations.



1123-150

(2-Pole Combination)
1-normally open light duty contact.
1-normally closed light duty contact.



1133-150

(3-Pole Combination)
2-normally open light duty contacts.
1-normally closed light duty contact.

GENERAL INFORMATION

Mercury-Wetted Relays — manufactured under Western Electric Co. license agreement

It is well known that the mercury contact does not become dirty or pitted — always provides positive closure — has low contact resistance throughout its life. The resistance of single contacts including that of the internal wiring between base terminals is less than **50 milliohms** for normal new switch contacts. Repetitive measurements on individual relays are constant to a **few milliohms.**

Adlake SINCE 1857

MERCURY WETTED CONTACT RELAYS

MOUNTING POSITION

For best performance, these relays are designed to be operated in a vertical position. Permormance is reduced when relays are operated at small angles off the vertical position. Where necessary to mount at an angle other than vertical, it is recommended that the departure not exceed 30 degrees from vertical.

ENCLOSURES AND TERMINATIONS

While 8-Pin and 11-Pin Bakelite Tube Bases and 14-Pin Glass-to-Metal Headers have been specified, other bases and terminals may be obtained. The standard housing is steel, cadmium plated with a golden chromate conversion coating. The MWB and MWC Relays differ from the standard in that they are supplied in a cast epoxy package and the MWSA Relay is provided with a tin plate cover. While ADLAKE MW & MWS Relays do not require hermetic sealing of the enclosure, certain applications may require this feature. Hermetic sealing can be furnished under certain conditions when specified.

MOUNTING ACCESSORIES

BAKELITE SOCKETS — 8-Pin Amphenol 77-MIP-8 or equal
11-Pin Octal Style Amphenol 77-MIP-11 or equal
14-Pin Mica-filled Bakelite socket Munston #198-201
AN/MS Socket size 20 Code 27S (14 contacts)
7-Pin Miniature Amphenol 147-505

VIBRATION AND SHOCK

While ADLAKE MW and MWS Relays have a glass-sealed switch, they are not fragile and neither are they dangerous to handle. They will withstand handling and normal transportation shocks.

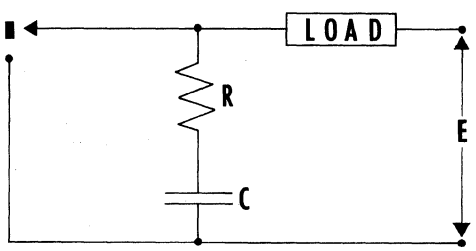
SELECTION FACTORS

In order to get the right relay for your application — the relay that will give you the best performance — it is essential that certain information concerning the conditions under which the relay must perform be carefully considered. We, therefore, recommend that answers to the following questions be forwarded to us with your inquiry or order:

1. **APPLICATION**
   a. What is relay required to do?
   b. Is application special in any way?
2. **CONTACT ARRANGEMENT**
   a. How many switches are needed in each relay?
   b. Do contacts or switches require shielding?
3. **COIL ARRANGEMENT**
   a. Is a single winding required, or should coil have more than one independent winding?
   b. What are operating currents?
   c. Any other coil requirements?
4. **TERMINATION**
   a. What base is required?
   b. What base wiring diagram will be needed?
5. **ENCLOSURE**
   a. Will hermetic sealing of can be required?
6. **MISCELLANEOUS**
   a. Are there any other features required?

CONTACT PROTECTION

Except for specific instances of light loads, the relay contacts must be protected by a network composed of a resistor and a capacitor in series as shown in the following diagram. This protection should be physically located as close as possible to the relay terminals.



Contact Protection Network to be used with ADLAKE Neutral Type MW and Sensitive Type MWS Relays

The preferred values of R and C, except for the conditions stated subsequently, can be evaluated from the following equations:

$$C = \frac{I^2}{10} \text{ microfarads}$$

$$R = \frac{E}{10I^{\left(1+\frac{50}{E}\right)}}$$

where I = load current in amperes immediately prior to opening of contacts.
E = source voltage immediately prior to closing of contacts.

The "break" action of mercury relays is extremely rapid, with the result that very large peak voltages can be developed across the load at that time. To reduce these peak voltages to safe levels, the value of C in the protective network can be increased above the minimum value of equation (1) required for contact protection. The appropriate value can be determined by measurement of peak values within the first few milliseconds after break of the contacts. Consideration must also be given to protection of the load and circuit wiring.

Where circuit applications of these relays involve the condition of a source of power across the front and back contacts, it is particularly important to fulfill the contact protection requirements and insure that the current ratings are not exceeded. In some applications, this may require the incorporation of a current limiting impedance in the power circuit.

To assure long service life and to provide adequate contact protection, the values derived from the equation must be applied as follows:

E	I	C	R
Less than 50	Less than 2.5 amperes	Use calculated value	May be omitted
Up to 70	All other conditions	Use calculated value	3 X calculated value permissible
@ 100 v.	All other conditions	Use calculated value	Within 50% of calculated value
@ 150 v.	All other conditions	Use calculated value	Within 10% of calculated value
Above 150 v.	All other conditions	Use calculated value	Follow calculated value closely

Note: For any voltages more than 50, the value of R must not be less than 0.5 ohm.

WARRANTY POLICY ADLAKE Mercury Wetted Contact Relays are warranted against defective workmanship and materials for one year. Replacement will be made at any time within that year, providing the relay has not been subject to improper use.

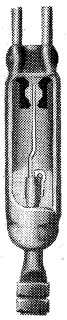
Adlake SINCE 1857

MERCURY WETTED CONTACT RELAYS
SENSITIVE FORM C & D



The ADLAKE Sensitive Relay represents a technical breakthrough in the mercury-wetted contact relay field.

Described in various terminology, i.e., High Speed, Sensitive, Bridging or Non-Bridging, the sensitive type switch capsule also makes use of the capillary action of mercury to provide a film of the metal on the contact surfaces. In general, the switch is similar to the MW (neutral) type. Two fixed contacts — one normally open, one normally closed — instead of four, as in the MW (neutral) type contacts, are sealed in the glass envelope. Operation of the switch is achieved through the use of a single operating coil, single or multiple-wound. Operating characteristics, however, are determined by permanent magnet biasing, in a manner similar to ADLAKE MWP-16000 (neutral type) relays. As the switch unit of these relays is filled with hydrogen at high pressure, the relays are factory-sealed and under no circumstances should be disassembled without taking necessary safety precautions in the event of breakage of the switch.

SPECIFICATIONS

CONTACT ARRANGEMENT SPDT, Form C, non-bridging, break before make (single-side-stable, bi-stable or chopper). SPDT, Form D, bridging, make before break (single-side-stable, bi-stable or chopper).

CONTACT RESISTANCE 50 Milliohms max.

CONTACT RATING 2 amperes max., 500 volts max., 100 volt-amperes peak with contact protection consisting of a series resistor — capacitor network in parallel with the relay contacts. The values of resistance and capacitance may be calculated from the formulas as shown on Page

BOUNCE None.

CONTACT RISE TIME (less contact protection) 10 nano-seconds or less.

LIFE One billion operations may be expected if contact ratings with recommended contact protection are observed.

STAND OFF VOLTAGE 1000 VAC 60 cps. between mutually insulated terminals, except between windings of bifilar construction dual wound coils.

INSULATION RESISTANCE 1000 megohms min. @ 500 VDC, 25°C, 45% RH between all mutually insulated terminals except between windings of bifilar construction dual wound coils.

BRIDGING TIME, FORM D 50 to 500 microseconds.

TRANSFER (null) TIME, FORM C 50 to 600 microseconds.
(Typical bridge and transfer times are measured on a time interval meter with switch operating at 60 times per second).

DEFINITIONS

Sensitivity Terminology

MUST OPERATE — Current required to operate the least sensitive relay of a given specification.

NON-OPERATE — Current at which the most sensitive relay will not operate.

HOLD — Current above which all relays will remain operated, once they have been operated.

MUST RELEASE — Current at which all relays will have released.

The MUST OPERATE and the NON-OPERATE values are the limits within which a specified relay will operate. The HOLD and MUST RELEASE values are the limits within which a specified relay will release. It should be noted that the four terms specified above are maximum values and that the average relays will operate and release at approximately average values.

Adjustment Terminology —

(All polarized & sensitive relays)

SINGLE SIDE STABLE — Adjustment of the permanent magnets for armature return to the normally closed contacts when coil current has been lowered to "must release" value.

BI-STABLE (MAGNETIC LATCHING) — Adjustment of the permanent magnets so armature will remain in the position last operated until sufficient current of opposite polarity is applied to the coil.

CHOPPER — Adjustment of the permanent magnets to provide equal dwell ±5% on the fixed contacts when coil is driven by the specified 60 cps. voltage.

Timing Terminology

OPERATE MAKE TIME, TYPICAL

Interval from coil energization until the armature reaches the normally open contact at given drive level.

RELEASE MAKE TIME, TYPICAL, UNSUPPRESSED

Interval from coil de-energized until the armature makes the normally closed contacts.

MERCURY WETTED CONTACT RELAYS

SENSITIVE FORM C & D - PLUG-IN TYPES

MWS

SENSITIVITY, TYPICAL

SINGLE SIDE STABLE
Must Operate: 27 Ampere Turns
Must Release: 5 Ampere Turns

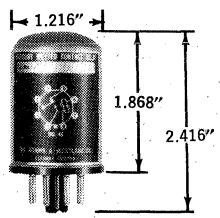
BI-STABLE
Must Operate: ±15 Ampere Turns
Non-Operate: ± 4 Ampere Turns

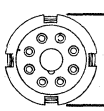
OPERATE MAKE TIME, TYPICAL

Single-Side Stable		Bi-Stable	
Ampere Turns Total	Milli-seconds	Ampere Turns Total	Milli-seconds
80	2.0	65	1.8
130	1.6	115	1.5
230	1.3	215	1.3
330	1.2	315	1.1
430	1.1	415	1.0

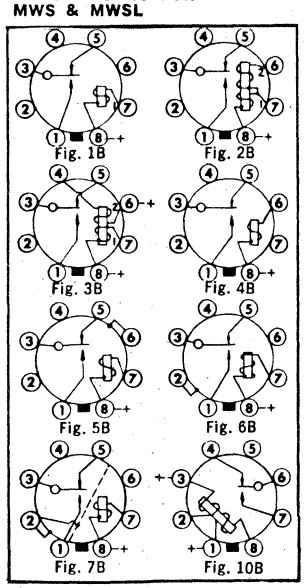
RELEASE MAKE TIME, TYPICAL, UNSUPPRESSED, SINGLE-SIDE-STABLE

1.4 Milliseconds.





BASE FIGURES FOR MWS & MWSL



NOTE:
Positive potential applied to the start of windings indicated by the symbol + will close the contacts shown open on the base connection figures. All Resistance and Voltage values shown are based on a temperature value of 25°C.
* Indicates limited stock item.

MWSL

SENSITIVITY, TYPICAL

SINGLE SIDE STABLE
Must Operate: 27 Ampere Turns
Must Release: 5 Ampere Turns

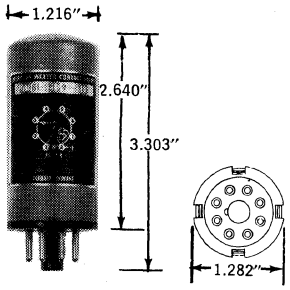
BI-STABLE
Must Operate: ±15 Ampere Turns
Non-Operate: ± 4 Ampere Turns

OPERATE MAKE TIME, TYPICAL

Single-Side-Stable		Bi-Stable	
Ampere Turns Total	Milliseconds	Ampere Turns Total	Milliseconds
80	2.5	65	2.2
130	1.8	115	1.7
230	1.5	215	1.4
330	1.3	315	1.2
430	1.2	415	1.1

RELEASE MAKE TIME, TYPICAL, UNSUPPRESSED, SINGLE-SIDE-STABLE

1.4 Milliseconds.



NOTE:

Positive potential applied to the start of windings indicated by the symbol + will close the contacts shown open on the base connection figures.

All Resistance and Voltage values shown are based on a temperature value of 25°C.

* Indicates limited stock item.

MERCURY WETTED CONTACT RELAYS

NEUTRAL FORM D

The ADLAKE MW Mercury-Wetted Contact Relay is sometimes referred to as the neutral type and often described as Bridging — Contact Form D (Make-Before-Break). The MW relay is comprised of one or more (a maximum of four) switch elements and a single operating coil — single or multiple wound. Each switch or contact assembly consists of two normally open contacts, two normally closed contacts, and a single swinger or armature. The normally closed contact condition is achieved by spring tension of the armature which holds the swinger or armature contact against the normally closed contacts. The swinger of the switch consists of a cantilever reed structure projecting from the bottom end of the glass envelope and interposing the two sets of fixed contacts supported from the top end. Mercury-wetting on the fixed and moving contacting surfaces is maintained by a capillary wick-feed system, associated with the cantilever reed, and connected to a small reservoir filled with mercury at the bottom of the switch. As the switch unit of these relays is filled with hydrogen at high pressure, the relays are factory-sealed and under no circumstances should be disassembled without taking necessary safety precautions in the event of breakage of the switch.

SPECIFICATIONS

CONTACT ARRANGEMENT SPDT, Form D, bridging, make before break.

CONTACT RESISTANCE 50 Milliohms max.

CONTACT RATING 5 amperes max., 500 volts max., 250 volt-amperes peak with contact protection consisting of a series resistor —capacitor network in parallel with the relay contacts. The values of resistance and capacitance may be calculated from the formulas as shown on Page

BOUNCE None.

CONTACT RISE TIME (less contact protection) 10 nano-seconds or less.

LIFE One billion operations may be expected if contact ratings with recommended contact protection are observed.

STAND OFF VOLTAGE 1000 VAC 60 cps. between mutually insulated terminals, except between windings of bifilar construction dual wound coils.

INSULATION RESISTANCE 1000 megohms min. @ 500 VDC. 25°C, 45% HR between all mutually insulated terminals except between windings of bifilar construction dual wound coils.

BRIDGING TIME 1 Millisecond max.

DEFINITIONS

Sensitivity Terminology

MUST OPERATE — Current required to operate the least sensitive relay of a given specification.

NON-OPERATE — Current at which the most sensitive relay will not operate.

HOLD — Current above which all relays will remain operated, once they have been operated.

MUST RELEASE — Current at which all relays will have released.

The MUST OPERATE and the NON-OPERATE values are the limits within which a specified relay will operate. The HOLD and MUST RELEASE values are the limits within which a specified relay will release. It should be noted that the four terms specified above are maximum values and that the average relays will operate and release at approximately average values.

Adjustment Terminology —

(All polarized & sensitive relays)

SINGLE SIDE STABLE — Adjustment of the permanent magnets for armature return to the normally closed contacts when coil current has been lowered to "must release" value.

BI-STABLE (MAGNETIC LATCHING) — Adjusmtent of the permanent magnets so armature will remain in the position last operated until sufficient current of opposite polarity is applied to the coil.

CHOPPER — Adjustment of the permanent magnets to provide equal dwell ±5% on the fixed contacts when coil is driven by the specified 60 cps. voltage.

Timing Terminology

OPERATE MAKE TIME, TYPICAL
Interval from coil energization until the armature reaches the normally open contact at given drive level.

RELEASE MAKE TIME, TYPICAL, UNSUPPRESSED

Interval from coil de-energized until the armature makes the normally closed contacts.

Adlake SINCE 1857

MERCURY WETTED CONTACT RELAYS
NEUTRAL FORM D – PRINTED CIRCUIT TYPES

AWNA

SENSITIVITY

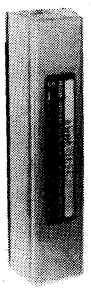
Must Operate: 190 Ampere Turns
Non Operate: 124 Ampere Turns
Hold: 147 Ampere Turns
Must Release: 84 Ampere Turns

OPERATE MAKE TIME, TYPICAL

Ampere Turns Total	Milliseconds
240	4.2
290	3.3
390	2.5
490	2.4
590	2.3

RELEASE MAKE TIME, TYPICAL, UNSUPPRESSED

3.2 Milliseconds.



SERIES AWNA/AWPB

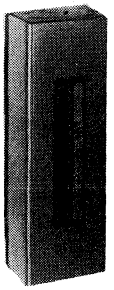
AWPA/AWPB

SENSITIVITY, TYPICAL

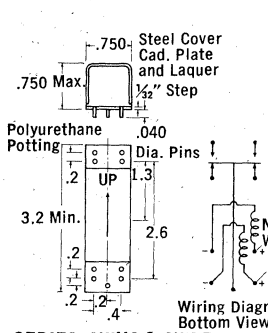
SINGLE SIDE STABLE
Must Operate: 70 Ampere Turns
Must Release: 5.5 Ampere Turns

BI-STABLE
Must Operate: ± 35 Ampere Turns
Non-Operate: ±5.5 Ampere Turns

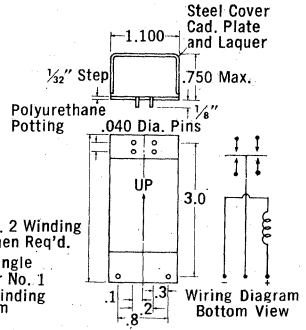
Relay types AWNA and AWPB are identical in size and configuration. Each is a single switch-Form D-neutral (bridging) type relay, and is available with either single or dual wound coil. Relay type AWPB is polarized by means of permanent magnets and is available in Single-Side-Stable, Bi-Stable or Chopper form.



SERIES AWPA
(Single Switch)
AWNA (2 Switch)



SERIES AWNA & AWPB



SERIES AWPA

AWNA (2 SWITCH)

SENSITIVITY

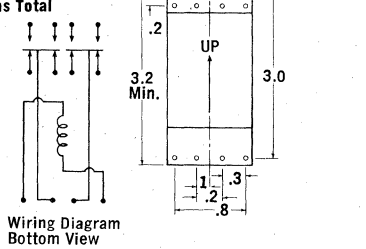
Must Operate: 220 Ampere Turns
Must Release: 97 Ampere Turns

OPERATE MAKE TIME, TYPICAL

Milliseconds	Ampere Turns Total
8	250
5.2	320
3.6	420
3.0	520

RELEASE MAKE TIME, TYPICAL UNSUPPRESSED

3.6 Milliseconds.



NOTE:

Positive potential applied to the start of windings indicated by symbol + will close the contacts shown open on the base connection figures.

All Resistance and Voltage values shown are based on a temperature value of 25°C.

* Indicates limited stock item.

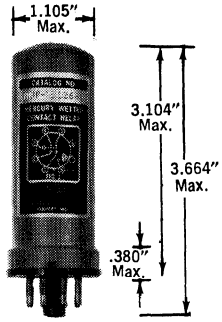
SINGLE SIDE STABLE

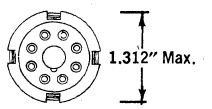
Must Operate: 70 Ampere Turns
Must Release: 5.5 Ampere Turns

BI-STABLE

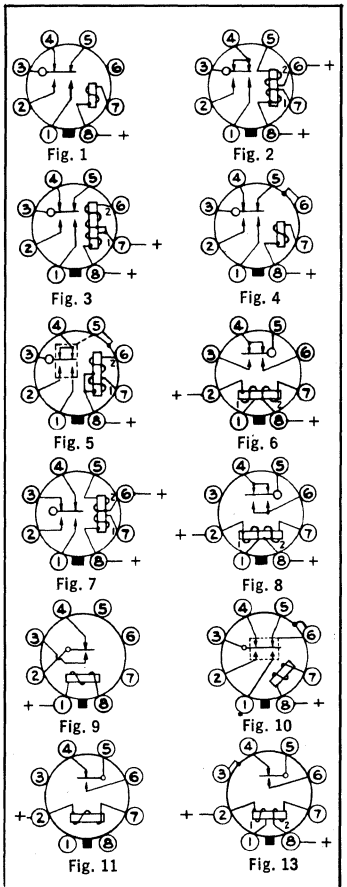
Must Operate: ± 35 Ampere Turns
Non-Operate: ±5.5 Ampere Turns



8-PIN TUBE BASE



BASE FIGURES



NOTE:

Positive potential applied to the start of windings indicated by the symbol + will close the contacts shown open on the base connection figures.

All Resistance and Voltage values shown are based on a temperature value of 25°C.

* Indicates limited stock item.

MWP — Single Side Stable, Single Wound Coil

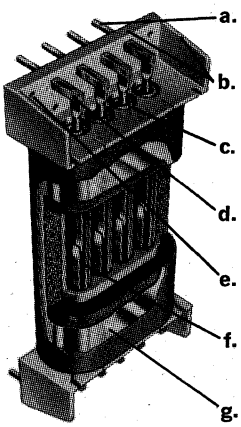
GENERAL INFORMATION

For over forty years the name "ADLAKE" has been recognized as the utmost in quality and reliability in the Mercury Displacement and Mercury Wetted Contact Relay Fields. Now all this experience is being put to use in offering a line of dry reed relays to meet the most exacting demands of industry.

The Adlake Dry Reed Relays presented in this catalog have been selected as the most used contact configurations, keeping in mind the short delivery requirements normally required. These relays uphold the Adlake tradition of high quality and reliability.

All Adlake Reed Relays are supplied with contaminate-free contacts to assure long and dependable life. The coils used are accurately wound, as well as soundly insulated, and rigid controls are maintained on the critical parts of all relays from raw material through completed assembly to provide additional reliability.



ADVANTAGES OF ADLAKE DRY REED RELAYS

a. Non-magnetic inter-connecting pins for printed circuit board insertion can be bent, cut, etc. They also relieve stresses and prevent breakage of glass-metal seal if board is flexed. This assures maintenance of operating characteristics.

b. Molded ledge is extra thick with two sides giving additional rigidity for further structural protection of switch seals.

c. Each switch is housed in its own cradle.

d. Standard connection of switch lead to pin is soldered.

e. Bobbin ledge has additional pin holes available for various grid spacings.

f. Contacts are rhodium plated for higher load and longer life characteristics.

g. Magnetic shielding layer prevents interaction from other flux-generating, electrical apparatus.

APPLICATION NOTES—DATA

1. The relays shown in this catalog as medium sensitivity have been selected as the best choice to provide nominal requirements of both time and power consumption. If higher switching speed, at greater coil power; or power conservation, at slower speeds, is most important, lower or higher sensitivity relays can be supplied appropriately rated as to contact life.
2. Generally speaking, the power consumption at the level of sensitivity will grow as the number of poles of a relay is increased.
3. Likewise, as the number of poles increases, the speed of closure and release will become greater.
4. Unless the relay loads are purely resistive, arc suppression to protect the relay contacts is highly recommended. In all cases, the contacts in Adlake Dry Reed Relays are suitable for any relay coil winding in the same series, if proper arc suppression is used.

SELECTION FACTORS—DESIGN OPTIONS

In order to get the correct relay for your application — the relay that will give you the best performance—it is essential that certain information concerning the conditions under which the relay must perform be carefully considered. We, therefore, recommend that answers to the following questions be determined, and forwarded to us, with your inquiry or order for standard and/or special Adlake Dry Reed Relays.

1. Application
   - **a.** What is relay required to do?
   - **b.** Is application special in any way?
2. Contacts
   - **a.** How many contacts are needed in each relay?
   - **b.** What amount and type of load will contacts be required to switch or carry?
3. Coil
   - **a.** What is the nominal operating coil voltage?
   - **b.** What are the minimum and maximum voltages available?
   - **c.** Is sensitivity a problem? If so, what is the main consideration? Switching speed or power consumption?
4. General
   - **a.** What pin spacing is required?
   - **b.** Are there any other features needed?

Adlake engineers will be pleased to assist you in the proper application of reed devices to your requirements any time during the design phase. Your inquiry is invited.

THE ADAMS & WESTLAKE COMPANY A SUBSIDIARY OF ALLIED PRODUCTS CORPORATION

DRY REED RELAYS

MINIATURE SIZE
Series ARAM (Form A)
ARBM (Form B)
Max. Power Rating—
15 Watts — 25 VA

INTERMEDIATE SIZE
Series ARAI (Form A)
ARBI (Form B)
Max. Power Rating—
15 Watts — 25 VA

STANDARD SIZE
Series ARAS (Form A)
ARBS (Form B)
Max. Power Rating—
25 Watts — 40 VA

All series available with coils rated 6, 12, 24 or 48 Volts D.C. Form A relays available in 1, 2, 3 or 4 Pole configurations as standard items. Larger Number of Poles available upon request. Form B relays available in 1 or 2-pole configurations.
Request complete catalog for detail information.

COMPETITIVE!

Competitive is the word! Midtex/AEMCO is competitive in range of products . . . competitive in price . . . competitive in delivery dates . . . and competitive in design know-how. Get the sort of broad range support you need from a single source. We welcome the opportunity to compete "glove-to-nose" with any of the giants in the relay and timer business!

ELECTRICAL SPECIFICATIONS

CONTACT RATING — noninductive load
Light Duty (Code L): Fine silver goldplated — low level to 2 amps @ 26 VDC or 1 amp @ 115 VAC
Heavy Duty (Code H): Silver cadmium oxide — 5 amp @ 26 VDC or 3 amp @ 115 VAC (other contact material available)

LIFE EXPECTANCY
Mechanical Operations: 10^8 — Operation at Rated Load: 10^6

CONTACT RESISTANCE
50 milliohms max. initially — 200 milliohms at end of life

OPERATE TIME
at two times "must operate" voltage or current: ≤ 8ms

RELEASE TIME
at two times "must operate" voltage or current: ≤ 3ms

CONTACT BOUNCE
at 10 ma contact current:
2 ms max. at operate, N.O. contacts
3 ms max. at release, N.C. contacts

DIELECTRIC STRENGTH
1000 V rms; 500 V rms across contact gap

INSULATION RESISTANCE
1000 megohms minimum @ 25°C, 100 VDC, 50% RH

COIL TEMPERATURE
Max. 105°C (220°F)

AMBIENT TEMPERATURE
Operating: —55°C (—72°F) to 80°C (175°F) @ nominal operating voltage
Storage: —55°C (—72°F) to 105°C (220°F)

VIBRATION
Operating: .062 DA @ 5-55 Hz; 10g @ 55-110 Hz
Non Operating: 10g @ 5-500 Hz

SHOCK
Operating: 20g @ 11 ms
Non Operating: 30g @ 11 ms

WEIGHT
23 to 35 grams (approx. 1 oz.)

All values at 20°C (1) Inductance for closed armature. For open armature, divide by two. (2) Relay will pull in with less than "must operate" value.

HOW TO ORDER

1. select basic relay type from Table I
2. add coil code from Table II
3. add contact code from Table III

For Example: AZ 431 – 07 – 1L
Plug-in type
1000 ohm coil resistance
6 PDT contacts single, light duty

Ordering information for sockets and hardware—see next page. For free samples or assistance in specifying your relay, contact our office or your nearest engineering representative listed in the yellow section.

SERIES AZ 480 – GENERAL PURPOSE RELAYS – 10 AMP CONTACTS

- 10 Amp @ 115 VAC silver cadmium oxide contacts
- Up to 3 form C contacts
- DC or AC coils, also sensitive version
- 8 or 11 pin octal socket or PC terminals
- Dimensions over all: 2.65 x 1.45 x 1.38 (octal) 1.78 x 1.35 x 1.26 (PC term)
- Weight: 3 oz.

- 10 Amp @ 115 VAC silver cadmium oxide contacts
- Up to 4 form C contacts
- DC or AC coils
- Mounting with base plate, 6-32 stud or one 6-32 screw
- Solder or PC terminals
- Dimensions over all: 1.65 x 1.26 x .95 (up to 3 pole) 1.65 x 1.26 x 1.24 (4 pole)
- Weight: 2.3 oz.

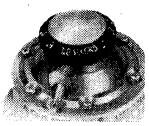
AGASTAT® timing instruments

NEW 2400 SERIES electropneumatic timing/relays

AGASTAT timing relays are electrically actuated, but pneumatically timed... they recirculate their own filtered air supply for long timing ranges, easy adjustment, instant recycling... no need for stable voltage supply for accurate timing... less temperature sensitivity.

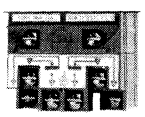
- Timing on Pull-in or Drop-out, or **both** in one unit.
- No power required during timing in Delay-on-Drop-Out models.
- All popular AC and DC operating voltages.
- DPDT switches, capacities to 20 amps.
- Field-replaceable coils and switchblocks.

Request Bulletin SR-2



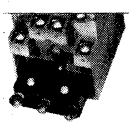
time-calibrated adjustment dials

eleven linear adjustment ranges provide delays from milliseconds to 60 minutes with direct-reading dial adjustment



front terminals

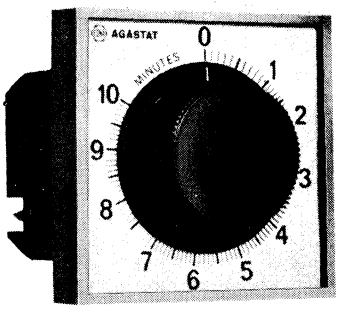
out-front accessibility with permanent identification, for easy wiring



auxiliary switch options

easily-added auxiliary switches handle extra circuits or provide two-step timing

new panelmount style



Including all features of upright model plus a modern dial plate and knob, with mechanism protected behind the panel; available in all twelve direct-reading dial ranges.

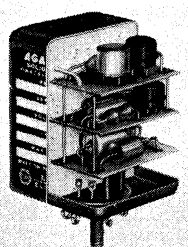
Request Bulletin SR-24

ELECTRONIC MODELS

R-C models: Full line of AC and DC units in a wide range of delay-on-energizing or de-energizing types. Static or relay outputs with adjustable or fixed timing and broad adjustment ranges.

- 18-32 vdc or 115 vac models.
- —55°C to 100°C ambients.
- timing from .01 to 300 sec. standard; higher ranges available.
- repeat accuracy to ±0.5%.

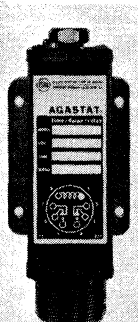
Bulletin SS-3



New Magnetic models: The inherent high accuracy of the magnetic core counter principle is applied for the first time to a new line of AGASTAT electronic timers featuring fewer components, lower power consumption and increased flexibility.

- timing period extended to hours, days, or years.
- repeat accuracy as high as ±0.25%.
- static or relay outputs, to 10 amps.
- —55°C to 85°C ambients.
- non-destruct memory feature available.
- easily adapted to multi-function capabilities.

Bulletin SS-4



MINIATURE PNEUMATIC t/d/r

Hermetically sealed or unsealed units for MIL-spec or other demanding applications where space is limited. Features operating principles of 2400 series; AC or DC operation, timing on pull-in or drop-out or both, DPDT switches.

- inherent transient protection, excellent recycling characteristics.
- adjustable timing to 3 minutes, capacities to 10 amps.
- timing-without-power capability.

Bulletin SM-2

PROGRAMMER AND STEPPING SWITCHES

Individual process steps controlled by high-accuracy time-calibrated dials. New design permits external control override at each step for greater flexibility and safety.

- adjustable during operation.
- exceptional accuracy—single solid state timer.
- unmatched flexibility—fast setup and program changes.
- also available without time control in advanced design stepping switch models.

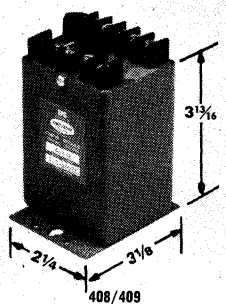
ELIZABETH, NEW JERSEY

ELECTRONIC TIMING DEVICES

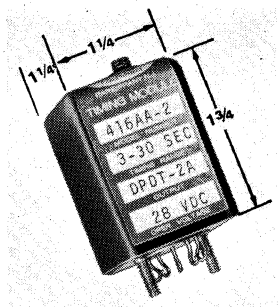
Artisan Electronics

5 EASTMANS ROAD, PARSIPPANY, NEW JERSEY 07054



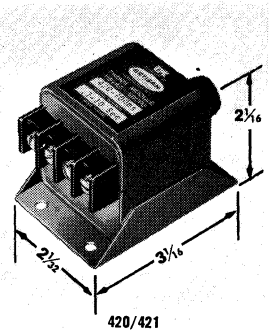
408/409

Industrial Time Delay Relays — adjustable, rugged and highly accurate — operating from 115 VAC as a delay on pull in (408) or a delay on drop out (409). Adjustable ranges of .025 to 2.5 seconds, 2.5 to 25 seconds, 10 to 100 and 20 to 300 seconds. Timing repeatability is ±1%. **Bulletin T 208.**



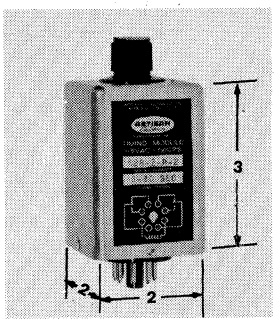
416/476

Universal military timing unit with an internal relay output (416) or solid state output (476). Both have various mounting configurations, adjustment capabilities (delay range of 30 milliseconds to 300 seconds) and are supported by an independent testing laboratory's detailed reliability report. **Bulletin T 206.**



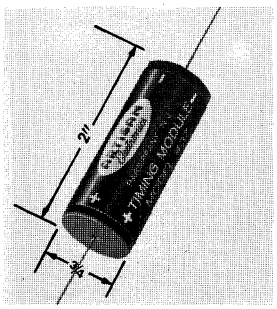
420/421

All solid state flasher/delay module. Adjustable unit capable of switching the full AC supply to the load as a 50% duty cycle flasher (420), or at the end of an adjusted delay period (421). **Bulletin T 205.**



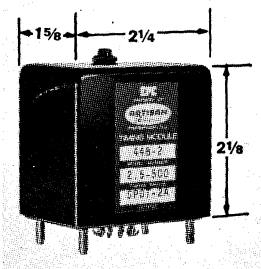
428

Industrial TDR, featuring the optimum in economy and flexibility. Various fixed or adjustable timing ranges and 2% repeat accuracy. **Bulletin T 204.**



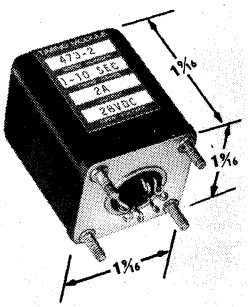
437

Miniature, fixed time delay (.025 to 300 sec.) with a full 2 amp solid state output, 3% repeatability, broad operating voltage in same unit and priced under $5.00 in quantity. **Bulletin T 211.**



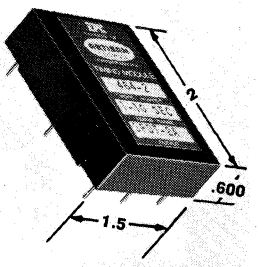
448

Adjustable time delays to 500 seconds, operating from 18 to 32 VDC, and capable of either a delay on pull in or a delay on drop out in the same application. **Bulletin T 209.**



473

Solid state flasher, 24 to 32 VDC, with capability of externally controlling both "ON" and "OFF" periods, and flashing under a no load condition. **Bulletin T 207.**



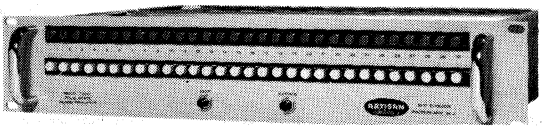
484

Summation timing module, which accumulates time until the input time is equal to a pre-set delay when its relay contacts transfer. **Bulletin T 203.**

CONTROL AND TERMINAL EQUIPMENT

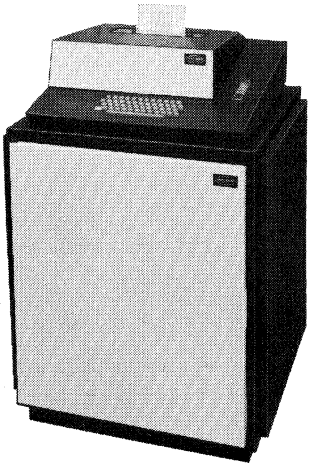
492 — Repeat and Predetermine Cycle Timer

Combines a repeat cycle timer (with adjustable "ON" and "OFF" time) and a predetermine counter for total cycles. Adjustable in 3 ranges from 0.1 sec. to 300 sec. through panel controls. Relay output, DPDT rated 10 amps; timing repeatability, ±1%; operating voltage, 105-130 VAC, 60 Hz, at 20 V.A. **Bulletin C 606.**



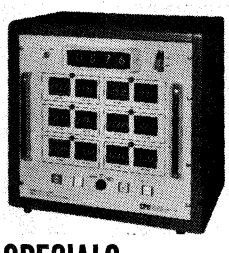
7007C — Annunciator

This 30-channel all solid state alarm indicator/annunciator is designed especially for detecting and isolating failures, abnormal conditions or malfunctions in a wide range of electronic and similar equipments. Features a completely wired chassis and a partial number of interchangeable modules for initial economy and future expansion. 40 watts maximum power required; operates from 115 VAC, with other voltages available. **Bulletin CC 603.**



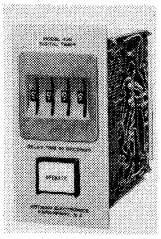
1270 — Event Recorder

A 250 channel event recorder, 29 column capacity, alpha numeric automatic print out plus date and time recording with each event. Application example in conjunction with supervisory control systems and single replacement of groups of pen recorders. Price $60 to $80 per channel. **Bulletin CC 609.**



10397 — Programmer

Used for the complete automatic control of processes, simulation, laboratory experiments or any equipment requiring flexibility in program changes. This unit independently or sequentially controls 6 different events from the start of a program to a maximum of 999.9 seconds. Each event may be preset by a 4-digit thumb wheel switch on the front panel for automatic turn-on and turn-off operation. Timing resolution, 0.1 second; operating voltage 105-130 VAC (60 cycles). Other available. **Bulletin CC 601.**



490 — Digital Timing Control

An advanced digital timing control permitting easy selection of any required time delay range from 0.1 sec. increments with extreme accuracies and at an economical price. This device is a completely solid state digital timing control capable of delay on pull in or delay on drop out through a SPDT relay with a 5 amp output, resistive at 115 VAC. Power required, 1 watt max; operating voltages 115 VAC. Many options available. **Bulletin CC 605.**

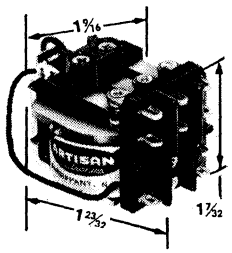
SPECIALS

The production of special devices to customer specifications is "state of the art" at Artisan and, in most cases, prices of custom models are no greater than those for stock items. **Bulletin T 210.**

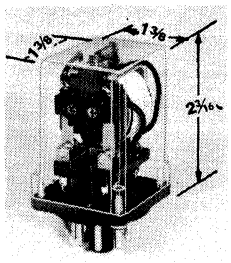
ELECTROMECHANICAL RELAYS

Artisan Electronics

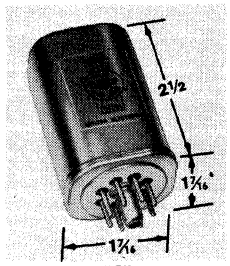
5 EASTMANS ROAD, PARSIPPANY, NEW JERSEY 07054



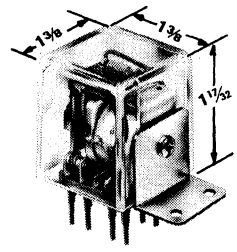
RE



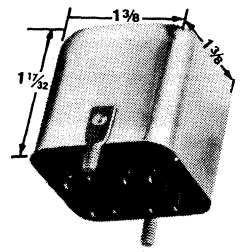
REP



REH

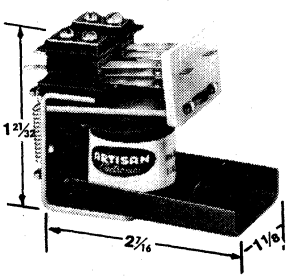


REKT

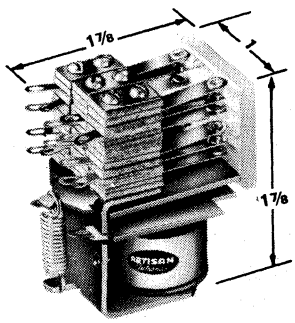


RED

General purpose relays designed for low cost, dependable switching of control circuits. Small, rugged, highly efficient with switching capacity to 10 amps and 3 PDT contact configuration. Available with hermetically sealed, plastic or metal plug enclosures; metal dust covers for chassis mounting; solder lug, quick disconnect and printed circuits board terminals and any coil voltage. **Bulletin R 301.**

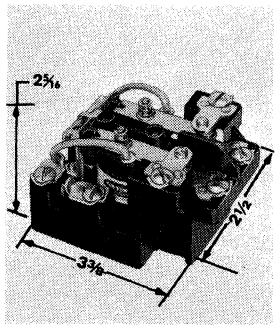


RH,



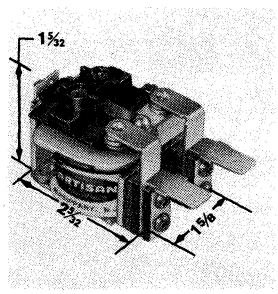
RHR

Specifically designed for maximum economy, these units are slightly larger and less sensitive than the RE Series, but feature 10 amp standard contacts (15 amperes available) and any combination of contact configurations through 9 PDT. This all-purpose component employs a nylon blade lifter that assures dependable operation. Also, metal and hermetically sealed enclosures and other quick disconnect (.110, .187 & .250) terminations are available. **Bulletin R 302.**



PJ

A power relay engineered for extra long life at loads of 25 amperes with DPST or DPDT contact configuration. Operates from any voltage to 240 volts AC or DC. 110 volts AC in Stock. **Bulletin R 304.**



RB

This single pole, single throw, normally closed double break (Form Y) is a compact, economical unit rated at 30 amperes at 30 VDC or 115 VAC and is specifically designed for emergency lighting use. Available with dust-proof enclosure. Coil voltages to 110 VDC or 240 VAC. **Bulletin R 306.**

LATCHING (REL, RHL, RELM)

Mechanical latching relays mounted on a common plate. Either relay when momentarily energized is mechanically held by the other. Used for ON-OFF switching, power reversal and similar applications with either identical or different voltages for each coil. Model REL (open) and Model RELM (enclosed plug in) are capable of up to 3PDT contacts on each relay. Model RHL is capable of up to 6PDT on one relay associated with a plain latching coil. **Bulletin R 303.**

SENSITIVE (RS, PE)

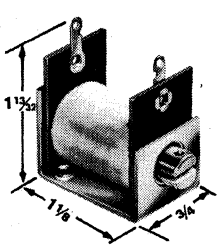
Model RS, a sensitive, economical relay, offers 60 milliwatts per pole (1, 2 or 3 Form "C" available) as standard and to 25 mw/pole special. Model PE (plate circuit unit similar to RE at top) offers 125 mw/pole standard and to 90 special. **Bulletin R 305.**

ACTUATORS (RC, RM)

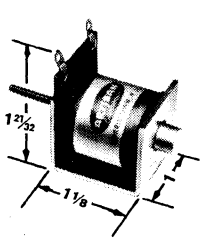
Actuators, coil and armature assembly of RE and RH respectively, offering life of 5 million operations at forces of 2 to 5 ounces on RC and 4 to 20 ounces on RM at a stroke of .080" depending on duty cycle and AC or DC operation. Coil voltages to 110 VDC or 240 VAC. Higher forces at shorter strokes; solder lugs or quick disconnect termina!s available. **Bulletin A 501.**

SOLENOIDS

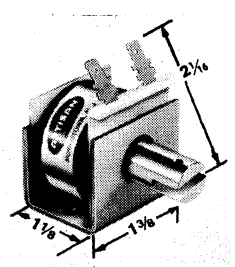
Light weight, compact solenoids utilize the economical U frame design for both continuous and intermittent duty. They are ideal for AC (to 220V) and DC (to 110V) applications in automatic equipment requiring up to twenty pounds force, such as vending machines, recording equipment and business machines. Can be furnished for high temperature ambients and in a wide range of plunger styles. Suffix A denotes pull type, G, push type. **Bulletin S 401.**



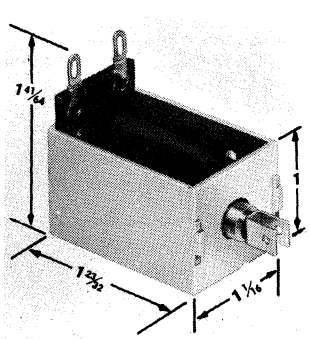
DSA, DSG



BRA, BRG



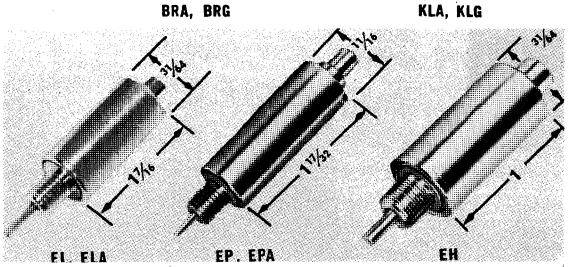
KLA, KLG



FA

Box frame solenoid specifically designed for efficient DC operation up to 110 volts. Actuator forces from 7 ounces at 3/4" stroke to 125 ounces seated. Intermittent and continuous duty forces proportionally less. **Bulletin S 403.**

Cylindrical solenoids offering close spacing and extra long life for both continuous and intermittent duty, these miniature solenoids are used where size and forces required are less than 50 ounces. Their applications include data processing equipment, such as tape-fed automatic operation of business machines, pen-lifting duties on chart recorders and flag-raising on instrument panels for warning purposes. Operation to 125 VDC. Available with threaded bushing or "C" ring mounting. **Bulletin S 402.**



EL, ELA **EP, EPA** **EH**

BABCOCK RELAYS

Unequalled for accurate, dependable performance under widely varying load and environmental conditions, Babcock hermetically sealed relays are ideally suited for continuous-duty airborne and ground system applications.

All relays in the Babcock line meet or exceed MIL-R-5757D and applicable sections of related military specifications. For complete assurance of reliable performance in critical applications, each relay series undergoes extensive life testing under a separate reliability program. First of its type in the relay industry, the Babcock program furnishes failure rate data guaranteeing miss-free operation within the critical parameters of missile usage.

DESIGN FEATURES

High-Flux Magnetic Design: High sensitivity with minimum coil power • Constant force across gap • High contact pressure.

Contaminant-Free Operation: High-reliability series available with all-welded construction and activated porous glass getters.

Hermetically Sealed Construction: Dry filled with 90% nitrogen, 10% helium, and leak tested to 10^{-8}cc /sec.

Universal Contacts: Exclusive Babcock "universal contacts" permit relay operation from dry circuit to rated load with the same contact set.

Vibration and Shock Immunity: Balanced armature and low-inertia components.

Coil temperature rise per watt of power dissipation	15°C	20°C	40°C	40°C

*The permanent magnets are adjusted so that the relay will release (open its front contact) when the current through its coil is reduced to less than the 'must release' value.

**The permanent magnets are adjusted to hold the armature in the position to which it was last operated until sufficient current of opposite polarity is applied.

***Special Order

BABCOCK RELAYS • A DIVISION OF BABCOCK ELECTRONICS CORPORATION

3501 HARBOR BLVD., COSTA MESA, CALIF. • 540-1234

General Purpose And Medium Power Relays

The quality control and value engineering behind Eagle relays are your assurance of reliability and maximum life expectancy. Their operating characteristics exceed those of other relays in their class. Many options are available in contact materials, ratings, coils, and electrical characteristics within the economical area of standard, catalog items. In addition, Eagle can fulfill special requirements. Besides standard slotted solder lug terminals, printed circuit and 3/16" disconnect terminals are available. Contacts on the general purpose and medium power relays are silver cadmium oxide; all 5 Amp and 10 Amp contacts are gold flashed. Dust covers and hermetic sealing are available for all units. Write for your copy of complete, new 16-page, color relay catalog.

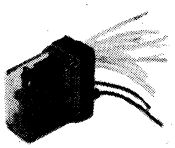
Automatic Controls INDUSTRIAL RELAYS

ADVANCED DESIGN, FOUR POLE DOUBLE THROW CONTACT WITH FULL 10 AMP CAPACITY . . . REQUIRES ⅓ LESS VOLUME, 20% LESS MOUNTING SPACE



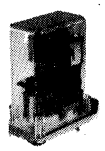
TYPE 811
GENERAL PURPOSE

This precisely engineered relay offers you the advantage of a four pole, double throw contact arrangement with full 10 ampere capacity in a dust type enclosure,

Quick disconnect terminals, .110 inches, are standard and a mating socket is also available for plug-in applications.

A manual operator mounted in the cover is an optional feature for those interested in trouble shooting circuits by means of contact closure. A pilot light can be supplied to indicate power to the relay coil.

Adequate spacing: ⅛ inch through air and ¼ inch over the surface is provided to meet all UL and CSA requirements for 150 volt applications. (UL listed. File No. E 43328).



TYPE 815
MECHANICAL LATCH RELAY

Another unique relay development from Cook Electric, combining maximum efficiency with new economy PLUS . . . the new mechanical latch system which provides a continual locked-in power source without constant control power.

No overlap of contacts . . . all contacts actuated by single armature; Lexan latch pawl gives 20 million operations minimum; Both operate and reset coils have separate termination for ease of circuit design; Mounting through chassis cut out, brackets or socket; Quick connect terminals are standard; Four pole, double throw contact with full 10 ampere capacity.

The most practical applications for the mechanical latch relay are as a memory device to monitor circuit functions, and as a process control device applied to a sequence of events.

TYPE 818
ADJUSTABLE TIME DELAY

The addition of a solid state timing module into the widely acclaimed Cook Electric 811 relay package yields an outstanding time delay relay—Type 818—to round out a distinguished family of industrial, dust-cover, plug-in relays.

Cook Electric's new adjustable time delay relay comes in three timing ranges, to meet your specific applications.

Timing Range	Adjustment (Part Nos.) Knob	Scw'driver
0.2 — 2.2 seconds	818-0001	818-0006
2.0 — 22.0 seconds	818-0002	818-0007
20.0 — 200.0 seconds	818-0003	818-0008

These units have built-in transient protection which are good for 1000 volt AC peak for a duration of ½ cycle (60 CPS), and a mechanical life of 20 million operations at no load.

COIL DATA Coil Current — 10MA during timing
45MA after timing

Repeat Accuracy ±3%

SPECIFICATIONS

CONTACT ARRANGEMENT
4 Pole double throw
CONTACT RATING
10 Amp @ 120 VAC Resistive
CONTACT MATERIAL
Silver cadmium oxide
COILS
Available for 6, 12, 24, 48 and 120V 60 Hz or DC (240 VAC - 811 only)
Type 818 - 115 VAC only
Epoxy encapsulated

COIL POWER
811
3.3 VA AC - 1.5 watts D.C.
815
3 VA AC - 1.5 watts D.C.-Operate
5 VA AC - 2.3 watts D.C.-Release
OPERATING VOLTAGE
Both AC and DC coils will withstand 110% rated voltage continuously. AC picks up 85% of nominal or less. DC picks up 80% of nominal or less
OPERATE & RELEASE TIME
15 milli-seconds nominal

LIFE
Mechanical—20,000,000 operations
Electrical —500,000 at 10 amps, 120V AC resistive
ENCLOSURE
Clear polycarbonate dust cover
AMBIENT
—20°C to 60°C
DIELECTRIC
1500V RMS
SIZE
Overall—Approximately 1⅜"x2⅞"x 2⅛" (Depending on model)

WEIGHT
811 5 oz. **815** 6.5 oz. **818** 7.5 oz.
MOUNTING
Plug-in or panel

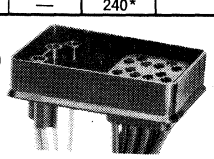
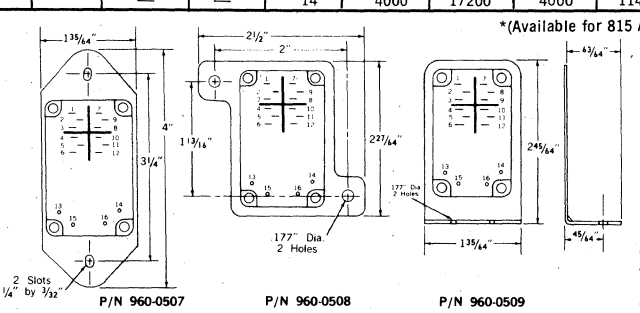
*(Available for 815 AC only).

960-0500



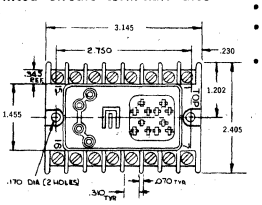
SOCKET
The molded self-extinguishing nylon socket is easily attached to a mounting bar or a panel cut-out. Two #8 screws are used for mounting in either case. Pre-terminated wires are brought to the socket and easily inserted into the housing. These may be easily removed with a simple tool if a wiring change is required, either during assembly or in the field. The relay is inserted or removed without disturbing the wiring.

The relay is engaged by the walls of the housing, making the relay secure—no chance for it to "wobble" out due to normal vibration. No extra clamping devices are required.



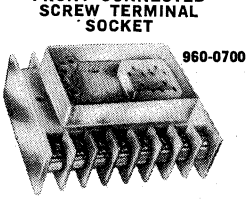
P/N 960-0507 P/N 960-0508 P/N 960-0509

MOUNTING
The 811 relay may be mounted directly to the panel by either a mounting bracket or socket. Wire wrap, termi point and printed circuit terminals also available.



FRONT CONNECTED SCREW TERMINAL SOCKET

960-0700



FEATURES
- Nylon Construction (prevents breakage)
- Captive Pressure Plates
- Wiring without removal of Relay
- All wiring remains on one plane
- Continuous end-to-end mounting
- Accommodates up to two #14 wires per terminal
- One socket accommodates a whole family of Automatic Controls Relays

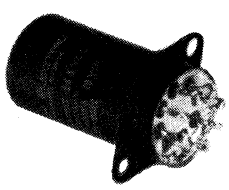
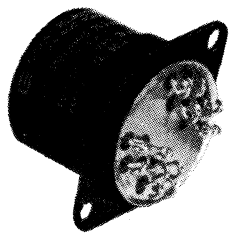
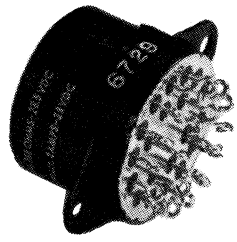
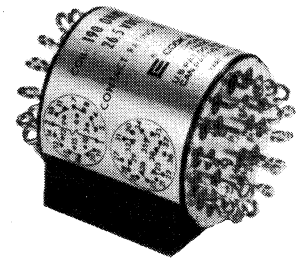
MICROPOISE INDUSTRIAL RELAYS — TELEPHONE & MILITARY TYPE RELAYS









The Micropoise line of relays brings you the ultimate in packaging density, contact reliability and minimum coil power requirements. Available in two, four, six and twelve pole double throw configurations, the Micropoise line offers the design engineer the right relay for any application demanding adherence to MIL-R-5757.

A simple efficient solenoid motion actuates the armature without rotating parts, fragile glass bead insulators or overstressed spring members. Direct linear contact motion makes wider contact gaps and more wipe possible.

Coils are hermetically sealed from all other parts of the relay where intermediate current and low level current requirements exist.

Standard contact material is palladium for general purpose 2 ampere switching circuit applications. For intermediate current through full load (2 ampere @ 28VDC) a contact material of palladium with a gold alloy overlay is standard. Gold alloy (68% Au/26% Ag/6% Pt) contacts are used for dry circuit conditions.

For nominal coil voltage of 26.5VDC all relays are adjusted to pick-up at 14VDC maximum at 20°C, assuring operation within specifications at —65°C and 125°C. By standardizing on these five basic types, all with three distinct contact ratings, it is possible to offer shorter lead times and lower costs. All relays are available with other coil ratings, mounting methods and plug-in configurations.

MOUNTINGS

Various types of mounting arrangements can be adapted to any of the Micropoise relays. Send us your requirements and a prompt quotation will be forwarded to you.

MERCURY-WETTED CONTACT RELAYS

Input analog switching, output power conversion switching, solid state input and output buffering.

- Life: 22 x 10^9 operations.
- Low, constant contact resistance.
- No contact bounce.
- Switching speeds as fast as 1 millisecond.
- Versatile contact load capabilities . . . low level to 250 va.
- High power gain . . . up to 5,000 with no noise sensitivity.
- Wide range of sensitivities: 2.0 mw to 550 mw.

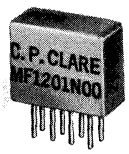
CLARE MILITARY-TYPE (CRYSTAL CAN) RELAYS

Aerospace and ground support equipment, communications, instrumentation, data processing, industrial process control

- Long electrical and mechanical life, under extreme conditions of temperature, shock, vibration, linear acceleration.
- Sensitivities from 40 mw.
- Wide variety of mounting styles.
- Wide range of relay types in addition to those listed.
- Versatile contact capabilities — low level to 10 amp. Gold-plated contact areas, high contact pressures, positive wiping action.



Type MF
L — .500″
W — .230″
H — .400″

TYPE TF TRANSISTOR CASE RELAY — MILITARY OR INDUSTRIAL

- Low level to 1 amp. contact rating.
- 2.0 ms max. operate time.
- 80 g ½ sinewave shock, 11 ±1 ms.
- 30 g to 3000 cps vibration.
- Hermetically sealed welded enclosure.
- 100,000 min. operations at 28 vdc lamp. resistive load.
- Temperature ranges:
  Military: −65°C to +125°C
  Industrial: −55°C to +75°C

Type TF Relays combine the advantages of electromechanical performance (immunity to transients, input-output isolation, positive on-off switching, etc.) with assembly and handling techniques for pcb mounting with transistors and other solid state devices. For complete information, call your Clare sales engineer.

CLAREED® SEALED-CONTACT REED RELAYS

Industrial control, data logging and instrumentation, communication switching, ground control and check-out systems.

- Inherent reliability with no maintenance (contacts sealed in glass).
- Switching speeds in low millisecond range.
- Immunity to transient electrical noise.
- Contact load versatility... low level to 50 va.
- Life: 20 x 10^6 or 100 x 10^6 at full rated load depending on choice of switches.
- One to twelve contacts.
- Packaging for pcb or wired chassis... or as functional pcb assemblies.

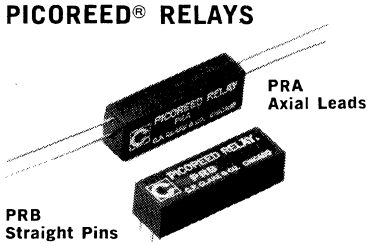
CLARE MINIATURE SEALED-CONTACT REED RELAYS

Applications, General Characteristics, Life: See Facing Page

PICOREED® RELAYS

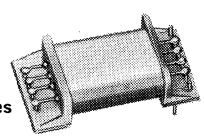


PRA
Axial Leads

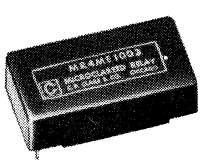
PRB
Straight Pins

High-speed subminiature glass-encapsulated reed relays in molded epoxy modules. Response time, size sensitivity and reliability characteristics provide complete electrical and packaging compatibility with IC solid-state devices. Economical reliable solid-state input-output isolation buffering. Load capability: low level to 10 va. Module sizes:
L — .781"; W — .250"; H — .187"

MICROCLAREED® RELAYS



MRMC
Open-type modules



MRME
Molded Epoxy

(Similar metal-covered relays also available with and without polyurethane fill)

All the advantages of Clareed Relays in one-fifth the size. Switching speeds as low as 500 microseconds — fully compatible with other process-control equipment. Immune to false operation by transients — insensitive to overload transients which would damage solid-state devices. Load capability: low level to 10 va. Sizes:

	MRMC Relays	MRME Relays	MRMD, MRMF
L	1 15/64"	1 19/64"	1.266"

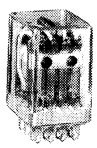
CLARE GENERAL PURPOSE RELAYS

Series GP1 - 4PDT, 3 AMP, AC or DC

- 1/10 hp, 250 VAC contact rating.
- Opposite polarity design.
- Choice of six contact types: Gold flashed silver button, silver cadmium oxide button, palladium button, gold alloy button, palladium crossbar, gold alloy crossbar.
- Designed for U/L recognition.
- Interchangeable with existing relays.
- Competitively priced.
- Delivery off-the-shelf in 132 models listed — fast delivery on customized variations.



CLARE GP1 GENERAL PURPOSE RELAY

The new general purpose relay from Clare, 30-year-leader in relays and related control components.

Typical applications: Appliances, vending machines, business machines, industrial control systems, communications, instrumentation, peripheral EDP equipment.

Height: 1.281″
Width: 1.109″
Depth: .859″

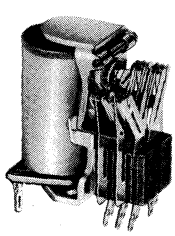
Relays listed above are stock items with same polarity rating and solder lug/plug in terminals. Stock relays with opposite polarity rating may be ordered by changing "R" to "Q". 3/16″ pcb terminals may be ordered by changing the second digit after the letter "R" from "1" to "2". For taper tabs, change this digit to "3".

TELEPHONE-TYPE RELAYS

Industrial, commercial and military ground systems where cost and life are important considerations.

- Long Life: up to 50 x 10^6 operations.
- Variety of enclosures and contact materials.
- Variety of terminals... pcb, direct plug-in, solder, taper tab.
- Highly reliable contacts, with independent twin contact surfaces.
- Stable, adjustment-free operation.
- Consistently reliable performance at low cost.

TYPE J



TERMINALS: Solder tabs — slotted.

MOUNTING: Two #6-32 NC tapped holes in relay heelpiece; mounting hardware included in relay price.

For detail characteristics see Manual 501.

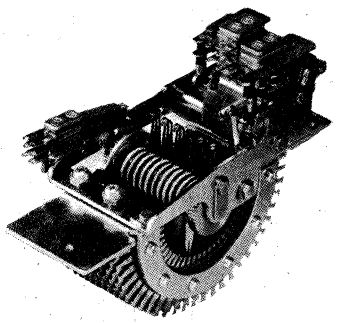
STEPPING SWITCHES

Mass sequential switching — counting, totalizing, scanning, sequence control, circuit monitoring.

- Low cost scanning and counting.
- Maximum switching density.
- Special purpose shorting switches . . . "All But One," "Progressive," "Alternate" operations.
- Long service life and low maintenance.
- Special high voltages are availale.
- Special modifications and functional assemblies for handling complex sequential switching operations.

For detail characteristics see Manual 601.



CONTACT RATINGS:

Bank and Wiper — Switch 100 ma, 30 vdc resistive . . . Carry 3 amps . . . Interrupter and Off-Normal — 2 amps, 150 watts.

QUICK-MOUNT MODELS AVAILABLE

Fast unit-for-unit replacement — no resoldering — minimum downtime. See Data Sheet 651-3A

PRICES COILS ONLY

Prices for larger quantities upon request

PRICES are for coils with 3" lead. Add $3.00/C for P/C Pin Termination.

TO ORDER: Specify coil type by LETTER plus VOLTAGE desired for flexible leads (example SF-12, UV-32). For printed circuit pins add suffix P (example: SD-12-P, T-6-P).

NOTE: We do not catalog complete relays, due to the extensive variety of switches and coils available. Write for relay prices.

THE JR MULTIPOLE ROTARY SWITCH

The JR Switch is manufactured in accordance with MIL-S-21604 (Ships). It features contact ratings of 10A at 125VAC and 5A at 125VDC. Switches can be assembled with any number of sections up to 25 and can contain any combination of rotor types.

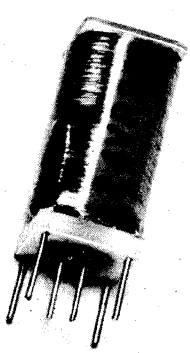
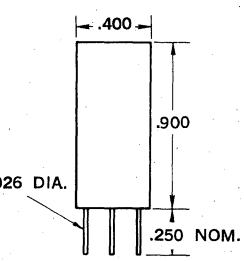
CONTACT RESISTANCE: 35 milliohms max.

VertiReed RELAYS

SERIES VR

Series VR Reed Relays are designed for applications where printed circuit board area is severely limited. The use of open bobbins provides protection for the reed switches and a rugged mounting support for the printed circuit terminals as well as low cost construction. For additional protection the coil leads and top switch leads are enclosed by the coil wrapper. The relays listed on the reverse side are standard. Other coil voltages, resistances and power requirements are produced on a special basis. Adaptations using small mercury wetted reed relays may also be obtained with a slight increase in height. As is the case with all DORANIC Relays, latching versions are also produced to operate on momentary pulses, and both electromagnetic and electrostatic shielding may be included on request.





CONTACT RATING:
FORM A & B UNITS: 10W or 120VA (.500A or 250V max.).
FORM C UNIT: 3W or V3A (.250A or 28VDC max.).

CONTACT RESISTANCE:
FORM A & B UNITS: .150 ohms max. initial.
FORM C UNIT: .200 ohms max. initial.

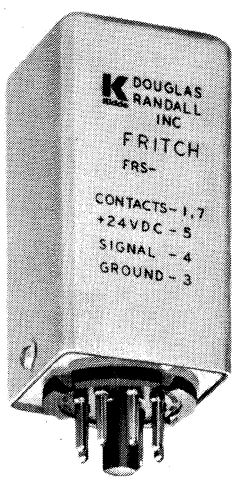
FRITCH: Frequency Responsive Switch Offers these Features

Douglas Randall, Inc., *FRITCH* combines solid state circuitry with reliable reed relay outputs into a component capable of responding to any selected frequency from 25Hz to 100KHz at speeds as fast as 75 operations per second. Bandwidth is ± 2% to ± 5% depending on signal voltage and temperature control. Typical operation is from a 5VRMS ± 10% signal, over a temperature range of −40°C to +65°C using a power supply of 24VDC with only 2MA standby and 25ma operating current.

The ability of the FRITCH to function accurately with a relatively uncontrolled signal level and to provide complete isolation of output signal from input signal in addition to the features listed above, make it excellent for telemetry, touch tone decoding, remote selection of several command functions over one pair of lines, central station signaling and many other applications.

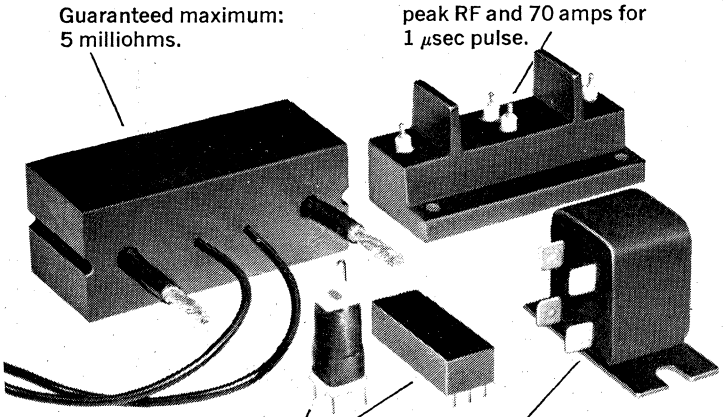


- **Broad Frequency Range—25Hz to 100KHz**
- **Low Signal Power—Only Imw**
- **Fast Response—As low as 5ms**
- **Shock & Vibration Resistant**
- **Plug-in or P. C. Mounting—in any position**

Assemblies are available to decode all touch tone frequency signals or any combination of frequencies between 25Hz and 100KHz. Units can be provided to fit existing hardware. Sensitive versions can be supplied which will respond to signals as low as 0.020 volts.

ULTRA-LOW CONTACT RESISTANCE
Guaranteed maximum: 5 milliohms.

HIGH VOLTAGE
Will break 15,000 volts peak RF and 70 amps for 1 μsec pulse.



VERTICAL MOUNT AND LOW PROFILE
For use where available space is limited. Low profile relay shown is .315" high. Vertical mount relay fits into .4" square.

SPECIAL MOUNTING
An example of one configuration designed to meet special mounting and terminal requirements.

SPECIAL REED RELAYS

In addition to standard relays Douglas-Randall, Inc. has developed many special versions to meet unusual size, terminal layout and electrical requirements. Special molding techniques make this possible without expensive tooling. Douglas Randall also makes special assemblies of reed switches, either molded or mounted on P.C. boards.

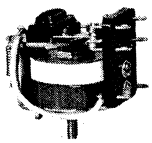
DELTROL CONTROLS

Manufacturers of: RELAYS, SOLENOIDS and TIMERS

RELAYS

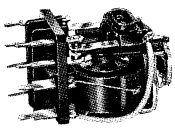
25 Series

Miniature cradle-type relay. Contacts; gold bonded fine silver, standard; other material available on request. Terminals: gold plated, pierced solder type. Mounting: four No. 3-48 holes on .375" x .375" centers. Includes snap-on dust cover.



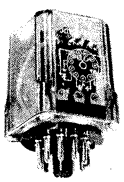
100 Series

Low cost, general purpose relay, designed for long, trouble-free life. Armature stop. 1/8" dia., silver cadmium oxide, gold flashed contacts, 5 amp. 3/16" dia., silver cadmium oxide, gold flashed contacts, 10 amp. Mounting: 6-32 mounting stud and self-locking locator tab.



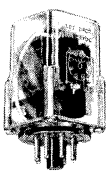
100UP/101UP Series

Printed circuit, mounted relay with phenolic insulating barriers. Contact Ratings: 5 amp. 1/8" dia. Silver Cadmium Oxide contacts, gold-flashed. 10 amp. 3/16" dia. Silver Cadmium Oxide contact, gold-flashed. Relay provided with armature stop to maintain adjusted characteristics through life of relay. Conforms to UL requirements.



105 Series

General purpose plug-in relay. Clear butyrate dust cover. With built-in bulb indicator. Bulb is in parallel with the relay coil and indicates voltage or current available in power circuit. 3/16" dia., silver cadmium oxide contacts, gold-flashed, 10 amp. Mountings: Standard 8 and 11 pin plugs.

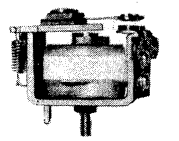


106/107 Series

Series 100U/101U not in plug-in series. Greater spacings provide the optimum in plug-in relays. 106 – 5 amp contacts; 107 – 10 amp contacts.

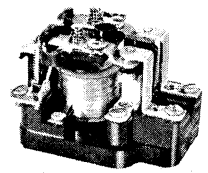
105ML Series

General purpose magnetic latching plug-in relay with positive snap-action magnetic latch. Up to 5PDT with 5 or 10 amp rating. Height of relay up to three poles: 3-3/16"; four and five poles: 3-19/32". Dust-tight clear cover is standard.



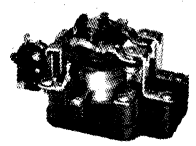
120 Series

Rugged, small size, medium duty power relay. Available as SPDT or SPST-NO-DM contact configuration. 1/4" dia., silver cadmium, gold-flashed contacts, rated 15 amp SPDT, 10 amp DM configuration. Terminals: combination .250 quick connect and solder hold.



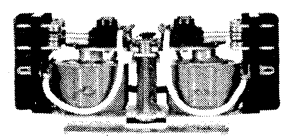
900 Series

Power relay. Long life, rugged construction. UL File No. 37066 CSA File No. 20690. Dust cover.



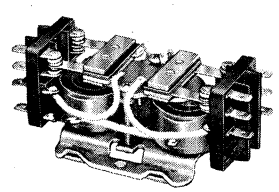
900-1C Series

Power relay with snap-action 10 amp, 1/3 H.P., SPDT auxilliary switch. Screw terminals are standard.



100ML/101ML

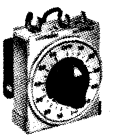
General purpose magnetic latching relay. Positive magnetic latch. UL approved. Up to 6PDT, 5 or 10 amp, contact rating. Standard solder or 3/16" quick-connect terminals.



140ML Series

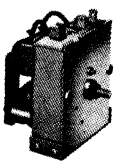
General purpose magnetic latching relay with 15 amp rating. Relay has Deltrol positive snap-action magnetic latch. Terminals accept 3/16" quick-connect terminals or soldered connections.

TIMERS



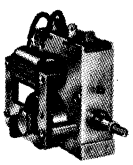
Model 116-D1

This interval timer switches contacts 1-4 OFF and contacts 1-3 ON at the beginning of each preset timed interval. At the end of the preset timed interval, contacts 1-4 switch to ON and contacts 1-3 switch to OFF.



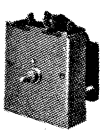
Model 159-D

This interval timer switches contacts 1-4 to OFF and contacts 1-3 to ON at the beginning of each preset timed interval. At the end of each preset timed interval, contacts 1-3 switch to OFF and contacts 1-4 switch to ON. Near end of each preset timed interval, buzzer will sound for a short period, then shut off.



Model 110

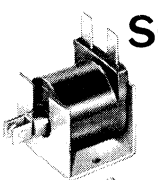
This pushbutton timer starts by manually depressing push button. Pushing button closes timer switch contacts 1-3, energizing timer load and timer motor. Upon completion of fixed time interval, contacts 1-3 open, shutting off timer load and timer motor.



Model 135-D1

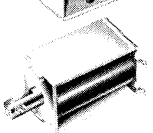
This repeat cycle timer switches contacts 1-4 OFF and 1-3 ON for a fixed time duration during each timing cycle. Timer will continue to repeat the preselected time cycle as long as power is applied.

SOLENOIDS



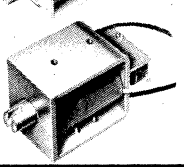
Type C-8

Low cost, low and medium power solenoids designed especially for volume applications where low cost is essential.



Type D-17

Designed for low and medium power applications. Constructed to provide maximum useful life and efficiency.



Type PS-65

Designed for high power applications. This high power is derived by incorporating coils having two windings: a high-surge current pull-in winding that starts the solenoid plunger in motion, and a low-drain winding for holding the plunger in a seated position. The windings are switched automatically by the motion of the plunger. Rated for continuous duty.

*All characteristics are nominal and subject to normal manufacturing tolerances, other voltages available on special order.
**115 VAC units are made with a full wave bridge rectifier and use the same coils as listed under 110 VDC units.
***Four-wafer relays with all "A" form contacts use three-wafer relay coils.
NOTE 1: ONE WAFER RELAYS USE A SHORTER ACTUATOR ASS'Y. — INSTEAD OF 2-1/32 AS SHOWN. THE ACTUATOR IS 1-15/32 HIGH.

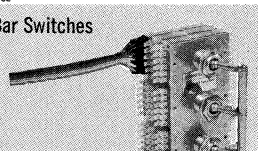
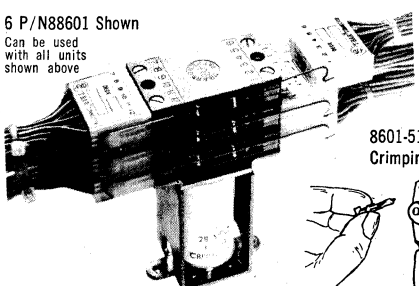
Ganged T-Bar Switches



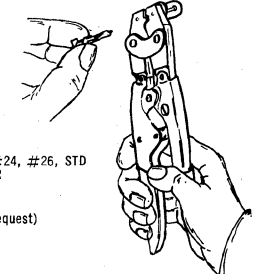
Toggles may be ganged for controlling additional circuits . . . 48, 72, 108, etc. Shown here, 108 poles.

T-BAR Connectors save time and reduce installation costs using individual snap-in crimp terminals crimped to pre-stripped wire and then snapped into a contact block, which forms the connector. The connector is pushed onto the wafer terminals, eliminating soldering. Because we offer a connector, rather than a receptacle, harness work can be completed outside the chassis and therefore no fancy chassis work is required to accept a receptacle. It not only makes the metal work simpler, but it also saves layout engineering and drafting time. Since T-Bar Switch/Relays are so easily mounted, they are often found on the back of meter panels or on their own brackets.

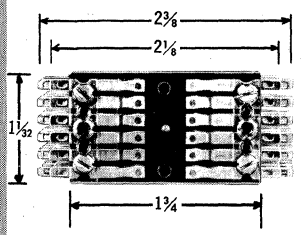
6 P/N88601 Shown
Can be used with all units shown above



8601-51 Crimping Tool



PHYSICAL PROPERTIES:
Wire Accommodated: (1) #18, #20, #22, #24, #26, STD (2) #22, #24, #26 STR
Connector Material: Nylon Zytel or Lexan®
Snap-in Contact Material: Phosphor Bronze
Snap-in Contact Finish: Tin Plated (other on request)
Retaining Clip Material: Stainless Steel
Connector Weight: Approximately 0.3 oz.



GENERAL FEATURES:

The series 801 T-Bar Relays are solenoid actuated multi-pole relays with a unique design permitting stack-up of enclosed contact "wafers." Each wafer has a maximum of 12 pole double throw contacts thereby allowing ECI to supply the 801 relay with any combination from 4 to 60 poles.

CONTACT RATING:
3 amp, resistive load 150 watt maximum make or break;
5 amp, 500 watt maximum carry.

CONTACT MATERIAL:
Gold bonded, fine silver. standard. Others available on special order.

CONTACT FORMS:
"A" single throw N.O.
"B" single throw N.C.
"C" double throw, break before make
"D" double throw, make before break

NUMBER OF POLES (RELAYS):
One Wafer — 12 poles
Two Wafers — 24 poles
Three Wafers — 36 poles
Four Wafers — 48 poles
Five Wafers — 60 poles ("A" form only)

OPERATE VOLTAGE:
Min. voltage: 80% of nominal at 25°C

RELEASE VOLTAGE:
Max. voltage: 20% of nominal at 25°C

OPERATE TIME:
One Wafer Relay — 15 ms. max.
Two Wafer Relay — 25 ms. max.
Three Wafer Relay — 30 ms. max.
Four Wafer Relay — 35 ms. max.
Five Wafer Relay — 40 ms. max.

RELEASE TIME:
5 ms. max. (36 pole) — 10 ms. max. (12 pole)

TERMINALS:
Solder tab that also mates with T-Bar connector P/N 88601 (two required per wafer)

ENCLOSURE:
Contacts enclosed in dust tight plastic enclosure that is separated from the actuator assembly. Withstands Mil. Std. — 202 method 106B moisture resistance test.

LIFE:
Mechanical — 20,000,000 operations minimum for relay
Electrical — 20,000,000 operations minimum at 100 milliamps to 100,000 minimum at 5 amps, 150 watts resistive load.

DIELECTRIC:
1000 vrms terminals to case at sea level and 25°C
1000 vrms terminal to terminal at sea level and 25°C
1000 vrms coil to case at sea level and 25°C

TEMPERATURE RANGE:
—55°C to +85°C

INSULATION RESISTANCE:
5,000 megohms @ 25°C minimum

ORDERING INFORMATION:
Specify Series No. — number of poles plus contact form letter-coil voltage. For example a 36 pole double throw relay with a 24 VDC coil is: 801-36C-24

MANUFACTURED BY:

electronic controls, inc.

T-Bar Switch/Relay Div. •
Danbury Road, Wilton, Conn. • (203) 762-8351

Manufactured under 1 or more of the following patents: 3,206,990, 3,226,508

® "T-Bar" — Reg. T.M.

Pin and Hook Terminals

Mounting Arrangements — All Relays come with plain, side bracket, side studs and flanges. All relays meet or exceed the requirements of MIL-R-5757D. **Vibration** — up to 30 G's and 3000 CPS. **Life** — 100,000 minimum up to 5,000,000 on some series at dry circuit. **Coil Resistance** — 10 to 12,000 DC OHMS at +25°C. Additional information is available in ES switching components catalog.

* Magnet coils designed for continuous duty. Do not operate at rate higher than indicated under Mechanical Life.

** Based on steady state test under laboratory environmental conditions. Consult factory if application involves unusual load, speed of operation, off-on ratio, environmental or operating conditions. Electric life substantially greater when operated below rated load.

† Load tests — making inrush ratings (0.4 to 0.5 P.F.) — breaking 125% continuous rating (0.65 to 0.8 P.F.).

• Cross-bar contacts.

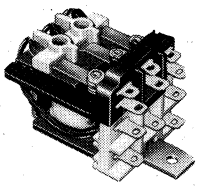
A.C.-D.C. GENERAL PURPOSE RELAYS

TYPE 93

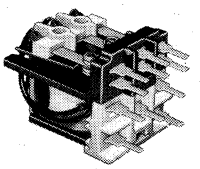


Solder Terminals
(Fig. 1a)

Solder terminal type has combined front, single hole screw and stud mounting, screw and stud included. All terminals out front. One piece molded bobbin and terminal board construction. Highly resistant to arc tracking. Printed circuit type may be controlled by SCR if firing angle, is no more than 10 degrees.*

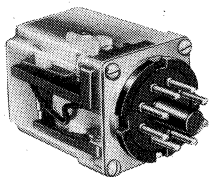
Size: 1 15/16" x 1 5/16" x 1 5/16" U.L. and C.S.A.

TYPE 93



Printed Circuit
(Fig. 1b)

TYPE 93P

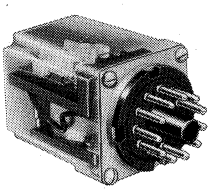


8 Pin Plug-In
(Fig. 2)

8 pin octal base for single and two pole. 11 pin base for three pole. High impact case. Standard pin connections.

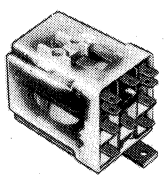
Size: 2 1/8" x 1 7/16" x 1 9/16". U.L. and C.S.A.

TYPE 93P



11 Pin Plug-In
(Fig. 2)

TYPE 93Q

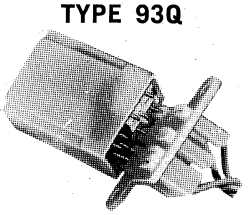


Quick Connect
(Fig. 3)

Enclosed quick connect type designed for front mounting or polarized socket mounting. For socket mounting use 93-153-1 socket kit. Front mounting relay has .20 x .187 terminals. High impact case.

Size: 2 1/8" x 1 7/16" x 1 9/16". U.L. and C.S.A.

TYPE 93Q



Relay Receptacle
93-153-1

ENGINEERING DESIGN DATA ON PAGE 2226 • NET PRICES ON PAGE 2227

Until now, designing with mercury relays meant taking the good with the bad. The trade-off for long life, high-speed closure and no contact bounce has been a bulky package (about ¾ cu. in.) that must be babied in a vertical position.

But not any more! Now Logcell® Mercury Film Relays offer all the advantages of mercury-wetted relays . . . plus miniature size (0.06 cu. in.), operation in **any** mounting position, and shock and vibration resistance suitable for many airborne, marine and other mobile applications.

Whether you require the specific advantages of mercury relays for computer logic circuits, advanced instrumentation or high-speed control systems . . . or just need a tiny rugged relay that will last and last and last, consider Logcells:

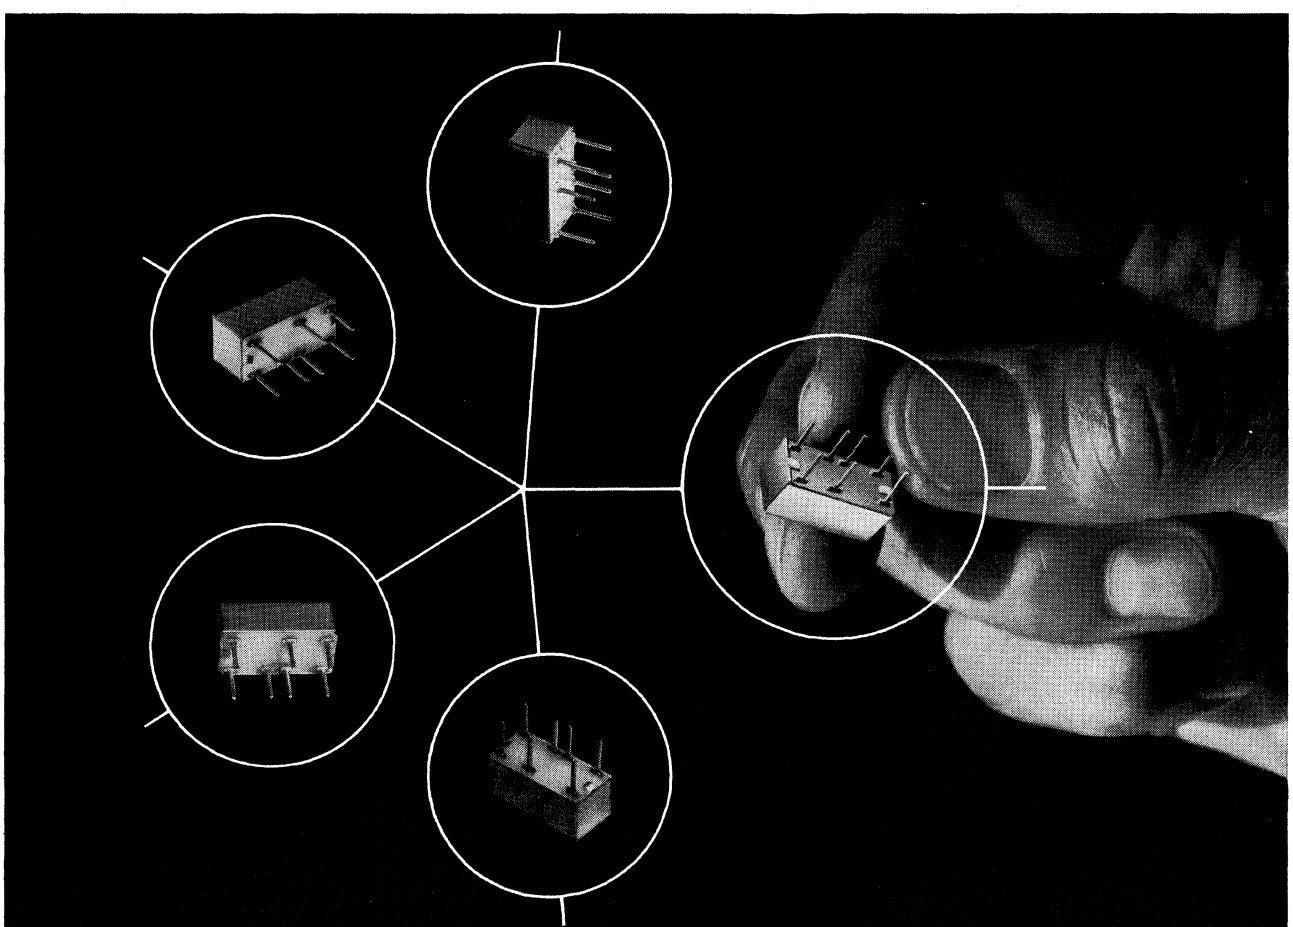
- Long life — units tested to billions of cycles
- No contact bounce
- Operation in any mounting plane
- Form "C" SPDT contacts
- Fast operating time — 2 ms
- No measurable AC contact noise
- Thermal noise less than 0.2 microvolt
- Switches dry circuits to 2 amps at 0-6 volts
- Inherent contact memory — requires no holding current (mono-stable models also available)

For complete information about revolutionary new Logcell Mercury Film Relays — and Logcell Mercury Film Switches — write Fifth Dimension Inc., Box 483, Princeton, New Jersey 08540 or call (609) 924-5990.

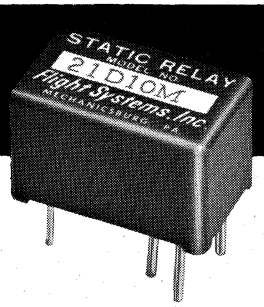
5-D FIFTH DIMENSION INC.

here at last . . .

a miniature mercury relay that operates IN ANY POSITION



The STATIC RELAY



- **FAST—50 Microseconds Actuating & Release Time**
- **VERSATILE—Over 50 Megohm Load-to-Control Isolation**
- **DEPENDABLE—No Moving Parts—Unlimited Life—No Contacts to Wear Out**
- **QUIET—No Bounce, No Arc, No Noise**
- **STRONG—Will Withstand The Most Severe Shock and Vibration**
- **SAFE—Will Operate in Explosive and Corrosive Atmospheres**
- **FLEXIBLE—Can Be Factory Modified to Most Any Switching Application**

NOTE: In Order to Perform THE NORMALLY CLOSED "CONTACT" FUNCTION ON DOUBLE THROW RELAYS, A BIAS VOLTAGE IS REQUIRED.

THESE CONTROL AND BIAS CURRENT REQUIREMENTS MAY BE SUBSTANTIALLY REDUCED ON RELAYS DESIGNED FOR HIGHER CONTROL AND BIAS VOLTAGES.

COMPARE THESE PERFORMANCE FEATURES

DC STATIC RELAY

DC LOAD VOLTAGE
DC CONTROL VOLTAGE
Load Voltage (min-max): 0 to 60 VDC
Load Types: resistive, inductive or capacitive (max. in-rush, 3.5 times max. load current rating for one second.)
Actuating Time: 50 microseconds
Release Time: 50 microseconds
Maximum Repetition Rate: 2000 operations per second
Closed Contact Resistance: 0.20 ohms max.
Open Contact Resistance: 10 megohms min.
Operating Temperature Range: —20°C to +75°C
Storage (non-operating) Temperature Range: —55°C to +100°C
NOTE: The DC STATIC RELAY is available in a full Mil-Spec Version in all models. The Mil-Spec version meets MIL-E-5400 Class IV. Contact the factory for price & delivery.

AC STATIC RELAY

AC LOAD VOLTAGE
DC CONTROL VOLTAGE
Load Voltage (min-max): 20-200 V PEAK, 1 Hz to 1 KHz
Load Types: resistive, reactive (p.f 0.5 leading or lagging)
Actuating Time: 100 microseconds
Release Time: less than ½ cycle at load frequency
Closed Contact Resistance: 0.20 ohms max.
Open Contact Resistance: 10 megohms min.
Operating Temperature Range: —20°C to +75°C
Storage (non-operating) Temperature Range: —55°C to +100°C

DRY CIRCUIT STATIC RELAY

For Instrumentation and Computation
- CLOSED "CONTACT DROP": 10 MV max @ 10 ma
- ACTUATING & RELEASE TIME: 50 microseconds
- REPETITION RATE: 3000 operations per second

PERFORMANCE SPECIFICATIONS

LOAD:	0 to 60 VDC Resistive 0-10 ma
CONTROL:	5 VDC @ 25 ma
OPEN CONTACT RESISTANCE:	500 Megohms

NO MOVING PARTS

PROTECT YOUR SOLID-STATE CIRCUITRY WITH THE FASTEST CIRCUIT BREAKERS MADE

FLIGHT SYSTEMS, INC. Announces the High Speed D. C. Static Circuit Breaker. The ultimate in circuit protection, the Static Circuit Breaker gives a clean, arc-free, bounceless break at 50 microseconds after current overload. The Static Circuit Breaker is insensitive to heat, shock, vibrations and will operate in any explosive or corrosive atmosphere. With its logic control of all functions and wide range of available modifications, the Static Circuit Breaker will adapt to most existing systems at very low cost. Since the current sensor is completely isolated from the switch portion of the Static Circuit Breaker, it is possible to monitor the current in a circuit different from the one being protected. The current sensor responds to D.C. or peak A.C. currents, regardless of polarity. Remote sensing is also possible. CONTACT YOUR LOCAL FLIGHT SYSTEMS, INC. REPRESENTATIVE OR THE FACTORY FOR COMPLETE SPECIFICATIONS AND PRICES.

NEED A SPECIAL VERSION OF THE STATIC RELAY? WE SPECIALIZE IN SERVICE! 2 to 3 WEEKS DELIVERY ON CUSTOM-BUILT RELAYS. WANT MORE INFORMATION? CALL (717) 697-0333 FOR DETAILS.

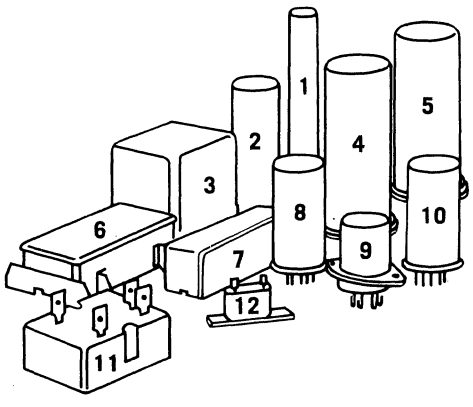
G-V

your complete source for timing and temperature control devices



ITEM NO.	PART	DESCRIPTION
1	C8 Series Electrical Thermostat	Hermetically sealed, adjustable, immersion type. Temp. range: −65° to +300°F. Rated 1000 W. Differential ±1°F. Vibration, 2000 Hz; Shock, 50g.
2	Series R, T&H Miniature Hermetically Sealed Thermal Time Delay Relay	Sealed, adjustable. Delays: 0.1-240 secs. Operating voltages: 6.3-230V, AC/DC. Meets MIL-R-19648. 7 Pin plug-in or flange mountings.
3	900064 Series General Purpose Solid State Time Delay	Solid state timing circuit. Delays: 0.1-30 secs. Operating temp.: −55°C to +85°C. Operating voltage: 18-32 V DC. Vibration: 2000 Hz; Shock, 50g.
4	Red Line (DT) Series. Industrial Timing Relay	Octal size. Steel sheathed heater. Dust-proof, tamper-proof. Delays: 0.5-180 secs. Operating voltages: 6.3-230 V, AC/DC.
5	Red Line (DM) Series. Instant Reset Thermal Timing Element	Provides instant reset during and after time delay when used with magnetic relay. Delays: 0.75-360 secs. Operating voltage: 6.3-230 V, AC/DC.
6	PT Series High Precision Thermal Timing Relay	±5% over −55°C to +125°C. Vibration, 20g, 2000 Hz; Shock, 50g, 11 ms. Delays: 3-180 secs. Heater Voltages: 6.3-115 V AC/DC.
7	JT Series Thermal Time Delay	Designed for printed circuit board mounting. Stainless internal construction. Dust-proof. Tamper-proof. Delays: 2-180 secs. Operating voltages: 6.3-230 V, AC/DC. Also available in Instant Reset version, Series JM.
8	Thermette Series. Commercial Thermal Timer	9 Pin miniature thermal time delay. Metal enclosed. Dust-proof. Delays: 5-180 secs. Operating voltage: 6.3-26V, and 115 V, AC/DC.
9	LT Series. Sub-miniature Thermal Time Delay	Flange mounting, hermetically sealed with seated height only 40% of standard miniature timers. Delays: 2-75 secs. Operating voltages: 6.3-115 V AC/DC. Vibration: 1000 Hz.
10	Air Flow Sensing Switch	Positive protection when air flow stops — operates alarm or automatic shut-off. Operates in any position. Heater voltages: 6.3, 26 and 115 V AC/DC.
11	Quick Connect Type Industrial Thermal Relay	Surface mounting, dust-proof. Time delays: 5 to 180 seconds. Temperature compensated. Heater voltages: 6.3, 26 and 115 AC/DC. Contacts SPST, NO or NC.
12	VE-2 Series Electrical Thermostat	Surface sensing thermostat. Preset or adjustable. Low differential. High degree contact force/motion. Vibration: 2000 Hz; Shock, 50g.

HERMETICALLY SEALED RELAYS

Unmatched for reliability, the light weight, thermal capabilities, and high resistance to shock of these hermetically sealed relays make them ideally suited for military and industrial electronic applications.

The reliability factor stems from exacting assembly (in a "White Room" where necessary), rigid quality control, well-equipped lab facilities and precise testing procedures. These manufacturing techniques, combined with GE's advanced engineering design, produce top-quality relays with dependable characteristics exceeding those of static switching devices.

Contact resistance is held to a minimum by silver contacts (with gold flash) combined with high contact forces.

All high-temperature components allow the operation of these relays in ambient temperatures between −65°C to +125°C.

Units are available with studs or brackets for mounting. The micro line has tab brackets for printed-circuit board application. Headers can be furnished with solder hooks, three-inch leads, plug-in (with socket availability information) and many special terminals. *Write for Bulletin GEA-6628*

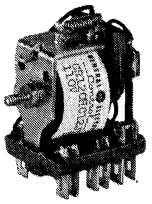
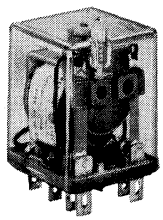
GENERAL ELECTRIC

RELAYS

CR120 TYPE H GENERAL-PURPOSE RELAYS



Open, stud-mounting relay



General purpose control socket plug-in form with manual operator

These compact, economical relays are ideal for the highly repetitive operations required in the output of electronic equipment and in small, built-in chassis-type control panels where space is at a premium.

FEATURES

- **Variety of Forms** — 5-amp, 10-amp relays and latch forms and current sensitive relays are available.
- **Mounting Flexibility** — forms available for front- or back-connection, plug-in or channel-mounting. Open relays either stud- or screw-mounted.
- **Small Size** — occupies only 3 to 5 cubic inches.
- **Not Position Sensitive** — relays will operate in any position.
- **Easy Connection** — combination push-on, solder-type terminals (.110 and .205 inch) available for front, back or plug-in connection.
- **Manual Operator, Indicating Light 110-250 V** — available on dust-covered, back-connected and plug-in forms permits check of relay operation.

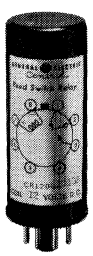
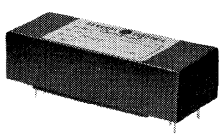
REED SWITCH RELAYS

CR120 TYPE G



Tube-type plug-in



Enclosed printed-circuit

CR120 Type G relays provide extremely long electrical and mechanical life.

They are available in a wide variety of mounting and connection arrangements including plug-in; printed-circuit; bracket-mount or stud-mount with solder-tab, wire-wrap or quick-connect terminals.

You can select relays which perform latching, timing, or current-sensing functions as well an ON-OFF switching.

Relays are magnetically shielded. High-fidelity contacts are hermetically sealed in an inert gas to prevent contamination.

Many standard factory modifications are available to meet wide application requirements.

Contact Characteristics

Maximum rating (a-c or d-c):
15 watts, resistive
1.0 ampere maximum
250 volts maximum (60 cycles rms)

Contact resistance (initial): 30-60 milliohms

Life expectancy (electrical):
20 million operations at maximum rating
100 million operations at ½ max rating
200 million operations at low load

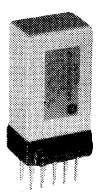
Resonant frequency (reed): 1080 cps

Operation

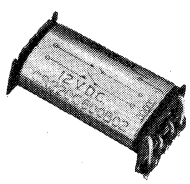
Nominal coil power:

SPDT 450 mw	SPDT latch 270 mw
DPDT 680 mw	DPDT latch 580 mw
3PDT 1000 mw	

CR220 TYPE G



Plug-in with socket attached



Open printed-circuit

CR220 Type G relays are small, compact units that are ideal for applications where fast operating time and low power are required such as for scanning, instrumentation, counting and data processing.

These small relays are available in a variety of compact housings suitable for multi-relay applications. You can choose forms for timing functions as well as ON-OFF switching. Mounting arrangements include printed-circuit, plug-in, bracket or channel-mounting. Bracket or channel-mounted forms are available with one- or two-level solder/push-on (0.110 x 0.032 in.) or wire-wrap terminals.

Relays are magnetically shielded, contacts are hermetically sealed. A wide variety of factory modifications are offered.

Contact Characteristics

Maximum rating (a-c or d-c):
15 watts, resistive
1.0 ampere maximum
250 volts maximum (60 cycles rms)

Contact resistance (initial): 30-60 milliohms

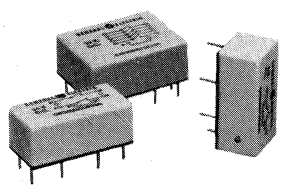
Life expectancy (electrical):
20 million operations at maximum rating
100 million operations at ½ max rating
200 million operations at low load

Resonant frequency (reed): 1100 cps

Operation

Nominal coil power:
Printed circuit: 1P 350 mw, 2P 600 mw, 3P 700 mw, 4P 900 mw, 5P 1200 mw, 6P 1600 mw
Plug-in & bracket: 1P 350 mw, 2P 600 mw, 3P 770 mw, 4P 1000 mw, 5P 1400 mw, 6P 2300 mw, 8P 2300 mw, 12P 4000 mw

CR120 TYPE M



CR120 Type M relays are miniature units that provide fast operating time, long life, and reliability in a minimum amount of space. You can get as many as five circuits in a relay only 0.88 x 1.12 inches. They are available as enclosed printed-circuit forms.

The relays perform ON-OFF switching, and are ideal for scanning, instrumentation, counting and data processing applications.

Enclosed forms assure mechanical protection and may be ordered with or without potting compound. They are not affected by magnetic fields created by adjacent relays. All contacts are hermetically sealed to give the highest possible fidelity. The miniature reed switches are manufactured and tested under clean-room conditions.

Forms with dual winding coils, special coil voltages, alternate pin length, and electrostatic shielding are also offered.

Contact Characteristics

Maximum rating (a-c or d-c):
4 watts, resistive
0.125 ampere maximum
120 volts maximum (60 cycles rms)

Contact resistance (initial): 200 milliohms

Life expectancy (electrical):
5 million operations at maximum rating
15 million operations at ½ max rating

Resonant frequency (reed): 2000 cps

Operation

Nominal coil Power:

1P 150 mw	4P & 5P 800 mw
2P & 3P 500 mw

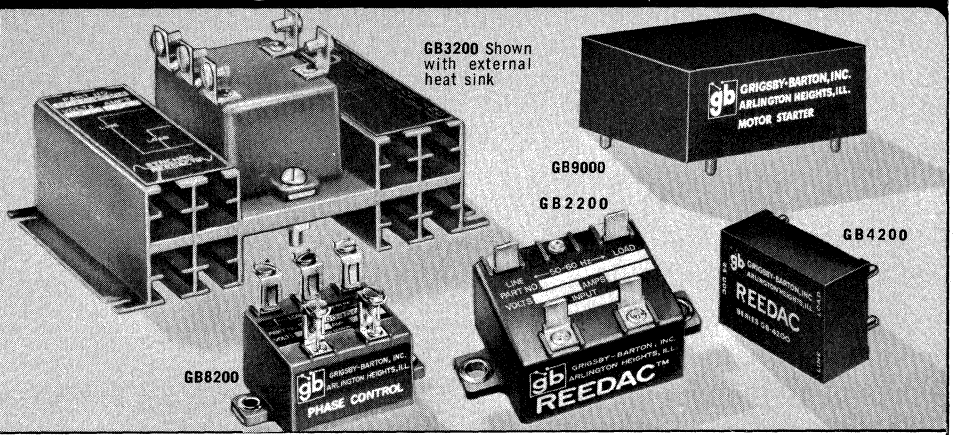
GENERAL ELECTRIC

REEDACS*/REED RELAYS/SYSTEMS/LOGIC CARDS
"Excellence through innovation!"

REEDACS

When you think TRIACS, *think* REEDACS*

Reedacs* incorporates solid state switching components based on Triac capabilities, and are specifically designed for inductive, tungsten or resistive loads rated up to 30 AMPS and to 220 VRMS. Inputs are switch closure, AC or DC pulse, DC or transistor logic. Inrush load is 10 times rating.



GB2200 STANDARD REEDAC — Designed for general heavy duty applications, it has random bounceless turn on and zero crossing turn off. Rated to 30 AMPS at 220 VRMS.

GB3200 SYNCHRONOUS REEDAC — Solid state device permits switching heavy inductive loads with no minimum load current meeting MIL-STD-826A. Rated to 30 AMPS at 220 VRMS.

GB4200 MINIATURE REEDAC — Rated at 2 AMPS, it is designed for PC board assembly. Compatible for logic card use.

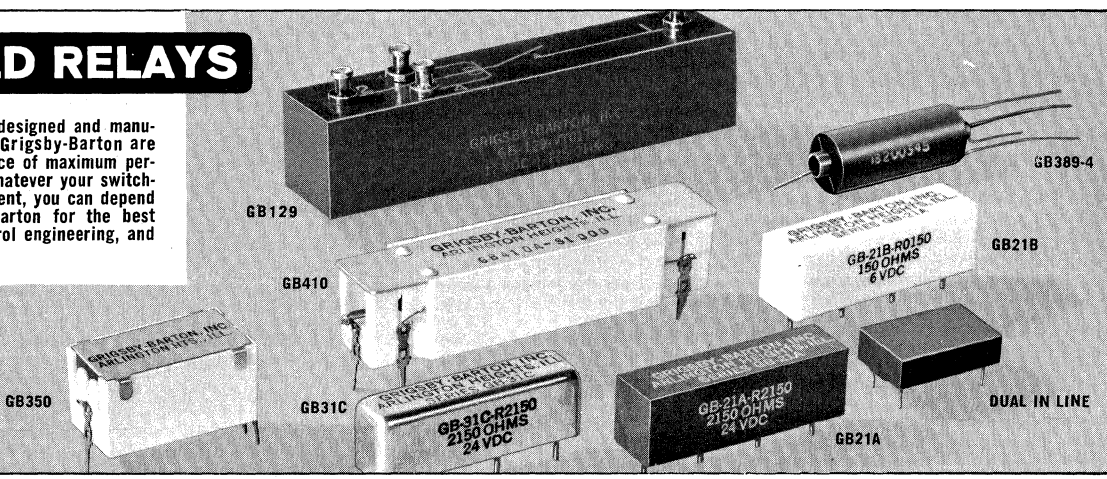
GB8200 PHASE CONTROL — Rated to 30 AMPS at 220 VRMS, the 8200 series is designed for high power factor inductive loads providing 1.5° symmetry.

GB9000 MOTOR STARTER — Solid state device is used as an off, forward-reverse motor switch. Rated up to 30 AMPS at 220 VRMS, it is designed for such applications as strip chart recorders, and machine and process motor controls.

*Patent Pending

REED RELAYS

Reed relays designed and manufactured by Grigsby-Barton are your assurance of maximum performance. Whatever your switching requirement, you can depend on Grigsby-Barton for the best quality, control engineering, and reliability.



DUAL IN LINE — Compatible with IC packages that have integrated circuits. Used as a logic interface in the computer field.

GB21A GB21B GB31C— Versatile single pole reed relays used widely in the communications industry. Available in forms A, B, C. Rated to 1KC switching.

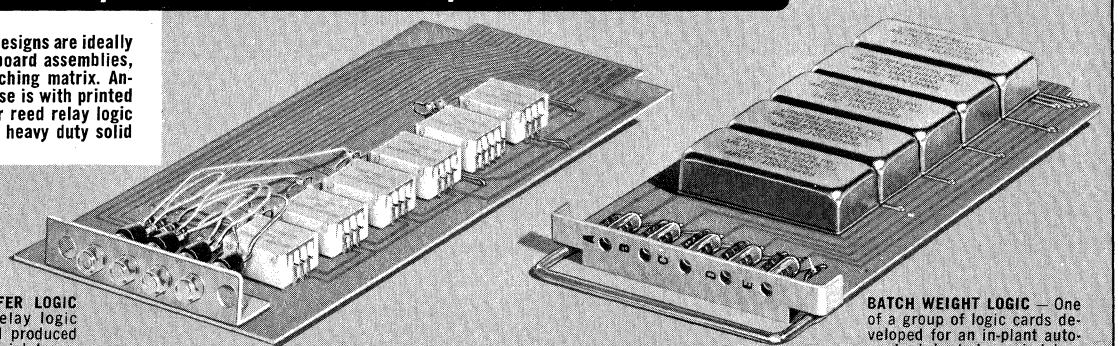
GB350 GB410—Low cost commercial reed relays are adaptable for standard PC board assembly.

GB129 — High voltage relay available in Forms A or B, and rated up to 25KV. Applications: Biomedical, power supplies, and test equipment.

GB389-4 — Newly designed low noise, ultra-high open circuit installation for use in analog computers. Employs both electrostatic and magnetic shielding in epoxy molded construction.

SYSTEMS / SUB SYSTEMS / LOGIC CARDS

Grigsby-Barton designs are ideally suited to logic board assemblies, such as in switching matrix. Another multiple use is with printed circuit cards for reed relay logic interfacing with heavy duty solid state controls.



MATERIAL TRANSFER LOGIC — Typical reed relay logic card designed and produced to control a material transfer system.

BATCH WEIGHT LOGIC — One of a group of logic cards developed for an in-plant automated batch weighing system.

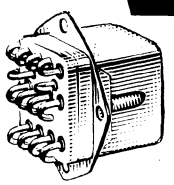
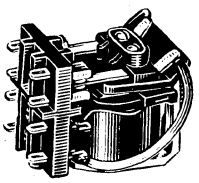
RELAYS AC DC



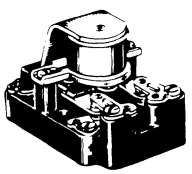
SERIES 4005 RELAY

The smallest, lightest commercially available 4 PDT relay that will switch a three-phase 10 amp. inductive or resistive load. Weighs only 2½ oz.; measures just 1.14" x 1.125" x 1.03". Rated 28 VDC or 115 or 115/200 V 400 cycles AC. Meets or exceeds MIL-R-6106-D with no restrictions on overload or rupture tests.



SERIES 1200 RELAY

Small, efficient relay rated at 10 amperes, 115 volts, non-inductive A.C. Heavy solder lug terminals molded in phenolic block, with barriers for over-surface insulation. Up to three pole, double throw contacts. Size: $1\frac{11}{16}$" x 1¼" x $1\frac{3}{8}$". Approx. wt. 1.9 oz.



SERIES 2300 POWER RELAY
